Foundations (8000 B.C.E. to 600 C.E.)

Major Developments

1) Locating world history in the environment and time
   A) Environment
      1) Interaction of geography and climate with the development of human society
      2) The environment as historical actor
      3) Demography: Major population changes resulting from human and environmental factors
   B) Time
      1) Periodization in early human history
      2) Nature and causes of changes associated with the time span
      3) Continuities and breaks within the time span
   C) Diverse Interpretations
      1) What are the issues involved in using "civilization" as an organizing principle in world history?
      2) What is the most common source of change: connection or diffusion versus independent invention?
      3) What was the effect of the Neolithic Revolution on gender relations?

2) Developing agriculture and technology
   A) Agricultural, pastoral, and foraging societies, and their demographic characteristics (Include Africa, the Americas, Europe, and Asia)
   B) Emergence of agriculture and technological change
   C) Nature of village settlements
   D) Impact of agriculture on the environment
   E) Introduction of key stages of metal use

3) Basic features of early civilizations in different environments: culture, state, and social structure.
   A) Mesopotamia
   B) Egypt
   C) Indus
   D) Shang
   E) Mesoamerica and Andean South America
   F) (Students should be able to compare two of the early civilizations above.)

4) Classical civilizations
   A) Major political developments in China, India, and the Mediterranean
   B) Social and gender structures
   C) Major trading patterns within and among Classical civilizations; contacts with adjacent regions
   D) Arts, sciences, and technology

5) Basic features of major world belief systems prior to 600 C.E. and where each belief system applied by 600 C.E.
   A) Polytheism
   B) Hinduism
   C) Judaism
   D) Confucianism
   E) Daoism
   F) Buddhism
   G) Christianity

6) Late Classical period (200 C.E.—600 C.E.)
   A) Collapse of empires (Han China, loss of western portion of the Roman Empire, Gupta)
   B) Movements of peoples (Huns, Germans)
   C) Interregional networks by 600 C.E.: Trade and religious diffusion

Major Comparisons and Snapshots

- Comparisons of the major religious and philosophical systems including some underlying similarities in cementing a social hierarchy, e.g., Hinduism contrasted with Confucianism
- Compare the role of women in different belief systems—Buddhism, Christianity, Confucianism, and Hinduism
- Understand how and why the collapse of empire was more severe in western Europe than it was in the eastern Mediterranean or in China
- Compare the caste system to other systems of social inequality devised by early and classical civilizations, including slavery
- Compare societies and cultures that include cities with pastoral and nomadic societies
- Compare the development of traditions and institutions in major civilizations, e.g., Indian, Chinese, and Greek/Roman
- Describe interregional trading systems, e.g., the Silk Roads
EXCERPTS FROM ANCIENT CIVILIZATIONS: WORLD VIEWS

Penitential Prayer to Every God, Sumer (Mesopotamia), 4th millenium BCE

“May the wrath of the heart of my god be pacified!
May the god who is unknown to me be pacified!
May the goddess who is unknown to me be pacified!
May the known and unknown god be pacified!
May the known and unknown goddess be pacified!
The sin which I have committed I know not.
The misdeed which I have committed I know not.
A gracious name may my god announce!
A gracious name may my goddess announce.
The lord, in the anger of his heart, hath looked upon me.
The god, in the wrath of his heart, hath visited me.
The goddess hath become angry with me, and hath grievously stricken me.
Unto my merciful god I turn, I make supplication.
I kiss the feet of my goddess and crawl before her.
How long, known and unknown god, until the anger of thy heart be pacified?
How long, known and unknown goddess, until they unfriendly heart be pacified?
Mankind is perverted and has no judgement.”

The Egyptian Negative Confession, excerpts from the Book of the Dead, Middle Kingdom, middle part of the 2nd Millenium BCE, prayer to be said when the deceased enters the Hall of the Goddesses of Truth to be judged by Osiris, god of death and resurrection.

1. I have not sinned against men.
2. I have not oppressed or wronged my kinsfolk.
3. I have not committed evil in the place of truth.
4. I have not known worthless men.
5. I have not committed acts of abomination.
6. I have not caused my name to appear for honors.
7. I have not domineered over slaves.
8. I have not thought scorn of the god.
9. I have not defrauded the poor man of his goods.
10. I have caused no man to suffer.
11. I have allowed no man to go hungry.
12. I have made no man weep.
13. I have slain no man.
14. I have not caused pain to the multitude.
15. I have not filched the offerings in the temples.
16. I have not cheated in measuring of grain.
17. I have not obstructed water when it should run.
18. I have not cut a cutting in a canal of rating water.
19. I have not repulsed the god in his manifestations. I am pure, I am pure, I am pure.

~ 2 ~
Excerpts from The Epic of Gilgamesh

First written down around 2000 BCE, the story of Gilgamesh is one of the oldest surviving works of world literature. Based on an actual historical figure, King Gilgamesh of Uruk (reigned c. 2700 BCE), it recounts Gilgamesh’s travels, adventures, and his search for immortality. In the process, it provides evidence of ancient Mesopotamian ideas about death, the place of humanity in the universe, and societal organization. The work survives in multiple copies, and it seems to have been a compilation of several hero narratives associated with Gilgamesh, his rival-turned-friend Enkidu, and the gods and men they encountered throughout their travels.

Focus Questions:

1. What does the document suggest about ancient Mesopotamian beliefs about the gods and their effects on men?
2. Is any of this document familiar to you from other sources?

I will proclaim to the world the deeds of Gilgamesh. This was the man to whom all things were known; this was the king who knew the countries of the world. He was wise, he saw mysteries and knew secret things, he brought us a tale of the days before the flood. He went on a long journey, was weary, worn-out with labour, returning he rested, he engraved on a stone the whole story.

When the gods created Gilgamesh they gave him a perfect body. Shamash the glorious sun endowed him with beauty, Adad the god of the storm endowed him with courage, the great gods made his beauty perfect, surpassing all others, terrifying like a great wild bull. Two thirds they made him god and one third man. Gilgamesh went abroad in the world, but he met with none who could withstand his arms till he came to Uruk. But the men of Uruk muttered in their houses, ’Gilgamesh sounds the tocsin for his amusement, his arrogance has no bounds by day or night. No son is left with his father, for Gilgamesh takes them all, even the children; yet the king would be a shepherd to his people. His lust leaves no virgin to her lover, neither the warrior’s daughter nor the wife of the noble; yet this is the shepherd of the city, wise, comely, and resolute.’

The gods heard their lament, the gods in heaven cried to the Lord of Uruk, to Anu the god of Uruk: ’A goddess made him, strong as a savage bull, none can withstand his arms. No son is left with his father, for Gilgamesh takes them all; and is this the king, the shepherd of his people? His lust leaves no virgin to her lover, neither the warrior’s daughter nor the wife of the noble.’ When Anu had heard their lamentation the gods cried to Aruru, the goddess of creation, ’You made him, O Aruru, now create his equal; let it be as like him as his own reflection, his second self, stormy heart for stormy heart. Let them contend together and leave Uruk in quiet.’

So the goddess conceived an image in her mind, and it was of the stuff of Anu of the firmament. She dipped her hands in water and pinched off clay, she let it fall in the wilderness, and noble Enkidu was created. There was virtue in him of the god of war, of Ninurta himself. His body was rough, he had long hair like a woman’s; it waved like the hair of Nisaba, the goddess of the corn. His body was covered
with matted hair like Samuquan's, the god of cattle.

In Uruk the bridal bed was made, fit for the goddess of love. The bride waited for the bridegroom, but in the night Gilgamesh got up and came to the house. Then Enkidu stepped out, he stood in the street and blocked the way. Mighty Gilgamesh came on and Enkidu met him at the gate. He put out his foot and prevented Gilgamesh from entering the house, so they grappled, holding each other like bulls. They broke the doorposts and the walls shook, they snorted like bulls locked together. They shattered the doorposts and the walls shook.

Gilgamesh bent his knee with his foot planted on the ground and with a turn Enkidu was thrown. Then immediately his fury died. When Enkidu was thrown he said to Gilgamesh, 'There is not another like you in the world. Ninsun, who is as strong as a wild ox in the byre, she was the mother who bore you, and now you are raised above all men, and Enlil has given you the kingship, for your strength surpasses the strength of men.' So Enkidu and Gilgamesh embraced and their friendship was sealed.

The Code of Hammurabi [18th Century BCE]

Of the several law codes surviving from the ancient Middle East, the most famous after the Hebrew Torah is the Code of Hammurabi, sixth king of the Amorite Dynasty of Old Babylon. It is best known from a beautifully engraved diorite stela now in the Louvre Museum which also depicts the king receiving the law from Shamash, the god of justice. This copy was made long after Hammurabi’s time, and it is clear that his was a long-lasting contribution to Mesopotamian civilization. It encodes many laws which had probably evolved over a long period of time, but is interesting to the general reader because of what it tells us about the attitudes and daily lives of the ancient Babylonians. In the following selection, most of the long prologue praising Hammurabi’s power and wisdom is omitted.

What do these laws tell us about attitudes toward slavery? What indication is there that some Babylonian women engaged in business? Clearly men had more rights than women in this society; but what laws can you identify that seem aimed at protecting certain rights of women? Which laws deviate from the egalitarian standard of "an eye for an eye and a tooth for a tooth?" What qualities does this text say a ruler should have to enable him to write new laws?

. . . Anu ad Bel called by name me, Hammurabi, the exalted prince, who feared God, to bring about the rule of righteousness in the land, to destroy the wicked and the evil-doers; so that the strong should not harm the weak; so that I should rule over the black-headed people like Shamash, and enlighten the land, to further the well-being of mankind. . . .

15: If any one take a male or female slave of the court, or a male or female slave of a freed man, outside the city gates [to escape], he shall be put to death.

16: If any one receive into his house a runaway male or female slave of the court, or of a freedman, and does not bring it out at the public proclamation of the [police], the master of the house shall be put to death.

53: If any one be too lazy to keep his dam in proper condition, and does not so keep it; if then the dam break and all the fields be flooded, then shall he in whose dam the break occurred be sold for money, and the money shall replace the [grain] which he has caused to be ruined.

~ 4 ~
54: If he be not able to replace the [grain], then he and his possessions shall be divided among the farmers whose corn he has flooded.

108: If a [woman wine-seller] does not accept [grain] according to gross weight in payment of drink, but takes money, and the price of the drink is less than that of the corn, she shall be convicted and thrown into the water. (1)

109: If conspirators meet in the house of a [woman wine-seller], and these conspirators are not captured and delivered to the court, the [wine-seller] shall be put to death.

110: If a "sister of a god"[nun] open a tavern, or enter a tavern to drink, then shall this woman be burned to death.

129: If a man's wife be surprised [having intercourse] with another man, both shall be tied and thrown into the water, but the husband may pardon his wife and the king his slaves.

130: If a man violate the wife (betrothed or child-wife) of another man, who has never known a man, and still lives in her father's house, and sleep with her and be surprised [caught], this man shall be put to death, but the wife is blameless.

131: If a man bring a charge against [his] wife, but she is not surprised with another man, she must take an oath and then may return to her house.

132: If the ”finger is pointed" at a man's wife about another man, but she is not caught sleeping with the other man, she shall jump into the river for [the sake of her] husband. (2)

138: If a man wishes to separate from his wife who has borne him no children, he shall give her the amount of her purchase money and the dowry which she brought from her father's house, and let her go.

141: If a man's wife, who lives in his house, wishes to leave it, plunges into debt [to go into business], tries to ruin her house, neglects her husband, and is judicially convicted: if her husband offer her release, she may go on her way, and he gives her nothing as a gift of release. If her husband does not wish to release her, and if he take another wife, she shall remain as servant in her husband's house.

142: If a woman quarrel with her husband, and say: "You are not congenial to me," the reasons for her prejudice must be presented. If she is guiltless, and there is no fault on her part, but he leaves and neglects her, then no guilt attaches to this woman, she shall take her dowry and go back to her father's house. (3)

143: If she is not innocent, but leaves her husband, and ruins her house, neglecting her husband, this woman shall be cast into the water.

195: If a son strike his father, his hands shall be [cut] off. (4)

196: If a [noble-]man put out the eye of another [noble-]man, his eye shall be put out. (5)

197: If he break another [noble-]man's bone, his bone shall be broken.

198: If he put out the eye of a [commoner], or break the bone of a [commoner], he shall pay one [silver] mina.

199: If he put out the eye of a man's slave, or break the bone of a man's slave, he shall pay one-half of its value.

200: If a man knock out the teeth of his equal, his teeth shall be knocked out.

201: If he knock out the teeth of a [commoner], he shall pay one-third of a [silver] mina.
In future time, through all coming generations, let the king, who may be in the land, observe the words of righteousness which I have written on my monument; let him not alter the law of the land which I have given, the edicts which I have enacted; my monument let him not mar. If such a ruler have wisdom, and be able to keep his land in order, he shall observe the words which I have written in this inscription; the rule, statute, and law of the land which I have given; the decisions which I have made will this inscription show him; let him rule his subjects accordingly, speak justice to them, give right decisions, root out the miscreants and criminals from this land, and grant prosperity to his subjects.

Hammurabi, the king of righteousness, on whom Shamash has conferred right (or law) am I. My words are well considered; my deeds are not equaled; to bring low those that were high; to humble the proud, to expel insolence.

Translated by L. W. King (1915), edited by Paul Brians.

### The Hebrew Creation Narrative (Genesis 1-3)

The mythologies of all the world’s people are designed to answer such questions as "Who are we as a people?" "How did we originate?" and Why do we die?"Created by Jews, adopted by Christians, the following creation stories have had an exceptionally long and complex history which can hardly be explored in this volume’s necessarily brief notes. It was about a century and a half ago that scholars first noted that Genesis seemed to contain two distinct creation stories, using different names for the creator (translated here as "God" and "the Lord"), with different emphases (physical vs. moral issues), and even a different order of creation (plants before humans, plants after humans). Scholars whose religious faith does not require them to believe otherwise have since generally agreed that the grand but starkly simple poetic opening of Genesis was the product of a much later period than the story of what traditionally is called "the Fall." The first narrative states themes typical of mature Judaism: the creator is the sole ruler of the universe, and even in the process of creation he has provided the foundation for the Jewish sabbath. Although it rejects the typical polytheism of Mesopotamian creation stories like the Enuma Elish, it shares certain features with them: land emerging out of an original watery chaos and waters above and beneath the earth. Although the universe is not created by God dividing up a goddess like Tiamat, other passages in the Hebrew Bible suggest that the metaphor of the slaying of a primordial sea-serpent named Leviathan lurked in Hebrew thought about creation, to be linked in some passages with the miraculous division of waters which enabled the captives to leave Egypt. Note how this account is deeply embedded in the use of language: speech calls the world into being, and speech blesses it. The concept of the divine word of God was to be a central concept of Judaism, later adopted by both Christianity and Islam.

Why do you suppose plants were so important that they are depicted as being created even before the sun? What kind of plants does the narrative particularly focus on?

### The Creation

In the beginning when God created the heavens and the earth, the earth was a formless void and darkness covered the face of the deep, while a wind from God swept over the face of the waters. Then God said, "Let there be light;" and there was light. And God saw that the light was good; and God separated the light from the darkness. God called the light Day, and the darkness he called Night. And there was evening and there was morning, the first day.

And God said, "Let there be a dome in the midst of the waters, and let it separate the waters from the waters." So God made the dome and
 Foundations (8000 B.C.E. to 600 C.E.)

separated the waters that were under the
dome from the waters that were above the
dome. (2) And it was so. God called the dome
Sky. And there was evening and there was
morning, the second day.

And God said, "Let the waters under the sky be
gathered together into one place, and let the
dry land appear." And it was so. God called the
dry land Earth, and the waters that were
gathered together he called Seas. And God saw
that it was good. Then God said, "Let the earth
put forth vegetation: plants yielding seed, and
fruit trees of every kind on earth that bear fruit
with the seed in it." And it was so. The earth
brought forth vegetation: plants yielding seed
of every kind, and trees of every kind bearing
fruit with the seed in it. And God saw that it was
good. And there was evening and there was
morning, the third day.

And God said, "Let there be lights in the dome
of the sky to separate the day from the night;
and let them be for signs and for seasons and
for days and years. (3) And let them be lights in
the dome of the sky to give light upon the
earth." And it was so. God made the two great
lights—the greater light to rule the day and the
lesser light to rule the night—and the stars. God
set them in the dome of the sky to give light
upon the earth, to rule over the day and over
the night, and to separate the light from the
darkness. And God saw that it was good. And
there was evening and there was morning, the
fourth day.

And God said, "Let the waters bring forth
swarms of living creatures and let birds fly
above the earth across the dome of the sky." So
God created the great sea monsters and every
living creature that moves, of every kind, with
which the waters swarm, and every winged bird
of every kind. And God saw that it was good.
God blessed them, saying, "Be fruitful and
multiply and fill the waters in the seas, and let
birds multiply on the earth." And there was
evening and there was morning, the fifth day.

And God said, "Let the earth bring forth living
creatures of every kind: cattle and creeping
things and wild animals of the earth of every
kind." And it was so. God made the wild animals
of the earth of every kind, and the cattle of
every kind, and everything that creeps upon the
ground of every kind, And God saw that it was
good. Then God said, "Let us make humankind
in our image, (4) according to our likeness; and
let them have dominion over the fish of the sea,
and over the birds of the air and over the cattle,
and over all the wild animals of the earth, and
over every creeping thing that creeps upon the
earth."

So God created humankind in his image,
in the image of God he created them;

male and female he created them. (5) God
blessed them, and God said to them, "Be fruitful
and multiply, and fill the earth and subdue it;
and have dominion over the fish of the sea and
over the birds of the air and over every living
thing that moves upon the earth." God said,
"See, I have given you every plant yielding seed
that is upon the face of all the earth, and every
tree with seed in its fruit; you shall have them
for food. And to every beast of the earth, and to
every bird of the air, and to everything that
creeps on the earth, everything that has the
breath of life, I have given every green plant for
food." (6) And it was so. God saw everything
that he had made, and indeed, it was very good.
And there was evening and there was morning,
the sixth day.

Thus the heavens and the earth were finished,
and all their multitude. And on the seventh day
God finished the work that he had done, and he
rested on the seventh day from all the work
that he had done. So God blessed the seventh
day and hallowed it, because on it God rested
from all the work that he had done in creation.
These are the generations of the heavens and
the earth when they were created.
Creation and Fall

If the first creation story answers the question "Where did we come from?" the second focuses on other questions, such as "Why do we have to die?" "Why must we work?" and "Why are women subordinate to men?"

What evidence can you find to support the theory that women's subordination to men is the result of an inherited curse? The tree of the knowledge of good and evil is often confused with the tree of life; can you distinguish between their apparent functions? In what way is the end of this story similar to the theme of the Epic of Gilgamesh?

In the day that the Lord God (7) made the earth and the heavens, when no plant of the field was yet in the earth and no herb of the field had yet sprung up—for the Lord God had not caused it to rain upon the earth, and there was no one to till the ground; but a stream would rise from the earth, and water the whole face of the ground—then the Lord God formed man from the dust of the ground, and breathed into his nostrils the breath of life, and the man became a living being. And the Lord God planted a garden in Eden, in the east; and there he put the man whom he had formed. Out of the ground the Lord God made to grow every tree that is pleasant to the sight and good for food, the tree of life also in the midst of the garden, and the tree of the knowledge of good and evil. A river flows out of Eden to water the garden, and from there it divides and becomes four branches. The name of the first is Pishon; it is the one that flows around the whole land of Havilah, where there is gold; and the gold of that land is good; bdellium and onyx stone are there. The name of the second river is Gihon; it is the one that flows around the whole land of Cush [The name of the third river is Tigris, which flows east of Assyria. And the fourth river is the Euphrates. (8)]

The Lord God took the man and put him in the garden of Eden to till it and keep it. And the Lord God commanded the man, -"You may freely eat of every tree of the garden; but of the tree of the knowledge of good and evil you shall not eat, for in the day that you eat of it you shall die." (9)

Then the Lord God said, "It is not good that the man should be alone; I will make him a helper as his partner." So out of the ground the Lord God formed every animal of the field and every bird of the air, and brought them to the man to see what he would call them; and whatever the man called every living creature, that was its name. The man gave names to all cattle, and to the birds of the air, and to every animal of the field; but for the man there was not found a helper as his partner. So the Lord God caused a deep sleep to fall upon the man, and he slept; then he took one of his ribs and closed up its place. And the rib that the Lord God had taken from the man he made into a woman and brought her to the man. Then the man said, "This at last is bone of my bones and flesh of my flesh; this one shall be called Woman, for out of Man this one was taken."

Therefore a man leaves his father and his mother and clings to his wife, and they become one flesh. (10) And the man and his wife were both naked, and were not ashamed. (11)

Now the serpent was more crafty than any other wild animal that the Lord God had made. (12) He said to the woman, "Did God say, 'You shall not eat from any tree in the garden?'" The woman said to the serpent, "We may eat of the fruit of the trees in the garden; but God said, 'You shall not eat of the fruit of the tree that is in the middle of the garden, nor shall you touch it, or you shall die.' But the serpent said to the woman, 'You will not die; for God knows that when you eat of it your eyes will be opened, and you will be like God, knowing good and evil.' (13) So when the woman saw that the tree was good for food, and that it was a delight to the eyes, and that the tree was to be desired to make one wise, she took of its fruit and ate; and she also gave some to her husband, who
was with her, and he ate. (14) Then the eyes of both were opened, and they knew that they were naked; and they sewed fig leaves together and made loincloths for themselves.

They heard the sound of the Lord God walking in the garden at the time of the evening breeze, and the man and his wife hid themselves from the presence of the Lord God among the trees of the garden. But the Lord God called to the man, and said to him, "Where are you?" He said, "I heard the sound of you in the garden, and I was afraid, because I was naked; and I hid myself." He said, "Who told you that you were naked? Have you eaten from the tree of which I commanded you not to eat?" The man said, "The woman whom you gave to be with me, she gave me fruit from the tree, and I ate." Then the Lord God said to the woman, "What is this that you have done?" The woman said, "The serpent tricked me, and I ate." The Lord God said to the serpent, "Because you have done this, cursed are you among all animals and among all wild creatures; upon your belly you shall go, and dust you shall eat all the days of your life. (15) I will put enmity between you and the woman, and between your offspring and hers; he will strike your head, and you will strike his heel." (16) To the woman he said, "I will greatly increase your pangs in childbearing; in pain you shall bring forth children, yet your desire shall be for your husband, and he shall rule over you."

And to the man he said, "Because you have listened to the voice of your wife, and have eaten of the tree about which I commanded you, 'You shall not eat of it,' cursed is the ground because of you; in toil you shall eat of it all the days of your life; thorns and thistles it shall bring forth for you; and you shall eat the plants of the field. By the sweat of your face you shall eat bread until you return to the ground, for out of it you were taken; you are dust, and to dust you shall return."

The man named his wife Eve, because she was the mother of all living. And the Lord God made garments of skins for the man and for his wife, and clothed them.

Then the Lord God said, "See, the man has become like one of us, knowing good and evil; and now, he might reach out his hand and take also from the tree of life, and eat, and live forever"- therefore the Lord God sent him forth from the garden of Eden, to till the ground from which he was taken. He drove out the man; and at the east of the garden of Eden he placed the cherubim, and a sword flaming and turning to guard the way to the tree of life.

(1) Many modern interpreters see these waters as the same primordial watery chaos of other Middle Eastern creation myths; but traditionalists have usually asserted that the water is created out of the "void and darkness," a belief known by its Latin name of creation ex nihilo (out of nothing).

(2) Rain seemed to provide to many ancient peoples evidence that a body of water existed above the sky.

(3) Even the heavenly bodies are seen as serving human needs, by providing the basis for a calendar.

(4) A wide variety of scholarly opinion has been expressed about this use of the plural in God's speech, unique to Genesis. Some think it reflects an earlier polytheism (an argument rejected by most scholars because of the otherwise insistent monotheism of the narrative), as an exalted "royal" use of the pronoun (but no other examples are known from this culture), as addressing the angels (previously unmentioned in the story), or even--in the Middle Ages--as the members of the Trinity speaking among themselves (a fanciful
interpretation flatly rejected by Jews as incorporating a uniquely Christian belief. No general agreement exists on this question.

(5) Some scholars maintain that God must be thought of here as having a human form; others argue that the resemblance is purely spiritual in nature. Contemporary feminists have pointed out that both sexes are created in God's image.

(6) The idea of absolute dominion over an abundantly productive earth must have been highly appealing to people struggling to scratch a living from the soil of ancient Israel, prey to attacks by wild animals. The image of the earth as a rich garden would have indeed seemed a paradise lost. Some interpret this passage as idealizing vegetarianism.

(7) Up to this point the original Hebrew text has called God Elahim; but in the subsequent passages, he is given the title now usually translated as Yahweh. Because this latter name was considered too sacred to utter in later Jewish tradition, various substitutes were devised. Here "Lord " capitalized indicates occurrences of the sacred name.

(8) The naming of the Tigris and Euphrates as rivers flowing from Eden locates the original Paradise somewhere in Mesopotamia, which is also the region to which the Hebrews traced their ancestry.

(9) The paradox that this prophecy is not fulfilled literally has led to many ingenious explanations, including the one dominant for centuries in Christianity: that by eating the fruit Adam and Eve fall from the state of divine grace into the death-like state of sin.

(10) Patriarchal interpretations of this story stress that the woman is a secondary creation, brought into being to serve the man; but some feminists have argued that the texts stresses the unity of the two.

(11) Jews shunned nudity far more than most of their neighbors, but seemed to view the sense of shame as a curse.

(12) Later interpretations, both Jewish and Christian, identify the serpent with Satan, but the latter is a figure whom many scholars believe to have been introduced into Judaism at a comparatively late date.

(13) Again, the fact that the serpent's prophecy comes true while God's does not has led to much speculation. Whatever interpretation is followed, guilt and shame are the result of the Fall. Traditional Christianity gave the incident a sexual interpretation, often arguing that eroticism itself was a shameful by-product, whereas Jews seldom accepted this view. The doctrine of an inherited curse called "original sin" is also alien to mainstream Judaism, but is the main focus of Christian commentary on this passage.

(14) The kind of fruit is not specified. It was often identified as a fig in the early Middle Ages; but an irresistible pun eventually settled the matter for Christians: malum in Latin meant both "apple" and "evil."

(15) Presumably snakes originally had legs like other animals, but lost them because of this curse.

(16) Christian artists made much use of this passage to create images of the Virgin Mary crushing a serpent beneath her heel.

The Jewish Bible is divided into three parts: the Law (Torah), the Prophets, and a miscellaneous group of works known as the Writings, which correspond roughly to the Christian Old Testament. (The Catholic text contains passages and works not admitted into the Jewish Bible.) Of these three, the Law is in some ways the most important, for it is the law that defines for Jews what God expects of them and provides a means ensure win his favor and protection. The Law is viewed by pious Jews as a special blessing granted God's chosen people to show them the path to virtue while other peoples languish in ignorant sin. Many people assume that the ethics of Judaism and Christianity are based primarily on the Ten
Commandments, but in fact Jews are called to observe some six hundred commandments and Christians usually do not observe two of the ten, having rejected the Jewish Sabbath for the Lord’s Day early in their history and freely violating the commandment against graven images by sculpting innumerable images of Christ as the divine savior. The first ten are set apart, and repeated, in the text, and are obviously considered as important; but in some ways the subsequent laws are more revealing. Almost all peoples have outlawed murder, theft, and adultery, however they defined them; but the other Jewish laws reflect the attitudes and customs of the people who followed them. An orthodox Jew is expected to observe strictly all of the laws (except, of course those relating to ritual sacrifice which were suspended after the destruction of the temple in Jerusalem in 70 CE). Unlike in Christianity, belief is not the central issue—obedience is. The delivery of the law is depicted as the aftermath of generations of slavery in Egypt followed by forty years of wandering in the wilderness of the Sinai Peninsula.

What provision in the law might discourage many Hebrew slaves from seeking their freedom? What laws enforce respect for parents? In what ways are the laws on slaves different from those of Hammurabi’s Code? What does the law have to say about the proper treatment of enemies and aliens?

Then God spoke all these words: I am the LORD your God, who brought you out of the land of Egypt, out of the house of slavery; you shall have no other gods before me. (1) You shall not make for yourself an idol, whether in the form of anything that is in heaven above, or that is on the earth beneath, or that is in the water under the earth. (2) You shall not bow down to them or worship them; for I the LORD your God am a jealous God, punishing children for the iniquity of parents, to the third and the fourth generation of those who reject me, but showing steadfast love to the thousandth generation of those who love me and keep my commandments. You shall not make wrongful use of the name of the LORD your God, for the LORD will not acquit anyone who misuses his name. (3) Remember the sabbath day, and keep it holy. Six days you shall labor and do all your work. But the seventh day is a sabbath to the LORD your God; you shall not do any work— you, your son or your daughter, your male or female slave, your livestock, or the alien resident in your towns. For in six days the LORD made heaven and earth, the sea, and all that is in them, but rested the seventh day; therefore the LORD blessed the sabbath day and consecrated it. (4) Honor your father and your mother, so that your days may be long in the land that the LORD your God is giving you.

You shall not murder.

You shall not commit adultery.

You shall not steal.

You shall not bear false witness against your neighbor.

You shall not covet your neighbor’s house; you shall not covet your neighbor’s wife, or male or female slave, or ox, or donkey, or anything that belongs to your neighbor. (5) When all the people witnessed the thunder and lightning, the sound of the trumpet, and the mountain smoking, they were afraid and trembled and stood at a distance and said to Moses, You speak to us, and we will listen; but do not let God speak to us, or we will die. Moses said to the people, Do not be afraid; for God has come only to test you and to put the fear of him upon you so that you do not sin.
Then the people stood at a distance, while Moses drew near to the thick darkness where God was.

The LORD said to Moses: Thus you shall say to the Israelites: You have seen for yourselves that I spoke with you from heaven. You shall not make gods of silver alongside me, nor shall you make for yourselves gods of gold. You need make for me only an altar of earth and sacrifice on it your burnt offerings and your offerings of well-being, your sheep and your oxen; in every place where I cause my name to be remembered I will come to you and bless you. But if you make for me an altar of stone, do not build it of hewn stones; if you use a chisel upon it you profane it. You shall not go up by steps to my altar, so that your nakedness may not be exposed on it. (6)

These are the ordinances that you shall set before them: When you buy a male Hebrew slave, he shall serve six years, but in the seventh he shall go out a free person, without debt. (7) If he comes in single, he shall go out single; if he comes in married, then his wife shall go out with him. If his master gives him a wife and she bears him sons or daughters, the wife and her children shall be her master’s and he shall go out alone. But if the slave declares, I love my master, my wife, and my children; I will not go out a free person, then his master shall bring him before God. He shall be brought to the door or the doorpost; and his master shall pierce his ear with an awl; (8)

When a man sells his daughter as a slave, she shall not go out as the male slaves do. If she does not please her master, who designated her for himself, then he shall let her be redeemed; (10) he shall have no right to sell her to a foreign people since he has dealt unfairly with her. If he designates her for his son, he shall deal with her as with a daughter. If he takes another wife to himself, he shall not diminish the food, clothing, or marital rights of the first wife. (11) And if he does not do these things for her, she shall go out without debt, without payment of money.

Whoever strikes a person mortally shall be put to death. If it was not premeditated, but came about by an act of God, then I will appoint for you a place to which the killer may flee. (12) But if someone willfully attacks and kills another by treachery, you shall take the killer from my altar for execution.

Whoever strikes father or mother shall be put to death.

Whoever kidnaps a person, whether that person has been sold or is still held in possession, shall be put to death.

Whoever curses father or mother shall be put to death.

When individuals quarrel and one strikes the other with a stone or fist so that the injured party, though not dead, is confined to bed, but recovers and walks around outside with the help of a staff, then the assailant shall be free of liability, except to pay for the loss of time, and to arrange for full recovery.

When a slaveowner strikes a male or female slave with a rod and the slave dies immediately, the owner shall be punished. But if the slave survives a day or two, there is no punishment; for the slave is the owner’s property.

When people who are fighting injure a pregnant woman so that there is a miscarriage, and yet no further harm follows, the one responsible shall be fined what the woman’s husband demands, paying as much as the judges determine. If any harm follows, then you shall give life for life, eye for eye, tooth for tooth, hand for hand, foot for foot, burn for burn, wound for wound, stripe for stripe. (13)

When a slave owner strikes the eye of a male or female slave, destroying it, the owner shall let
the slave go, a free person, to compensate for the eye. If the owner knocks out a tooth of a male or female slave, the slave shall be let go, a free person, to compensate for the tooth. . . .

When a man seduces a virgin who is not engaged to be married, and lies with her, he shall give the bride-price for her and make her his wife. But if her father refuses to give her to him, he shall pay an amount equal to the bride-price for virgins.

You shall not permit a female sorcerer to live. (14)

Whoever lies with an animal shall be put to death.

Whoever sacrifices to any god, other than the Lord alone, shall be devoted to destruction.

You shall not wrong or oppress a resident alien, for you were aliens in the land of Egypt. You shall not abuse any widow or orphan. If you do abuse them, when they cry out to me, I will surely heed their cry; my wrath will burn, and I will kill you with the sword, and your wives shall become widows and your children orphans. (16)

If you lend money to my people, to the poor among you, you shall not deal with them as a creditor; you shall not exact interest from them. (17)

If you take your neighbor’s cloak in pawn, you shall restore it before the sun goes down; for it may be your neighbor’s only clothing to use as cover; in what else shall that person sleep? And if your neighbor cries out to me, I will listen, for I am compassionate.

You shall not revile God, or curse a leader of your people.

You shall not delay to make offerings from the fullness of your harvest and from the outflow of your presses. The firstborn of your sons you shall give to me. You shall do the same with your oxen and with your sheep: seven days it shall remain with its mother; on the eighth day you shall give it to me. (18)

You shall be people consecrated to me; therefore you shall not eat any meat that is mangled by beasts in the field; you shall throw it to the dogs. (19)

You shall not spread a false report. You shall not join hands with the wicked to act as a malicious witness. You shall not follow a majority in wrongdoing; when you bear witness in a lawsuit, you shall not side with the majority so as to pervert justice; nor shall you be partial to the poor in a lawsuit. (20)

When you come upon your enemy’s ox or donkey going astray, you shall bring it back.

When you see the donkey of one who hates you lying under its burden and you would hold back from setting it free, you must help to set it free.

You shall not pervert the justice due to your poor in their lawsuits. Keep far from a false charge, and do not kill the innocent and those in the right, for I will not acquit the guilty. You shall take no bribe, for a bribe blinds the officials, and subverts the cause of those who are in the right.

You shall not oppress a resident alien; you know the heart of an alien, for you were aliens in the land of Egypt.

(1) Although later Judaism insists that only one god exists, some scholars have argued that this wording reflects a time when Jews acknowledged the existence of other gods but forbade their worship.

(2) This has usually been broadly interpreted by orthodox Jews as a prohibition against all figurative art, establishing a pattern also followed by orthodox Muslims. Although at some periods Jews have decorated buildings and manuscripts with images from the Bible, their general avoidance of divine sculpture led to a historic misunderstanding when the Romans invaded the sanctuary of the Temple in Jerusalem and, finding it empty, announced to the world that the Jews were atheists. More strongly than circumcision, the
Foundations (8000 B.C.E. to 600 C.E.)

rejection of idols set the Jews apart from the people who surrounded them.

3) The desire to avoid misusing God's name led eventually to the custom of not pronouncing it or spelling it out fully. Some English-speaking Jews even today follow this pattern by writing the deity's name as G*d.

4) The Sabbath was a unique Jewish invention, which attracted some criticism from outsiders as an excuse for laziness, but most modern people are probably grateful to it as the ultimate origin of the custom of the weekend.

5) Sometimes interpreted as prohibiting mere envy, this may have been more narrowly intended at those who would plot to seize what was not theirs.

6) Steps might cause a parting of the front of the skirt which men wore.

7) Following the pattern of six days of labor followed by a day of rest.

8) A mark of enslavement, comparable to branding. and he shall serve him for life.

9) Be freed.

10) Bought back by her parents. It is assumed that she has been bought as a wife or concubine.

11) Compare the prohibition in the Qur'an against treating multiple wives unequally.

12) The concept of places of refuge or sanctuary was also held in ancient Greece, and to some extent in Medieval Europe. A fleeing criminal could take refuge at an altar or other sacred spot and demand protection from justice. Here the law provides an exception for what is now called involuntary manslaughter.

13) Note that the death of a fetus is treated as much less serious than last ing injury to the mother. The "eye for an eye" pattern used here and elsewhere was moderated later in Jewish practice by allowing money fines to substitute for mutilation; but in various periods both Christians and Muslims have also used the severing of members as punishment.

14) Used as the classic justification for witch-burning by Christians.

15) I.e., has intercourse with. Many of the laws prohibit various sexual activities.

16) This unequivocal demand for mercy and hospitality to foreigners is repeated elsewhere in the Jewish Bible, and becomes a hallmark of the prophetic era.

17) This prohibition against charging interest to coreligionists was also maintained by the Medieval Catholic Church; but the capital necessary for trade was provided by all owing Jews, who could not charge each other interest, to be lenders to Christians. Christians maneuvered Jews into this position and made it impossible for the moneylenders to enforce repayment in court (despite the fantasy depicted in Shakespeare's Merchant of Venice). They then bitterly reproached them for their greed. One of the crucial foundation stones for modern capitalism was laid when Protestants accepted the legitimacy of interest.

18) To the Hebrews, this dedication of the first-born to God (as priests) reflected the tradition that their first-born had been spared when God killed those of the Egyptians. Christian theologians later saw in it an anticipation of the sacrificial offering of Jesus as God's son in the crucifixion.

19) Muslims are also prohibited from eating carrion.

20) This passage spells out in more detail what is meant by the commandment against bearing false witness.

The Mandate of Heaven: Selections from the Shu Jing

~ 14 ~
[Andrea Introduction] The Shu Jing, or Classic of History, is the oldest complete work among what are known as the five Confucian classics. The five classics were canonized as the basic elements of the Confucian educational system during the second century BCE., when the books were reconstructed by order of several emperors of the Han Dynasty (202 BCE–220 CE). Although Han scholars probably refashioned elements of the Shu Jing, the work was already ancient in Confucius’s day, and the book, as we have received it, is probably essentially the same text that Confucius (551-479 BCE) knew, studied, and accepted as an authentic record of Chinese civilization.

Despite its title, the Classic of History is not a work of historical interpretation or narration. Rather, it is a collection of documents spanning some seventeen hundred years of Chinese history and legend, from 2357 to 631 BCE. Many of the documents, however, are the spurious creations of much later period fore reflect the attitudes of those subsequent eras.

The document that appears here was composed in the age of Zhou but purports to be the advice given by the faithful Yi Yin to King Tai Jia, second of the Shang kings. According to the story behind this document, when the first Shang king, Cheng Tang, died around 1753, his chief minister Yi Yin took it upon himself to instruct the new young king in the ways and duties of kingship and the workings of the Mandate of Heaven.

The Mandate of Heaven was a political-social philosophy that served as the basic Chinese explanation for the success and failure of monarchs and states down to the end of the empire in 1912 CE. Whenever a dynasty fell, the reason invariably offered by China's sages was that it had lost the moral right to rule which is given by Heaven alone. In this context heaven did not mean a personal god but a cosmic all-pervading power. Most historians today agree that the theory the Mandate of Heaven was an invention of the Zhou to justify their overthrow of the Shang. The king, after all, was the father of his people, and paternal authority was the basic cement of Chinese society from earliest times. Rebellion against a father, therefore, needed extraordinary justification.

In the twelfth month of the first year... Yi Yin sacrificed to the former king, and presented the heir-king reverently before the shrine of his grandfather. All the princes from the domain of the nobles and the royal domain were present; all the officers also, each continuing to discharge his particular duties, were there to receive the orders of the chief minister. Yi Yin then clearly described the complete virtue of the Meritorious Ancestor for the instruction of the young king.

He said, "Oh! of old the former kings of Xia cultivated earnestly their virtue, and then there were no calamities from Heaven. The spirits of the hills and rivers alike were all in tranquility; and the birds and beasts, the fishes and tortoises, all enjoyed their existence according to their nature. But their descendant did not follow their example, and great Heaven sent down calamities, employing the agency of our ruler- who was in possession of its favoring appointment. The attack on Xia may be traced to the orgies in Ming Tiao... Our king of Shang brilliantly displayed his sagely prowess; for oppression he substituted his generous gentleness; and the millions of the people gave him their hearts. Now your Majesty is entering on the inheritance of his virtue; -- all depends on how you commence your reign. To set up love, it is For you to love your relations; to set up respect, it is for you to respect your elders. The commencement is in the family and the state....

"Oh! the former king began with careful attention to the bonds that hold men together. He listened to expostulation, and did not seek
to resist it; he conformed to the wisdom of the ancients; occupying the highest position, he displayed intelligence; occupying an inferior position, he displayed his loyalty; he allowed the good qualities of the men whom he employed and did not seek that they should have every talent.

"He extensively sought out wise men, who should be helpful to you, his descendant and heir. He laid down the punishments for officers, and warned those who were in authority, saying, 'If you dare to have constant dancing in your palaces, and drunken singing in your chambers, -- that is called the fashion of sorcerers; if you dare to see your hearts on wealth and women, and abandon yourselves to wandering about or to the chase, -- that is called the fashion of extravagance; if you dare to despise sage words, to resist the loyal and upright, to put far from you the aged and virtuous, and to seek the company of...youths, - - that is called the fashion of disorder. Now if a high noble or officer be addicted to one of these three fashions with their ten evil ways, his family will surely come to ruin; if the prince of a country be so addicted, his state will surely come to ruin. The minister who does not try to correct such vices in the sovereign shall be punished with branding.'...

"Oh! do you, who now succeed to the throne, revere these warnings in your person. Think of them! -- sacred counsels of vast importance, admirable words forcibly set forth! The ways of Heaven are not invariable: -- on the good-doer it sends down all blessings, and on the evil-doer it sends down all miseries. Do you but be virtuous, be it in small things or in large, and the myriad regions will have cause for rejoicing. If you not be virtuous, be it in large things or in small, it will bring the ruin of your ancestral temple."

**QUESTIONS FOR ANALYSIS**

1. How does a monarch lose the Mandate of Heaven, and what are the consequences of this loss?
2. What evidence can you find here of the Chinese cult of reverence for the ancestors?
3. What evidence can you find to support the conclusion that classical Chinese political philosophy perceived the state as an extended family?
4. What sort of harmony does the monarch maintain?
5. Would Yi Yin accept the notion that there can be a distinction between ruler’s private morality and public policies?
6. What does the theory of the Mandate of Heaven suggest about the nature of Chinese society?
7. American politicians often promise "innovative answers to the challenge of tomorrow." What would Yi Yin think about such an approach to statecraft? What would Yi Yin think about modern politicians who attempt to appear youthful? What would he chink of popular opinion polls?

---

**Han Fei-tzu (d. 233 BCE): Legalist Views on Good Government**

_The Confucian ideal of "government through virtue" and the tendency of Confucianists to seek guidance in the rule of former kings was strongly criticized by another school of thought: the Legalists or School of Law. According to the Legalists, neither the wisdom of ancient kings nor an ethical code would make a state strong. Instead "good" and "bad" were defined by whatever the self-interest of the ruler demanded. A system of harsh punishments and rewards, regulated through laws and enforced without exceptions, should guarantee good behavior within the state. The Legalists considered military service and agriculture as the only occupations beneficial to the welfare of the state and discouraged all scholarship._

_The state of Qin in Western China was the first to adopt Legalist doctrines. The Qin were so successful that by 221 BCE they had conquered the other Chinese states and unified the empire after centuries of war. The following paragraph was taken from Han Fei-tzu, The "[book of] Master Han Fei," chapter 50._

~ 16 ~
Han Fei-tzu had studied under the Confucian scholar Hsun-tzu and became the major theorist of the Legalist school. Confucian scholars vigorously denounced his teachings in all subsequent generations; yet his harsh pragmatism, often compared to that of Machiavelli and Kautiya, more accurately explains the actions of many rulers than does the idealistic Confucian model.

What attitude does Han Fei express toward the common people? What kinds of stern measures does he suggest should be enacted for their own good?

When a sage governs a state, he does not rely on the people to do good out of their own will. Instead, he sees to it that they are not allowed to do what is not good. If he relies on people to do good out of their own will, within the borders of the state not even ten persons can be counted on [to do good]. Yet, if one sees to it that they are not allowed to do what is not good, the whole state can be brought to uniform order. Whoever rules should consider the majority and set the few aside: He should not devote his attention to virtue, but to law.

If it were necessary to rely on a shaft that had grown perfectly straight, within a hundred generations there would be no arrow. If it were necessary to rely on wood that had grown perfectly round, within a thousand generations there would be no cart wheel. If a naturally straight shaft or naturally round wood cannot be found within a hundred generations, how is it that in all generations carriages are used and birds shot? Because tools are used to straighten and bend. But even if one did not rely on tools and still got a naturally straight shaft or a piece of naturally round wood, a skillful craftsman would not value this. Why? Because it is not just one person that needs to ride and not just one arrow that needs to be shot. Even if without relying on rewards and punishments there would be someone doing good out of his own will, an enlightened ruler would not value this. Why? Because a state’s law must not be neglected, and not just one person needs to be governed. Therefore, the skilled ruler does not go after such unpredictable goodness, but walks the path of certain success. . . .

Praising the beauty of Ma Ch’iang or Hsi shih (1) does not improve your own face. But using oil to moisten it, and powder and paint will make it twice as attractive.

Praising the benevolence and righteousness of former kings does not improve your own rule. But making laws and regulations clear and rewards and punishments certain, is like applying oil, powder and paint to a state.

An enlightened ruler holds up facts and discards all that is without practical value. Therefore he does not pursue righteousness and benevolence, and he does not listen to the words of scholars. These days, whoever does not understand how to govern will invariably say: "Win the hearts of the people." If winning the hearts of the people is all that one needs in order to govern, a Yi Yin or a Kuan Chung (2) would be useless. Listening to the people would be enough. But the wisdom of the people is useless: They have the minds of little infants! If an infant’s head is not shaved, its sores will spread, and if its boil is not opened, it will become sicker. Yet while its head is being shaved and its boil opened, one person has to hold it tight so that the caring mother can perform the operation, and it screams and wails without end. Infants and children don’t understand that the small pain they have to suffer now will bring great benefit later.

Likewise, if the people are forced to till their land and open pastures in order to increase their future supplies, they consider their ruler harsh. If the penal code is being revised and punishments are made heavier in order to wipe out evil deeds, they consider their ruler stern. If
light taxes in cash and grain are levied in order to fill granaries and the treasury so that there will be food in times of starvation and sufficient funds for the army, they consider their ruler greedy. If it is required that within the borders everybody is familiar with warfare, that no one is exempted from military service, and that the state is united in strength in order to take all enemies captive, the people consider their ruler violent. These four types of measures would all serve to guarantee order and peace, yet the people do not have the sense to welcome them. Therefore one has to seek for an enlightened ruler to enforce them.

(1) The beauty of these women is proverbially famous.

(2) Ancient Chinese statesmen famous for their wisdom.

Confucius: Analects (5th C. BCE?)

The sayings of Confucius were remembered by his followers and were later compiled in a book of Analects (sayings), perhaps having been expanded on in the meantime. Through them we discover Confucius' notions of the virtues, i.e., the positive character traits, to which we should aspire. Foremost among these is Filial Piety, the respect which children owe to parents--and by extension, wives owe to husbands, sisters to brothers, and everyone to ancestors. When such virtue is cultivated in the home, it is supposed to carry over into one's relations in affairs of state as well.

How does Confucius formulate the equivalent of the Golden Rule ("do unto others as you would have them do unto you")? Is his a stronger injunction or a less demanding one?

---

On Filial Piety

Mang I asked what filial piety is. The Master said, "It is being obedient." Soon after, as Fan Chi was driving him, the Master told him "Mang asked me what filial piety is, and I answer him 'being obedient.'" Fan Chi asked, "What exactly did you mean?" The Master replied, "That parents, when alive, should be served according to ritual; that, when dead, they should be buried according to ritual; and that they should be sacrificed to according to ritual."

Ziyu asked what filial piety is. The Master said, "The filial piety of now-a-days means providing nourishment for one's parents. But dogs and horses likewise are able to do something along that line for their own kind. Without reverence, what is there to distinguish the one support given from the other?"

---

On Goodness

The Master said, "A youth, when at home, should behave well toward his parents, and when abroad, respectfully to his elders. He should be earnest and truthful. He should overflow in love to all, and cultivate the friendship of the good. When he has time and opportunity, after doing those things, he should study the polite arts."

The Master said, "With coarse rice to eat, with water to drink, and my bended arm for a pillow, I still have joy in the midst of these things. Riches and honours acquired by unrighteousness are to me as a floating cloud."

Zhonggong asked about perfect virtue. The Master said, "When abroad, behave to everyone as if you were receiving an important guest; treat people as if you were assisting at a great sacrifice; do not do to others as you would not wish done to yourself. Thereby you
will let no murmuring rise against you in the country, and none in the family. . . ."

The Master said, "The determined scholar and the man of virtue will not seek to live at the expense of humanity. They will even sacrifice their lives to preserve their humanity."

Someone said, "What do you say concerning the principle that injury should be recompensed with kindness?" The Master said, "With what then will you recompense kindness? Recompense injury with justice, and recompense kindness with kindness."

Confucius took the notion of the gentleman, as one who owned land and had some political power, and reworked it into a moral notion which captures the essence of the good life. The graciousness and self-discipline which characterize such a gentleman are fostered by, and expressed in, ritual and music. But this also leads to many detailed guidelines about how to dress and how to perform the rituals. (The counterpart would be rules of etiquette in our society.)

Why is ritual supposed to be important? What happens to otherwise virtuous traits without such ritual?

On the Gentleman

The Master said, "Riches and honours are what men desire; but if they cannot be obtained in the proper way, they should be let go. Poverty and meanness are what men dislike; but if they cannot be avoided in the proper way, they should not be avoided. If a gentleman abandons virtue, how can he fulfill the requirements of his title? A gentleman not, even for the space of a single meal, act contrary to virtue. Even in moments of haste, and in times of danger, he clings to virtue."

The Master said, "A gentleman, well studied in literature, and abiding by the rules of ritual, will not go very wrong."

"When gentlemen perform well all their duties to their relations, the people are inspired to virtue. When they remain true to their old friends, the people are preserved from irresponsible behavior."

The Master said, "A gentleman points out the admirable qualities of men and does not point out their bad qualities. A petty man does just the opposite."

The Master said, "A gentleman is distressed by his lack of ability, but he is not distressed by men's not knowing him."

The Master said, "What the gentleman demands is something of himself. What the petty man demands is something of others."

A gentleman does not wear a deep purple or a puce color, nor in his at-home clothes does he wear red. In warm weather, he wears a single-layered garment, either of coarse or fine texture, but when going out he wears it over another garment. He wears lambskin with a garment of black, fawn with white, and fox with yellow. His fur dressing gown should be long, but with the right sleeve short. His night clothes must be half again as long as his body. When staying at home, he wears thick furs of the fox or the badger. So long as he is not in mourning, he wears all the trimmings of his girdle. . . . He does not wear lamb's fur or a black cap when making a visit of condolence. And on the first day of the month he must put on his court robes and present himself at court.

The Master said, "The progress of the superior man is upwards; the progress of the mean man is downwards."

Confucius said, "There are three things of which the superior man stand in awe. He stands in awe of the ordinances of Heaven. He stands in awe
of great men. He stands in awe of the words of the sages. The mean man does not know the ordinances of Heaven, and consequently does not stand in awe of them. He is disrespectful to great men. He makes sport of the words of the sages."

The Master said, "The superior man is modest in his speech, but exceeds in his actions."

---

*Education is, of course, important to Confucius, as one needs to learn the traditions and profit from the wisdom of the past. Government can then be carried on by "moral force," as opposed to requiring military or legal force. As to religion, Confucius does not challenge it, but he doesn't put his hope in it either. His stress is always on living well, which means living properly, here and now and by our own actions.*

*Which is more important for an orderly state: food, weapons, or a government that one can trust?*

---

*On Education*

The Master said, "Anyone learning without thought is lost; anyone thinking but not learning is in peril."

The Master said, "Yu, shall I teach you what knowledge is? When you know a thing, to realize that you know it; and when you do not know a thing, to allow that you do not know it: this is knowledge." The Master said, [I have been] "a transmitter and not a maker, believing in and loving the ancients. . . ."

When the Master went to Wei, Ran Yu acted as driver of his carriage. The Master observed, "How numerous the people are!" Ran Yu asked, "When they are more numerous, what more shall be done for them?" "Enrich them," was the reply. "And when they have been enriched, what more shall be done?" The Master said, "Instruct them."

---

*On Government*

The Master said, "To rule a country of a thousand chariots requires reverent attention to business, sincerity, economy in expenditures, and love for men, as well as the employment of the people only in the right seasons."

The Master said, "If the people are governed by laws and punishment is used to maintain order, they will try to avoid the punishment but have no sense of shame. If they are governed by virtue and rules of propriety [ritual] are used to maintain order, they will have a sense of shame and will become good as well."

Zigong asked about government. The Master said, "The requisites of government are that there be sufficient food, sufficient military equipment, and the confidence of the people in their ruler." Zigong said, "If one had to dispense with one of those three, which should be given up first?" "The military equipment," said the Master. Zigong again asked, "If one had to dispense with one of the two remaining, which should be given up?" The Master answered, "Give up the food. From of old, death has always been the lot of men; but if the people have no faith in their rulers, they cannot stand."

Chi K'ang-tzu asked Confucius about government, saying, "What do you say to killing unprincipled people for the sake of principled people?" Confucius replied, "Sir, in carrying on your government, why should you use killing at all? Let your evinced desires be for what is good, and the people will be good. The relation between superiors (chūn-tzu) and inferiors is like that between the wind and the grass. The grass must bend, when the wind blows across it.

The Master said, "When a prince's personal conduct is correct, his government is effective without the issuing of orders. If his personal conduct is not correct, he may issue orders, but they will not be followed."
Tzu-lu asked how a sovereign should be served. The Master said, "Do not impose on him, and, moreover, withstand him to his face.

The Master said, "The full observance of the rules of propriety in serving one's prince is accounted by people to be flattery.

What is called a great minister, is one who serves his prince according to what is right, and when he finds he cannot do so, retires.

Hsien asked what was shameful. The Master said, "When good government prevails in a state, to be thinking only of one's salary. When bad government prevails, to be thinking, in the same way, only of one's salary. That is what is shameful."

On Religion

Someone asked the meaning of the great sacrifice. The Master said, "I do not know. Anyone who knew its meaning would find it as easy to govern the kingdom as to look on this," and he pointed to the palm of his hand.

Zilu asked about serving the ghosts of the dead. The Master said, "Until you are able to serve men, how can you serve their ghosts?" When Zilu ventured to ask about death, the answer was: "While you do not know life, how can you [hope to] know about death?"

Lao Tzu: Tao te Ching

The Tao te Ching (literally, "the classic of the way of virtue") is attributed to Lao Tzu, though scholars disagree about his actual existence. In its very poetic form it teaches that there is a dynamic, cosmic structure underlying everything that happens in the world. We humans need to discover that Way (Tao), which is immanent in all aspects of the world, not a rule imposed from without; and we need to fit into it, letting things take their course, not exerting ourselves in opposition to it by trying to bend things to our will.

Our naming (describing) of things always falls short of the way things are, since things are not limited as our language presupposes. Even the Tao which we are trying to talk about here eludes our words. The original polarity is that of being and non-being, and it will be found to interplay throughout the world, with non-being (emptiness, what is not) having as much significance as does being (the fullness of things, what is). Thus the notion of the Tao recaptures the earlier Chinese concept of Yin and Yang, the polarities running through all things.

What price is paid when people come to know beauty and goodness? (i.e., what comes along with such knowledge?) Is that bad, according to Taoism?

1

The Tao that can be spoken of is not the enduring and unchanging Tao. The name that can be named is not the enduring and unchanging name.

Having no name, it is the Originator of heaven and earth; having a name, it is the Mother of all things.

We should rid ourselves of desires if we wish to observe its subtlety; we should allow our
desires if we wish to see something of its manifestations.

Under these two aspects, it is really the same; but as development takes place, it receives the different names. Together we call them the mystery; where the mystery is the deepest is the gate of all that is subtle and wonderful.

2

All in the world know the beauty of the beautiful, and in doing so they have the idea of ugliness; they all know the good, and in doing so they have the idea of what is the bad.

So it is that being and non-being give birth each to the other; that difficulty and ease each produce the idea of the other; that the ideas of height and lowness arise from the contrast of the one with the other; that the musical notes and tones become harmonious through the relation of one with another; and that being before and behind give the idea of one following the other.

Therefore the sage manages affairs without doing anything, and conveys his teachings without the use of speech.

[In that way] all things come forth, and there is not one which declines to show itself; they grow, and there is no ownership claim made upon them; they go through their processes, and there is no expectation placed on them. The work is accomplished, and there is no disruption of order.

Taoism eschews many of the practices and principles of Confucianism, as in the following passage, where we are urged not to single out exemplary individuals and not to store up treasures and invest in fancy clothing and such.
The sage rules his people not by force from the top but by subtly encouraging those trends and inclinations which are in keeping with the Tao; thus he can "act without action."

Which kind of knowledge is it that the sage ruler protects his people from?

3

Not to value and employ men of superior ability is the way to keep the people from rivalry among themselves; not to prize articles which are precious difficult to procure is the way to keep them from becoming thieves; not to show them what is likely to excite their desires is the way to keep their minds from disorder.

Therefore the sage, in the exercise of his government, empties their minds, fills their bellies, weakens their wills, and strengthens their bones.

He constantly (tries to) keep them without knowledge and without desire, and where there are those who have knowledge, to keep them from presuming to act (on it). When there is this abstinence from action, good order is universal.

The Tao te Ching uses a series of images to show the potency of that which is not. The vessel or bowl is essentially an empty space, but it makes containment, hence drinking and life, possible. Similarly a room gets its usefulness from being empty; and doors and windows are important because there is nothing there. The valley, as a female receptacle, is rich and productive. The hub of the wheel is the empty space to which the spokes connect. Water becomes an image for the moral character of humans (at least in its passive mode), for it "does not compete" but fills in the cracks.
between other things. While our task is to fit in quietly, we may still "love the earth," i.e., extreme asceticism is not called for.

A brief list of what Taoists love and appreciate can be gleaned from Chapter 8. What are those sorts of things?

4

The Tao is (like) the emptiness of a vessel; and in our employment of it we must be on our guard against all fullness. How deep and unfathomable it is, as if it were the Honored Ancestor of all things!

We should blunt our sharp points and unravel the complications of things; we should moderate our brightness and bring ourselves into agreement with the obscurity of others. How pure and still the Tao is, as if it would ever so continue!

I do not know whose son it is. It might appear to have been before God.

6

The spirit of the valley dies not, but remains the same; Thus we name it the mysterious female. Its gate is called the root from which grew heaven and earth. Long and unbroken does its power remain, Used gently, it will never be exhausted.

8

The highest excellence (2) is like that of water. The excellence of water appears in its benefiting all things, and in its occupying, without striving, the low place which all men dislike. Hence it is near to the Tao.

The excellence of a residence is in the suitability of the place; that of the mind is in the stillness of the abyss; that of relationships is in their being with the virtuous; that of government is in its securing good order; that of the conduct of affairs is in its ability; and that of any movement is its timeliness. And when one with the highest excellence does not strive against his low position, no one finds fault with him.

11

The thirty spokes unite in the one center; but it is on the empty space for the axle that the use of the wheel depends. Clay is fashioned into vessels; but it is on their empty hollowness that their use depends. The door and windows are cut out from the walls to form an apartment; but it is on the empty space that its use depends. Therefore, whatever has being is profitable, but what does not have being can be put to use.

Translated by James Legge (1887), revised by Michael Neville

(1) "Emptying the mind" seems here to mean "freeing from concerns which might press in upon them."

(2) Some translators take this to be "the good man." In any case, it is human virtue that is being talked about.
Hymns from the *Rig Veda*

Of the several Vedic texts, the *Rig Veda* is most fundamental to Indian thought, the others dealing with more particular matters such as the sacrificial formulas, melodies, and magic. Composed over a long period of time and coming into their present form between 1500 and 1000 B.C.E., the Vedic hymns were eventually attributed to the divine breath or to a vision of the seers.

A time is envisioned when the world was not, only a watery chaos (the dark, "indistinguishable sea") and a warm cosmic breath, which could give an impetus of life. Notice how thought gives rise to desire (when something is thought of it can then be desired) and desire links non-being to being (we desire what is not but then try to bring it about that it is). Yet the whole process is shrouded in mystery.

*Where do the gods fit in this creation scheme?*

**Creation Hymn**

The non-existent was not; the existent was not at that time. The atmosphere was not nor the heavens which are beyond. What was concealed? Where? In whose protection? Was it water? An unfathomable abyss?

There was neither death nor immortality then. There was not distinction of day or night. That alone breathed windless by its own power. Other than that there was not anything else.

Darkness was hidden by darkness in the beginning. All this was an indistinguishable sea. That which becomes, that which was enveloped by the void, that alone was born through the power of heat.

Upon that desire arose in the beginning. This was the first discharge of thought. Sages discovered this link of the existent to the nonexistent, having searched in the heart with wisdom.

Their line [of vision] was extended across; what was below, what was above? There were impregnators, there were powers: inherent power below, impulses above.

Who knows truly? Who here will declare whence it arose, whence this creation? The gods are subsequent to the creation of this. Who, then, knows whence it has come into being?

Whence this creation has come into being; whether it was made or not; he in the highest heaven is its surveyor. Surely he knows, or perhaps he knows not.

*Agni, the god of fire, whose name is the common word for fire, is a terrestrial deity, only loosely anthropomorphic. He is most often compared to animals, with wood for his food and melted butter for his drink. He is the mouth by which the gods consume those items during the sacrifice. He is born from wood (as two sticks are rubbed together), but then devours his parents. As "Lord of the House," he is a guest in human dwellings in the form of the domestic fire.*

*How is Agni supposed to "bring the gods here"?*

**To Agni (Fire)**

I call upon Agni, the one placed in front, the divine priest of the sacrifice, the invoker, the best bestower of gifts.

Agni is worthy of being called upon by seers past and present: may he bring the gods here!
Through Agni may one obtain wealth and prosperity day by day, splendid and abounding in heroic sons.

O Agni, the sacrifice and work of the sacrifice, which you encompass on all sides—-that alone goes to the gods.

May Agni, the invoker who has the powers of a sage, true and most brilliant in glory, come here, a god with the gods!

Whatever favor you wish to do for a worshipper, Agni, that favor of yours surely comes true, O Angiras [member of a priestly family].

O Agni, you who gleam in the darkness, to you we come day by day, with devotion and bearing homage;

to you, ruler of the sacrifices, keeper of the Rta [cosmic law], brightly shining, growing in your abode.

So, be of easy access to us, Agni, as a father to his son. Abide with us for our well-being.

Indra is a sky god and a war god who holds the earth and the heavens apart, on occasion making the earth tremble. As the counterpart of Zeus for the Greeks or Jupiter for the Romans, he is the god of the thunderstorm, who vanquishes drought and darkness. He is the most frequently mentioned god in the Veda, the most nationalistic, and the most anthropomorphic. The serpent which he slew was a demon of drought, who had bottled up the streams; but Indra shattered the mountain, releasing the streams like pent up cows. "The lowly Dasa color" whom he has "put in hiding" presumably refers to the indigenous peoples of northern India who had been overcome by the Aryan invaders and either moved into the forests or migrated southward.

What is Indra supposed to do for the weary, the weak, the needy priest (a Brahman, of course) and the singer?

To Indra

The one who is first and possessed of wisdom when born; the god who strove to protect the gods with strength; the one before whose force the two worlds were afraid because of the greatness of his virility: he, O people, is Indra.

The one who made firm the quaking earth; the one who made fast the shaken mountains; the one who measured out wide the atmosphere; the one who propped up heaven: he, O people, is Indra.

The one who, having killed the serpent, released the seven rivers; the one who drove out the cows by undoing [Vala, (1)] the one who generates fire between two rocks, victor in battles: he, O people, is Indra.

The one by whom all things here were made moving; the one who put in hiding the lowly Dasa color; the one who, like a gambler who has won the stake, has taken the enemy's possessions: he, O people, is Indra.

The one who is the terrible one, about whom they ask "Where is he?" and they say of him, "He is not!" He diminished the enemy's possessions like stakes [at a game]. Put your faith in him: he, O people, is Indra.

The one who is the impeller of the weary, of the weak, of the Brahman seeking aid, the singer; the one with goodly mustaches who is the helper of him who works the stones, who has pressed the Soma [2]: he, O people, is Indra.

The one in whose control are horses, cows, villages, all chariots; the one who has caused to be born the sun, the dawn; the one who is the waters' leader: he, O people, is Indra.
Foundations (8000 B.C.E. to 600 C.E.)

The one whom the two lines of battle, coming together, call upon separately, the nearer and the farther, both foes; even the two who have mounted the same chariot call upon him individually: he, O people, is Indra.

The one without whom people do not conquer; the one to whom, when fighting, they call for help; the one who is a match for everyone; the one who shakes the unshakable: he, O people, is Indra.

This is one of the latest compositions in the Rig Veda, as it suggests a sort of pantheistic philosophy. Purusa is a cosmic giant, of whom the gods and the cosmos itself are composed; yet he is also the object of the sacrifice to the gods. From him then are derived the gods in the heaven and, from the remainder, all the rest of what is, both the living and the non-living.

The top four castes are supposed to have been derived from Purusa: the Brahmans, the Rajanya (or Ksatriya), the Vaisya, and the Sudra. Which body parts are associated with each group, and what seems to be the significance of those parts?

Purusa, the Cosmic Person

Thousand-headed is Purusa, thousand-eyed, thousand-footed. Having covered the earth on all sides, he stood above it the width of ten fingers.

Only Purusa is all this, that which has been and that which is to be. He is the lord of the immortals, who grow by means of [ritual] food.

Such is his greatness, yet more than this is Purusa. One-quarter of him is all beings; three-quarters of him is the immortal in heaven.

Three-quarters of Purusa went upward, one-quarter of him remained here. From this [one-quarter] he spread in all directions into what eats and what does not eat.

From him the shining one was born, from the shining one was born Purusa. When born he extended beyond the earth, behind as well as in front.

When the gods performed a sacrifice with the offering Purusa, spring was its clarified butter, summer the kindling, autumn the oblation.

It was Purusa, born in the beginning, which they sprinkled on the sacred grass as a sacrifice. With him the gods sacrificed, the demi-gods, and the seers.

From that sacrifice completely offered, the clotted butter was brought together. It made the beasts of the air, the forest and the village.

From that sacrifice completely offered, the mantras [Rig Veda] and the songs [Samaveda] were born. The meters were born from it. The sacrificial formulae [Yajurveda] were born from it.

From it the horses were born and all that have cutting teeth in both jaws. The cows were born from it, also. From it were born goats and sheep.

When they divided Purusa, how many ways did they apportion him? What was his mouth? What were his arms? What were his thighs, his feet declared to be?

His mouth was the Brahman [caste], his arms were the Rajanya [Ksatriya caste], his thighs the Vaisya [caste]; from his feet the Sudra [caste] was born.

The moon was born from his mind; from his eye the sun was born; from his mouth both Indra and Agni [fire]; from his breath Vayu [wind] was born.
From his navel arose the air; from his head the heaven evolved; from his feet the earth; the [four] directions from his ear. Thus, they fashioned the worlds.

Seven were his altar sticks, three times seven were the kindling bundles, when the gods, performing the sacrifice, bound the beast Purusa.

The gods sacrificed with the sacrifice to the sacrifice. These were the first rites. These powers reached the firmament, where the ancient demi-gods and the gods are.

Translated by Michael Myers

(1) The cave in which the cattle were imprisoned.

(2) A beverage made from the juice of a plant (probably a hallucinogenic mushroom) and used in religious ceremonies; also a god.

The Bhagavad-Gita

The Bhagavad-Gita has been an essential text of Hindu culture in India since the time of its composition in the first century A.D. One of the great classics of world literature, it has inspired such diverse thinkers as Henry David Thoreau, Mahatma Gandhi, and T.S. Eliot.

~ 27 ~
They are teachers, fathers, sons, and grandfathers, uncles, grandsons, fathers and brothers of wives, and other men of our family. 34

I do not want to kill them even if I am killed, Krishna; not for kingship of all three worlds, much less for the earth! 35

What joy is there for us, Krishna, in killing Dhritarashtra's sons? Evil will haunt us if we kill them, though their bows are drawn to kill. 36

Honor forbids us to kill our cousins, Dhritarashtra's sons; how can we know happiness if we kill our own kinsmen? 37

The greed that distorts their reason blinds them to the sin they commit in ruining the family, blinds them to the crime of betraying friends. 38

How can we ignore the wisdom of turning from this evil when we see the sin of family destruction, Krishna? 39

When the family is ruined, the timeless laws of family duty perish; and when duty is lost, chaos overwhelms the family. 40

In overwhelming chaos, Krishna, women of the family are corrupted; and when women are corrupted, disorder is born in society. 41

This discord drags the violators and the family itself to hell; for ancestors fall when rites of offering rice and water lapse. 42

The sins of men who violate the family create disorder in society that undermines the constant laws of caste and family duty. 43

Krishna, we have heard that a place in hell is reserved for men who undermine family duties. 44

I lament the great sin we commit when our greed for kingship and pleasures drives us to kill our kinsmen. 45

If Dhritarashtra's armed sons kill me in battle when I am unarmed and offer no resistance, it will be my reward." 46

Saying this in the time of war, Arjuna slumped into the chariot and laid down his bow and arrows, his mind tormented by grief. 47

THE SECOND TEACHING
PHILOSOPHY AND
SPIRITUAL DISCIPLINE

Lord Krishna

You grieve for those beyond grief, and you speak words of insight; but learned men do not grieve for the dead or the living. 11

Never have I not existed, nor you, nor these kings; and never in the future shall we cease to exist. 12

Just as the embodied self enters childhood, youth, and old age, so does it enter another body; this does not confound a steadfast man. 13

Contacts with matter make us feel heat and cold, pleasure and pain Arjuna, you must learn to endure fleeting things—they come and go! 14

When these cannot torment a man, when suffering and joy are equal for him and he has courage, he is fit for immortality. 15

Nothing of nonbeing comes to be, nor does being cease to exist; the boundary between these two is seen by men who see reality. 16

Indestructible is the presence that pervades all this; no one can destroy this unchanging reality. 17

Our bodies are known to end, but the embodied self is enduring, indestructible, and immeasurable; therefore, Arjuna, fight the battle! 18

He who thinks this self a killer and he who thinks it killed both fail to understand; it does not kill, nor is it killed. 19

It is not born, it does not die; having been, it will never not
be; unborn, enduring, constant, and primordial, it is not killed when the body is killed. 20

Arjuna, when a man knows the self to be indestructible, enduring, unborn, unchanging, how does he kill or cause anyone to kill? 21

As a man discards worn-out clothes to put on new and different ones, so the embodied self discards its worn-out bodies to take on other new ones. 22

Weapons do not cut it, fire does not burn it, waters do not wet it, wind does not wither it. 23

It cannot be cut or burned; it cannot be wet or withered; it is enduring, all-pervasive, fixed, immovable, and timeless. 24

It is called unmanifest, inconceivable, and immutable; since you know that to be so, you should not grieve! 25

If you think of its birth and death as ever-recurring, then too, Great Warrior, you have no cause to grieve! 26

Death is certain for anyone born, and birth is certain for the dead; since the cycle is inevitable, you have no cause to grieve! 27

Creatures are unmanifest in origin, manifest in the midst of life, and unmanifest again in the end. Since this is so, why do you lament? 28

Rarely someone sees it, rarely another speaks it, rarely anyone hears it- even hearing it, no one really knows it. 29

The self embodied in the body of every being is indestructible; you have no cause to grieve for all these creatures, Arjuna! 30

Look to your own duty; do not tremble before it; nothing is better for a warrior than a battle of sacred duty. 31

The doors of heaven open for warriors who rejoice to have a battle like this thrust on them by chance. 32

If you fail to wage this war of sacred duty, you will abandon your own duty and fame only to gain evil. 33

People will tell of your undying shame, and for a man of honor shame is worse than death. 34

The great chariot warriors will think you deserted in fear of battle; you will be despised by those who held you in esteem. 35

Your enemies will slander you, scorning your skill in so many unspeakable ways- could any suffering be worse? 36

If you are killed, you win heaven; if you triumph, you enjoy the earth; therefore, Arjuna, stand up and resolve to fight the battle! 37

Impartial to joy and suffering, gain and loss, victory and defeat, arm yourself for the battle, lest you fall into evil. 38

Understanding is defined in terms of philosophy; now hear it in spiritual discipline. Armed with this understanding, Arjuna, you will escape the bondage of action. 39

No effort in this world is lost or wasted; a fragment of sacred duty saves you from great fear. 40

This understanding is unique in its inner core of resolve; diffuse and pointless are the ways irresolute men understand. 41

Undiscerning men who delight in the tenets of ritual lore utter florid speech, proclaiming, "There is nothing else!" 42

Driven by desire, they strive after heaven and contrive to win powers and delights, but their intricate ritual language bears only the fruit of action in rebirth. 43

Obsessed with powers and delights, their reason lost in words, they do not find in contemplation this
Foundations (8000 B.C.E. to 600 C.E.)

understanding of inner resolve. 44
Arjuna, the realm of sacred lore is nature-beyond its

tripod of qualities, dualities, and mundane rewards, be forever lucid, alive to your self. 45
For the discerning priest, all of sacred lore has no more value than a well when water flows everywhere. 4

Herodotus: Xerxes at the Hellespont (mid 5th Century BCE)

Whereas many Middle Eastern peoples welcomed the advent of the Persian Empire, the Greeks viewed their own victories over the Persians as making possible the very continuance of their civilization. The army of Darius was defeated at the Battle of Marathon in 490 BCE and that of Xerxes I at Salamis in 486 BCE. The Greeks considered their poleis many of them democracies as infinitely superior to the absolute monarchy of Persia. Europeans have traditionally maintained that if these battles had not been won, history would have been utterly changed, with Europe falling under the sway of Eastern despotism. Whether or not this theory is true can never be known; but the theory itself helped to shape centuries of European hostility to and contempt for the nations of the Middle East. Part of that contempt is expressed in the following story, in which the great Xerxes is depicted by the Greek historian Herodotus as a superstitious fool and a bloodthirsty tyrant. His massive army is preparing to cross the narrow strait (the Hellespont, now in Turkey) which separated Asia from Europe.

What incidents described below depict Xerxes as superstitious? As tyrannical?

They then began to build bridges across the Hellespont from Abydos to that headland between Sestus and Mandys, the Phoenicians building one of ropes made from flax, and the Egyptians building a second one out of papyrus. From Abydos to the opposite shore it is a distance of almost two-thirds of a mile. But no sooner had the strait been bridged than a great storm came on and cut apart and scattered all their work.

Xerxes flew into a rage at this, and he commanded that the Hellespont be struck with three hundred strokes of the whip and that a pair of foot-chains be thrown into the sea. It’s even been said that he sent off a rank of branders along with the rest to the Hellespont! He also commanded the scourgers to speak outlandish and arrogant words: "You hateful water, our master lays his judgement on you thus, for you have unjustly punished him even though he’s done you no wrong! Xerxes the king will pass over you, whether you wish it or not! It is fitting that no man offer you sacrifices, for you’re a muddy and salty river!" In these ways he commanded that the sea be punished and also that the heads be severed from all those who directed the bridging of the Hellespont.

And this scourging was done by those appointed to this graceless honor, and other builders were chosen. The bridging was done in the following way: fifty-oared ships and triremes were set side by side, about three hundred and sixty to form the Euxinian bridge, and about three hundred and fourteen to form the other bridge, all of them at right angles to the Pontus and parallel to the Hellespont, thus taking off some of the tension from the ropes. Once the ships were alongside one another, they released huge anchors, both from the end near the Pontus because of the winds blowing from that sea, and on the other end towards the west and the Aegean because of the western and southern winds. A passage was left in the opening of the fifty-oared ships and triremes in order that, if he wished to go into or out of the Pontus, he could pass through in a small ship. Having done all this, they stretched
ropes from the land and twisted them with wooden pulleys, and they did not keep each separate, but assigned two flaxen cables and four papyrus cables for each bridge. Each type of cable was thick and comely, but the report goes that the flaxen cables were heavier, a single yard weighing over 100 pounds. (3) When the sea was bridged, wooden timbers equal to the breadth of the floating ships were felled and were laid on the stretched cables, and laying them alongside one another they tied them fast. Having done this, they put down brushwood, laying it on the timbers, and they put down earth on top of the brushwood, stamping it down and building a fence on the earth on each side in order that the beasts of burden and the horses would not be frightened by the sea flowing beneath them.

When they had built the bridges, the work around Athos, and the dikes around the mouths of the canals, these built because of the sea breaking on the shore which would silt up the mouths of the canals, and these canals being reported as completely finished, the army then and there prepared to winter and, when spring came, was ready and set forth to Abydos from Sardis. When they had started to set forth, the sun eclipsed itself and was not to be seen in its place in the heavens, even though the sky was unclouded and as clear as can be, so that the day turned to night. When Xerxes perceived this he became anxious, and he asked the Magians to clarify what this omen meant. These said that the god, Pythian Apollo, was foreshowing to the Greeks the eclipse of their city, for the sun was a prophet to the Greeks, as the moon was to them. Hearing that, Xerxes' mood became exceedingly sunny and he continued the march.

As he marched out the army, Pythias the Lydian, dreading the heavenly omen and encouraged by the gifts given to him by Xerxes, came up to Xerxes and said, "Master, I wish to ask a favor of you, which would be a small favor for you to render, but would be a great favor for me to receive." Xerxes, thinking that he knew everything Pythias could ask for, answered that he would grant the favor and asked him to proclaim what it was he wished. "Master, it happens that I have five sons, and they are all bound to soldier for you against the Greeks. I pray you, king, that you have pity on one who has reached my age and that you set free one of my sons, even the oldest, from your army, so that he may provide for me and my possessions. Take the other four with you, and may you return having accomplished all you intended."

Xerxes flew into a horrible rage and replied, "You villainous man, you have the effrontery, seeing me marching with my army against the Greeks, with my sons and brothers and relatives and friends, to remind me of your son, you, my slave, who should rather come with me with your entire household, including your wife! You may now be certain of this, that since the spirit lives in a man's ears, hearing good words it fills the body with delight, when it hears the opposite it swells up. When you at one time performed well and promised more, you had no reason to boast that you outperformed your king in benefits; and now that you have turned most shameless, you shall receive less than what you deserve. You and four of your sons are saved because of your hospitality; but one of your sons, the one you most desire to hold your arms around, will lose his life!" Having answered thus, he commanded those charged to accomplish this to find the eldest of Pythias's sons and cut him in half, and having cut him in two to set one half of his corpse on the right side of the road and the other on the left side, and between these the army moved forth.

(1) Bodies of water were routinely treated as gods, and offered sacrifices.

(2) Men with hot branding irons.

(3) Literally: "18 1/2 inches weighing about 57 3/4 pounds."
The Death of Socrates

Socrates opposed the Sophists, arguing that there are absolute, transcultural standards of right and wrong, good and bad. He argued (as in the first passage below) that once we recognize what is truly good, we will act in accord with that knowledge—hence his claim that "the virtues are a kind of knowledge." He also firmly believed (as shown in the second passage) that the cosmos is grounded in goodness, hence that a good person cannot suffer unduly and that death is not something to be feared. Plato recounts the last hours of Socrates' life in a moving dialogue. This is the end of his final speech, just after he had been condemned to death by the citizens of Athens, his home town. The method of execution was that the condemned should drink a cup of hemlock, a not uncommon mode of execution.

What reasons does Socrates give for not fearing death? Why is Socrates so little concerned with how his body is to be buried?

Now as you see there has come upon me that which may be thought, and is generally believed to be, the last and worst evil. But the oracle made no sign of opposition . . . I regard this as a proof that what has happened to me is a good, and that those of use who think that death is an evil are in error . . . Let us reflect in another way, and we shall see that there is great reason to hope that death is a good, for one of two things:--either death is a state of nothingness and utter unconsciousness, or, as men say, there is a change and migration of the soul from this world to another. Now if you suppose that there is no consciousness, but a sleep like the sleep of him who is undisturbed even by the sight of dreams, death will be an unspeakable gain . . . Now if death is like this, I say that to die is gain; for eternity is then only a single night. But if death is a journey to another place, and there, as men say, all the dead are, what good, O my friends and judges, can be greater than this? . . . What would not a man give if he might converse with Orpheus and Musaeus and Hesiod and Homer? Nay, if this be true, let me die again and again. . . . Above all, I shall be able to continue my search into true and false knowledge; as in this world, so also in that; I shall find out who is wise, and who pretends to be wise, and is not. . . . The hour of departure has arrived, and we go our ways--I to die, and you to live. Which is better God only knows.

The Death of Socrates

Then he turned to us, and added with a smile: "I cannot make Crito believe that I am the same Socrates who has been talking and conducting the argument; he fancies that I am the other Socrates whom he will soon see, a dead body--and he asks, How shall he bury me? And though I have spoken many words in the endeavor to show that when I have drunk the poison I shall leave you and go to the joys of the blessed--these words of mine, with which I was comforting you and myself, have had, as I perceive, no effect upon Crito. And therefore I want you to be surety for me to him how, as at the trial he was surety to the judges for me: but let the promise be of another sort; for he was surety for me to the judges that I would remain, and you must be my surety to him that I shall not remain, but go away and depart; and then he will suffer less at my death, and not be grieved when he sees my body being burned or buried. I would not have him sorrow at my hard lot, or say at the burial, Thus we lay out Socrates, or Thus we follow him to the grave or bury him; for false words are not only evil in themselves, but they infect the soul with evil. Be of good cheer then, my dear Crito, and say that you are burying my body only, and do with that whatever is usual, and what you think best."
When he had spoken these words, he arose and went into a chamber to bathe; Crito followed him and told us to wait. So we remained behind, talking and thinking of the subject of discourse, and also of the greatness of our sorrow; he was like a father of whom we were being bereaved, and we were about to pass the rest of our lives as orphans. When he had taken the bath his children were brought to him (he had two sons and an elder one); and the women of his family also came, and he talked to them and gave them a few directions in the presence of Crito; then he dismissed them and returned to us.

Now the hour of sunset was near, for a good deal of time had passed while he was within. When he came out, he sat down with us again after his bath, but not much was said. Soon the jailer, who was the servant of the eleven, entered and stood by him, saying: "To you, Socrates, whom I know to be the noblest and gentlest and best of all who ever came to this place, I will not impute the angry feelings of other men, who rage and swear at me, when, in obedience to the authorities, I bid them drink the poison--indeed, I am sure that you will not be angry with me; for others, as you are aware, and not I, are to blame. And so fare you well, and try to bear lightly what must needs be--you know my errand." Then bursting into tears he turned away and went out.

Socrates looked at him and said: "I return your good wishes, and will do as you bid." Then turning to us, he said, "How charming the man is: since I have been in prison he has always been coming to see me, and at times he would talk to me, and was as good to me as could be, and now see how generously he sorrows on my account. We must do as he says, Crito; and therefore let the cup be brought, if the poison is prepared; if not, let the attendant prepare some."

"Yet," said Crito, "the sun is still upon the hilltops, and I know that many a one has taken the draught late, and after the announcement has been made to him, he has eaten and drunk, and enjoyed the society of his beloved; do not hurry--there is time enough."

Socrates said: "Yes, Crito, and they of whom you speak are right in so acting, for they think that they will be gainers by the delay; But I am right in not following their example, for I do not think that I should gain anything by drinking the poison a little later; I should only be ridiculous in my own eyes for sparing and saving a life which is already forfeit. Please then to do as I say, and not to refuse me."

Crito made a sign to the servant, who was standing by; and he went out, and having been absent for some time, returned with the jailer carrying the cup of poison. Socrates said: "You, my good friend, who are experienced in these matters, shall give me directions how I am to proceed."

The man answered: "you have only to walk about until your legs are heavy, and then to lie down, and the poison will act."

At the same time he handed the cup to Socrates, who in the easiest and gentlest manner, without the least fear or change of color or feature, looking at the man with all his eyes, . . . as his manner was, took the cup and said: "What do you say about making a libation out of this cup to any god? May I, or not?"

The man answered: "We only prepare, Socrates, just so much as we deem enough."

"I understand," he said; "but I may and must ask the gods to prosper my journey from this to the other world--even so--and so be it according to my prayer.

Then raising the cup to his lips, quite readily and cheerfully he drank off the poison. And hitherto most of us had been able to control our sorrow; but now when we saw him drinking, and saw too that he had finished the draught, we could
not longer forbear, and in spite of myself my own tears were flowing fast; so that I covered my face and wept, not for him, but at the thought of my own calamity in having to part from such a friend. Nor was I the first; for Crito, when he found himself unable to restrain his tears, had got up, and I followed; and at that moment, Apollodorus, who had been weeping all the time, broke out in a loud and passionate cry which made cowards of us all.

Socrates alone retained his calmness: "What is this strange outcry?" he said. "I sent away the women mainly in order that they might not misbehave in this way, for I have been told that a man should die in peace. Be quiet then, and have patience."

When we heard his words we were ashamed, and refrained our tears; and he walked about until, as he said, his legs began to fail, and then he lay on his back, according to the directions, and the man who gave him the poison now and then looked at his feet and legs; and after a while he pressed his foot hard, and asked him if he could feel; and he said, "No;" and then his leg, and so upwards and upwards, and showed us that he was cold and stiff. And he felt himself, and said: "When the poison reaches the heart, that will be the end."

He was beginning to grow cold about the groin, when he uncovered his face, for he had covered himself up, and said—they were his last words—he said: "Crito, I owe a cock to Asclepius; (1) will you remember to pay the debt?

"The debt shall be paid," said Crito; "is there anything else?"

There was no answer to this question; but in a minute or two a movement was heard, and the attendants uncovered him; his eyes were set, and Crito closed his eyes and mouth.

Such was the end . . . of our friend; concerning whom I may truly say, that of all the men of his time whom I have known, he was the wisest and justest and best.

Translated by Benjamin Jowett (1892)

(1) The god of health and medicine.

---

**Plato: The Allegory of the Cave, from The Republic**

_Plato, the most creative and influential of Socrates' disciples, wrote dialogues, in which he frequently used the figure of Socrates to espouse his own (Plato’s) full-fledged philosophy. In “The Republic,” Plato sums up his views in an image of ignorant humanity, trapped in the depths and not even aware of its own limited perspective. The rare individual escapes the limitations of that cave and, through a long, tortuous intellectual journey, discovers a higher realm, a true reality, with a final, almost mystical awareness of Goodness as the origin of everything that exists. Such a person is then the best equipped to govern in society, having a knowledge of what is ultimately most worthwhile in life and not just a knowledge of techniques; but that person will frequently be misunderstood by those ordinary folks back in the cave who haven’t shared in the intellectual insight. If he were living today, Plato might replace his rather awkward cave metaphor with a movie theater, with the projector replacing the fire, the film replacing the objects which cast shadows, the shadows on the cave wall with the projected movie on the screen, and the echo with the loudspeakers behind the screen. The essential point is that the prisoners in the cave are not seeing reality, but only a shadowy representation of it. The importance of the allegory lies in Plato’s belief that there are invisible truths lying under the apparent surface of things which only the most enlightened can grasp. Used to the world of illusion in the cave, the prisoners at first resist enlightenment, as students resist education. But those who can achieve enlightenment deserve to be the_
Foundations (8000 B.C.E. to 600 C.E.)

leaders and rulers of all the rest. At the end of the passage, Plato expresses another of his favorite ideas: that education is not a process of putting knowledge into empty minds, but of making people realize that which they already know. This notion that truth is somehow embedded in our minds was also powerfully influential for many centuries.

Judging by this passage, why do you think many people in the democracy of Athens might have been antagonistic to Plato’s ideas? What does the sun symbolize in the allegory?

Is a resident of the cave (a prisoner, as it were) likely to want to make the ascent to the outer world? Why or why not? What does the sun symbolize in the allegory? And now, I said, let me show in a figure how far our nature is enlightened or unenlightened:—Behold! human beings living in an underground den, which has a mouth open towards the light and reaching all along the den; here they have been from their childhood, and have their legs and necks chained so that they cannot move, and can only see before them, being prevented by the chains from turning round their heads. Above and behind them a fire is blazing at a distance, and between the fire and the prisoners there is a raised way; and you will see, if you look, a low wall built along the way, like the screen which marionette players have in front of them, over which they show the puppets.

I see.

And do you see, I said, men passing along the wall carrying all sorts of vessels, and statues and figures of animals made of wood and stone and various materials, which appear over the wall? Some of them are talking, others silent.

You have shown me a strange image, and they are strange prisoners.

Like ourselves, I replied; and they see only their own shadows, or the shadows of one another, which the fire throws on the opposite wall of the cave?

True, he said; how could they see anything but the shadows if they were never allowed to move their heads?

And of the objects which are being carried in like manner they would only see the shadows?

Yes, he said.

And if they were able to converse with one another, would they not suppose that they were naming what was actually before them?

Very true.

And suppose further that the prison had an echo which came from the other side, would they not be sure to fancy when one of the passers-by spoke that the voice which they heard came from the passing shadow?

No question, he replied.

To them, I said, the truth would be literally nothing but the shadows of the images.

That is certain.

And now look again, and see what will naturally follow if the prisoners are released and disabused of their error. At first, when any of them is liberated and compelled suddenly to stand up and turn his neck round and walk and look towards the light, he will suffer sharp pains; the glare will distress him, and he will be unable to see the realities of which in his former state he had seen the shadows; and then conceive some one saying to him, that what he saw before was an illusion, but that now, when he is approaching nearer to being and his eye is turned towards more real existence, he has a clearer vision,—what will be his reply? And you may further imagine that his
instructor is pointing to the objects as they pass and requiring him to name them,—will he not be perplexed? Will he not fancy that the shadows which he formerly saw are truer than the objects which are now shown to him?

Far truer.

And if he is compelled to look straight at the light, will he not have a pain in his eyes which will make him turn away to take refuge in the objects of vision which he can see, and which he will conceive to be in reality clearer than the things which are now being shown to him?

True, he said.

And suppose once more, that he is reluctantly dragged up a steep and rugged ascent, and held fast until he is forced into the presence of the sun himself, is he not likely to be pained and irritated? When he approaches the light his eyes will be dazzled, and he will not be able to see anything at all of what are now called realities.

Not all in a moment, he said.

He will require to grow accustomed to the sight of the upper world. And first he will see the shadows best, next the reflections of men and other objects in the water, and then the objects themselves; then he will gaze upon the light of the moon and the stars and the spangled heaven; and he will see the sky and the stars by night better than the sun or the light of the sun by day?

Certainly.

Last of all he will be able to see the sun, and not mere reflections of him in the water, but he will see him in his own proper place, and not in another; and he will contemplate him as he is.

Certainly.

He will then proceed to argue that this is he who gives the season and the years, and is the guardian of all that is in the visible world, and in a certain way the cause of all things which he and his fellows have been accustomed to behold?

Clearly, he said, he would first see the sun and then reason about him.

And when he remembered his old habitation, and the wisdom of the den and his fellow-prisoners, do you not suppose that he would felicitate himself on the change, and pity them?

Certainly, he would.

And if they were in the habit of conferring honors among themselves on those who were quickest to observe the passing shadows and to remark which of them went before, and which followed after, and which were together; and who were therefore best able to draw conclusions as to the future, do you think that he would care for such honors and glories, or envy the possessors of them? Would he not say with Homer,

Better to be the poor servant of a poor master, and to endure anything, rather than think as they do and live after their manner? (1)

Yes, he said, I think that he would rather suffer anything than entertain these false notions and live in this miserable manner.

Imagine once more, I said, such a one coming suddenly out of the sun to be replaced in his old situation; would he not be certain to have his eyes full of darkness?

To be sure, he said.

And if there were a contest, and he had to compete in measuring the shadows with the prisoners who had never moved out of the den, while his sight was still weak, and before his
eyes had become steady (and the time which would be needed to acquire this new habit of sight might be very considerable), would he not be ridiculous? Men would say of him that up he went and down he came without his eyes; and that it was better not even to think of ascending; and if any one tried to loose another and lead him up to the light, let them only catch the offender, and they would put him to death.

(2)

No question, he said.

This entire allegory, I said, you may now append, dear Glaucon, to the previous argument; the prison-house is the world of sight, the light of the fire is the sun, and you will not misapprehend me if you interpret the journey upwards to be the ascent of the soul into the intellectual world according to my poor belief, which, at your desire, I have expressed--whether rightly or wrongly God knows. But whether true or false, my opinion is that in the world of knowledge the idea of good appears last of all, and is seen only with an effort; and, when seen, is also inferred to be the universal author of all things beautiful and right, parent of light and of the lord of light in this visible world, Here Plato describes his notion of God in a way that was influence profoundly Christian theologians. and the immediate source of reason and truth in the intellectual; and that this is the power upon which he would act rationally either in public or private life must have his eye fixed.

I agree, he said, as far as I am able to understand you.

Moreover, I said, you must not wonder that those who attain to this beatific vision are unwilling to descend to human affairs; for their souls are ever hastening into the upper world where they desire to dwell; which desire of theirs is very natural, if our allegory may be trusted.

Yes, very natural.

And is there anything surprising in one who passes from divine contemplations to the evil state of man, misbehaving himself in a ridiculous manner; if, while his eyes are blinking and before he has become accustomed to the surrounding darkness, he is compelled to fight in courts of law, or in other places, about the images or the shadows of images of justice, and is endeavoring to meet the conception of those who have never yet seen absolute justice?

Anything but surprising, he replied.

Any one who has common sense will remember that the bewilderments of the eyes are of two kinds, and arise from two causes, either from coming out of the light or from going into the light, which is true of the mind's eye; and he who remembers this when he sees any one whose vision is perplexed and weak, will not be too ready to laugh; he will first ask whether that soul of man has come out of the brighter life, and is unable to see because unaccustomed to the dark, or having turned from darkness to the day is dazzled by excess of light. And he will count the one happy in his condition and state of being, and he will pity the other; or, if he have a mind to laugh at the soul which comes from below into the light, there will be more reason in this than in the laugh which greets him who returns from above out of the light into the den.

That, he said, is a very just distinction.

But then, if I am right, certain professors of education must be wrong when they say that they can put a knowledge into the soul which was not there before, like sight into blind eyes.

They undoubtedly say this, he replied.

Whereas our argument shows that the power and capacity of learning exists in the soul already; and that just as the eye was unable to turn from darkness to light without the whole body, so too the instrument of knowledge can only by the movement of the whole soul be
turned from the world of becoming into that of being, and learn by degrees to endure the sight of being and of the brightest and best of being, or in other words, of the good.

(1) This refers to a famous passage in Homer’s Odyssey in which the ghost of the great hero Achilles, when asked if he is not proud of the fame his deeds have spread throughout the world, answers that he would rather be a slave on a worn-out farm than king over all of the famous dead. Interestingly, Plato quotes the same passage elsewhere as disapprovingly as depicting life after death in such a negative manner that it may undermine the willingness of soldiers to die in war.

(2) The comic playwright Aristophanes had mocked Socrates by portraying Plato’s master, Socrates, as a foolish intellectual with his head in the clouds.

(3) Plato undoubtedly has in mind the fact that the Athenians had condemned to death his master Socrates, who Plato considered supremely enlightened.

Translated by Benjamin Jowett

Tacitus (c. 55 -117 CE): Nero's persecution of the Christians

Tacitus was a fierce critic of Nero, and modern scholars have questioned the reliability of his account of this notorious Roman Emperor; but the following passage from his Annals is famous because it is one of the first mentions in a non-Christian source of Christianity. In 64 CE Rome underwent a catastrophic fire, which some believed had been set at the orders of the emperor himself. Tacitus claims that Nero tried to shift the blame to the unpopular Christians, though other sources indicate that their persecution may have been unconnected to the fire. It is not clear exactly why many Romans detested the new believers, though Christians were often confused with Jews, who were accused of being rebellious (with some reason, since the Jews of Judaea more than once created insurrections against the Roman provincial government) and lazy (since they rested on the Sabbath). Scandalous rumors about obscene Christian rituals circulated at an early date, and we know that they were accused of disloyalty because of their refusal to perform the token ritual acknowledging the divine status of the Emperor, viewed by most citizens as little different from a modern flag salute. If Tacitus shows sympathy for them, it is because he detests Nero more. Whatever their exact cause this early persecution and later ones made a profound impact on the Christian Church, and bequeathed a legacy of colorful tales of martyred saints who were celebrated in story, song, and art for the next two millennia, long after the Church had triumphed over its opponents.

What were the main accusations brought against the Christians?

Yet no human effort, no princely largess nor offerings to the gods could make that infamous rumor disappear that Nero had somehow ordered the fire. Therefore, in order to abolish that rumor, Nero falsely accused and executed with the most exquisite punishments those people called Christians, who were infamous for their abominations. The originator of the name, Christ, was executed as a criminal by the procurator Pontius Pilate during the reign of Tiberius; and though repressed, this destructive superstition erupted again, not only through Judea, which was the origin of this evil, but also through the city of Rome, to which all that is horrible and shameful floods together and is celebrated. Therefore, first those were seized who admitted their faith, and then, using the information they provided, a vast multitude were convicted, not so much for the crime of burning the city, but for hatred of the human race. And perishing they were additionally made into sports: they were killed by dogs by

~ 38 ~
having the hides of beasts attached to them, or they were nailed to crosses or set aflame, and, when the daylight passed away, they were used as nighttime lamps. Nero gave his own gardens for this spectacle and performed a Circus game, in the habit of a charioteer mixing with the plebs or driving about the race-course. Even though they were clearly guilty and merited being made the most recent example of the consequences of crime, people began to pity these sufferers, because they were consumed not for the public good but on account of the fierceness of one man.

Translated by Richard Hooker

Sermon on the Mount

In contrast to Mark, Matthew contains far fewer miracles and a great deal of teaching, including the famous collection of sayings called "The Sermon on the Mount," some of them quite extreme. As we saw earlier, Jewish law required the fair treatment of enemies, and by no means called upon all crimes to be punished by "an eye for an eye;" but it did not require forgiveness to extend as far as this.

In your opinion, which of these is the most extreme commandment? Why?

You have heard that it was said, "An eye for an eye and a tooth for a tooth." (1) But I say to you, [Do not resist an evildoer. (2) But if anyone strikes you on the right cheek, turn the other also; and if anyone wants to sue you and take your coat, give your cloak as well; and if anyone forces you to go one mile, go also the second mile. (3) Give to everyone who begs from you, and do not refuse anyone who wants to borrow from you.

You have heard that it was said, "You shall love your neighbor and hate your enemy." (4) But I say to you, Love your enemies and pray for those who persecute you, so that you may be children of your Father in heaven; for he makes his sun rise on the evil and on the good, and sends rain on the righteous and on the unrighteous. For if you love those who love you, what reward do you have? Do not even the tax collectors do the same? (5) And if you greet only your brothers and sisters, what more are you doing than others? Do not even the Gentiles (6) do the same? Be perfect, therefore, as your heavenly Father is perfect." (7)

(2) This statement is so strong, seeming to leave no room for police, judges, or even self-defense, that some scholars have argued that it must envision a very near end of the world. In that case, civil society need not be maintained because all will shortly be judged by God. A more traditional view applies Paul's theory that salvation by works (good deeds) is literally impossible. These commandments would then be uttered because they are impossible to obey, in order to force the hearer to accept that only faith can save.

(3) This commandment has been explained by some as an extension of the much-resented Roman law which required subjects to carry the spear and shield of a soldier for one mile whenever requested. The early church was anxious to avoid any appearance of being hostile to Rome, unlike the Jews who rebelled against the imperial government. "Going the second mile" has come to be a popular expression for making an extra effort.

(4) This saying occurs nowhere in the Hebrew Bible. It may be simply an expression of popular attitudes.

(5) Tax collectors were hated representatives of Rome, all the more so because their income depended on charging taxpayers more than was actually due the central government.

~ 39 ~
(6) Non-Jews.

(7) With the exception of some saints, few Christians
have taken this commandment literally, seeing in it
an inconsistency with Paul's doctrine of original sin.

Jewish law, of course, expected perfection in that
the worshipper was supposed to be able to observe
all of God's law without superhuman efforts.

Paul on marriage vs. celibacy

The meaning of Paul's teachings on women and marriage has been the subject of endless controversy,
particularly in modern times. Some have argued that Paul believed that the world was about to come to
an end and that there was therefore no need to continue marrying and begetting children. Yet elsewhere
Paul seems to be anxious to avoid the extreme asceticism of some contemporary religious thinkers. He
has been called an anti-feminist and a proto-feminist. The Catholic Church has embraced both the
concept of celibacy (for priests and nuns) and encouraged reproduction (among lay people).

What arguments does Paul use against marriage? What does he say are reasons one should get
married?

1 Corinthians 7: 25-31, 36-40)

Now concerning virgins, I have no command of
the Lord, but I give my opinion as one who by
the Lord's mercy is trustworthy. I think that, in
view of the impending crisis, it is well for you to
remain as you are. Are you bound to a wife? Do
not seek to be free. Are you free from a wife?
Do not seek a wife. But if you marry, you do not
sin, and if a virgin marries, she does not sin. Yet
those who marry will experience distress in this
life, and I would spare you that. I mean,
brothers and sisters, the appointed time has
grown short; from now on, let even those who
have wives be as though they had none, and
those who mourn as though they were not
mournning, and those who rejoice as though
they were not rejoicing, and those who buy as
though they had no possessions, and those who
deal with the world as thought they had no
dealings with it. For the present form of this
world is passing away. . . .

If anyone thinks that he is not behaving
properly toward his fiancée, if his passions are
strong, and so it has to be, let him marry as he
wishes; it is no sin. Let them marry. But if
someone stands firm in his resolve, being under
no necessity but having his own desire under
control, and has determined in his own mind to
keep her as his fiancée, he will do well. So then,
he who marries his fiancée does well; and he
who refrains from marriage will do better.

A wife is bound as long as her husband lives.
But if the husband dies, she is free to marry
anyone she wishes, only in the Lord. But in my
judgment she is more blessed if she remains as
she is.
Post – Classical (600 C.E. to 1450 C.E.)

Major Developments

1) Questions of periodization
   A) Nature and causes of changes in the world history framework leading up to 600 C.E. – 1450 as a period
   B) Emergence of new empires and political systems
   C) Continuities and breaks within the period (e.g., the impact of the Mongols on international contacts and on specific societies)

2) The Islamic world
   A) The rise and role of Dar al-Islam as a unifying cultural and economic force in Eurasia and Africa
   B) Islamic political structures, notably the caliphate
   C) Arts, sciences, and technologies

3) Interregional networks and contacts
   A) Development and shifts in interregional trade, technology, and cultural exchange
   B) Trans-Saharan trade
   C) Indian Ocean trade
   D) Silk routes
   E) Missionary outreach of major religions
   F) Contacts between major religions, e.g., Islam and Buddhism, Christianity and Islam
   G) Impact of the Mongol empires

4) Political systems and cultural patterns
   A) East Asia
      1) China’s expansion
      2) Chinese influence on surrounding areas and its limits
      3) Changes and continuities in Confucianism
   B) The Americas
      1) Apex and decline of the Maya
      2) Rise of the Aztec
      3) Rise of the Inca
   C) Restructuring of Europe
      1) Decentralization - Medieval society
      2) Division of Christianity
      3) Revival of Cities

5) Africa
   A) Sudanic Empires (Mali, Ghana, Songhay)
   B) Swahili coast

6) South Asia and Southeast Asia
   A) Delhi Sultanate
   B) Vietnam

7) Arts, sciences, and technologies
   A) Demographic and environmental changes
   B) Impact of nomadic migrations on Afro-Eurasia and the Americas (e.g., Aztecs, Mongols, Turks, Vikings, and Arabs)
   C) Consequences of plague pandemics in the fourteenth century
   D) Growth and role of cities

8) Diverse interpretations
   A) What are the issues involved in using cultural areas rather than states as units of analysis?
   B) What are the sources of change: nomadic migrations versus urban growth?
   C) Was there a world economic network in this period?
   D) Were there common patterns in the new opportunities available to and constraints placed on elite women in this period?
   E) To what extent was Dar-al-Islam a unified cultural/political entity?

Major Comparisons and Snapshots

~ 41 ~
Sung (Song) China: Imperial Examination System

One of the unique features of the imperial government of China was the imperial examination system. Through it, the Chinese government recruited the members of its bureaucracy from the general populace, rather than leaving the imperial administration to the hereditary nobles. This system evolved gradually, starting in the second century B.C. during the former Han dynasty (206 B.C.-A.D. 8), becoming more elaborate and institutionalized during the early part of the Sung [Song] dynasty (960–1279), and continuing with only slight modifications down to the early years of this century. The last imperial examinations were held in 1905.

Millions of young men in China during the imperial period invested their time, energy, money, and passion in an effort to pass the examination, since this was the road to power and wealth. Aspirants for imperial bureaucratic posts usually spent ten or more years preparing for the examination, primarily by reading, analyzing, and memorizing the voluminous Confucian classics. During the Sung period, prospective candidates for imperial administrative posts were expected to pass three levels of highly competitive examinations—prefectural, metropolitan, and palace—and attain the Presented Scholar (Chin-shih [Jinshi]) degree, which was the most coveted degree, roughly comparable to a Ph.D. in the West. The candidates in the palace examination were ranked in order of their achievements in the examination. The higher the rank the candidates achieved, the better the chances were that they would receive more powerful and prestigious imperial appointments. The candidate for the Chin-shih degree was required to produce, among other things, poems in various styles, a rhyme prose piece, a policy essay, answers to five policy questions, and answers to ten “written elucidation” questions on Confucian classics such as the Spring and Autumn Annals and the Book of Rites. The following selection is an example of an essay question on policy matters.

Questions:

1. What do you think are the merits and demerits of the Chinese imperial examination system?

2. How does this system compare with the way the Ottoman Empire recruited Janissaries?

It is stated in the Book of Kuan-tzu [Guan Zi]:

“the method by which a sage rules the world is this: he does not let the four classes of people live together. Therefore, there are no complaints, and things run smoothly. As a result, scholars know how to spend their leisure, laborers abide with the orders of officials, merchants go to the marketplaces and farmers go to the fields. Everyone goes to his appropriate place and lives there satisfactorily. Young children are sent to study; their wills are satisfied and they do not change their minds when they see strange things.” The Kuan-tzu Book further states: “Children of scholars and farmers must always be scholars and farmers and children of merchants and laborers must also always be merchants and laborers, so that a scholar can give instructions and take care of
his proper status, and a farmer can work attentively in cultivating his crops to feed the people. Everyone is satisfied with his occupation and does not seek to change. This is truly good! Otherwise, hundreds of laborers might all go to the marketplaces and ten thousand merchants might all try to work in the same [most profitable] business; they would all become cunning, deceitful, eager to play tricks, and they would also become capricious, greedy and seek only profits.”

Now, to fit people in their occupations is not to improve morals. To see something better and change—what harm is there in this? Take the example of Tuan-mu [Duanmu] who became a merchant [after being a disciple of Confucius], Chiao Li [Jiao Li] who became a fisherman [after being an important official] and Wang Meng who went to sell dust-baskets [after being a prime minister]; these men responded to their times and changed in myriad ways, why should they have been restricted to their fixed occupations? Similarly, Huang Hsien [Huang Xian] was originally a lowly veterinarian, Sang Hung-yang [Sang Hongyang] a merchant, Sun Shu-aO a wood-cutter, and yet they all were able to preserve their intelligence and help strengthen their states. How can we accuse them of responding to their times and of going to take up responsibilities other than their own occupations! We now have a regulation keeping the descendants of those in despised occupations from taking the civil service examinations. Although this rule has been in force for some time, I consider that it still is a good time to examine this regulation. You candidates have excelled yourselves in knowledge of the past, and in debating various problems; I would like you to spend time considering the issue I have just outlined above.

1. Kuan-tzu or Master Kuan [Guan], who lived in the middle of the seventh century B.C., is regarded in Chinese history as one of the most innovative government reformers in ancient China. He was a great supporter of a centralized form of government.

**The Tang Dynasty (618–907): The Art of Government**

*In the following document, Tang Daizong, a founder of the Tang dynasty, set the tone for his new administration to his chosen officials. His emphasis on honesty and open communication contrasts the single-minded and obsessive rule of the former Sui dynasty.*

**Questions:**

1. What mistakes did Sui Wenti make?

2. What were the responsibilities of Tang government officials?

*Source: Reprinted with the permission of Scribner, a Division of Simon & Schuster, Inc., from The Civilization of China, translated by Dun J. Li. Copyright © 1975 by Dun J. Li.*
TANG DAIZONG

Different people are bound to have different opinions; the important thing is that differences in opinion should not degenerate into personal antagonism. Sometimes to avoid the possibility of creating personal grievances or causing embarrassment to a colleague, an official might decide to go ahead with the implementation of a policy even though he knows that the policy is wrong. Let us remember that preservation of a colleague’s prestige, or the avoidance of embarrassment to him, cannot be compared with the welfare of the nation in importance, and to place personal consideration above the wellbeing of the multitude will lead to defeat for the government as a whole. I want all of you to understand this point and act accordingly.

During the Sui dynasty, all officials, in the central as well as the local governments, adopted an attitude of conformity to the general trend in order to be amiable and agreeable with one another. The result was disaster as all of you well know. Most of them did not understand the importance of dissent and comforted themselves by saying that as long as they did not disagree, they could forestall harm to themselves that might otherwise cross their path. When the government, as well as their families, finally collapsed in a massive upheaval, they were severely but justifiably criticized by their contemporaries for their complacency and inertia, even if they themselves may have been fortunate enough to escape death through a combination of circumstances. This is the reason that I want all of you to place public welfare above private interest and hold steadfastly the principle of righteousness, so that all problems, whatever they are, will be resolved in such a way as to bring about a most beneficial result. Under no circumstances are you allowed to agree with one another for the sake of agreement.

As for Sui Wenti, I would say that he was politically inquisitive, but mentally closed. Being close-minded, he could not see truth even if it were spotlighted for him; being over inquisitive, he was suspicious even when there was no valid reason for his suspicion. He rose to power by trampling on the rights of orphans and widows and was consequently not so sure that he had the unanimous support of his own ministers. Being suspicious of his own ministers, he naturally did not trust them and had to make a decision on every matter himself. He became a hard worker out of necessity and, having overworked, could not make the right decision every time. Knowing the kind of man he was, all his ministers, including the prime minister, did not speak as candidly as they should have and unanimously uttered “Yes, sir” when they should have registered strong dissent.

I want all of you to know that I am different. The empire is large and its population enormous. There are thousands of matters to be taken care of, each of which has to be closely coordinated with the others in order to bring about maximum benefit. Each matter must be thoroughly investigated and thought out before a recommendation is submitted to the prime minister, who, having consulted all the men knowledgeable in this matter, will then present the commendation, modified if necessary, to the emperor for approval and implementation. It is impossible for one person, however intelligent and capable, to be able to make wise decisions by himself. . . .

I want all of you to know that whenever an imperial decree is handed down you should carefully study its content and decide for

~ 44 ~
Post – Classical (600 C.E. to 1450 C.E.)

yourselves whether all or part of it is or is not wise or feasible. If you have any reservations, postpone the enforcement and petition me immediately. You can do no less as my loyal ministers.

Governing a country is like taking care of a patient. The better the patient feels, the more he should be looked after, lest in a moment of complacency and neglect one irrevocably reverse the recovery process and send him to death. Likewise, when a country has only recently recovered from chaos and war, those responsible for running the country should be extremely diligent in their work, for false pride and self-indulgence will inevitably return the country to where it used to be and perhaps make it worse.

I realize that the safety of this nation relies to a great extent on what I can or may do and consequently I have not relaxed for a moment in doing the best I can. But I cannot do it alone. You gentlemen are my eyes and ears, legs and arms, and should do your best to assist me. If anything goes wrong anywhere in the empire, you should let me know immediately. If there is less than total trust between you and me and consequently you and I cannot do the best we can, the nation will suffer enormous damage.

Japanese Creation Myth (712 CE)

From Genji Shibukawa: Tales from the Kojiki

The following is a modern retelling of the creation story from the Kojiki, Japan’s oldest chronicle, compiled in 712 CE by O No Yasumaro. This version is easier for the modern reader to understand than the original, but its essential features are preserved. The quest for Izanami in the underworld is reminiscent of the Greek demigod Orpheus’ quest in Hades for his wife, Euridice, and even more of the Sumerian myth of the descent of Innana to the underworld.

How does this story reflect the sense of its creators that Japan is the most important place in the world?

The Beginning of the World

Before the heavens and the earth came into existence, all was a chaos, unimaginably limitless and without definite shape or form. Eon followed eon: then, lo! out of this boundless, shapeless mass something light and transparent rose up and formed the heaven. This was the Plain of High Heaven, in which materialized a deity called Ame-no-Minaka-Nushi-no-Mikoto (the Deity-of-the-August-Center-of-Heaven). Next the heavens gave birth to a deity named Takami-Musubi-no-Mikoto (the High-August-Producing-Wondrous-Deity), followed by a third called Kami-Musubi-no-Mikoto (the Divine-Producing-Wondrous-Deity).

These three divine beings are called the Three Creating Deities.

In the meantime what was heavy and opaque in the void gradually precipitated and became the earth, but it had taken an immeasurably long time before it condensed sufficiently to form solid ground. In its earliest stages, for millions and millions of years, the earth may be said to have resembled oil floating, medusa-like, upon the face of the waters. Suddenly like the sprouting up of a reed, a pair of immortals were born from its bosom. These were the Deity Umashi-Ashi-Kahibi-Hikoji-no-Mikoto (the Pleasant-Reed-Shoot-Prince-Elder-Deity) and
the Deity Ame-no-Tokotachi-no-Mikoto (The Heavenly-Eternally-Standing-Deity). . . .

Many gods were thus born in succession, and so they increased in number, but as long as the world remained in a chaotic state, there was nothing for them to do. Whereupon, all the Heavenly deities summoned the two divine beings, Izanagi and Izanami, and bade them descend to the nebulous place, and by helping each other, to consolidate it into terra firma. "We bestow on you," they said, "this precious treasure, with which to rule the land, the creation of which we command you to perform." So saying they handed them a spear called Ama-no-Nuboko, embellished with costly gems. The divine couple received respectfully and ceremoniously the sacred weapon and then withdrew from the presence of the Deities, ready to perform their august commission. Proceeding forthwith to the Floating Bridge of Heaven, which lay between the heaven and the earth, they stood awhile to gaze on that which lay below. What they beheld was a world not yet condensed, but looking like a sea of filmy fog floating to and fro in the air, exhaling the while an inexpressibly fragrant odor. They were, at first, perplexed just how and where to start, but at length Izanagi suggested to his companion that they should try the effect of stirring up the brine with their spear. So saying he pushed down the jeweled shaft and found that it touched something. Then drawing it up, he examined it and observed that the great drops which fell from it almost immediately coagulated into an island, which is, to this day, the Island of Onokoro. Delighted at the result, the two deities descended forthwith from the Floating Bridge to reach the miraculously created island. In this island they thenceforth dwelt and made it the basis of their subsequent task of creating a country. Then wishing to become espoused, they erected in the center of the island a pillar, the Heavenly August Pillar, and built around it a great palace called the Hall of Eight Fathoms. Thereupon the male Deity turning to the left and the female Deity to the right, each went round the pillar in opposite directions. When they again met each other on the further side of the pillar, Izanami, the female Deity, speaking first, exclaimed: "How delightful it is to meet so handsome a youth!" To which Izanagi, the male Deity, replied: "How delightful I am to have fallen in with such a lovely maiden!" After having spoken thus, the male Deity said that it was not in order that woman should anticipate man in a greeting. Nevertheless, they fell into connubial relationship, having been instructed by two wagtails which flew to the spot. Presently the Goddess bore her divine consort a son, but the baby was weak and boneless as a leech. Disgusted with it, they abandoned it on the waters, putting it in a boat made of reeds. Their second offspring was as disappointing as the first. The two Deities, now sorely disappointed at their failure and full of misgivings, ascended to Heaven to inquire of the Heavenly Deities the causes of their misfortunes. The latter performed the ceremony of divining and said to them: "It is the woman's fault. In turning round the Pillar, it was not right and proper that the female Deity should in speaking have taken precedence of the male. That is the reason."

The two Deities saw the truth of this divine suggestion, and made up their minds to rectify the error. So, returning to the earth again, they went once more around the Heavenly Pillar. This time Izanagi spoke first saying: "How delightful to meet so beautiful a maiden!" "How happy I am," responded Izanami, "that I should meet such a handsome youth!" This process was more appropriate and in accordance with the law of nature. After this, all the children born to them left nothing to be desired. First, the island of Awaji was born, next, Shikoku, then, the island of Oki, followed by Kyushu; after that, the island Tsushima came into being, and lastly, Honshu, the main island of Japan. The name of Oyashi- ma-kuni (the Country of the Eight Great Islands) was given to these eight islands. After this, the two Deities became the parents of numerous smaller islands destined to surround the larger ones.
The Birth of the Deities

Having, thus, made a country from what had formerly been no more than a mere floating mass, the two Deities, Izanagi and Izanami, about begetting those deities destined to preside over the land, sea, mountains, rivers, trees, and herbs. Their first-born proved to be the sea-god, Owatatsumi-no-Kami. Next they gave birth to the patron gods of harbors, the male deity Kamihaya-akitsu-hiko having control of the land and the goddess Haya-akitsu-hime having control of the sea. These two latter deities subsequently gave birth to eight other gods.

Next Izanagi and Izanami gave birth to the wind-deity, Kami-Shinatsuhiko-no-Mikoto. At the moment of his birth, his breath was so potent that the clouds and mists, which had hung over the earth from the beginning of time, were immediately dispersed. In consequence, every corner of the world was filled with brightness. Kukunochi-no-Kami, the deity of trees, was the next to be born, followed by Oyamatsumi-no-Kami, the deity of mountains, and Kayanuhime-no-Kami, the goddess of the plains. . . .

The process of procreation had, so far, gone on happily, but at the birth of Kagutsuchi-no-Kami, the deity of fire, an unseen misfortune befell the divine mother, Izanami. During the course of her confinement, the goddess was so severely burned by the flaming child that she swooned away. Her divine consort, deeply alarmed, did all in his power to resuscitate her, but although he succeeded in restoring her to consciousness, her appetite had completely gone. Izanagi, thereupon and with the utmost loving care, prepared for her delectation various tasty dishes, but all to no avail, because whatever she swallowed was almost immediately rejected. It was in this wise that occurred the greatest miracle of all. From her mouth sprang Kanayama-biko and Kanayama-hime, respectively the god and goddess of metals, whilst from other parts of her body issued forth Haniyasu-hiko and Haniyasu-hime, respectively the god and goddess of earth.

Before making her "divine retirement," which marks the end of her earthly career, in a manner almost unspeakably miraculous she gave birth to her last-born, the goddess Mizuhame-no-Mikoto. Her demise marks the intrusion of death into the world. Similarly the corruption of her body and the grief occasioned by her death were each the first of their kind.

By the death of his faithful spouse Izanagi was now quite alone in the world. In conjunction with her, and in accordance with the instructions of the Heavenly Gods, he had created and consolidated the Island Empire of Japan. In the fulfillment of their divine mission, he and his heavenly spouse had lived an ideal life of mutual love and cooperation. It is only natural, therefore, that her death should have dealt him a truly mortal blow.

He threw himself upon her prostrate form, crying: "Oh, my dearest wife, why art thou gone, to leave me thus alone? How could I ever exchange thee for even one child? Come back for the sake of the world, in which there still remains so much for both us twain to do." In a fit of uncontrollable grief, he stood sobbing at the head of the bier. His hot tears fell like hailstones, and lo! out of the tear-drops was born a beauteous babe, the goddess Nakisawame-no-Mikoto. In deep astonishment he stayed his tears, a gazed in wonder at the new-born child, but soon his tears returned only to fall faster than before. It was thus that a sudden change came over his state of mind. With bitter wrath, his eyes fell upon the infant god of fire, whose birth had proved so fatal to his mother. He drew his sword, Totsuka-natsurugi, and crying in his wrath, "Thou hateful matricide," decapitated his fiery offspring. Up shot a crimson spout of blood. Out of the sword and blood together arose eight strong and gallant deities. "What! more children?" cried Izanagi, much astounded at their sudden appearance, but the very next moment, what should he see but eight more deities born from
the lifeless body of the infant firegod! They came out from the various parts of the body,—head, breast, stomach, hands, feet, and navel, and, to add to his astonishment, all of them were glaring fiercely at him. Altogether stupefied he surveyed the new arrivals one after another.

Meanwhile Izanami, for whom her divine husband pined so bitterly, had quitted this world for good and all and gone to the Land of Hades.

---

**Izanagi's Visit to the Land of Hades**

As for the Deity Izanagi, who had now become a widower, the presence of so many offspring might have, to some extent, beguiled and solaced him, and yet when he remembered how faithful his departed spouse had been to him, he would yearn for her again, his heart swollen with sorrow and his eyes filled with tears. In this mood, sitting up alone at midnight, he would call her name aloud again and again, regardless of the fact that he could hope for no response. His own piteous cries merely echoed back from the walls of his chamber.

Unable any longer to bear his grief, he resolved to go down to the Nether Regions in order to seek for Izanami and bring her back, at all costs, to the world. He started on his long and dubious journey. Many millions of miles separated the earth from the Lower Regions and there were countless steep and dangerous places to be negotiated, but Izanagi's indomitable determination to recover his wife enabled him finally to overcome all these difficulties. At length he succeeded in arriving at his destination. Far ahead of him, he espied a large castle. "That, no doubt," he mused in delight, "may be where she resides."

Summoning up all his courage, he approached the main entrance of the castle. Here he saw a number of gigantic demons, some red some black, guarding the gates with watchful eyes. He retraced his steps in alarm, and stole round to a gate at the rear of the castle. He found, to his great joy, that it was apparently left unwatched. He crept warily through the gate and peered into the interior of the castle, when he immediately caught sight of his wife standing at the gate at an inner court. The delighted Deity loudly called her name. "Why! There is someone calling me," sighed Izanami-no-Mikoto, and raising her beautiful head, she looked around her. What was her amazement but to see her beloved husband standing by the gate and gazing at her intently! He had, in fact, been in her thoughts no less constantly than she in his. With a heart leaping with joy, she approached him. He grasped her hands tenderly and murmured in deep and earnest tones: "My darling, I have come to take thee back to the world. Come back, I pray thee, and let us complete our work of creation in accordance with the will of the Heavenly Gods,—our work which was left only half accomplished by thy departure. How can I do this work without thee? Thy loss means to me the loss of all." This appeal came from the depth of his heart. The goddess sympathized with him most deeply, but answered with tender grief: "Alas! Thou hast come too late. I have already eaten of the furnace of Hades. Having once eaten the things of this land, it is impossible for me to come back to the world." So saying, she lowered her head in deep despair.

"Nay, I must entreat thee to come back. Canst not thou find some means by which this can be accomplished?" exclaimed her husband, drawing nearer to her. After some reflection, she replied: "Thou hast come a very, very long way for my sake. How much I appreciate thy devotion! I wish, with all my heart, to go back with thee, but before I can do so, I must first obtain the permission of the deities of Hades. Wait here till my return, but remember that thou must not on any account look inside the castle in the meantime." I swear I will do as thou biddest," quoth Izanagi, "but tarry not in thy quest." With implicit confidence in her
husband's pledge, the goddess disappeared into the castle.

Izanagi observed strictly her injunction. He remained where he stood, and waited impatiently for his wife's return. Probably to his impatient mind, a single heart-beat may have seemed an age. He waited and waited, but no shadow of his wife appeared. The day gradually wore on and waned away, darkness was about to fall, and a strange unearthly wind began to strike his face. Brave as he was, he was seized with an uncanny feeling of apprehension. Forgetting the vow he had made to the goddess, he broke off one of the teeth of the comb which he was wearing in the left bunch of his hair, and having lighted it, he crept in softly and- glanced around him. To his horror he found Izanagi lying dead in a room: and lo! a ghastly change had come over her. She, who had been so dazzlingly beautiful, was now become naught but a rotting corpse, in an advanced stage of decomposition. Now, an even more horrible sight met his gaze; the Fire Thunder dwelt in her, head, the Black Thunder in her belly, the Rending-Thunder in her abdomen, the Young Thunder in her left hand, the Earth-Thunder in her right hand, the Rumbling-Thunder in her left foot, and the Couchant Thunder in her right foot:--altogether eight Thunder-Deities had been born and were dwelling there, attached to her remains and belching forth flames from their mouths. Izanagito-Mikoto was so thoroughly alarmed at the sight, that he dropped the light and took to his heels. The sound he made awakened Izanami from her death-like slumber. For sooth!" she cried: "he must have seen me in this revolting state. He has put me to shame and has broken his solemn vow. Unfaithful wretch! I'll make him suffer, for his perfidy."

Then turning to the Hags of Hades, who attended her, she commanded them to give chase to him. At her word, an army of female demons ran after the Deity.

**Prince Otsu (663-86) and Lady Ishikawa**

In the classical age much of the verse was occasional poetry, and poetic exchanges were a necessary part of courtship. In this exchange the Lady Ishikawa has taken Prince Otsu's poem and cleverly rearranged it. She repeats in the forth line what Prince Otsu has repeated in lines two and five of his poem.

How does Lady Ishakawa turn Prince Otsu's complaint at having been stood up into a compliment which reassures him of her continuing love?

 Prince Shotoku’s Seventeen Article Constitution

During the reign of the Japanese Empress Suiko, the true power behind the throne and chief administrator was her nephew, Prince Shotoku (574–622 B.C.E.). Japan was just recovering from a bitter and sometimes bloody power struggle between court traditionalists and nobles like Shotoku, who desired to reform the government along the lines of Chinese administrative methods morally buttressed with Buddhist precepts. The main purpose was, of course, to centralize and bureaucratize authority along Chinese Confucian lines, but the idea of a moral responsibility was stated explicitly.

Questions:

1. Which element of the “Seventeen Articles is the more dominant, the political or the ethical? Why?

2. What particular areas of deficiency of the old system does Shotoku imply are in need of reform?

3. Are there passages that seem to express sympathy for, and a wish to alleviate the burden of, ordinary people? Explain.

12th year [604], Summer, 4th month, 3rd day. The Prince Imperial in person prepared for the first time laws. There were seventeen clauses, as follows:

I. Harmony is to be valued and an avoidance of wanton opposition to be honored. All men are influenced by partisanship, and there are few who are intelligent. Hence there are some who disobey their lords and fathers, or who maintain feuds with the neighboring villages. But when those above are harmonious and those below are friendly, and there is concord in the discussion of business, right views of things spontaneously gain acceptance. Then what is there which cannot be accomplished?

II. Sincerely reverence the three treasures. The three treasures, viz. Buddha, the Law, and the Monastic orders, are the final refuge of the four generated beings, and are the supreme objects of faith in all countries. Few men are utterly bad. They may be taught to follow it. But if they do not betake them to the three treasures, wherewithal shall their crookedness be made straight?

III. When you receive the imperial commands, fail not scrupulously to obey them. The lord is Heaven, the vassal is Earth. Heaven overspreads, and Earth upbears. When this is so, the four seasons follow their due course, and the powers of Nature obtain their efficacy. If the Earth attempted to overspread, Heaven would simply fall in ruin. Therefore is it that when the lord speaks, the vassal listens; when the superior acts, the inferior yields compliance. Consequently when you receive the imperial commands, fail not to carry them out scrupulously. Let there be a want of care in this matter, and ruin is the natural consequence.

IV. The ministers and functionaries should make decorous behavior their leading principle, for the leading principle of the government of the people consists in decorous behavior. If the
superiors do not behave with decorum, the inferiors are disorderly: if inferiors are wanting in proper behavior, there must necessarily be offenses. Therefore it is that when lord and vassal behave with decorum, the distinctions of rank are not confused: when the people behave with decorum, the government of the commonwealth proceeds of itself.

V. Ceasing from gluttony and abandoning covetous desires, deal impartially with the suits which are submitted to you. Of complaints brought by the people there are a thousand in one day. If in one day there are so many, how many will there be in a series of years? If the man who is to decide suits at law makes gain his ordinary motive, and hears cases with a view to receiving bribes, then will the suits of the rich man be like a stone flung into water, while the plaints of the poor will resemble water cast upon a stone. Under these circumstances the poor man will not know whither to betake himself. Here too there is a deficiency in the duty of the minister.

VI. Chastise that which is evil and encourage that which is good. This was the excellent rule of antiquity. Conceal not, therefore, the good qualities of others, and fail not to correct that which is wrong when you see it. Flatterers and deceivers are a sharp weapon for the overthrow of the State, and a pointed sword for the destruction of the people. Sycophants are also fond, when they meet, of dilating to their superiors on the errors of their inferiors; to their inferiors, they censure the faults of their superiors. Men of this kind are all wanting in fidelity to their lord, and in benevolence towards the people. From such an origin great civil disturbances arise.

VII. Let every man have his own charge, and let not the spheres of duty be confused. When wise men are entrusted with office, the sound of praise arises. If unprincipled men hold office, disasters and tumults are multiplied. In this world, few are born with knowledge: wisdom is the product of earnest meditation. In all things, whether great or small, find the right man, and they will surely be well managed: on all occasions, be they urgent or the reverse, meet but with a wise man, and they will of themselves be amenable. In this way will the State be lasting and the Temples of the Earth and of Grain will be free from danger. Therefore did the wise sovereigns of antiquity seek the man to fill the office, and not the office for the sake of the man.

VIII. Let the ministers and functionaries attend the court early in the morning, and retire late. The business of the State does not admit of remissness, and the whole day is hardly enough for its accomplishment. If, therefore, the attendance at court is late, emergencies cannot be met: if officials retire soon, the work cannot be completed.

IX. Good faith is the foundation of right. In everything let there be good faith, for in it there surely consists the good and the bad, success and failure. If the lord and the vassal observe good faith one with another, what is there which cannot be accomplished? If the lord and the vassal do not observe good faith towards one another, everything without exception ends in failure.

X. Let us cease from wrath, and refrain from angry looks. Nor let us be resentful when others differ from us. For all men have hearts, and each heart has its own leanings. Their right is our wrong, and our right is their wrong. We are not unquestionably sages, nor are they unquestionably fools. Both of us are simply ordinary men. How can any one lay down a rule
Post – Classical (600 C.E. to 1450 C.E.)

by which to distinguish right from wrong? For we are all, one with another, wise and foolish, like a ring which has no end. Therefore, although others give way to anger, let us on the contrary dread our own faults, and though we alone may be in the right, let us follow the multitude and act like them.

XI. Give clear appreciation to merit and demerit, and deal out to each its sure reward or punishment. In these days, reward does not attend upon merit, nor punishment upon crime. Ye high functionaries who have charge of public affairs, let it be your task to make clear rewards and punishments.

XII. Let not the provincial authorities or the Kuni no Miyakko levy exaction on the people. In a country there are not two lords; the people have not two masters. The sovereign is the master of the people of the whole country. The officials to whom he gives charge are all his vassals. How can they, as well as the Government, presume to levy taxes on the people?

XIII. Let all persons entrusted with office attend equally to their functions. Owing to their illness or to their being sent on missions, their work may sometimes be neglected. But whenever they become able to attend to business, let them be as accommodating as if they had had cognizance of it from before, and not hinder public affairs on the score of their not having had to do with them.

XIV. Ye ministers and functionaries! Be not envious. For if we envy others, they in turn will envy us. The evils of envy know no limit. If others excel us in intelligence, it gives us no pleasure; if they surpass us in ability, we are envious. Therefore it is not until after a lapse of five hundred years that we at last meet with a wise man, and even in a thousand years we hardly obtain one sage. But if we do not find wise men and sages, wherewithal shall the country be governed?

XV. To turn away from that which is private, and to set our faces towards that which is public—this is the path of a minister. Now if a man is influenced by private motives, he will assuredly eel resentments, and if he is influenced by resentful feelings, he will assuredly fail to act harmoniously with others. If he fails to act harmoniously with others, he will assuredly sacrifice the public interests to his private feelings. When resentment arises, it interferes with order, and is subversive of law. Therefore in the first clause it was said, that superiors and inferiors should agree together. The purport is the same as this.

XVI. Let the people be employed [in forced labor] at seasonable times. This is an ancient and excellent rule. Let them be employed, therefore, in the winter months, when they are at leisure. But from Spring to Autumn, when they are engaged in agriculture or with the mulberry trees, the people should not be so employed. For if they do not attend to agriculture, what will they have to eat? if they do not attend to the mulberry trees, what will they do for clothing?

XVII. Decisions on important matters should not be made by one person alone. They should be discussed with many. But small matters are of less consequence. It is unnecessary to consult a number of people. It is only in the case of the discussion of weighty affairs, when there is a suspicion that they may miscarry, that one should arrange matters in concert with others, so as to arrive at the right conclusion.
Examples of Filial Piety (14th Century CE)

According to Chinese tradition, filial piety (hsiao) was the primary duty of all Chinese. Being a filial son meant complete obedience to one's parents during their lifetime and—as they grew older—taking the best possible care of them. After their death the eldest son was required to perform ritual sacrifices at their grave site or in the ancestral temple. A son could also express his devotion to his parents by passing the Civil Service examinations, winning prestige for the whole family. Most important of all, a son had to make sure that the family line would be continued. Dying without a son therefore was one of the worst offenses against the concept of filial piety. If a marriage remained barren, it was a son's duty to take a second wife or adopt a child in order to continue the family. Since Chinese women became part of their husband's family through marriage, filial conduct for a woman meant faithfully serving her in-laws, in particular her mother-in-law, and giving birth to a son. By fulfilling these duties, she also gained prestige for her own family. If the mother and daughter-in-law did not get along, filial piety demanded that a man should get rid of his wife in order to please his mother. He could always get another wife, but he would only have one mother. While continuing the family line was probably the most important issue for the vast majority of the Chinese, Buddhist monks and nuns were required to remain celibate. Their refusal to fulfill the obligations of filial piety made them suspect in the eyes of other Chinese. Along with the eunuchs at the emperor's court and Taoist priests they were often believed to conduct themselves in an immoral or criminal manner.

Stories about exemplary filial conduct abound in Chinese history. The Twenty-Four Examples of Filial Piety (Er-shih-ssu hsiao) were chosen and compiled by Kuo Chü-ching during the Yuan Dynasty (1280-1368 CE) while he was mourning the death of his father. Other collections followed. Even today, these stories form an important part of Chinese folklore. You may be surprised at how brief these stories are and how little background is given. Two reasons may explain this: On the one hand, everyone was so familiar with the heroes of these examples that it was unnecessary to give any details about their lives. On the other hand, brevity is considered to be good style in the classic Chinese tradition.

Choose a western fairy tale which involves children's relationship to their parents and compare the attitudes in that tale with the attitudes expressed here. What strikes you as familiar? Where do you see differences?

**Freezing in a Thin Coat in Obedience to His Stepmother**

Min Tzu-chien had lost his mother at a young age. His father remarried and had two more sons with his second wife. She always dressed her own sons in thickly padded robes. But to her stepson she gave only a thin coat padded with cattails (instead of cotton). One winter day, when Min Tzu-chien was told to hold the reins of his father's cart, he was shivering so badly that he dropped the reins. This way his father found out that his wife dressed his oldest son very poorly. In his rage he decided to dismiss his second wife. But Min Tzu-chien said:

"If she stays, one son will be freezing. But if she leaves, all three sons will suffer from the cold."

When his stepmother heard this, she changed her attitude towards Min Tzu-chien.

**Allowing Mosquitoes to Feast on His Blood**

During the Chin Dynasty (4th-5th Century CE), a boy named [Wu Meng](1) was already serving his parents in exemplary filial piety although he was just eight years old. The family was so poor that they could not even afford a gauze net against the mosquitoes. Therefore every night in the summer swarms of mosquitoes would come and bite them. Wu Meng let them all

~ 53 ~
feast on his naked stomach. Even though there were so many, he did not drive them away. He feared that the mosquitoes, having left him, would instead bite his parents. His heart was truly filled with love for his parents.

Sacrificing His Son for the Sake of His Mother

Kuo Chi, who lived during the Han Dynasty (200 BCE-200 CE) and his family were very poor. He had a three-year-old son. Even though there was little food, Kou Chi's mother would always give part of her share to her grandson so that he did not suffer hunger.

One day Kuo Chi said to his wife, "We are so poor and needy that we cannot give mother enough to eat, and on top of this our son is eating part of mother's share. It were better if we buried our son." He started digging a grave. When he had dug a hole of about three chih [3] he discovered a pot filled with gold and the inscription: "Officials may not take it, people may not steal it."

Wearing Children's Clothes to Amuse His Parents

During the time of the Chou Dynasty (11th-3rd Century BCE), there was a man named Lao Lai-tzu [4] who was by nature extremely filial. He took care of both his parents and provided for them with the choicest delicacies. After he himself turned seventy, he never spoke about his age. He often wore clothes striped in five colors and acted like an infant in front of his parents. He would carry a bowl of water to them, and then stumble on purpose. Lying on the floor he would cry like a little child in order to make his parents laugh.

Crying in the Bamboo-Grove and Making the Bamboo Sprout

During the era of the Three Kingdoms (3rd Century CE) there lived a man named Meng Sung, also known as Meng Chien-wu [6]. He had lost his father during his childhood. When his mother was old and sick she craved fresh bamboo-shoots even though it was winter. Sung had no idea how he could get them. In desperation, he went into a bamboo grove, clasped a bamboo stem and broke into tears. His filial devotion moved heaven and earth and they forced the earth to crack open. Numerous shoots of bamboo came out. Meng Sung carried them home and made them into a soup for his mother. As soon as she had eaten she felt much better.

Cleaning his Mother's Chamberpot

Huang T'ing-chien [7] of the Sung Dynasty, also known as Huang Shan-gu, became a member of the Hanlin academy [8] during the Yuan-Yu reign (1086-1094 CE) [9].

He was by nature extremely filial. Even though he was such an esteemed and famous person, he served his mother with utmost devotion. Every evening he would personally clean his mother's chamber pot. Not a moment passed without his fulfilling his filial duties.

---

(1) According to Chinese tradition, Wu Meng later in life studied black magic and could cross a river without a boat, waving a fan of white feathers over the water. His body did not decompose after death and finally disappeared.
(2) Chinese texts sometimes continue this conversation: "We can always get another son, but it is impossible to get another mother."
(3) One chih is approximately 11 inches long.
(4) Lao Lai-tzu lived during the Spring and Autumn Period (770-476 CE) of the Chou Dynasty and was a native of Ch'u in South-West China. According to Chinese tradition, the king of Ch'u eventually heard of his ability to make people laugh and gave him a post in his court.
(5) In China it is quite unusual even today for both men and women above seventy not to mention their age with pride. In some colloquial
versions of this story it is said that he does not mention his age so that his parents would not be sad and realize that both their son and they themselves might be near death.
(6) Meng Sung eventually became keeper of the imperial fish ponds under the first emperor of the succeeding Chin dynasty.
(7) Huang T'ing-chien (1050-1110 CE) was a well-known poet and calligrapher.

(8) The Hanlin academy was the central institution of learning in Imperial China. This appointment was very prestigious for any scholar.
(9) Upon his ascension to the throne and whenever he considered it beneficial, a Chinese emperor proclaimed a new maxim for his reign. "Yuan yu" means "great protection."

Translated by Lydia Gerber

**Herodotus: The Histories, Book III, c. 430 BCE**

The Arabs keep such pledges more religiously than almost any other people. They plight faith with the forms following. When two men would swear a friendship, they stand on each side of a third: he with a sharp stone makes a cut on the inside of the hand of each near the middle finger, and, taking a piece from their dress, dips it in the blood of each, and moistens therewith seven stones lying in the midst, calling the while on Bacchus and Urania. After this, the man who makes the pledge commends the stranger (or the citizen, if citizen he be) to all his friends, and they deem themselves bound to stand to the engagement. They have but these two gods, to wit, Bacchus and Urania; and they say that in their mode of cutting the hair, they follow Bacchus. Now their practice is to cut it in a ring, away from the temples. Bacchus they call in their language Orothal, and Urania, Allilat. . . . There is a great river in Arabia, called the Corys, which empties itself into the Erythraean sea. The Arabian king, they say, made a pipe of the skins of oxen and other beasts, reaching from this river all the way to the desert, and so brought the water to certain cisterns which he had dug in the desert to receive it. It is a twelve days' journey from the river to this desert tract. And the water, they say, was brought through three different pipes to three separate places. . . . The Arabs brought every year a thousand talents of frankincense. . . .

Arabia is the last of inhabited lands towards the south, and it is the only country which produces frankincense, myrrh, cassia, cinnamon, and laudanum. The Arabians do not get any of these, except the myrrh, without trouble. The frankincense they procure by means of the gum styrax, which the Greeks obtain from the Phoenicians; this they burn, and thereby obtain the spice. For the trees which bear the frankincense are guarded by winged serpents, small in size, and of varied colors, whereof vast numbers hang about every tree. They are of the same kind as the serpents that invade Egypt; and there is nothing but the smoke of the styrax which will drive them from the trees. The Arabians say that the whole world would swarm with these serpents, if they were not kept in check in the way in which I know that vipers Such, then, is the way in which the Arabians obtain their frankincense; their manner of collecting the cassia is the following: They cover all their body and their face with the hides of oxen and other skins, leaving only holes for the eyes, and thus protected go in search of the cassia, which grows in a lake of no great depth. All round the shores and in the lake itself there dwell a number of winged animals, much resembling bats, which screech horribly, and are very valiant. These creatures they must keep from their eyes all the while that they gather the cassia.

Still more wonderful is the mode in which they collect the cinnamon. Where the wood grows, and what country produces it, they cannot tell—only some, following probability, relate that it comes from the country in which Bacchus was brought up. Great birds, they say, bring the
Post – Classical (600 C.E. to 1450 C.E.)

sticks which we Greeks, taking the word from the Phoenicians, call cinnamon, and carry them up into the air to make their nests. These are fastened with a sort of mud to a sheer face of rock, where no foot of man is able to climb. So the Arabians, to get the cinnamon, use the following artifice. They cut all the oxen and asses and beasts of burthen that die in their land into large pieces, which they carry with them into those regions, and Place near the nests: then they withdraw to a distance, and the old birds, swooping down, seize the pieces of meat and fly with them up to their nests; which, not being able to support the weight, break off and fall to the ground. Hereupon the Arabians return and collect the cinnamon, which is afterwards carried from Arabia into other countries.

Concerning the spices of Arabia let no more be said. The whole country is scented with them, and exhales an odor marvelously sweet. There are also in Arabia two kinds of sheep worthy of admiration, the like of which is nowhere else to be seen; the one kind has long tails, not less than three cubits in length, which, if they were allowed to trail on the ground, would be bruised and fall into sores. As it is, all the shepherds know enough of carpentering to make little trucks for their sheep's tails. The trucks are placed under the tails, each sheep having one to himself, and the tails are then tied down upon them. The other kind has a broad tail, which is a cubit across sometimes. are. . . .The Arabians wore the zeira, or long cloak, fastened about them with a girdle; and carried at their right side long bows, which when unstrung bent backwards.

**Yakut: Baghdad under the Abbasids, c. 1000 CE**

[Introduction (adapted from Davis)]

Baghdad "the city of the Arabian nights" was founded in 764 CE. by the Abbasid Caliph Al-Mansur. It was in its prime about 800 CE., during the reign of the famous caliph Harun-al-Rashid. What this city - which represented the crown of Medieval Muslim civilization - resembled, is told by an author who saw Baghdad in its glory.

---

**Yakut: Geographical Encyclopedia:**

The city of Baghdad formed two vast semi-circles on the right and left banks of the Tigris, twelve miles in diameter. The numerous suburbs, covered with parks, gardens, villas and beautiful promenades, and plentifully supplied with rich bazaars, and finely built mosques and baths, stretched for a considerable distance on both sides of the river. In the days of its prosperity the population of Baghdad and its suburbs amounted to over two millions! The palace of the Caliph stood in the midst of a vast park several hours in circumference which beside a menagerie and aviary comprised an inclosure for wild animals reserved for the chase. The palace grounds were laid out with gardens, and adorned with exquisite taste with plants, flowers, and trees, reservoirs and fountains, surrounded by sculptured figures. On this side of the river stood the palaces of the great nobles. Immense streets, none less than forty cubits wide, traversed the city from one end to the other, dividing it into blocks or quarters, each under the control of an overseer or supervisor, who looked after the cleanliness, sanitation and the comfort of the inhabitants.

The water exits both on the north and the south were like the city gates, guarded night and day by relays of soldiers stationed on the watch towers on both sides of the river. Every
Post – Classical (600 C.E. to 1450 C.E.)

household was plentifully supplied with water at all seasons by the numerous aqueducts which intersected the town; and the streets, gardens and parks were regularly swept and watered, and no refuse was allowed to remain within the walls. An immense square in front of the imperial palace was used for reviews, military inspections, tournaments and races; at night the square and the streets were lighted by lamps.

There was also a vast open space where the troops whose barracks lay on the left bank of the river were paraded daily. The long wide estrades at the different gates of the city were used by the citizens for gossip and recreation or for watching the flow of travelers and country folk into the capital. The different nationalities in the capital had each a head officer to represent their interests with the government, and to whom the stranger could appeal for counsel or help.

Baghdad was a veritable City of Palaces, not made of stucco and mortar, but of marble. The buildings were usually of several stories. The palaces and mansions were lavishly gilded and decorated, and hung with beautiful tapestry and hangings of brocade or silk. The rooms were lightly and tastefully furnished with luxurious divans, costly tables, unique Chinese vases and gold and silver ornaments.

Both sides of the river were for miles fronted by the palaces, kiosks, gardens and parks of the grandees and nobles, marble steps led down to the water's edge, and the scene on the river was animated by thousands of gondolas, decked with little flags, dancing like sunbeams on the water,

and carrying the pleasure-seeking Baghdad citizens from one part of the city to the other. Along the wide-stretching quays lay whole fleets at anchor, sea and river craft of all kinds, from the Chinese junk to the old Assyrian raft resting on inflated skins.

The mosques of the city were at once vast in size and remarkably beautiful. There were also in Baghdad numerous colleges of learning, hospitals, infirmaries for both sexes, and lunatic asylums.

The Mongol Khan’s Ultimatum to the Nations of Europe

Contact between the Mongol Empire of Genghis Khan and his successors and Western Europeans was slight, although detachments of the Mongol forces had stationed themselves in Russia at the doorstep of Eastern European states and had gone so far as to raid and devastate parts of Poland and Hungary. These Tartars (as the Mongols were often called) would maintain a lengthy presence in Russia under the designation of “The Golden Horde.” From time to time popes would dispatch emissaries with letters to the Khan. That the Khan was not particularly impressed is made clear in his imperious reply.

Questions:

1. What is the Khan’s response to requests that he be baptized?

2. How does the Khan justify the slaying and seizure of the land of Eastern European Christians?
Post – Classical (600 C.E. to 1450 C.E.)

3. What is the letter’s general tone? What does the Khan command and what consequences does he state could arise from noncompliance?

The Strength of God, the Emperor of all men, to the Great Pope, Authentic and True Letters

Having taken counsel for making peace with us, You Pope and all Christians have sent an envoy to us, as we have heard from him and as your letters declare. Wherefore, if you wish to have peace with us, You Pope and all kings and potentates, in no way delay to come to me to make terms of peace and then you shall hear alike our answer and our will. The contents of your letters stated that we ought to be baptized and become Christians. To this we answer briefly that we do not understand in what way we ought to do this. To the rest of the contents of your letters, viz: that you wonder at so great a slaughter of men, especially of Christians and in particular Poles, Moravians and Hungarians, we reply likewise that this also we do not understand. However, lest we may seem to pass it over in silence altogether, we give you this for our answer.

Because they did not obey the word of God and the command of Chingis Chan and the Chan, but took counsel to slay our envoys, therefore God ordered us to destroy them and gave them up into our hands. For otherwise if God had not done this, what could man do to man? But you men of the West believe that you alone are Christians and despise others. But how can you know to whom God deigns to confer His grace? But we worshipping God have destroyed the whole earth from the East to the West in the power of God. And if this were not the power of God, what could men have done? Therefore if you accept peace and are willing to surrender your fortresses to us, You Pope and Christian princes, in no way delay coming to me to conclude peace and then we shall know that you wish to have peace with us. But if you should not believe our letters and the command of God nor hearken to our counsel then we shall know for certain that you wish to have war. After that we do not know what will happen, God alone knows.

Chingis Chan, first Emperor, second Ochoday Chan, third Cuiuch Chan.

Sa’di: A story about wealth vs. virtue (early 13th Century CE)

Sa’di’s Gulistan (Rose-Garden) is one of the most popular books in the Islamic world. A collection of poems and stories, it is widely quoted as a source of wisdom. A native of Shiraz, he was also the father-in-law of another great Persian writer, Hafiz.

I saw the son of a rich man seated at the head of his father’s sepulcher, and engaged in a dispute with the son of a poor man, and saying, "My father's sarcophagus is of
stone, and the inscription colored with a pavement of alabaster and turquoise bricks. What resemblance has it to that of thy father? which consists of a brick or two huddled together, with a few handfuls of dust sprinkled over it." The son of the poor man heard him, and answered, "Peace! for before thy father can have moved himself under this heavy stone, my sire will have arrived in paradise. This is a saying of the Prophet: 'The death of the poor is repose.'"

**The Qur'an: Call for Jihad**

**Introduction**

*Exiled from their home city of Mecca, Mohammed and the first Muslims found sanctuary in Medina in 622. Determined to get revenge, Mohammed and his supporters led a series of raids to disrupt caravan trade to Mecca. These raids gradually escalated into full-scale warfare between the two cities that ended in Muslim conquest of Mecca in 630. Muhammad died two years later with his religion firmly established in Arabia. The call for jihad, rather than being interpreted as "holy war," more accurately refers to using this traditional practice of raiding enemies to defend the new faith. The late seventh and early eighth centuries saw tremendous expansion for Islam. Arab armies built an incredible empire out of the ruins of the southern and eastern Roman world and extended their boundaries farther east than the Romans ever did. This expansion added thousands to the ranks of Muslim faithful, but generally not through forced conversion.*

**Questions to Consider**

- According to the Qur'an, what conditions justify the use of force to defend the faith? What restrictions apply?
- How does this selection fit into a broader discussion of the connections between religious and military expansion during the early medieval period?

| Fight in the path of God against those who fight you, but do not transgress, for God does not love transgressors. and religion is God's. If they desist, there is no enmity, save against the unjust. |
| Kill them wherever you encounter them, and expel them from whence they have expelled you, for dissension [fitna] is worse than killing. But do not fight them by the Sacred Mosque unless they fight you first, and if they do fight you, then kill them. Such is the recompense of the unbelievers. When you meet those who are infidels, strike their necks until you have overwhelmed them, tighten their bonds, and then release them, either freely or for ransom, when war lays down its burdens. Thus it is, and if God wished, He would crush them Himself, but He tests you against one another. Those who are killed in the path of God, He does not let their good deeds go for nothing. |

~ 59 ~
**Formula for Conducting the Ordeal of Boiling Water**

Let the priest go to the church with the prosecutors and with him who is about to be tried. And while the rest wait in the vestibule of the church let the priest enter and put on the sacred garments except the chasuble and, taking the Gospel and the chrismarium and the relics of the saints and the chalice, let him go to the altar and speak thus to all the people standing near: Behold, brethren, the offices of the Christian religion. Behold the law in which is hope and remission of sins, the holy oil of the chrisma, the consecration of the body and blood of our Lord. Look that ye be not deprived of the heritage of such great blessing and of participation in it by implicating yourselves in the crime of another, for it is written, not only are they worthy of death who do these things, but they that have pleasure in them that do them.

Then let him thus address the one who is to undertake the ordeal: I command thee, N., in the presence of all, by the Father, the Son, and the Holy Ghost, by the tremendous day of judgment, by the ministry of baptism, by thy veneration for the saints, that, if thou art guilty of this matter charged against thee, if thou hast done it, or consented to it, or hast knowingly seen the perpetrators of this crime, thou enter not into the church nor mingle in the company of Christians unless thou wilt confess and admit thy guilt before thou are examined in public judgment.

Then he shall designate a spot in the vestibule where the fire is to be made for the water, and shall first sprinkle the place with holy water, and shall also sprinkle the kettle when it is ready to be hung and the water in it, to guard against the illusions of the devil. Then, entering the church with the others, he shall celebrate the ordeal mass. After the celebration let the priest go with the people to the place of the ordeal, the Gospel in his left hand, the cross, censer and relics of the saints being carried ahead, and let him chant seven penitential psalms with a litany.

Prayer over the boiling water: O God, just judge, firm and patient, who art the Author of peace, and judgest truly, determine what is right, O Lord, and make known Thy righteous judgment. O Omnipotent God, Thou that lookest upon the earth and makest it to tremble, Thou that by the gift of Thy Son, our Lord Jesus Christ, didst save the world and by His most holy passion didst redeem the human race, sanctify, O Lord, this water being heated by fire. Thou that didst save the three youths, Sidrac, Misac, and Abednago, cast into the fiery furnace at the command of Nebuchadnezzar, and didst lead them forth unharmed by the hand of Thy angel, do Thou O clement and most holy Ruler, give aid if he shall plunge his hand into the boiling water, being innocent, and, as Thou didst liberate the three youths from the fiery furnace and didst free Susanna from the false charge, so, O Lord, bring forth his hand safe and unharmed from this water. But if he be guilty and presume to plunge in his hand, the devil hardening his heart, let Thy holy justice deign to declare it, that Thy virtue may be manifest in his body and his soul be saved by penitence and confession. And if the guilty man shall try to hide his sins by the use of herbs or any magic, let Thy right hand deign to bring it to no account. Through Thy only begotten Son, our Lord Jesus Christ, who dwelleth with Thee.

Benediction of the water: I bless thee, O creature of water, boiling above the fire, in the name of the Father, and of the Son, and of the Holy Ghost, from whom all things proceed; I adjure thee by Him who ordered thee to water the whole earth from the four rivers, and who summoned thee forth from the rock, and who
Post – Classical (600 C.E. to 1450 C.E.)

changed thee into wine, that no wiles of the devil or magic of men be able to separate thee from thy virtues as a medium of judgment; but mayest thou punish the vile and the wicked, and purify the innocent. Through Him whom hidden things do not escape and who sent thee in the flood over the whole earth to destroy the wicked and who will yet come to judge the quick and the dead and the world by fire. Amen.

Prayer: Omnipotent, Eternal God, we humbly beseech Thee in behalf of this investigation which we are about to undertake here amongst us that iniquity may not overcome justice but that falsehood may be subjected to truth. And if any one seek to hinder or obscure this examination by any magic or by herbs of the earth, deign to ring it to naught by Thy right hand, O upright judge.

Then let the man who is to be tried, as well as the kettle or pot in which is the boiling water, be fumed with the incense of myrrh, and let this prayer be spoken: O God, Thou who within this substance of water hast hidden Thy most solemn sacraments, be graciously present with us who invoke Thee, and upon this element made ready by much purification pour down the virtue of Thy benediction that this creature, obedient to Thy mysteries, may be endowed with Thy grace to detect diabolical and human fallacies, to confute their inventions and arguments, and to overcome their multiform arts. May all the wiles of the hidden enemy be brought to naught that we may clearly perceive the truth regarding those things which we with finite senses and simple hearts are seeking from Thy judgment through invocation of Thy holy name. Let not the innocent, we beseech Thee, be unjustly condemned, or the guilty be able to delude with safety those who seek the truth from Thee, who art the true Light, who seest in the shadowy darkness, and who maketh our darkness light. O Thou who perceivest hidden things and knowest what is secret, show and declare this by Thy grace and make the knowledge of the truth manifest to us who believe in thee.

Then let the hand that is to be placed in water be washed with soap and let it be carefully examined whether it be sound; and before it is thrust in let the priest say: I adjure thee, O vessel, by the Father and the Son and the Holy Ghost, and by the holy resurrection and by the tremendous day of judgement, and by the four evangelists, that is this man is guilty of this crime, either by deed or by consent, let the water boil violently, and do thou O vessel, tuen and swing.

After this let the man who is to be tried plunge in his hand and afterwards let it be immediately sealed up. After the ordeal let him take a drink of holy water. Up to the time of the decision regarding the ordeal [a period of three days was allowed to elapse before the hand was examined] it is good thing to mix salt and holy water with all his food and drink.

The Conversion of Clovis: Two Accounts, 496

Davis Introduction: In 496 A.D. Chlodovocar (Clovis, or Louis), the founder of the Frankish power which was to develop into modern France and Germany, was converted to Catholic Christianity from heathenism. This was an event of high historical importance. If, like other Germanic kings, he had become an Arian heretic, he would have been hopelessly estranged from his subject Roman population. As it was, the Franks and the provincials coalesced as in none other of the new barbarian kingdoms. The story of Chlodovocar's conversion, of course, gave the pious chroniclers an opening for many edifying anecdotes.
From The Chronicle of St. Denis, I.18-19, 23:

At this time the King was yet in the errors of his idolatry and went to war with the Alemanni, since he wished to render them tributary. Long was the battle, many were slain on one side or the other, for the Franks fought to win glory and renown, the Alemanni to save life and freedom. When the King at length saw the slaughter of his people and the boldness of his foes, he had greater expectation of disaster than of victory. He looked up to heaven humbly, and spoke thus: "Most mighty God, whom my queen Clothilde worships and adores with heart and soul, I pledge you perpetual service unto your faith, if only you give me now the victory over my enemies."

Instantly when he had said this, his men were filled with burning valor, and a great fear smote his enemies, so that they turned their backs and fled the battle; and victory remained with the King and with the Franks. The king of the Alemanni were slain; and as for the Alemanni, seeing themselves discomfited, and that their king had fallen, they yielded themselves to Chlodovocar and his Franks and became his tributaries.

The King returned after this victory into Frankland. He went to Rheims, and told the Queen what had befallen; and they together gave thanks unto Our Lord. The King made his confession of faith from his heart, and with right good will. The Queen, who was wondrously overjoyed at the conversion of her lord, went at once to St. Remi, at that time archbishop of the city. Straightway he hastened to the palace to teach the King the way by which he could come unto God, for his mind was still in doubt about it. He presented himself boldly before his face, although a little while before he [the bishop] had not dared to come before him.

When St. Remi had preached to the King the Christian faith and taught him the way of the Cross, and when the king had known what the faith was, Chlodovocar promised fervently that he would henceforth never serve any save the all-powerful God. After that he said he would put to the test and try the hearts and wills of his chieftains and lesser people: for he would convert them more easily if they were converted by pleasant means and by mild words, than if they were driven to it by force; and this method seemed best to St. Remi. The folk and the chieftains were assembled by the command of the King. He arose in the midst of them, and spoke to this effect: "Lords of the Franks, it seems to me highly profitable that you should know first of all what are those gods which you worship. For we are certain of their falsity: and we come right freely into the knowledge of Him who is the true God. Know of a surety that this same God which I preach to you has given victory over your enemies in the recent battle against the Alemanni. Lift, therefore, your hearts in just hope; and ask the Sovereign Defender, that He give to you all, that which you desire—-that He save our souls and give us victory over our enemies." When the King full of faith had thus preached to and admonished his people, one and all banished from their hearts all unbelief, and recognized their Creator.

When shortly afterward Chlodovocar set out for the church for baptism, St. Remi prepared a great procession. The streets of Rheims were hung with banners and tapestry. The church was decorated. The baptistry was covered with balsams and all sorts of perfumes. The people believed they were already breathing the delights of paradise. The cortège set out from the palace, the clergy led the way bearing the holy Gospels, the cross and banners, chanting hymns and psalms. Then came the bishop leading the King by the hand, next the Queen with the multitude. Whilst on the way the King asked of the bishop, "If this was the Kingdom of Heaven which he had promised him." "Not so," replied the prelate; "it is the road that leads to it."
When in the church, in the act of bestowing baptism the holy pontiff lifted his eyes to heaven in silent prayer and wept. Straightway a dove, white as snow, descended bearing in his beak a vial of holy oil. A delicious odor exhaled from it: which intoxicated those near by with an inexpressible delight. The holy bishop took the vial, and suddenly the dove vanished. Transported with joy at the sight of this notable miracle, the King renounced Satan, his pomps and his works; and demanded with earnestness the baptism; at the moment when he bent his head over the fountain of life, the eloquent pontiff cried, "Bow down thine head, fierce Sicambrian! Adore that which thou hast burned: burn that which thou hast adored!"

After having made his profession of the orthodox faith, the King is plunged thrice in the waters of baptism. Then in the name of the holy and indivisible Trinity---Father, Son, and Holy Ghost---the prelate consecrated him with the divine union. Two sisters of the king and 3000 fighting men of the Franks and a great number of women and children were likewise baptized. Thus we many well believe that day was a day of joy in heaven for the holy angels; likewise of rejoicing on earth for devout and faithful men!

The King showed vast zeal for his new faith. He built a splendid church at Paris, called St. Genevieve, where later he and Clothilde were buried. Faith and religion and zeal for justice were pursued by him all the days of his life. Certain Franks still held to paganism, and found a leader in Prince Ragnachairus but he was presently delivered up in fetters to Chlodovocar who put him to death. Thus all the Frankish people were converted and baptized by the merits of St. Remi....

At this time there came to Chlodovocar messengers from Anastasius, the Emperor of Constantinople, who brought him presents from their master, and letters whereof the effect was, that it pleased the Emperor and the Senators that he [Chlodovocar] be made a "Friend of the Emperor," and a "Patrician" and "Councilor" of the Romans. When the King had read these letters, he arrayed himself in the robe of a senator, which the Emperor had sent to him. He mounted upon his charger; and thus he went to the public square before the church of St. Martin; and then he gave great gifts to the people. From this day he was always called "Councilor" and "Augustus."

**Gregory of Tours:**
*History of the Franks, II.40*

While King Chlodovocar dwelt at Paris he sent secretly to Cloderic, son of Sigibert, king of Cologne, and said unto him: "Behold, your father is old and lame. If he should die, his kingdom would be yours on the strength of our friendship together." Then it came to pass that Sigebert quitted the city of Cologne and crossed the Rhine to enjoy himself in the forest of Buonia. And as he slept in his tent about noon time, his son sent assassins against him, and caused him to perish, in order to gain his kingdom. The murderer sent messengers to Chlodovocar saying: "My father is dead, even as was enjoined, and I have in my possession both his wealth and his kingdom. Send, therefore, some of your people, and I will freely commit to them whatever you wish of his treasures."

When Chlodovocar's messengers came, Cloderic opened before them the treasures of his father; but as he thrust his hand deep down in the chest, one of the messengers raised his "Franciska" [the Frankish battle axe] and cleft his skull. Then Chlodovocar straightway presented himself at Cologne, assembled the folk there and spoke to them: "Hear what has befallen. While I sailed upon the river Scheldt, Cloderic, the son of my kinsman, pursued his father, pretending that I desired him to kill him; and while Sigebert fled across the forest of Buonia, Cloderic compassed his death by brigands. Then he himself---at the moment he was opening the treasures of his father---was smitten and slain!---I know not by whom. I am in no way an accomplice in these deeds; for I cannot shed the blood of my kinsfolk---
something utterly unlawful! But since the thing is done, I give you council; if you are willing, receive me as your king. Have recourse to me and put yourselves under my protection.

The Ripuarian Franks of Cologne welcomed these words with loud applause, and with the clashing of their shields. They lifted Chlodovocar upon a shield, and proclaimed him king over them.....

Daily did God cause Chlodovocar's enemies to fall into his hand, and increased his kingdom;

seeing that he went about with his heart right before the Lord, and did that which was pleasing in His eyes.

Ibn Battuta in Mali

Born in Algiers, Ibn Battuta (1304–1368) was the premier world traveler of the Middle Ages. Although Marco Polo’s adventures are better known in the West, never did Polo travel as far or see as many different countries as this indefatigable Berber did. In 1325, Ibn Battuta made the first of four visits to the Holy City of Mecca, thereby beginning an itinerary of 75,000 miles. Later in life, this devout Muslim would dictate to a Moroccan scribe an account of his journeys.

For nearly thirty years, Ibn Battuta traveled continuously throughout Africa, the Middle East, Persia, Russia, India, China, and Spain. He made it a rule, if possible, never to travel the same road twice, and he frequently paid the price of taking the less-traveled road. He often was stranded or overcome by disease. His African editors note: “He seems to have experienced most travellers’ diseases from Lahore sore to Delhi belly. Only the fact that the New World had not been discovered saved him from Montezuma’s revenge.”

The following selection illustrates the range of Ibn Battuta’s travels and also suggests that, by the fourteenth century, Islamic civilization, spanning four continents, was truly the “world” civilization. In 1344, Ibn Battuta left the Malabar coast of India and sailed south to the Maldives Islands, where for eighteen months he served as a judge of Islamic sacred law.

Later, after journeys to Ceylon, China, and Syria, he returned to Algiers. In 1352, on his last journey, he set off on foot across the Sahara to visit the African kingdoms of the Niger basin. His account of this experience is one of the primary records of the social customs in the Kingdom of Mali, particularly the city of Iwalatan (Walata).

In reporting on Black Africa, Ibn Battuta’s accounts are basically favorable, but his enthusiasm over the devout acceptance of Islam is offset by reservations about non-Islamic elements in living customs.

Questions:
1. Why was Ibn Battuta so troubled by his African hosts’ methods of tracing genealogy? Are here political implications of this genealogical system?
2. How would you compare Ibn Battuta’s observations of Africa with those of Gomes Eannes de Azurara?
Post – Classical (600 C.E. to 1450 C.E.)

The condition of these people [of Iwalatan] is strange and their manners are bizarre. As for their men, there is no sexual jealousy about them. None of them is named after his father, but each traces his genealogy from his maternal uncle. A man’s inheritance is not passed to his own sons but to the sons of his sister. I have never seen such a thing in any other part of the world except among the infidels who live on the Malabar coast of India. These people are Muslims who follow exactly the prescribed laws for prayer, study the laws of Islam, and know the Koran by heart. Their women are not modest in the presence of men; despite reciting their prayers punctually, they do not veil their faces. Any male who wishes to marry one of them can do so very easily, but the women do not travel with their husbands for her family would not allow it. In this country, the women are permitted to have male friends and companions among men who are not members of her family. So too for men; they are permitted to have female companions among women who are not members of his family. It happens quite often that a man would enter his own house and find his wife with one of her own friends and would not rebuke her.

ANECDOТЕ

One day I entered the home of a judge in Iwalatan after he had given his permission, and I found him with a very young and beautiful woman. Immediately I thought it best to leave, but she laughed at me and was not at all embarrassed. The judge asked me “Why would you want to leave? She is my friend.” I was astonished at the conduct of these two. He was a judge and had made a pilgrimage to Mecca. Later I learned that he has asked permission of the Sultan to go on a pilgrimage to Mecca that year with his female friend. Whether it was this one or another I do not know, but the Sultan refused to let him go.

A SIMILAR ANECDOТЕ

One day I entered the home of Aboû Mohammed Yandecán, a man of the Mesoufah tribe. He was sitting on a rug while in the middle of his house was a bed covered with a canopy. On it was his wife in conversation with another man sitting at her side. I said to Aboû Mohammed “Who is this woman?”—“She is my wife,” he responded—“And who is the man with her?” I asked. “He is her friend,” replied the judge. I asked how he, who knew the divine law on such matters, could permit such a thing. He replied that “The companionship of women with men in this country is proper and honorable: It does not inspire suspicion. Our women are not like the women of your country.” I was shocked at his stupid answer and immediately left his home and never returned. . . .

GOOD AND BAD QUALITIES

Among their good qualities we can cite the following:

1. There is a small amount of crime, for these people obey the law. Their sultan does not pardon criminals.

2. Travelers and natives alike are safe from brigands, robbers, and thieves.

3. The natives do not confiscate the property of white men who die in this country, even if they are very wealthy; instead they entrust it to another, respected white man to dispose of it properly.

4. The prayers are offered punctually and with fervor. Children who neglect their prayers are beaten. If you do not come to the mosque early on a Friday you cannot find a place to pray because the crowds are so large. Quite often they send their slaves to the mosque with a
prayer rug to find and hold a place for their masters. These prayer rugs are made from the leaves of trees similar to palm trees, but one that bears no fruit.

5. White garments are worn on Fridays. If by chance one does not have a proper white garment, regular clothing is washed and cleaned to wear for public prayer.

6. They are committed to learn by heart the sublime Koran. Children who fail to learn the Koran by heart have their feet shackled and these shackles are not removed until they memorize the Koran. On a feast day I visited a judge who had his children in chains. I said to him, “Why don’t you release them?” He said,”I will not do so until they know the Koran by heart.” Another day I passed a handsome young black man dressed superbly, but Shackled by a heavy chain on his feet. I asked my companion, “What has this young man done? Is he a murderer?” The handsome young black man laughed and my companion told me, “He has been chained so that he will learn the Koran by heart.”

Among their bad qualities we can cite the following:

1. Their female servants, slave women and small daughters appear before men completely naked, exposing their private parts. Even during the month of Ramadan [a period of fast], military commanders broke their fast in the palace of the Sultan. Twenty or more naked servant girls served them food.

2. Nude women without veils on their faces enter the palace of the Sultan. On the twenty-seventh night of Ramadan, I saw about a hundred naked female slaves coming out of the palace of the Sultan with food. Two of the Sultan’s daughters, who have large breasts, were with them and they were naked.

3. These natives put dust and ashes on their head to show their education and as a sign of respect.

4. They laugh when poets recite their verse before the Sultan.

5. Finally, they eat impure meat such as dogs and donkeys.

---

Kingdom of Ghana

The following description of the Kingdom of Ghana was written by Al-Bakri, a member of a prominent Spanish Arab family who lived during the 11th century.

Questions:

What can you tell about religion in Ghana?
What was the basis of Ghana’s wealth?
Is there any example of ethnocentrism in this account?

The city of Ghana consists of two towns situated on a plain. One of these towns, which is inhabited by Muslims, is large and possesses twelve mosques, in which they assemble for the Friday prayer. There are salaried imams and muezzins, as well as jurists and scholars. In the environs are wells with sweet water, from which they drink and with which they grow vegetables. The king’s town is six miles distant from this one....

Between these two towns are continuous habitations. ...In the king’s town, and not far from his court of justice, is a mosque where the Muslims who arrive at his court pray. Around the king’s town are domed buildings and groves and thickets where the sorcerers of these
people, men in charge of the religious cult, live. In them too are their idols and the tombs of their kings. These woods are guarded and none may enter them and know what is there. The king’s interpreters, the official in charge of his treasury and the majority of his ministers are Muslims. Among the people who follow the king’s religion only he and his heir apparent (who is the son of his sister) may wear sewn clothes. All other people wear robes of cotton, silk, or brocade, according to their means. All of them shave their beards, and women shave their heads. The king adorns himself like a woman (wearing necklaces) round his neck and (bracelets) on his forearms, and he puts on a high cap decorated with gold and wrapped in a turban of fine cotton. He sits in audience or to hear grievances against officials in a domed pavilion around which stand ten horses covered with gold-embroidered materials. Behind the king stand ten pages holding shields and swords decorated with gold, and on his right are the sons of the (vassal) kings of his country wearing splendid garments and their hair plaited with gold. The governor of the city sits on the ground before the king and around him are ministers seated likewise. At the door of the pavilion are dogs of excellent pedigree who hardly ever leave the place where the king is, guarding him. Round their necks they wear collars of gold and silver studded with a number of balls of the same metals. The audience is announced by the beating of a drum which they call duba made from a long hollow log. When the people who profess the same religion as the king approach him they fall on their knees and sprinkle dust on their head, for this is their way of greeting him. As for the Muslims, they greet him only by clapping their hands.

Their religion is paganism and the worship of idols....

On every donkey-load of salt when it is brought into the country their king levies one golden dinar and two dinars when it is sent out. ... The best gold is found in his land comes from the town of Ghiyaru, which is eighteen days’ traveling distance from the king’s town over a country inhabited by tribes of the Sudan whose dwellings are continuous...

The king of Ghana when he calls up his army, can put 200,000 men into the field, more than 40,000 of them archers.

By John Barbot: "PREPOSSESSED OF THE OPINION...THAT EUROPEANS ARE FOND OF THEIR FLESH"

John Barbot, an agent for the French Royal African Company, made at least two voyages to the West Coast of Africa, in 1678 and 1682.

Those sold by the Blacks are for the most part prisoners of war, taken either in fight, or pursuit, or in the incursions they make into their enemies territories; others stolen away by their own countrymen; and some there are, who will sell their own children, kindred, or neighbours. This has been often seen, and to compass it, they desire the person they intend to sell, to help them in carrying something to the factory by way of trade, and when there, the person so deluded, not understanding the language, is old and deliver’d up as a slave, notwithstanding all his resistance, and exclaiming against the treachery....

The kings are so absolute, that upon any slight pretense of offences committed by their
subjects, they order them to be sold for slaves, without regard to rank, or possession....

Abundance of little Blacks of both sexes are also stolen away by their neighbours, when found abroad on the roads, or in the woods; or else in the Cougans, or corn-fields, at the time of the year, when their parents keep them there all day, to scare away the devouring small birds, that come to feed on the millet, in swarms, as has been said above.

In times of dearth and famine, abundance of those people will sell themselves, for a maintenance, and to prevent starving. When I first arriv'd at Goerree, in December, 1681, I could have bought a great number, at very easy rates, if I could have found provisions to subsist them; so great was the dearth then, in that part of Nigritia.

To conclude, some slaves are also brought to these Blacks, from very remote inland countries, by way of trade, and sold for things of very inconsiderable value; but these slaves are generally poor and weak, by reason of the barbarous usage they have had in traveling so far, being continually beaten, and almost famish'd; so inhuman are the Blacks to one another....

The trade of slaves is in a more peculiar manner the business of kings, rich men, and prime merchants, exclusive of the inferior sort of Blacks.

These slaves are severely and barbarously treated by their masters, who subsist them poorly, and beat them inhumanly, as may be seen by the scabs and wounds on the bodies of many of them when sold to us. They scarce allow them the least rag to cover their nakedness, which they also take off from them when sold to Europeans; and they always go bare- headed. The wives and children of slaves, are also slaves to the master under whom they are married; and when dead, they never bury them, but cast out the bodies into some by place, to be devoured by birds, or beasts of prey.

This barbarous usage of those unfortunate wretches, makes it appear, that the fate of such as are bought and transported from the coast to America, or other parts of the world, by Europeans, is less deplorable, than that of those who end their days in their native country; for aboard ships all possible care is taken to preserve and subsist them for the interest of the owners, and when sold in America, the same motive ought to prevail with their masters to use them well, that they may live the longer, and do them more service. Not to mention the inestimable advantage they may reap, of becoming christians, and saving their souls, if they make a true use of their condition....

Many of those slaves we transport from Guinea to America are prepossessed with the opinion, that they are carried like sheep to the slaughter, and that the Europeans are fond of their flesh; which notion so far prevails with some, as to make them fall into a deep melancholy and despair, and to refuse all sustenance, tho' never so much compelled and even beaten to oblige them to take some nourishment: notwithstanding all which, they will starve to death; whereof I have had several instances in my own slaves both aboard and at Guadalupe. And tho' I must say I am naturally compassionate, yet have I been necessitated sometimes to cause the teeth of those wretches to be broken, because they would not open their mouths, or be prevailed upon by any entreaties to feed themselves; and thus have forced some sustenance into their throats....

As the slaves come down to Fida from the inland country, they are put into a booth, or prison, built for that purpose, near the beach, all of them together; and when the Europeans are to receive them, every part of every one of them, to the smallest member, men and women being all stark naked. Such as are allowed good and sound, are set on one side, and the others by themselves; which slaves so
rejected are there called Mackrons, being above thirty five years of age, or defective in their limbs, eyes or teeth; or grown grey, or that have the venereal disease, or any other imperfection. These being set aside, each of the others, which have passed as good, is marked on the breast, with a red- hot iron, imprinting the mark of the French, English, or Dutch companies, that so each nation may distinguish their own, and to prevent their being chang'd by the natives for worse, as they are apt enough to do. In this particular, care is taken that the women, as tenderest, be not burnt too hard.

The branded slaves, after this, are returned to their former booth, where the factor is to subsist them at his own charge, which amounts to about two- pence a day for each of them, with bread and water, which is all their allowance. There they continue sometimes ten or fifteen days, till the sea is still enough to send them aboard; for very often it continues too boisterous for so long a time, unless in January, February and March, which is commonly the calmest season: and when it is so, the slaves are carried off by parcels, in bar- canoes, and put aboard the ships in the road. Before they enter the canoes, or come out of the booth, their former Black masters strip them of every rag they have, without distinction of men or women; to supply which, in orderly ships, each of them as they come aboard is allowed a piece of canvas, to wrap around their waist, which is very acceptable to those poor wretches....

If there happens to be no stock of slaves at Fida, the factor must trust the Blacks with his goods, to the value of a hundred and fifty, or two hundred slaves; which goods they carry up into the inland, to buy slaves, at all the markets, for above two hundred leagues up the country, where they are kept like cattle in Europe; the slaves sold there being generally prisoners of war, taken from their enemies, like other booty, and perhaps some few sold by their own countrymen, in extreme want, or upon a famine; as also some as a punishment of heinous crimes: tho' many Europeans believe that parents sell their own children, men their wives and relations, which, if it ever happens, is so seldom, that it cannot justly be charged upon a whole nation, as a custom and common practice....

One thing is to be taken notice of by sea- faring men, that this Fida and Ardra slaves are of all the others, the most apt to revolt aboard ships, by a conspiracy carried on amongst themselves; especially such as are brought down to Fida, from very remote inland countries, who easily draw others into their plot: for being used to see mens flesh eaten in their own country, and publick markets held for the purpose, they are very full of the notion, that we buy and transport them to the same purpose; and will therefore watch all opportunities to deliver themselves, by assaulting a ship's crew, and murdering them all, if possible: whereof, we have almost every year some instances, in one European ship or other, that is filled with slaves.
1450 C.E. to 1750 C.E.

Major Developments

1) Questions of periodization
   A) Continuities and breaks, causes of changes from the previous period and within this period
2) Changes in global commerce, communications, and technology
   A) Industrial Revolution (transformative effects on and differential timing in different societies; mutual relation of industrial and scientific developments; commonalities)
   B) Changes in patterns of world trade
3) Demographic and environmental changes (migrations, end of the Atlantic slave trade, new birthrate patterns, food supply)
4) Changes in social and gender structure (Industrial Revolution; commercial and demographic developments; emancipation of serfs/slaves; and tension between work patterns and ideas about gender)
   A) Political revolutions and independence movements; new political ideas
   B) United States and Latin American independence movements
   C) Revolutions (United States, France, Haiti, Mexico, China)
   D) Rise of nationalism, nation-states, and movements of political reform
5) Rise of democracy and its limitations: reform; women; racism
6) Rise of Western dominance (economic, political, social, cultural and artistic, patterns of expansion; imperialism and colonialism) and different cultural and political reactions (reform; resistance; rebellion; racism; nationalism)
7) Diverse interpretations
   A) What are the debates over the utility of modernization theory as a framework for interpreting events in this period and the next?
   B) What are the debates about the causes of serf and slave emancipation in this period and how do these debates fit into broader comparisons of labor systems?
   C) What are the debates over the nature of women’s roles in this period and how do these debates apply to industrialized areas and how do they apply in colonial societies?

Major Comparisons and Snapshots

- Compare the causes and early phases of the industrial revolution in western Europe and Japan
- Comparative revolutions (compare the Haitian and French Revolutions)
- Compare reaction to foreign interference in: the Ottoman Empire, China, India, and Japan
- Compare nationalism
- Explain forms of Western intervention in Latin America, Africa, and Southeast Asia
- Compare the roles and conditions of women in the upper/middle classes with peasantry/working class in western Europe

Examples of What You Need to Know

Below are examples of the types of information you are expected to know contrasted with examples of those things you are not expected to know for the multiple-choice section.

- Causes of Latin American independence movements, but not specific protagonists.
- The French Revolution of 1789, but not the Revolution of 1830
- Meiji Restoration, but not Iranian Constitutional Revolution
- Causes of Latin American independence movements, but not specific protagonists
- Boxer Rebellion, but not the Crimean War
- Suez Canal, but not the Erie Canal
- Muhammad Ali, but not Isma’il
- Marxism, but not Utopian socialism
- Social Darwinism, but not Herbert Spencer

~ 70 ~
Accounts of the "Potato Revolution," 1695 - 1845

The Leaves of Potato are manifestly hot and dry in the beginning of the second degree, as manifestly appear by their taste. But the roots are temperate in respect to heat or cold, dryness and moisture: They Astringe, are moderately Diuretic, Stomatic, Chylisic, Analeptic, and Spermatogenetic. They nourish the whole body, restore in consumptions, and provoke lust. The preparations of the potato are: (1) boiled, baked or roasted roots, (2) the broth, (3) the blood. *The Prepared Roots*: They stop fluxes of the bowels, nourish much, and restore in a pining consumption; being boiled, baked or roasted, they are eaten with good butter, salt, juice of oranges or lemons, and double refined sugar, as common food: they increase seed and provoke lust, causing fruitfulness in both sexes: and stop all sorts of fluxes of the belly. *The Broth of the Roots*: They are first boiled soft in fair water, then taken out and peeled, afterwards put into the same water again, and boiled till the broth becomes as thick, as very thick cream, or thin Hasty Pudding: some mix an equal quantity of milk with it, and so make broth; others after they are peeled, instead of putting them into the waters they were boiled in, boil them only in milk, till they are dissolved as aforesaid, and the broth is made pleasant with sweet butter, a little salt and double refined sugar, and so eaten. It has all the virtues of the roots eaten in substance, nourishes more, and restores not only in an atrophy, or pining consumption, but also in an ulceration of the lungs. *The Blood of the Potato*: It is made as the Blood of Satyroron, Parsnips, Eddo's Comfrey, and other like roots. It may be taken to a spoonful or two, morning, noon, and night, in a glass of choice Canary, Tent, Alicant, old Malaga, or other good Wines. It restores in deep consumption of all kinds, nourishes to admiration, is good against impotency in men and barrenness in women, and has all the other virtues of both the prepared roots and broth.

William Somerville, *Fable of the Two Springs*, 1725

In the course of a very few years, the consumption of potatoes in this Kingdom will be almost as general and universal as that of wheat.

David Henry, *The Complete English Farmer*, 1771

Certainly, potatoes might be used instead of rye as a substitute for bread, and of this discovery the poor may avail themselves in time of dearth.

Adam Smith, *The Wealth of Nations*, 1776

The vegetable food of the original inhabitants of the Americas, though from their want of industry not very abundant, was not altogether so scanty. It consisted in corn, yams, potatoes, bananas, tomatoes, etc., plants which were then altogether unknown in Europe, and which have never since been very much esteemed in it, or supposed to yield a sustenance equal to what is drawn from the common sorts of grain and pulse, which have been cultivated in this part of the world time out of mind.

The food produced by a field of potatoes is not inferior in quantity to that produced by a field of rice, and much superior to what is produced by a field of wheat. Twelve thousand weight of potatoes from an acre of land is not a greater produce than two thousand weight of wheat. The food or solid nourishment, indeed, which can be drawn from each of those two plants, is not altogether in proportion to their weight, on account of the watery nature of potatoes. Allowing, however, half the weight of this root to go to water, a very large allowance, such an
acres of potatoes will still produce six thousand pounds of solid nourishment, three times the quantity produced by the acre of wheat. An acre of potatoes is cultivated with less expense than an acre of wheat; the fallow, which generally precedes the sowing of wheat, more than compensating the hoeing and other extraordinary culture which is always given to potatoes. Should this root ever become in any part of Europe, like rice in some rice countries, the common and favorite vegetable food of the people, so as to occupy the same proportion of the lands in tillage which wheat and other sorts of grain for human food do at present, the same quantity of cultivated land would maintain a much greater number of people, and the laborers being generally fed with potatoes, a greater surplus would remain after replacing all the stock and maintaining all the labor employed in cultivation. A greater share of this surplus, too, would belong to the landlord. Population would increase, and rents would rise much beyond what they are at present.

In some parts of Lancashire it is pretended, I have been told, that bread of oatmeal is a heartier food for laboring people than wheaten bread, and I have frequently heard the same doctrine held in Scotland. I am, however, somewhat doubtful of the truth of it. The common people in Scotland, who are fed with oatmeal, are in general neither so strong, nor so handsome as the same rank of people in England who are fed with wheaten bread. They neither work so well, nor look so well; and as there is not the same difference between the people of fashion in the two countries, experience would seem to show that the food of the common people in Scotland is not so suitable to the human constitution as that of their neighbors of the same rank in England. But it seems to be otherwise with potatoes. The chairmen, porters, and coalheavers in London, and those unfortunate women who live by prostitution, the strongest men and the most beautiful women perhaps in the British dominions, are said to be the greater part of them from the lowest rank of people in Ireland, who are generally fed with this root. No food can afford a more decisive proof of its nourishing quality, or of its being peculiarly suitable to the health of the human constitution.

It is difficult to preserve potatoes through the year, and impossible to store them like corn, for two or three years together. The fear of not being able to sell them before they rot discourages their cultivation, and is, perhaps, the chief obstacle to their ever becoming in any great country, like bread, the principal vegetable food of all the different ranks of the people.... The circumstances of the poor through a great part of England cannot surely be so much distressed by any rise in the price of poultry, fish, wild-fowl, or venison, as they must be relieved by the fall in that of potatoes.

**Thomas Ruggles, Annals of Agriculture, 1792**

Everybody knows that bread covers at least two-thirds of the expenditure on food. A laborer’s wage must be at least sufficient to maintain himself and his family, and must allow for something over. Were the wages not to do so, then the race of such workers would not last beyond the first generation. In Great Britain, therefore, the wages of the laborer must be evidently more than what is precisely necessary to bring up a family, and the price of grain must determine everything in regard to the economics of labor. However, failure to implement this level of wages may, perhaps, be mitigated by the adoption by the poor of the potato, a nutritious and cheap substitute. Nonetheless, the poor will not eat potatoes if they can get anything else, for the daintiness and ignorance of the poor in regard to the wondersments of this root has been the chief obstacle to its adoption.

**David Davies, The Case of the Laborers in Husbandry, 1795**

Today the whole laboring people have neither meat nor cheese nor milk nor beer in sufficient
quantities, they eat white bread where everybody else eats it. Though the potato is an excellent root, deserving to be brought into general use, yet it seems not likely that the use of it should ever be general in this country [England]. There are three reasons for this. First, in richer counties the poor have neither the garden to grow the potato, nor milk to eat it with. This is due to engrossing, the little scrap of garden left to him he uses for a variety of vegetables (but where buttermilk can be got, potatoes are eaten). Second, the poor allege that they cannot perform their tasks without white bread, and they must have it of the most nourishing kind. Third, the appearance of the potato, full of eyes, resembles those afflicted with leprosy, and the poor irrationally believe that the potato is thus the cause of so many lepers.

The Times, July 11, 1795

The solution to the lack of grain for our rising population is simple. The poor should adopt the diet of Lancashire, with its abundant potatoes and oatmeal porridge. Also, the poor can eat a soup of water and potatoes. If a bread is required, one of corn and potatoes is both pleasant and nutritious.

Sir Frederick M. Eden, The State of the Poor, 1797

The Naturalists of Queen Anne's time would probably have been astonished to hear, what the Board of Agriculture mentions as a fact of the greatest importance, that potatoes and water alone, with common salt, can nourish men completely.

Ralph Leycester, Annals of Agriculture, Vol. 29, 1798

It is with great satisfaction that I can report that wages are now 8s. per week, having only increased 1s. in twenty-five years, and that, considering the use of potatoes and turnips, the laborer is better off than before. Potatoes are in great use here, which necessarily lessens the consumption of bread.

J. C. Curwen, The Rural Economy of Ireland, 1818

The first and most important object in the rural economics of Ireland is the crop of potatoes, for on these exclusively depends the existence of all the lower orders not resident in towns. The potato, which in some points of view, may justly be regarded as one of the greatest blessings to our species, is capable of operating the greatest calamities, when it exclusively furnishes the food on which a community is content to exist, for as the cultivation of a single statute acre may successfully and easily be attended by one individual and as its produce on an average would give food for at least ten persons the year round, at 7 lb. each day, which may be considered as an abundant allowance, what chance is there for manual exertion in such a society among whom a patrimonial aversion to labor and an habitual attachment to idleness are paramount to every other consideration.

The diet of the poor consists chiefly of milk, oatmeal, potatoes and vegetables. The potato is the all-important food, oatmeal a quite secondary one, and bacon a rare luxury.

Rev. James Mulligan, Description of Carrickmacross, Co. Monaghan, 1845

The small farmers live on potatoes and milk. It is considered that he is a very fortunate man if he has milk for his family. He sells his butter and never uses oatmeal in his house. It is thus obvious that oatmeal plays a quite secondary role in the household economy of the poorer classes, and that the primary meal consists of potatoes.
Report of the Devon Commission for Ireland, 1845

The potato enabled a large family to live on food produced in great quantities at a trifling cost, and, as the result, the increase of the people has been gigantic.

Pico Della Mirandola: Oration On the Dignity Of Man (15th C. CE)

If there is such a thing as a "manifesto" of the Italian Renaissance, Pico della Mirandola's "Oration on the Dignity of Man" is it; no other work more forcefully, eloquently, or thoroughly remaps the human landscape to center all attention on human capacity and the human perspective. Pico himself had a massive intellect and literally studied everything there was to be studied in the university curriculum of the Renaissance; the "Oration" in part is meant to be a preface to a massive compendium of all the intellectual achievements of humanity, a compendium that never appeared because of Pico's early death. Pico was a "humanist," following a way of thinking that originated as far back as the fourteenth century. Late Medieval and Renaissance humanism was a response to the dry concerns for logic and linguistics that animated the other great late Medieval Christian philosophy, Scholasticism. The Humanists, rather than focussing on what they considered futile questions of logic and semantics, focussed on the relation of the human to the divine, seeing in human beings the summit and purpose of God's creation. Their concern was to define the human place in God's plan and the relation of the human to the divine; therefore, they centered all their thought on the "human" relation to the divine, and hence called themselves "humanists." At no point do they ignore their religion; humanism is first and foremost a religious movement, not a secular one (what we call "secular humanism" in modern political discourse is a world view that arises in part from "humanism" but is, nevertheless, essentially conceived in opposition to "humanism").

Where is humanity's place on the "chain of being?" What choices do human beings have? How might these views have arisen from the views expressed in Boccaccio's story of Ser Cappelletto?

I once read that Abdala the Muslim, when asked what was most worthy of awe and wonder in this theater of the world, answered, "There is nothing to see more wonderful than man!"

Hermes Trismegistus[1] concurs with this opinion: "A great miracle, Asclepius, is man!"

However, when I began to consider the reasons for these opinions, all these reasons given for the magnificence of human nature failed to convince me: that man is the intermediary between creatures, close to the gods, master of all the lower creatures, with the sharpness of his senses, the acuity of his reason, and the brilliance of his intelligence the interpreter of nature, the nodal point between eternity and time, and, as the Persians say, the intimate bond or marriage song of the world, just a little lower than angels[as David tells us. (2)] concede these are magnificent reasons, but they do not seem to go to the heart of the matter, that is, those reasons which truly claim admiration. For, if these are all the reasons we can come up with, why should we not admire angels more than we do ourselves? After thinking a long time, I have figured out why man is the most fortunate of all creatures and as a result worthy of the highest admiration and earning his rank on the chain of being, a rank to be envied not merely by the beasts but by the stars themselves and by the spiritual natures beyond and above this world. This miracle goes past faith and wonder. And why not? It is for this reason that man is rightfully named a magnificent miracle and a wondrous creation.

What is this rank on the chain of being? God the Father, Supreme Architect of the Universe, built this home, this universe we see all around us, a
1450 C.E. to 1750 C.E.

venerable temple of his godhead, through the sublime laws of his ineffable Mind. The expanse above the heavens he decorated with Intelligences, the spheres of heaven with living, eternal souls. The scabrous and dirty lower worlds he filled with animals of every kind. However, when the work was finished, the Great Artisan desired that there be some creature to think on the plan of his great work, and love its infinite beauty, and stand in awe at its immenseness. Therefore, when all was finished, as Moses and Timaeus tell us, He began to think about the creation of man. But he had no Archetype from which to fashion some new child, nor could he find in his vast treasure-houses anything which He might give to His new son, nor did the universe contain a single place from which the whole of creation might be surveyed. All was perfected, all created things stood in their proper place, the highest things in the highest places, the midmost things in the midmost places, and the lowest things in the lowest places. But God the Father would not fail, exhausted and defeated, in this last creative act. God's wisdom would not falter for lack of counsel in this need. God's love would not permit that he whose duty it was to praise God's creation should be forced to condemn himself as a creation of God.

Finally, the Great Artisan mandated that this creature who would receive nothing proper to himself shall have joint possession of whatever nature had been given to any other creature. He made man a creature of indeterminate and indifferent nature, and, placing him in the middle of the world, said to him "Adam, we give you no fixed place to live, no form that is peculiar to you, nor any function that is yours alone. According to your desires and judgment, you will have and possess whatever place to live, whatever form, and whatever functions you yourself choose. All other things have a limited and fixed nature prescribed and bounded by our laws. You, with no limit or no bound, may choose for yourself the limits and bounds of your nature. We have placed you at the world's center so that you may survey everything else in the world. We have made you neither of heavenly nor of earthly stuff, neither mortal nor immortal, so that with free choice and dignity, you may fashion yourself into whatever form you choose. To you is granted the power of degrading yourself into the lower forms of life, the beasts, and to you is granted the power, contained in your intellect and judgment, to be reborn into the higher forms, the divine."

Imagine! The great generosity of God! The happiness of man! To man it is allowed to be whatever he chooses to be! As soon as an animal is born, it brings out of its mother's womb all that it will ever possess. Spiritual beings from the beginning become what they are to be for all eternity. Man, when he entered life, the Father gave the seeds of every kind and every way of life possible. Whatever seeds each man sows and cultivates will grow and bear him their proper fruit. If these seeds are vegetative, he will be like a plant. If these seeds are sensitive, he will be like an animal. If these seeds are intellectual, he will be an angel and the son of God. And if, satisfied with no created thing, he removes himself to the center of his own unity, his spiritual soul, united with God, alone in the darkness of God, who is above all things, he will surpass every created thing. Who could not help but admire this great shape-shifter? In fact, how could one admire anything else? . . .

For the mystic philosophy of the Hebrews transforms Enoch into an angel called "Mal'akh Adonay Shebaoth," and sometimes transforms other humans into different sorts of divine beings. The Pythagoreans abuse villainous men by having them reborn as animals and, according to Empedocles, even plants. Muhammed also said frequently, "Those who deviate from the heavenly law become animals." Bark does not make a plant a plant, rather its senseless and mindless nature does. The hide does not make an animal an animal, but rather its irrational but sensitive soul. The spherical form does not make the heavens the
heavens, rather their unchanging order. It is not a lack of body that makes an angel an angel, rather it is his spiritual intelligence. If you see a person totally subject to his appetites, crawling miserably on the ground, you are looking at a plant, not a man. If you see a person blinded by empty illusions and images, and made soft by their tender beguilements, completely subject to his senses, you are looking at an animal, not a man. If you see a philosopher judging things through his reason, admire and follow him: he is from heaven, not the earth. If you see a person living in deep contemplation, unaware of his body and dwelling in the inmost reaches of his mind, he is neither from heaven nor earth, he is divinity clothed in flesh.

Who would not admire man, who is called by Moses (3) and the Gospels "all flesh" and "every creature," because he fashions and transforms himself into any fleshly form and assumes the character of any creature whatsoever? For this reason, Euanthes the Persian in his description of Chaldaean theology, writes that man has no inborn, proper form, but that many things that humans resemble are outside and foreign to them, from which arises the Chaldaean saying: "Hanorish tharah sharinas": "Man is multitudinous, varied, and ever changing." Why do I emphasize this? Considering that we are born with this condition, that is, that we can become whatever we choose to become, we need to understand that we must take earnest care about this, so that it will never be said to our disadvantage that we were born to a privileged position but failed to realize it and became animals and senseless beasts. Instead, the saying of Asaph the prophet should be said of us, "You are all angels of the Most High."

Above all, we should not make that freedom of choice God gave us into something harmful, for it was intended to be to our advantage. Let a holy ambition enter into our souls; let us not be content with mediocrity, but rather strive after the highest and expend all our strength in achieving it.

Let us disdain earthly things, and despise the things of heaven, and, judging little of what is in the world, fly to the court beyond the world and next to God. In that court, as the mystic writings tell us, are the Seraphim, Cherubim, and Thrones (4) in the foremost places; let us not even yield place to them, the highest of the angelic orders, and not be content with a lower place, imitate them in all their glory and dignity. If we choose to, we will not be second to them in anything.

Translated by Richard Hooker

---

(1) This mystical Egyptian writer, much quoted by Renaissance alchemists, probably lived in the 2nd-3rd century.

(2) Psalms 8:5.

(3) Moses was reputed to have written the first five books of the Bible.

(4) These are the three highest orders of angels in the medieval and Renaissance theory of angelic hierarchy which is, in descending order, Seraphim, Cherubim, Thrones, Dominations, Powers, Angels, Archangels.

---

**Niccolò Machiavelli: The Prince (1532 CE)**

Machiavelli’s treatise on government was rejected with horror by almost all early readers, but it accurately describes the means which rulers have always used to remain in power. As a pioneering study of practical politics it has often been compared with Kautilya’s Arthasastra and the doctrines of the Chinese legalists, such as Han Fei Tzu. But what makes The Prince both more revolutionary and more controversial than either of these is the delight Machiavelli seems to take in scorning conventional

~ 76 ~
1450 C.E. to 1750 C.E.

morality. Indeed so cynical are such passages as the following that some readers have imagined that he must have been satirizing rather than advocating these ideas. His work cannot be said to have had any great impact on the world, but it strikingly marks the end of an era during which writers felt obliged to cloak their recommendations on government in a pious guise: his values are entirely secular. In describing the behavior of the successful politician Machiavelli has in mind a specific model, the ruthless Cesare Borgia (1476-1507).

What good qualities does Machiavelli say a prince should seem to have?

The Way Princes Should Keep Their Word

Everyone understands how praiseworthy it is for a prince to remain true to his word and to live with complete integrity without any scheming. However, we've seen through experience how many princes in our time have achieved great things who have little cared about keeping their word and have shrewdly known the skill of tricking the minds of men; these princes have overcome those whose actions were founded on honesty and integrity.

It should be understood that there are two types of fighting: one with laws and the other with force. The first is most suitable for men, the second is most suitable for beasts, but it often happens that the first is not enough, which requires that we have recourse to the second. Therefore, it is necessary for a prince to know how to act both as a man and as a beast. This was signified allegorically to princes by the ancient writers: they wrote that Achilles and many other ancient princes were given to be raised and tutored by the centaur Chiron, who took custody of them and disciplined them. This can only mean, this trainer who was half beast and half man, that a prince needs to know how to use either one or the other nature, and the one without the other will never last.

Since it is necessary for the prince to use the ways of beasts, he should imitate the fox and the lion, because the lion cannot defend himself from snares and the fox cannot defend himself from wolves. Therefore, it is important to be a fox in order to understand the snares and a lion in order to terrify the wolves. Those who choose only to be a lion do not really understand. Therefore, a prudent leader will not and should not observe his promises, when such observance will work against him and when the reasons for making the promise are no longer valid. If all men were good, this precept would not be good; but since men are evil and will not keep their word with you, you shouldn't keep yours to them. Never has a prince lacked legitimate reasons to break faith. I could give you an infinite number of examples from modern times, and show you numerous peace treaties and promises that have been broken and made completely empty by the faithlessness of princes: these knew well how to use the ways of the fox, and they are the ones who succeed. But it is necessary to know how to hide this nature and to simulate a good character and to dissimulate: for the majority of men are simple and will only follow the needs of the present, so that the deceiver can always find someone he can deceive.

I'm not going to pass up a specific example from recent history. [Alexander VI (1)] never did or thought about anything else except deceiving people and always found some reason or other to do it. There was never a man who was better at making assurances, or more eager to offer solemn promises, or who kept them less; yet he always succeeded in his deceptions beyond his wildest dreams, because he played his role in the world so well.

Therefore, a prince doesn't need to have all the qualities mentioned earlier, but it is necessary that he appear to have them. I'll even add to this: having good qualities and always practicing
them is harmful, while appearing to practice them is useful. It's good to appear to be pious, faithful, humane, honest, and religious, and it's good to be all those things; but as long as one keeps in mind that when the need arises you can and will change into the opposite. It needs to be understood that a prince, and especially a prince recently installed, cannot observe all those qualities which make men good, and it is often necessary in order to preserve the state to act contrary to faity, contrary to mercy, contrary to humaneness, and contrary to religion. And therefore he needs a spirit disposed to follow wherever the winds of fortune and the variability of affairs leads him. As I said above, it's necessary that he not depart from right but that he follow evil.

A prince must take great care never to let anything come from his mouth that is not full of the above-mentioned five qualities, and he must appear to all who see and hear him to be completely pious, completely faithful, completely honest, completely humane, and completely religious. And nothing is more important than to appear to have that last quality. Men judge more by their eyes than by their hands, because everyone can see but few can feel. Everyone can see how you appear, few can feel what you are, and these few will not dare to oppose the opinion of the multitude when it is defended by the majesty of the state. In actions of all men, especially princes, where there is no recourse to justice, the end is all that counts. A prince should only be concerned with conquering or maintaining a state, for the means will always be judged to be honorable and praiseworthy by each and every person, because the masses always follow appearances and the outcomes of affairs, and the world is nothing other than the masses. The few do not find a place wherever the masses are supported. There is a certain prince of our own time, whom it would not be wise to name, who preaches nothing except peace and faith, and yet is the greatest enemy of both; and if he had observed one or the other, he already would have lost both his reputation and his state many times over.

Translated by Richard Hooker

**René Descartes: Discourse on Method (1637)**

*René Descartes, the celebrated mathematician and physicist, is also often considered a founder of modern philosophy, as he sought new ways to move beyond Medieval Aristoteleanism and justify the science of his day. In his Discourse on Method he expresses his disappointment with traditional philosophy and with the limitations of theology; only logic, geometry and algebra hold his respect, because of the utter certainty which they can offer us. Unfortunately, because they depend on hypotheses, they cannot tell us what is real (i.e., what the world is really like). Therefore Descartes proposes a method of thought incorporating the rigor of mathematics but based on intuitive truths about what is real, basic knowledge which could not be wrong (like the axioms of geometry). He calls into question everything that he thinks he has learned through his senses but rests his whole system on the one truth that he cannot doubt, namely, the reality of his own mind and the radical difference between the mental and the physical aspects of the world.*

Descartes (late in our excerpt) suggests that sense experience might be like dreaming, i.e., vivid but not matching the way things really are. But what does he realize must be the case even if his senses cannot
1450 C.E. to 1750 C.E.

be trusted?

Part 1:

Good sense is the most evenly distributed thing in the world, for all people suppose themselves so well provided with it that even those who are the most difficult to satisfy in every other respect never seem to desire more than they have. It is not likely that everyone is mistaken; rather this attitude reveals that the ability to judge and distinguish the true from the false, which is properly what one calls good sense or reason, is in fact naturally equally distributed among all people. Thus the diversity of our opinions does not result from some of us being more reasonable than others, but solely from the fact that we conduct our thoughts along different paths, and consider different things.

As far as reason—or good sense—is concerned, since it is the only thing that makes us human and differentiates us from the animals, I should like to believe that it is entirely present in each of us.

I was nourished by study from my earliest childhood; and since I was convinced that this was the means to acquire a clear and certain knowledge of all that is useful in life, I had an extreme desire to learn. But as soon as I had finished a course of studies which usually culminates in one being accepted as one of the learned, I changed my opinion completely; for I found myself troubled by so many doubts and errors that the only profit I had gained in seeking to educate myself was to discover more and more clearly the extent of my ignorance. Nevertheless I had been at one of the most famous schools in Europe, where I thought there must be wise men if such existed anywhere on earth. There I had learned all that the others learned; and besides, not satisfied with the knowledge that we were taught, I had poured over all the unusual and strange books that I could lay my hands on. In addition, I knew how others evaluated me; and I did not want to be considered inferior to my fellow-students, even though some among them were already destined to take the places of my teachers.

Finally, our century seemed to me to abound in as many wise spirits as any preceding one, which led me to suppose that I could judge the experience of others by my own, and to think that there was no such knowledge in the world such as I had been led to hope for.

I was especially pleased with mathematics because of the certainty and clarity of its proofs; but I did not as yet realize its true usefulness; and, thinking that it was only useful in the mechanical arts, I was astonished that, since its foundations were so firm and solid, no one had built something higher upon it. To the contrary, I felt that the writings of the ancient [pagans (1)] who had discussed morality were like superb, magnificent palaces which were built on mere sand and mud: they greatly praised the virtues and made them appear more exalted than anything else in the world; but they did not sufficiently teach how to know them. Often that which they called by the fine name of "virtue" was nothing but apathy, or pride, or despair, or parricide.

I revered our theology, and hoped as much as anyone else to get to heaven; but having learned, as if it were certain, that the road to heaven is as open to the most ignorant as to the most learned, and that the revealed truths which lead one there are beyond our comprehension, I did not dare to submit them to my feeble reasonings, and I thought that to undertake successfully to examine them one would need some extraordinary heavenly aid and beyond human ability.

Of philosophy I will say nothing except that, seeing that it had been developed by the finest minds that had lived over many centuries and that nevertheless there was no point in it which was not still under dispute, and consequently doubtful, I lacked the presumption to hope that I would succeed any better than the others.
1450 C.E. to 1750 C.E.

When I considered how many different opinions there had been about the same subject put forward by learned men, whereas only one of them could have been correct, I considered that anything which was only probable was as good as false. . . .

It is true that while I considered only the customs of other ordinary men, I found nothing in them to reassure me, and I noticed as much diversity among them as I had earlier done among the opinions of philosophers. The greatest benefit I received from this study was that, having observed many things which, while they seemed quite extravagant and ridiculous, were nevertheless commonly accepted as true and approved by great peoples, I learned not to believe too firmly in anything of which I had been persuaded only by example and custom. Thus I freed myself little by little from many errors which can dim our natural light and even make us less able to listen to reason. But after I had spent several years thus studying the book of the world and trying to get some experience, I one day resolved to study my own self, and to use all the powers of my mind to choose the path I should follow, which was much more successful, it seems to me, than if I had never left my country or my books.

Part 2:

When I was younger I had studied a little among other branches of philosophy, logic, and among types of mathematics, geometrical analysis and algebra: three arts or sciences which seemed as if they ought to contribute something to my goal. But when I examined them, I realized that as far as logic was concerned, its syllogisms and most of its other methods serve only to explain to someone else that which one already knows, or even, like Lully's art, to speak foolishly of things one does not know, rather than to actually learn anything. Even though logic contains, in fact, many very true and good precepts, they are nevertheless mingled with so many others which are harmful or superfluous that it is almost as hard to separate them out as to carve a Diana or a Minerva from an as yet untouched block of marble. Besides, as far as the analysis of the ancients or modern algebra is concerned, and besides the fact that they can deal only with very abstract matters which seem utterly useless, the former is always so restricted to the study of geometrical figures that it cannot exercise the understanding without greatly tiring the imagination; and the latter is so restricted to certain rules and figures that it has become a confused, obscure art which perplexes the mind instead of being a science which cultivates it. So I thought that I had to look for some other method which, having the advantages of these three, would be free of their defects. Just as a multitude of laws often creates excuses for vices, so that the best regulated state is that which, having very few laws, makes those few strictly observed, instead of the great number or precepts which make up logic, I thought that the four following precepts would suffice, provided that I could make a firm, steadfast resolution not to violate them even once.

The first was to never accept anything as true which I could not accept as obviously true; that is to say, to carefully avoid impulsiveness and prejudice, and to include nothing in my conclusions but whatever was so clearly presented to my mind that I could have no reason to doubt it.

The second was to divide each of the problems I was examining in as many parts as I could, as many as should be necessary to solve them.

The third, to develop my thoughts in order, beginning with the simplest and easiest to understand matters, in order to reach by degrees, little by little, to the most complex knowledge, assuming an orderliness among them which did not at all naturally seem to follow one from the other.

And the last resolution was to make my enumerations so complete and my reviews so
1450 C.E. to 1750 C.E.

general that I could be assured that I had not omitted anything.

These long chains of reasoning, so simple and easy, which geometers customarily use to make their most difficult demonstrations, caused me to imagine that everything which could be known by human beings could be deduced one from the other in the same way, and that, provided only that one refrained from accepting anything as true which was not, and always preserving the order by which one deduced one from another, there could not be any truth so abstruse that one could not finally attain it, nor so hidden that it could not be discovered. And I had little trouble finding which propositions I needed to begin with, for I already knew that they would be the simplest and the easiest to know. . . .

I took the best features of geometrical analysis and of algebra, and corrected all the defects of one by the other. (2)

Part 4:

I had noticed for a long time that it was necessary sometimes to agree with opinions about ethics which I knew to be quite uncertain, even though they were indubitable, as I said earlier; but since I wanted to devote myself solely to the search for truth, I thought that I should act in the opposite manner, and reject as absolutely false anything about which I could imagine the slightest doubt, so that I could see if there would not remain after all that something in my belief which could be called absolutely certain. So, because our senses sometimes trick us, I tried to imagine that there was nothing which is the way that we imagine it; and since there are people who are mistaken about the simplest matters of geometry, making mistakes in logic, and supposing that I was as likely to make mistakes as anyone else, I rejected as false all the reasonings that I had considered as valid demonstrations. Finally, considering that all our thoughts which we have when we are awake can also come to us when we are sleeping without a single one of them being true, I resolved to pretend that everything I had ever thought was no more true that the illusions in my dreams. But I immediately realized that, though I wanted to think that everything was false, it was necessary that the "me" who was doing the thinking was something; and noticing that this truth--I think, therefore I am--was so certain and sure that all the wildest suppositions of skeptics could not shake it, I judged that I could unhesitatingly accept it as the first principle of the philosophy for which I was seeking.

Then, examining closely what I was, and seeing that I could imagine that I had no body and that there was no world or place where I was, I could not imagine that I did not exist at all. On the contrary, precisely because I doubted the existence of other things it followed quite obviously and certainly that I did exist. If, on the other hand, I had only ceased to think while everything else that I had imagined remained true, I would have had no reason to believe that I existed; therefore I realized that I was a substance whose essence, or nature, is nothing but thought, and which, in order to exist, needs no place to exist nor any other material thing. So this self, that is to say the soul, through which I am what I am, is entirely separate from the body, and is even more easily known than the latter, so that even if I did not have a body, my soul would continue to be all that it is.

Translated by Paul Brians

(1) Descartes means to include here the Greek philosophers; "pagan" covers anyone who was not a part of Christendom.

(2) It was Descartes who figured out how to combine algebra and geometry such that, on a pair of intersecting axes, we can geometrically map any algebraic function. Those axes are still called "Cartesian co-ordinates."
Michel de Montaigne: *On Cannibals* (1580)

The discovery of so many new lands in the Renaissance had less impact on most Europeans than one might suppose. They were largely absorbed in recovering (and competing with) their own classical past and engaging in violent theological and political disputes among themselves. Yet some Europeans were profoundly shaken by the new discoveries into realizing that much of the world thought and lived very differently from what was then known as "Christendom." No writer was more strongly moved to view his own society from a new perspective in the light of reports brought back of the habits of the natives of the "New World" than Michel de Montaigne. He began a long tradition of using non-European peoples as a basis for engaging in a critique of his own culture, undoubtedly in the process romanticizing what Jean-Jacques Rousseau would later call "the noble savage." It is a theme which still appeals to many Westerners.

What reason does Montaigne give for judging cannibalistic Native Americans to be preferable to Europeans?

When King Pyrrhus invaded Italy, after he had reconnoitered the armed forces that the Romans had sent out against him, he said, "I don't know who these barbarians are"--for the Greeks called all foreign peoples barbarians--"but the organization of the army I see before me is not at all barbaric." The Greeks said the same when Flamininus invaded their country, as did Philip, when he saw from a hill the orderly layout of the Roman camp which had been set up in his kingdom under Publius Sulpicius Galba. These examples illustrate how one must avoid accepting common prejudices: opinions must be judged by means of reason, and not by adopting common opinion.

I had with me for a long time a man who had lived for ten or twelve years in this other world which has been discovered in our time, in the place where Villegaignon landed, which he named [Antarctic France](#). This discovery of an enormous land seems to me to be worth contemplating. I doubt that I could affirm that another such may not be discovered in the future, since so many greater people than I were mistaken about this one. I'm afraid that our eyes are bigger than our stomachs, and that we have more curiosity than comprehension. We try to embrace everything but succeed only in grasping the wind.

. . . I do not find that there is anything barbaric or savage about this nation, according to what I've been told, unless we are to call barbarism whatever differs from our own customs. Indeed, we seem to have no other standard of truth and reason than the opinions and customs of our own country. There at home is always the perfect religion, the perfect legal system--the perfect and most accomplished way of doing everything. These people are wild in the same sense that fruits are, produced by nature, alone, in her ordinary way. Indeed, in that land, it is we who refuse to alter our artificial ways and reject the common order that ought rather to be called wild, or [savage](#). In them the most natural virtues and abilities are alive and vigorous, whereas we have bastardized them and adopted them solely to our corrupt taste. Even so, the flavor and delicacy of some of the wild fruits from those countries is excellent, even to our taste, better than our cultivated ones. After all, it would hardly be reasonable that artificial breeding should be able to outdo our great and powerful mother, Nature. We have so burdened the beauty and richness of her works by our innovations that we have entirely stifled her. Yet whenever she shines forth in her purity she puts our vain and frivolous enterprises amazingly to shame.
1450 C.E. to 1750 C.E.

Et veniunt ederæ sponte sua melius,
surgit et in solis formosior arbutus anris,
et volucres nulla dulcius arte canunt. (3)

All our efforts cannot create the nest of the tiniest bird: its structure, its beauty, or the usefulness of its form; nor can we create the web of the lowly spider. All things, said Plato are produced by nature, chance, or human skill, the greatest and most beautiful things by one of the first two, the lesser and most imperfect, by the latter.

These nations seem to me, then, barbaric in that they have been little refashioned by the human mind and are still quite close to their original naïveté. They are still ruled by natural laws, only slightly corrupted by ours. They are in such a state of purity that I am sometimes saddened by the thought that we did not discover them earlier, when there were people who would have known how to judge them better than we. It displeases me that Lycurgus or Plato didn’t know them, for it seems to me that these peoples surpass not only the portraits which poetry has made of the Golden Age and all the invented, imaginary notions of the ideal state of humanity, but even the conceptions and the very aims of philosophers themselves. They could not imagine such a pure and simple naïveté as we encounter in them; nor would they have been able to believe that our society might be maintained with so little artifice and social structure.

This is a people, I would say to Plato, among whom there is no commerce at all, no knowledge of letters, no knowledge of numbers, nor any judges, or political superiority, no habit of service, riches, or poverty, no contracts, no inheritance, no divisions of property, no occupations but easy ones, no respect for any relationship except ordinary family ones, no clothes, no agriculture, no metal, no use of wine or wheat. The very words which mean "lie," "treason," "deception," "greed," "envy," "slander" and "forgiveness" are unknown. How far his imaginary Republic would be from such perfection:

viri a diis recentes (4)
Hos natura modos primum dedit. . . (5)

They have their wars against peoples who live beyond their mountains, further inland, to which they go entirely naked, bearing no other arms that bows and sharpened stakes like our hunting spears. The courage with which they fight is amazing: their battles never end except through death of bloodshed, for they do not even understand what fear is. Each one carries back as a trophy the head of the enemy that he has killed, and hangs it up at the entrance to his home. After having treated their prisoners well for a long time, giving them all the provisions that they could one, he who is the chief calls a great assembly of his acquaintances. He ties a rope to one of the arms of the prisoner and on the other end, several feet away, out of harm’s way, and gives to his best friend the arm to hold; and the two of them, in the presence of the assembled group, slash him to death with their swords. That done, they roast him and eat him together, sending portions to their absent friends. They do this, not as is supposed, for nourishment as did the ancient Scythians; it represents instead an extreme form of vengeance. The proof of this is that when they saw that the Portuguese, who had allied themselves with their adversaries, when they executed their captives differently, burying them up to the waist and firing numerous arrows into the remainder of the body, hanging them afterward, they viewed these people from another world, who had spread the knowledge of many vices among their neighbors, and who were much more masterly than they in every sort of evil, must have chosen this sort of revenge for a reason. Thinking that it must be more bitter than their own, they abandoned their ancient way to imitate this one.
1450 C.E. to 1750 C.E.

I am not so concerned that we should remark on the barbaric horror of such a deed, but that, while we quite rightly judge their faults, we are blind to our own. I think it is more barbaric to eat a man alive than to eat him dead, to tear apart through torture and pain a living body which can still feel, or to burn it alive by bits, to let it be gnawed and chewed by dogs or pigs (as we have no only read, but seen, in recent times, not against old enemies but among neighbors and fellow-citizens, and—what is worse—under the pretext of piety and religion. (6) Better to roast and eat him after he is dead.

Translated by Paul Brians

(1) Brazil.

(2) Sauvage in French means both wild and savage.

(3) The ivy grows best when it grows wild, and the arbutus is most lovely when it grows in solitude; untaught birds sing most sweetly. Propertius, I, ii, 10.

(4) Men freshly molded from the hands of the gods. (Seneca: Epistles, 90.)

(5) These are the first laws laid down by Nature. (Virgil: Georgics, II, 20.)

(6) Montaigne is describing the tortures frequently carried out by the Holy Inquisition against heretics.

Jonathon Swift: A Modest Proposal

Swift was Irish, and though he much preferred living in England, he resented British policies toward the Irish. In a letter to Pope of 1729, he wrote, "Imagine a nation the two-thirds of whose revenues are spent out of it, and who are not permitted to trade with the other third, and where the pride of the women will not suffer [allow] them to wear their own manufactures even where they excel what come from abroad: This is the true state of Ireland in a very few words." His support for Irish causes has made him a renowned figure in modern Ireland. The paragraph numbers have been added for this edition.

For Preventing the Children of Poor People in Ireland, from Being a Burden on Their Parents or Country, and for Making Them Beneficial to the Publick.

It is a melancholly Object to those, who walk through this great Town or travel in the Country, when they see the Streets, the Roads, and Cabbin-Doors, crowded with Beggars of the female Sex, followed by three, four, or six Children, all in Rags, and importuning every Passenger for an Alms. These Mothers instead of being able to work for their honest livelihood, are forced to employ all their time in Stroiling, to beg Sustenance for their helpless Infants, who, as they grow up either turn Thieves for want of work, or leave their dear native Country to fight for the Pretender in Spain or sell themselves to the Barbadoes.

I think it is agreed by all Parties, that this prodigious number of Children, in the Arms, or on the Backs, or at the heels of their Mothers, and frequently of their Fathers, is in the present deplorable state of the Kingdom, a very great additional grievance; and therefore whoever could find out a fair, cheap and easy method of making these Children sound and useful Members of the common-wealth would deserve so well of the publick, as to have his Statue set up for a preserver of the Nation.

But my Intention is very far from being confined to provide only for the Children of professed beggars, it is of a much greater extent, and shall take in the whole number of

~ 84 ~
Infants at a certain Age, who are born of Parents in effect as little able to support them, as those who demand our Charity in the Streets. As to my own part, having turned my thoughts for many Years, upon this important Subject, and maturely weighed the several Schemes of other Projectors, I have always found them grossly mistaken in their computation. It is true a Child, just drop from it’s Dam may be supported by her Milk, for a Solar year with little other Nourishment, at most not above the Value of two Shillings, which the Mother may certainly get, or the Value in Scraps, by her lawful Occupation of begging, and it is exactly at one year Old that I propose to provide for them, in such a manner, as, instead of being a Charge upon their Parents, or the Parish for wanting Food and Raiment for the rest of their Lives, they shall, on the Contrary, contribute to the Feeding and partly to the Cloathing of many Thousands.

There is likewise another great Advantage in my Scheme, that it will prevent those voluntary Abortions, and that horrid practice of Women murdering their Bastard Children, alas! too frequent among us, Sacrificing the poor innocent Babes, I doubt more to avoid the Expence, than the Shame, which would move Tears and Pity in the most Savage and inhuman breast.

The number of Souls in this Kingdom being usually reckoned one Million and a half, Of these I calculate there may be about two hundred thousand Couple whose Wives are breeders, from which number I Subtract thirty Thousand Couples, who are able to maintain their own Children, although I apprehend there cannot be so many, under the present distresses of the Kingdom, but this being granted, there will remain an hundred and seventy thousand Breeders. I again Subtract fifty Thousand for those Women who miscarry, or whose Children dye by accident, or disease within the Year. There only remain an hundred and twenty thousand Children of poor Parents annually born: The question therefore is, How this number shall be reared, and provided for, which, as I have already said, under the present Situation of Affairs, is utterly impossible by all the methods hitherto proposed, for we can neither employ them in Handicraft, or Agriculture; we neither build Houses, (I mean in the Country) nor cultivate Land they can very seldom pick up a Livelyhood by Stealing until they arrive at six years Old, except where they are of towardly parts although, I confess they learn the Rudiments much earlier; during which time they can however be properly looked upon only as Probationers, as I have been informed by a principal Gentleman in the County of Cavan, who protested to me, that he never knew above one or two Instances under the Age of six, even in a part of the Kingdom so renowned for the quickest proficiency in that Art.

I am assured by our Merchants, that a Boy or Girl, before twelve years Old, is no saleable Commodity, and even when they come to this Age, they will not yield above three Pounds, or three Pounds and half a Crown at most on the Exchange, which cannot turn to Account either to the Parents or the Kingdom, the Charge of Nutriments and Rags having been at least four times that Value.

I shall now therefore humbly propose my own thoughts, which I hope will not be lyable to the least Objection.

I have been assured by a very knowing American of my acquaintance in London, that a young healthy Child well Nursed is at a year Old, a most delicious, nourishing, and wholesome Food, whether Stewed, Roasted, Baked, or Boyled, and I make no doubt that it will equally serve in a Fricasie, or Ragout.

I do therefore humbly offer it to publick consideration, that of the hundred and twenty thousand Children, already computed, twenty thousand may be reserved for Breed, whereof only one fourth part to be Males, which is more
than we allow to Sheep, black Cattle, or Swine, and my reason is, that these Children are seldom the Fruits of Marriage, a Circumstance not much regarded by our Savages, therefore, one Male will be sufficient to serve four Females. That the remaining hundred thousand may at a year Old be offered in Sale to the persons of Quality and Fortune, through the Kingdom, always advising the Mother to let them Suck plentifully in the last Month, so as to render them Plump, and Fat for a good Table. A Child will make two Dishes at an Entertainment for Friends, and when the Family dines alone, the fore or hind Quarter will make a reasonable Dish, and seasoned with a little Pepper or Salt will be very good Boiled on the Fourth Day, especially in Winter.

I have reckoned upon a Medium, that a Child just born will weigh 12 pounds, and in a solar Year if tolerably nursed encreaseth to 28 Pounds.

I grant this food will be somewhat dear and therefore very proper for Landlords, who, as they have already devoured most of the Parents, seem to have the best Title to the Children.

Infant's flesh will be in Season throughout the Year, but more plentiful in March, and a little before and after; for we are told by a grave Author, an eminent French phisitian, that Fish being a prolifick Dyet, there are more Children born in Roman Catholic Countries about nine Months after Lent, than at any other Season, therefore reckoning a Year after Lent, the Markets will be more glutted than usual, because the Number of Popish Infants, is at least three to one in this Kingdom, and therefore it will have one other Collateral advantage by lessening the Number of Papists among us.

I have already computed the Charge of nursing a Beggars Child (in which list I reckon all Cottagers, Labourers, and four fifths of the Farmers) to be about two Shillings per Annum, Rags included; and I believe no Gentleman would repine to give Ten Shillings for the Carcass of a good fat Child, which, as I have said will make four Dishes of excellent Nutritive Meat, when he hath only some particular friend, or his own Family to Dine with him. Thus the Squire will learn to be a good Landlord, and grow popular among his Tenants, the Mother will have Eight Shillings neat profit, and be fit for Work till she produceth another Child.

Those who are more thrifty (as I must confess the Times require) may flay the Carcass; the Skin of which, Artificially dressed, will make admirable Gloves for Ladies, and Summer Boots for fine Gentlemen.

As to our City of Dublin, Shambling may be appointed for this purpose, in the most convenient parts of it, and Butchers we may be assured will not be wanting, although I rather recommend buying the Children alive, and dressing them hot from the Knife, as we do roasting Pigs.

A very worthy Person, a true Lover of his Country, and whose Virtues I highly esteem, was lately pleased, in discoursing on this matter, to offer a refinement upon my Scheme. He said, that many Gentlemen of this Kingdom, having of late destroyed their Deer, he conceived that the want of Venison might be well supplied by the Bodies of young Lads and Maidens, not exceeding fourteen Years of Age, nor under twelve; so great a Number of both Sexes in every County being now ready to Starve, for want of Work and Service: And these to be disposed of by their Parents if alive, or otherwise by their nearest Relations. But with due deference to so excellent a friend, and so deserving a Patriot, I cannot be altogether in his Sentiments, for as to the Males, my American acquaintance assured me from frequent Experience, that their flesh was generally Tough and Lean, like that of our School-boys, by continual exercise, and their Taste disagreeable, and to Fatten them would not answer the Charge. Then as to the Females,
it would, I think, with humble Submission, be a loss to the Publick, because they soon would become Breeders themselves: And besides it is not improbable that some scrupulous People might be apt to Censure such a Practice, (although indeed very unjustly) as a little bordering upon Cruelty, which, I confess, hath always been with me the strongest objection against any Project, how well soever intended.

But in order to justify my friend, he confessed, that this expedient was put into his head by the famous Sallmanzaor,[23] a Native of the Island Formosa, who came from thence to London, above twenty Years ago, and in Conversation told my friend, that in his Country when any young Person happened to be put to Death, the Executioner sold the Carcass to Persons of Quality, as a prime Dainty, and that, in his Time, the Body of a plump Girl of fifteen, who was crucified for an attempt to Poison the Emperor, was sold to his Imperial Majesty's prime Minister of State, and other great Mandarin, of the Court, in Joints from the Gibbet[24] at four hundred Crowns. Neither indeed can I deny, that if the same use were made of several plump young Girls in this Town, who, without one single Groa[25] to their Fortunes, cannot stir abroad without a Chair, and appear at a Play-House, and Assemblies in Foreign fineries, which they never will Pay for; the Kingdom would not be the worse.

Some Persons of a desponding Spirit are in great concern about that vast Number of poor People, who are aged, diseased, or maimed, and I have been desired to implant my thoughts what Course may be taken, to ease the Nation of so grievous an Incumbrance. But I am not in the least pain upon that matter, because it is very well known, that they are every Day dying, and rotting, by cold, and famine, and filth, and vermin, as fast as can be reasonably expected. And as to the younger Labourers they are now in almost as hopeful a Condition. They cannot get Work, and consequently pine away from want of Nourishment, to a degree, that if at any time they are accidentally hired to common Labour, they have not strength to perform it, and thus the Country and themselves are happily delivered from the Evils to come.

I have too long digressed, and therefore shall return to my subject. I think the advantages by the Proposal which I have made are obvious and many, as well as of the highest importance.

For first, as I have already observed, it would greatly lessen the Number of Papists, with whom we are Yearly over-run, being the principal Breeders of the Nation, as well as our most dangerous Enemies, and who stay at home on purpose with a design to deliver the Kingdom to the Pretender, hoping to take their Advantage by the absence of so many good Protestants[26] who have chosen rather to leave their Country, than stay at home, and pay Tythes against their Conscience, to an idolatrous Episcopal Curate.

Secondly, the poorer Tenants will have something valuable of their own, which by Law may be made lyable to Distress[27] and help to pay their Landlord's Rent, their Corn and Cattle being already seazed, and Money a thing unknown.

Thirdly, Whereas the Maintainance of an hundred thousand Children, from two Years old, and upwards, cannot be computed at less than Ten Shillings a piece per Annum, the Nation's Stock will be thereby encreased fifty thousand pounds per Annum, besides the profit of a new Dish, introduced to the Tables of all Gentlemen of Fortune in the Kingdom, who have any refinement in Taste, and the Money will circulate among our selves, the Goods being entirely of our own Growth and Manufacture.

Fourthly, The constant Breeders, besides the gain of Eight Shillings Sterling per Annum, by the Sale of their Children, will be rid of the Charge of maintaining them after the first Year.

~ 87 ~
Fifthly, this food would likewise bring great Custom to Taverns, where the Vintners will certainly be so prudent as to procure the best receipt for dressing it to perfection, and consequently have their Houses frequented by all the fine Gentlemen, who justly value themselves upon their knowledge in good Eating, and a skilful Cook, who understands how to oblige his Guests will contrive to make it as expensive as they please.

Sixthly, This would be a great Inducement to Marriage, which all wise Nations have either encouraged by Rewards, or enforced by Laws and Penalties. It would encrease the care and tenderness of Mothers towards their Children, when they were sure of a Settlement for Life, to the poor Babes, provided in some sort by the Publick to their Annual profit instead of Expence, we should soon see an honest Emulation among the married women, which of them could bring the fattest Child to the Market, Men would become as fond of their Wives, during the Time of their Pregnancy, as they are now of their Mares in Foal, their Cows in Calf, or Sows when they are ready to Farrow, nor offer to Beat or Kick them (as is too frequent a practice) for fear of a Miscarriage.

Many other advantages might be enumerated: For Instance, the addition of some thousand Carcasses in our exportation of Barreled Beef. The Propagation of Swines Flesh, and Improvement in the Art of making good Bacon, so much wanted among us by the great destruction of Pigs, too frequent at our Tables, which are no way comparable in Taste, or Magnificence to a well grown, fat Yearling Child, which Roasted whole will make a considerable Figure at a Lord Mayor’s Feast, or any other Publick Entertainment. But this, and many others I omit being studious of Brevity.

Supposing that one thousand Families in this City, would be constant Customers for Infants Flesh, besides others who might have it at Merry-meetings, particularly at Weddings and Christenings, I compute that Dublin would take off Annually about twenty thousand Carcasses, and the rest of the Kingdom (where probably they will be Sold somewhat Cheaper) the remaining eighty thousand.

I can think of no one Objection, that will possibly be raised against this Proposal, unless it should be urged, that the Number of People will be thereby much lessened in the Kingdom. This I freely own and it was indeed one Principal design in offering it to the World. I desire the Reader will observe, that I Calculate my Remedy for this one individual Kingdom of IRELAND, and for no other that ever was, is, or, I think, ever can be upon Earth. Therefore let no man talk to me of other expedients of taxing our Absentees at five Shillings a pound. Of using neither Cloaths, nor household Furniture, except what is of our own Growth and Manufacture: Of utterly rejecting the Materials and Instruments that promote Foreign Luxury: Of curing the Expenciveness of Pride, Vanity, Idleness, and Gaming in our Women: Of introducing a Vein of Parcimony, Prudence and Temperance: Of learning to Love our Country, wherein we differ even from LAPLANDERS, and the Inhabitants of TOPINAMBOO. Of quitting our Animosities, and Factions, nor Act any longer like the Jews, who were Murdering one another at the very moment their City was taken Of being a little Cautious not to Sell our Country and Consciences for nothing: Of teaching Landlords to have at least one degree of Mercy towards their Tenants. Lastly of putting a Spirit of Honesty, Industry and Skill into our Shop-keepers, who, if a Resolution could now be taken to Buy only our Native Goods, would immediately unite to Cheat and Exact upon us in the Price, the Measure, and the Goodness, nor could ever yet be brought to make one fair Proposal of just dealing, though often and earnestly invited to it.

Therefore I repeat, let no Man talk to me of these and the like Expedients, till he hath at least a Glimpse of Hope, that there will ever be
some hearty and sincere attempt to put them into Practice.

But as to myself, having been wearied out for many Years with offering vain, idle, visionary thoughts, and at length utterly despairing of Success, I fortunately fell upon this Proposal, which as it is wholly new, so it hath something Solid and Real, of no Expence and little Trouble, full in our own Power, and whereby we can incur no Danger in disobligeing England. For this kind of Commodity will not bear Exportation, the Flesh being of too tender a Consistance, to admit a long continuance in Salt, although perhaps I could name a Country, which would be glad to Eat up our whole Nation without it.¹

After all I am not so violently bent upon my own Opinion, as to reject any Offer, proposed by wise Men, which shall be found equally Innocent, Cheap, Easy and Effectual. But before something of that kind shall be advanced in Contradiction to my Scheme, and offering a better, I desire the Author, or Authors will be pleased maturely to consider two points. First, As things now stand, how they will be able to find Food and Raiment for a hundred thousand useless Mouths and Backs. And Secondly, there being a round Million of Creatures in humane Figure, throughout this Kingdom, whose whole Subsistence put into a common Stock, would leave them in Debt two Millions of Pounds Sterling adding those, who are Beggars by Profession, to the Bulk of Farmers, Cottagers and Labourers with their Wives and Children, who are Beggars in Effect; I desire those Politicians, who dislike my Overture, and may perhaps be so bold to attempt an Answer, that they will first ask the Parents of these Mortals, whether they would not at this Day think it a great Happiness to have been sold for Food at a year Old, in the manner I prescribe, and thereby have avoided such a perpetual Scene of Misfortunes, as they have since gone through, by the oppression of Landlords, the Impossibility of paying Rent without Money or Trade, the want of common Sustenance, with neither House nor Cloaths to cover them from Inclemencies of Weather, and the most inevitable Prospect of intailing the like, or greater Miseries upon their Breed for ever.

I Profess in the sincerity of my Heart that I have not the least personal Interest in endeavouring to promote this necessary Work having no other Motive than the publick Good of my Country, by advancing our Trade, providing for Infants, relieving the Poor, and giving some Pleasure to the Rich. I have no Children, by which I can propose to get a single Penny; the youngest being nine Years old, and my Wife past Child-bearing.

**The Lady and Her Five Suitors, from The Thousand and One Nights**

The sprawling, untidy collection of stories known throughout the Arab-speaking world as the Thousand and One Nights (and in English long called The Arabian Nights) evolved over a long period of time, and it is impossible to say just when a particular story was written. Because the collection reached its more or less definitive form in the 16th century we have chosen to place this example here. Such tales of magic as "Aladdin and the Wonderful Lamp" and "Ali Baba and the Forty Thieves" are actually quite unrepresentative of the bulk of the Nights. Most are decidedly adult tales of scandal and treachery, often involving faithless women. It is an irony that cultures which depict women as irrepressibly sexual (including European culture, with its Decameron and other story collections), simultaneously tend to portray them as highly intelligent; for in a repressive patriarchal society it takes a good deal of cleverness to break the rules successfully. This story stands out in depicting sympathetically a heroine who manages

~ 90 ~
to cleverly make fools of her would-be lovers by developing her own unique defense against sexual harassment.

In what sense can this adulterous woman be called faithful?

A woman of the merchant class was married to a man who was a great traveler. Once he set out for a far country and was absent so long that his wife, out of sheer boredom, fell in love with a handsome young man, and they loved each other exceedingly. One day, the youth quarreled with another man, who lodged a complaint against him with the Chief of Police, and he cast him into prison. When the news came to the merchant's wife, she nearly lost her mind. Then she arose and—putting on her richest clothes—went to the house of the Chief of Police. She Greeted him and presented him with a petition which read, "The man you have imprisoned is my brother So-and-So, who had a fight with someone; but those who testified against him lied. He has been wrongfully imprisoned, and I have no one else to live with or to support me; therefore I beg you graciously to release him."

When the Chief had read the petition, he looked at her and immediately fell in love with her; so he said to her, "Go into my house, till I bring him out; then I will send for you and you may take him away."

"O, my lord," she replied, "I have no one to protect me except almighty God. I cannot enter any strange man's home."

The Chief said, "I will not let him go unless you come to my home and let me do what I will with you."

She answered, "If it must be, you must come to my home and sleep through the afternoon and evening there."

"And where is your home?" he asked; and she answered, "At such-and-such a place," and arranged a time for him to come.

Then she left him, who had entirely fallen in love with her, and went to the Cadi of the city, to whom she said, "O, our lord the Cadi!"

He said, "Yes?" and she continued, "Examine my case and you will be rewarded God."

He said, "Who has wronged you?" and she replied, "O my lord, I have a brother, my only brother, and it is on his behalf that I come to you, because the Chief has imprisoned him as a criminal and men have borne false witness against him, claiming that he is an evil man, and I beg you to intercede for him with the Chief of Police."

When the Cadi gazed at her, he immediately fell in love with her and said, "Go into the house and rest awhile with the women in my harm while I send to the Chief to release your brother. If I knew how much his fine was, I would pay it myself out of my own purse sot that I could enjoy you, for your sweet speech greatly pleases me.:"

She said, "If you, O my lord, are to behave in this way, we would not be able to blame others."

Said he, "If you will not come in, go away."

Then she said, "If you insist, O our lord, it will be better and more private at my place than in yours, for here there are slave-girls and eunuchs and people coming and going; and indeed I am not this sort of woman, but I see that I must give in."

The Cadi asked, "And where is your house?" and she answered, "In such-and-such a place, and set for him the same day and time as the Chief of Police.
Then she went from him to the Vizier, to whom she offered her petition for the release from prison of her brother, who was absolutely necessary to her; but he also demanded she give herself to him, saying "Allow me to do what I will with you and I will set your brother free."

She said, "If you insist, let it be in my house, for there we shall both have more privacy. It is not far away, and you I will wash and dress myself properly for you.

He asked, "Where is your house."

"In such-and-such a place," she answered, and set the same time for as for the two others.

Then she left him to go to the King and told him her story and sought her brother's release. "Who imprisoned him?" he asked; and she replied, "It was the Chief of Police." When the King heard her speech, it pierced his heart with arrows of love, and he asked her to enter this private chamber with him so that he might send to the Cadi to have her brother released.

But she said, "O King, everything is easy for you, whether I agree or not; and if the King indeed wants me, I am fortunate; but if he will come to my house he will do me more honor by entering it, as the poet says: "O my friends, have you seen or have you heard of his visit whose virtues I hold so high?"

The King said, "I do not disagree." So she set for him the same time as the three others and told him where her house was.

Then she left him and sought out a carpenter, and told him "I want you to make me a cabinet with four compartments, one above the other, each with a door that can be locked. Let me know how much it will cost and I will pay it."

He replied, "My price is four dinars; but, sweet lady, if you will grant me your favors, I will charge you nothing."

She answered, "If it is absolutely necessary, I will agree; but in that case make five compartments with their padlocks," and she told him to bring it exactly on the day required.

He said, "This is well; sit down, O my lady, and I will make it for you immediately, and then will come with you." So she sat down by him while he began working on the cabinet; and when he had finished it she asked to have it carried home at once and set up in her sitting-room. Then she took four gowns and carried them to the dyer, who dyed each of them a different color; after which she prepared meat and drink, fruits, flowers, and perfumes.

Now when the appointed day came, she put on her costliest dress and adorned herself and scented herself, then spread the sitting-room with various kinds of rich carpets and sat down to await who should come.

The Cadi was the first to appear; and when she saw him, she rose to her feet and kissed the ground before him. Then, taking him by the hand, made him sit down by her on the couch and lay with him and fell to joking and toying with him. Soon he wanted to fulfill his desires with her, but she said, "O my lord, take off your clothes and turban and put on this yellow robe and bonnet[1], while I bring you food and drink, and then you shall do what you will." So saying, she took his clothes and turban and dressed him in the robe and bonnet; but hardly had she done this when there was a knocking at the door.

He asked, "Who is that knocking at the door?" and she answered, "My husband!"

"What shall I do? Where shall I go?" the Cadi said.
"Have no fear," she replied;" I will hide you in this cabinet;" and he answered, "Do whatever you think necessary." So she took him by the hand, and pushing him into the lowest compartment, locked he door on him. Then she went to the door of the house, where she found the Chief; so she kissed the ground before him, and taking his hand, brought him into the sitting-room and said to him, "O my lord, make this house your own, this place you place, and I will be your servant. You shall spend all days with me; so take off your clothes and put on this red sleeping gown." So she took away his clothes and made him put on the red gown and set on his head an old patched rag she happened to have; after which she sat by him on the divan and they toyed with each other until he reached to touch her intimately, whereupon she said to him, "O our lord, this is your day, and no one will share it with us; but first, if you will be so kind and generous, write me an order for my brother's release from jail so that my heart can rest easy."

He said, "I hear and obey, by my head and eyes!" and wrote a letter to his treasurer saying, "As soon as this communication reaches you, set So-and-so free, without delay. Do not even wait to give the messenger an answer." Then he sealed it and she took it from him, after which she began to toy with him on the divan again when someone suddenly knocked at the door.

"Who is that?" he asked; and she answered, "My husband." "What shall I do?" he asked, and she replied, "Enter this cabinet, till is end him away and return to you."

So she set him up in the second compartment from the bottom and padlocked the door; and meanwhile the Cadi heard everything they said. Then she went to the house door and opened it, and in entered the Vizier. She kissed the ground before him and received him with all honor, saying "O my lord, you flatter us by coming to our house; may God never deprive us of the light of your countenance!"

Then she seated him on the divan and said to him, "O my lord, take off your heavy clothes and turban and put on these lighter garments." So he took off his clothes and turban and she dressed him in a blue shirt and a tall red bonnet, and said to him, "Those were your official robes; so leave them be for their own time and put on this light gown which is more suitable for carousing and making merry and sleep." Then they began to play with each other, and he was just about to take her when she put him off by saying, "We will get to that."

As they were talking there came a knock at the door, and the Vizier asked her, "Who is that?" to which she replied, "My husband." "What is to be done?" he said; and she answered, "Hide in this cabinet until I can get rid of him and come back to you; don't be afraid." So she put him in the third compartment and locked the door on him, after which she went out and opened the house door, and in came the King.

As soon as she saw him she kissed the ground before him, and taking him by the hand, led him into the sitting-room and seated him on the divan at the far end. Then she said to him, "Truly, O King, you honor us highly, and whatever we might give you of all the world contains would not be worth a single one of your steps toward us." And when he had sat down on the divan she said, "Permit me to say one thing."

"Whatever you wish," he answered; and she said, "O my lord, relax and take off your robe and turban." His clothes were worth a thousand dinars; but when he took them off she dressed him in a patched gown worth ten dirhams at the very most, and began talking and joking with him. All this time the men in the cabinet heard everything that went on but did not dare to say a word. Soon the King placed his hand on her breast and sought to fulfill his desire for her; but she said "We will do this soon, but first I promised myself that I would entertain you properly in this room, and I have something to please you."
As they were speaking, someone knocked at the door and he asked her, "Who is that? "My husband," she answered; and he said, "Make him go away voluntarily, or I will go out and force him to go away."

She replied, "No, O my lord, be patient while I send him away using my cleverness." "And what shall I do?" asked the King; whereupon she took him by the hand and, making him enter the fourth compartment of the cabinet, locked it upon him.

Then she went out and opened the house door to the carpenter, who entered and greeted her. She said, "What kind of a cabinet is this you've made me?" "What's wrong with it, O my lady?" he asked; and she answered, "The top compartment is too narrow." He replied, "No it isn't," and she answered, "Get in yourself and see; you cannot fit in it."

He answered, "it is wise enough for four," and entered the fifth compartment, whereupon she locked the door on him.

Then she took the letter of the Chief of Police and carried it to the treasurer who, having read and understood it, kissed it and delivered her lover to her. She told him all she had done and he said, "But what shall we do now?" She answered, "We will move away to another city, for after all this we cannot remain here." So the two of them packed up what possessions they had and, loading them on camels, set out immediately for another city.

Meanwhile, the five men remained each in his compartment of the cabinet without eating or drinking for three whole days, during which time they held their water, until at last the carpenter couldn't hold back any longer, so he pissed on the King's head, and the King pissed on the Vizier's head, and the Vizier pissed on the Chief, and the Chief pissed on the Cadi, whereupon the Cadi shouted, "What filth is this? Isn't it bad enough that we are trapped like this that you have to piss all over us?"

The Chief of Police recognized the Cadi's voice and answered, "May God reward you, O Cadi!" And when the Cadi heard him, he knew it was the Chief. Then the Chief shouted, "What's the meaning of this filth?" and the Vizier replied, "May God reward you, O Chief!" so that he recognized him as the Vizier. Then the Vizier shouted "What is this nastiness?" But when the King heard his Vizier's voice he recognized it, so he kept silent to conceal his plight.

Then the vizier said, "May God curse this woman for the way she has dealt with us. She has brought together here all the chief officials of the state, except the King. Said the King, "Silence! For I was the first one to be entrapped by this shameless whore."

At this the carpenter cried out, "And what have I done? I made her a cabinet for four gold pieces, and when I came to get my pay, she tricked me into entering this compartment and locked the door on me." And they began talking with each other, diverting the King and reducing his shame.

Soon, however, the neighbors came by the house and noticed it was deserted. They said to one another, "Only yesterday, our neighbor the wife of So-and-so was home; but no we cannot hear or see anyone. Let's break down the doors and see what is the matter; or news of the case may come to the Chief of the King, and we will be thrown into prison to regret that we had not taken action earlier."

So they broke down the doors and entered the sitting room, where they saw a large wooden cabinet and heard the men in it groaning with hunger and thirst. Then one of them said, "Is there a Genie in this cabinet?" and another said, "Let's pile fuel around it and burn it up."

When the Cadi heard this, he cried out, "Don't!" and they said to each other, "The Genies pretend they are mortals and speak with the voices of men." Thereupon the Cadi recited a
passage from the Blessed Qur’an, and said to the neighbors, "Come closer to the cabinet."

So they came closer, and he told him, "I am So-and-so the Cadi, and you are so and so, and here we are all together." The neighbors said, "Who put you in here?" And he told them the whole story from beginning to end. They brought a carpenter to open the five doors and let out the Cadi, the Vizier, the Chief, the King and the carpenter in their bizarre robes; and each one, when he saw how the others were dressed, began laughing at them. She had taken away all their clothes; so all of them sent to their homes for fresh clothing and put it on and went out, shielding themselves from people's eyes.

(1) It was customary for party guests to put on special garments supplied by the host.

(2) Magic spirit.

Translated by Richard Burton, revised by Paul Brians

Sunni versus Shi’ite: “We Exhort You to Embrace the True Faith!”

This selection is a letter from the Ottoman ruler, Selim I to his Persian rival, Isma’il I, leader of the Shi’ite Safavid state. Ismail had entered Ottoman territory and had demanded that Ottoman subjects accept Shi’ism. This response by Selim I, a committed Sunni, reveals the divisive competition among Islamic religious sects and political leaders. Selim I won the battle of Chaldiran in 1514 and protected his territory from Shi’ite encroachment.

Questions:

1. What is the purpose of this warning to Amir Isma’il from Sultan Selim I.
2. How does Selim use the Qur’an to justify his actions?

Keep in Mind . . .

• What is the purpose of this warning to Amir Isma’il from Sultan Selim I?
• How does Selim use the Qur’an to justify his actions?

Consider This:

• Aren’t Sunnis and Shi’ites both Muslims? What was the reason for this confrontation?
• Why was Selim I so sure that he embodied the “true religion” and that this justified his military threat?

SULTAN SELIM I

The Supreme Being who is at once the sovereign arbiter of the destinies of men and the source of all light and knowledge, declares in the Qur’an that the true faith is that of the Muslims, and that whoever professes another religion, far from being hearkened to and saved, will on the contrary be cast out among the rejected on the great day of the Last Judgment; He says further, this God of truth, that His designs and decrees are unalterable, that all human acts are perforce reported to Him, and that he who abandons the good way will be
condemned to hell-fire and eternal torments. Place yourself, O Prince, among the true believers, those who walk in the path of salvation, and who turn aside with care from vice and infidelity. May the purest and holiest blessings be upon Muhammad, the master of the two worlds, the prince of prophets, as well as upon his descendants and all who follow his Law!

I, sovereign chief of the Ottomans, master of the heroes of the age . . . I, the exterminator of idolaters, destroyer of the enemies of the true faith, the terror of the tyrants and pharaohs of the age; I, before whom proud and unjust kings have humbled themselves . . . and whose hand breaks the strongest scepters; . . . I address myself graciously to you, Amir Isma’il, chief of the troops of Persia . . . and predestined to perish . . . in order to make known to you that the works emanating from the Almighty are not the fragile products of caprice or folly, but make up an infinity of mysteries impenetrable to the human mind. The Lord Himself says in His holy book: “We have not created the heavens and the earth in order to play a game” [Qur’an, 21:16]. Man, who is the noblest of the creatures and the summary of the marvels of God, is in consequence on earth the living image of the Creator. It is He who has set up Caliphs on earth, because, joining faculties of soul with perfection of body, man is the only being who can comprehend the attributes of the divinity and adore its sublime beauties; but because he possesses this rare intelligence, he attains this divine knowledge only in our religion, and by observing the precepts of the prince of prophets, the Caliph of Caliphs, the right are of the God of Mercy; it is then only by practicing the true religion that man will prosper in this world and merit eternal life in the other. As to you, Amir Isma’il, such a recompense will not be your lot; because you have denied the sanctity of the divine laws; because you have deserted the path of salvation and the sacred commandments; because you have impaired the purity of the dogmas of Islam; because you have dishonored, soiled, and destroyed the altars of the Lord, usurped the scepter of the East by unlawful and tyrannical means; because coming forth from the dust, you have raised yourself by odious devices to a place shining with splendor and magnificence; because you have opened to Muslims the gates of tyranny and oppression; because you have joined iniquity, perjury, and blasphemy to your sectarian impiety; because under the cloak of the hypocrite, you have sowed everywhere trouble and sedition; because you have raised the standard of irreligion and heresy; because yielding to the impulse of your evil passions, and giving yourself up without rein to the most infamous disorders, you have dared to throw off the control of Muslim laws and to permit lust and rape, the massacre of the most virtuous and respectable men, the destruction of pulpits and temples . . . the repudiation of the Qur’an, the cursing of the legitimate Caliphs. Now as the first duty of a Muslim and above all of a pious prince is to obey the commandment, “O, you faithful who believe, be the executors of the decrees of God!” the ulama [religious leadership] and our doctors have pronounced sentence of death against you, perjurer and blasphemer, and have imposed on every Muslim the sacred obligation to arm in defense of religion and destroy heresy and impiety in your person and that of all your partisans.

Animated by this [religious decree], conforming to the Qur’an, the code of divine laws, and wishing on one side to strengthen Islam, on the other to liberate the lands and peoples who
writhe under your yoke, we have resolved to lay aside our imperial robes in order to put on the shelf and coat of mail, to raise our ever victorious banner, to assemble our invincible armies, to take up the gauntlet of the avenger, to march with our soldiers, whose sword strikes mortal blows. . . . In pursuit of this noble resolution, we have entered upon the campaign, and guided by the hand of the Almighty, we hope soon to strike down your tyrannous arm, blow away the clouds of glory and grandeur which trouble your head and cause your fatal blindness, release from your despotism your trembling subjects, smother you in the end in the very mass of flames which your infernal [spirit] raises everywhere along your passage, accomplishing in this way on you the maxim which says: “He who sows discord can only reap evils and afflictions.” However, anxious to conform to the spirit of the law of the Prophet, we come, before commencing war, to set out before you the words of the Qur’an, in place of the word, and to exhort you to embrace the true faith; this is why we address this letter to you. . . .

But if, to your misfortune, you persist in your past conduct; if, puffed up with the idea of your power and your foolish bravado, you wish to pursue the course of your iniquities, you will see in a few days your plains covered with our tents and inundated with our battalions. Then prodigies of valor will be done, and we shall see the decrees of the Almighty, Who is the God of Armies, and sovereign judge of the actions of men, accomplished. For the rest, victory to him who follows the path of salvation!

**Women in Ottoman Society: Oigier de Busbecq**

*The energy of the Ottoman Empire perhaps reached its zenith under the direction of Sultan Süleyman “the Lawgiver” (r. 1520–1566). One of the most important assessments of Süleyman’s influence came from Oigier Ghiselin de Busbecq, the ambassador from Austria to Süleyman’s court at Istanbul from 1554–1562. Busbecq had been dispatched in the recent wake of the unsuccessful Ottoman siege of Vienna in 1529. His mission was to use his diplomatic skills to prevent another possible attack on the city. Busbecq’s letters reveal much about Süleyman, his court, capital, Islamic traditions, and treatment of women.*

**Question:**

1. *What is the role of women in Ottoman society?*

**Consider This:**

- *Why are women completely covered in Ottoman society? What were the expectations for women at this time and what distinctions were made between wives and concubines?*

The Turks are the most careful people in the world of the modesty of their wives, and therefore keep them shut up at home and hide them away, so that they scarce see the light of day. But if they have to go into the streets, they are sent out so covered and wrapped up in veils that they seem to those who meet them mere gliding ghosts. They have the means of seeing
men through their linen or silken veils, while no part of their own body is exposed to men’s view. For it is a received opinion among them, that no woman who is distinguished in the very smallest degree by her figure or youth, can be seen by a man without his desiring her, and therefore without her receiving some contamination; and so it is the universal practice to confine the women to the harem. Their brothers are allowed to see them, but not their brothers-in-law. Men of the richer classes, or of higher rank, make it a condition when they marry, that their wives shall never set foot outside the threshold, and that no man or woman shall be admitted to see them for any reason whatever, not even their nearest relations, except their fathers and mothers, who are allowed to pay a visit to their daughters at the [festival of Bairam].

On the other hand, if the wife has a rather high rank, or has brought a larger dowry than usual, the husband promises on his part that he will take no concubine, but will keep to her alone. Otherwise, the Turks are not forbidden by any law to have as many concubines as they please in addition to their lawful wives. Between the children of wives and those of concubines there is no distinction, and they are considered to have equal rights. As for concubines, they either buy them for themselves or win them in war; when they are tired of them there is nothing to prevent their bringing them to market and selling them; but they are entitled to their freedom if they have borne children to their master. . . . The only distinction between the lawful wife and the concubine, is that the former has a dowry, while the slaves have none. A wife who has a portion settled on her [a dowry] is mistress of her husband’s house, and all the other women have to obey her orders. The husband, however, may choose which of them shall spend the night with him. He makes known his wishes to the wife, and she sends to him the slave he has selected. . . . Only Friday night . . . is supposed to belong to the wife; and she grumbles if her husband deprives her of it. On all the other nights he may do so as he pleases. Divorces are granted among them for many reasons which it is easy for the husbands to invent. The divorced wife receives back her dowry, unless the divorce has been caused by some fault on her part. There is more difficulty in a woman’s getting a divorce from her husband.

---

**The Interesting Narrative of the Life of Olaudah Equiano (1789)**

*Born in Benin in the late 18th century, Equiano was enslaved as a young boy and passed through a variety of experiences, many of them horrible; but he managed to acquire enough learning and independence to become a major voice advocating an end to slavery. His Narrative, written in English in 1789, immediately became a sensation, and has remained a classic source for our knowledge about the European slave trade from the point of view of the slave.*

*In what ways does Equiano contrast slavery within Africa with the sort of slavery he encountered in the western hemisphere? What sufferings does he describe on the slave ship crossing the Atlantic Ocean to the Caribbean? In what ways were slaves cheated by whites?*
Description of his early life.

Our tillage is exercised in a large plain or common, some hours walk from our dwellings, and all the neighbors resort thither in a body. They use no beasts or husbandry, and their only instruments are hoes, axes, shovels, and beaks, or pointed iron to dig with. Sometimes we are visited by locusts, which come in large clouds so as to darken the air and destroy our harvest. This however happens rarely, but when it does a famine is produced by it. I remember an instance or two wherein this happened. This common is often the theater of war and therefore when our people go out to till their land they not only go in a body but generally take their arms with them for fear of a surprise, and when they apprehend an invasion they guard the avenues to their dwellings by driving sticks into the ground, which are so sharp at one end as to pierce the foot and are generally dipped in poison. From what I can recollect of these battles, they appear to have been irruptions of one little state or district on the other to obtain prisoners or booty. Perhaps they were incited to this by those traders who brought the European goods I mentioned amongst us. Such a mode of obtaining slaves in Africa is common, and I believe morc are procured this way and by kidnapping than any other. When a trader wants slaves he applies to a chief for them and tempts him with his wares. It is not extraordinary if on this occasion he yields to the temptation with as little firmness, and accepts the price of his fellow creature's liberty with as little reluctance as the enlightened merchant. Accordingly he falls on his neighbours and a desperate battle ensues. If he prevails and takes prisoners, he gratifies his avarice by selling them; but if his party be vanquished and he falls into the hands of the enemy, he is put to death: for as he has been known to foment their quarrels it is thought dangerous to let him survive, and no ransom can save him, though all other prisoners may be redeemed. We have fire-arms, bows and arrows, broad two-edged swords and javelins: we have shields also which cover a man from head to foot. All are taught the use of these weapons; even our women are warriors and march boldly out to fight along with the men. Our whole district is a kind of militia: on a certain signal given, such as the firing of a gun at night, they all rise in arms and rush upon their enemy. It is perhaps something remarkable that when our people march to the field a red flag or banner is borne before them. I was once a witness to a battle in our common. We had been all at work in it one day as usual, when our people were suddenly attacked. I climbed a tree at some distance, from which I beheld the fight. There were many women as well as men on both sides; among others my mother was there, and armed with a broad sword. After fighting for a considerable time with great fury and after many had been killed, our people obtained the victory and took their enemy's Chief prisoner. He was carried off in great triumph, and though he offered a large ransom for his life he was put to death. A virgin of note among our enemies had been slain in the battle, and her arm was exposed in our market-place where our trophies were always exhibited. The spoils were divided according to the merit of the warriors. Those prisoners which were not sold or redeemed we kept as slaves: but how different was their condition from that of the slaves in the West Indies! With us they do no more work than other members of the community, even their master; their food, clothing and lodging were nearly the same as theirs, (except that they were not permitted to eat with those who were freeborn), and there was scarce any other difference between them than a superior degree of importance which the head of a family possesses in our state, and that authority which, as such, he exercises over every part of his household. Some of these slaves have even slaves under them as their own property and for their own use.

Enslavement

My father, besides many slaves, had a numerous family of which seven lived to grow
up, including myself and a sister who was the only daughter. As I was the youngest of the sons I became, of course, the greatest favourite with my mother and was always with her; and she used to take particular pains to form my mind. I was trained up from my earliest years in the art of war, my daily exercise was shooting and throwing javelins, and my mother adorned me with emblems after the manner of our greatest warriors. In this way I grew up till I was turned the age of 11, when an end was put to my happiness in the following manner. Generally when the grown people in the neighbourhood were gone far in the fields to labour, the children assembled together in some of the neighbours' premises to play, and commonly some of us used to get up a tree to look out for any assailant or kidnapper that might come upon us, for they sometimes took those opportunities of our parents' absence to attack and carry off as many as they could seize. One day, as I was watching at the top of a tree in our yard, I saw one of those people come into the yard of our next neighbour but one to kidnap, there being many stout young people in it. Immediately on this I gave the alarm of the rogue and he was surrounded by the stoutest of them, who entangled him with cords so that he could not escape till some of the grown people came and secured him. But alas! ere long it was my fate to be thus attacked and to be carried off when none of the grown people were nigh. One day, when all our people were gone out to their works as usual and only I and my dear sister were left to mind the house, two men and a woman got over our walls, and in a moment seized us both, and without giving us time to cry out or make resistance they stopped our mouths and ran off with us into the nearest wood. Here they tied our hands and continued to carry us as far as they could till night came on, when we reached a small house where the robbers halted for refreshment and spent the night. We were then unbound but were unable to take any food, and being quite overwhelmed by fatigue and grief, our only relief was some sleep, which allayed our misfortune for a short time. The next morning we left the house and continued travelling all the day. For a long time we had kept to the woods, but at last we came into a road which I believed I knew. I had now some hopes of being delivered, for we had advanced but a little way before I discovered some people at a distance, on which I began to cry out for their assistance: but my cries had no other effect than to make them tie me faster and stop my mouth, and then they put me into a large sack. They also stopped my sister's mouth and tied her hands and in this manner we proceeded till we were out of the sight of these people. When we went to rest the following night they offered us some victuals, but we refused it, and the only comfort we had was in being in one another's arms all that night and bathing each other with our tears. But alas! we were soon deprived of even the small comfort of weeping together. The next day proved a day of greater sorrow than I had yet experienced, for my sister and I were then separated while we lay clasped in each other's arms. It was in vain that we besought them not to part us; she was torn from me and immediately carried away, while I was left in a state of distraction not to be described. I cried and grieved continually, and for several days I did not eat anything but what they forced into my mouth.

---

**On the slave ship**

I now saw myself deprived of all chance of returning to my native country or even the least glimpse of hope of gaining the shore, which I now considered as friendly; and I even wished for my former slavery in preference to my present situation, which was filled with horrors of every kind, still heightened by my ignorance of what I was to undergo. I was not long suffered to indulge my grief; I was soon put down under the decks, and there I received such a salutation in my nostrils as I had never experienced in my life: so that with the loathsomeness of the stench and crying together, I became so sick and low that I was not able to eat, nor had I the least desire to
taste anything. I now wished for the last friend, death, to relieve me; but soon, to my grief, two of the white men offered me eatables, and on my refusing to eat, one of them held me fast by the hands and laid me across I think the windlass, and tied my feet while the other flogged me severely. I had never experienced anything of this kind before, and although, not being used to the water, I naturally feared that element the first time I saw it, yet nevertheless could I have got over the nettings I would have jumped over the side, but I could not; and besides, the crew used to watch us very closely who were not chained down to the decks, lest we should leap into the water: and I have seen some of these poor African prisoners most severely cut for attempting to do so, and hourly whipped for not eating. This indeed was often the case with myself. In a little time after, amongst the poor chained men I found some of my own nation, which in a small degree gave ease to my mind. I inquired of these what was to be done with us; they gave me to understand we were to be carried to these white people's country to work for them. I then was a little revived, and thought if it were no worse than working, my situation was not so desperate: but still I feared I should be put to death, the white people looked and acted, as I thought, in so savage a manner; for I had never seen among my people such instances of brutal cruelty, and this not only shewn towards us blacks but also to some of the whites themselves. One white man in particular I saw, when we were permitted to be on deck, flogged so unmercifully with a large rope near the foremost that he died in consequence of it; and they tossed him over the side as they would have done a brute. This made me fear these people the more, and I expected nothing less than to be treated in the same manner. . . .

The stench of the hold while we were on the coast was so intolerably loathsome that it was dangerous to remain there for any time, and some of us had been permitted to stay on the deck for the fresh air; but now that the whole ship's cargo were confined together it became absolutely pestilential. The closeness of the place and the heat of the climate, added to the number in the ship, which was so crowded that each had scarcely room to turn himself, almost suffocated us. This produced copious perspirations, so that the air soon became unfit for respiration from a variety of loathsome smells, and brought on a sickness among the slaves, of which many died, thus falling victims to the improvident avarice, as I may call it, of their purchasers. This wretched situation was again aggravated by the galling of the chains, now become insupportable and the filth of the necessary tubs, into which the children often fell and were almost suffocated. The shrieks of the women and the groans of the dying rendered the whole a scene of horror almost inconceivable. Happily perhaps for myself I was soon reduced so low here that it was thought necessary to keep me almost always on deck, and from my extreme youth I was not put in fetters. In this situation I expected every hour to share the fate of my companions, some of whom were almost daily brought upon deck at the point of death, which I began to hope would soon put an end to my miseries. Often did I think many of the inhabitants of the deep much more happy than myself. I envied them the freedom they enjoyed, and as often wished I could change my condition for theirs. Every circumstance I met with served only to render my state more painful, and heighten my apprehensions and my opinion of the cruelty of the whites. One day they had taken a number of fishes, and when they had killed and satisfied themselves with as many as they thought fit, to our astonishment who were on the deck, rather than give any of them to us to eat as we expected, they tossed the remaining fish into the sea again, although we begged and prayed for some as well as we could, but in vain; and some of my countrymen, being pressed by hunger, took an opportunity when they thought no one saw them of trying to get a little privately; but they were discovered, and the attempt procured them some very severe floggings. One day, when we had a smooth sea and moderate wind, two of my wearied
countrymen who were chained together (I was near them at the time), preferring death to such a life of misery, somehow made through the nettings and jumped into the sea: immediately another quite dejected fellow, who on account of his illness was suffered to be out of irons, also followed their example; and I believe many more would very soon have done the same if they had not been prevented by the ship's crew, who were instantly alarmed. Those of us that were the most active were in a moment put down under the deck, and there was such a noise and confusion amongst the people of the ship as I never heard before, to stop her and get the boat out to go after the slaves. However two of the wretches were drowned, but they got the other and afterwards flogged him unmercifully for thus attempting to prefer death to slavery. In this manner we continued to undergo more hardships than I can now relate, hardships which are inseparable from this accursed trade.

This they frequently do. A negro-man on board a vessel of my master, while I belonged to her, having been put in irons for some trifling misdemeanour and kept in that state for some days, being weary of life, took an opportunity of jumping overboard into the sea; however, he was picked up without being drowned. Another whose life was also a burden to him resolved to starve himself to death, and refused to eat any victuals; this procured him a severe flogging, and he also, on the first occasion which offered, jumped overboard at Charleston, but was saved.

Nor is there any greater regard shown to the little property, than there is to the persons and lives of the negroes. I have already related an instance or two of particular oppression out of many which I have witnessed, but the following is frequent in all the islands. The wretched field-slaves, after toiling all the day for an unfeeling owner who gives them but little victuals, steal sometimes a few moments from rest or refreshment to gather some small portion of grass, according as their time will admit. This they commonly tie up in a parcel, (either a bit, worth six pence, or half a bit's-worth) and bring it to town or to the market to sell. Nothing is more common than for the white people on this occasion to take the grass from them without paying for it; and not only so, but too often also to my knowledge our clerks and many others at the same time have committed acts of violence on the poor, wretched, and helpless females, whom I have seen for hours stand crying to no purpose and get no redress or pay of any kind. Is not this one common and crying sin enough to bring down God's judgement on the islands? He tells us the oppressor and the oppressed are both in his hands; and if these are not the poor, the broken-hearted, the blind, the captive, the bruised, which our Saviour speaks of, who are they? One of these depredators once in St Eustatia came on board our vessel and bought some fowls and pigs of me, and a whole day after his departure with the things he returned again and wanted his money back: I refused to give it and not seeing my captain on board, he

---

"With shudd’ring horror pale, and eyes aghast,  
They view their lamentable lot, and find  
No rest!" (1)
began the common pranks with me, and swore he would even break open my chest and take my money. I therefore expected, as my captain was absent, that he would be as good as his word, and he was just proceeding to strike me, when fortunately a British seaman on board, whose heart had not been debauched by a West India climate, interposed and prevented him. But had the cruel man struck me I certainly should have defended myself at the hazard of my life, for what is life to a man thus oppressed? He went away, however, swearing, and threatened that whenever he caught me on shore he would shoot me, and pay for me afterwards.

The small account in which the life of a negro is held in the West Indies is so universally known that it might seem impertinent to quote the following extract, if some people had not been hardy enough of late to assert that negroes are on the same footing in that respect as Europeans. By the 329th Act, page 125, of the assembly of Barbadoes it is enacted "That if any negro, or other slave, under punishment by his master, or his order, for running away, or any other crime or misdemeanor towards his said master, unfortunately shall suffer in life or member, no person whatsoever shall be liable to a fine, but if any man shall out of wantonness, or only of bloody-mindedness, or cruel intention, wilfully kill a negro, or other slave, of his own, he shall pay into the public treasury fifteen pounds sterling." And it is the same in most, if not all, of the West India islands.

(1) These lines describe the plight of the damned in Milton's Paradise Lost.
1750 C.E. to 1914 C.E.

Major Developments

8) Questions of periodization
   A) Continuities and breaks, causes of changes from the previous period and within this period
9) Changes in global commerce, communications, and technology
   A) Industrial Revolution (transformative effects on and differential timing in different societies; mutual relation of industrial and scientific developments; commonalities)
   B) Changes in patterns of world trade
10) Demographic and environmental changes (migrations, end of the Atlantic slave trade, new birthrate patterns, food supply)
11) Changes in social and gender structure (Industrial Revolution; commercial and demographic developments; emancipation of serfs/slaves; and tension between work patterns and ideas about gender)
   A) Political revolutions and independence movements; new political ideas
   B) United States and Latin American independence movements
   C) Revolutions (United States, France, Haiti, Mexico, China)
   D) Rise of nationalism, nation-states, and movements of political reform
12) Rise of democracy and its limitations: reform; women; racism
13) Rise of Western dominance (economic, political, social, cultural and artistic, patterns of expansion; imperialism and colonialism) and different cultural and political reactions (reform; resistance; rebellion; racism; nationalism)
14) Diverse interpretations
   A) What are the debates over the utility of modernization theory as a framework for interpreting events in this period and the next?
   B) What are the debates about the causes of serf and slave emancipation in this period and how do these debates fit into broader comparisons of labor systems?
   C) What are the debates over the nature of women’s roles in this period and how do these debates apply to industrialized areas and how do they apply in colonial societies?

Major Comparisons and Snapshots

❖ Compare the causes and early phases of the industrial revolution in western Europe and Japan
❖ Comparative revolutions (compare the Haitian and French Revolutions)
❖ Compare reaction to foreign interference in: the Ottoman Empire, China, India, and Japan
❖ Compare nationalism
❖ Explain forms of Western intervention in Latin America, Africa, and Southeast Asia
❖ Compare the roles and conditions of women in the upper/middle classes with peasantry/working class in western Europe

Examples of What You Need to Know

Below are examples of the types of information you are expected to know contrasted with examples of those things you are not expected to know for the multiple-choice section.

❖ Causes of Latin American independence movements, but not specific protagonists.
❖ The French Revolution of 1789, but not the Revolution of 1830
❖ Meiji Restoration, but not Iranian Constitutional Revolution
❖ Causes of Latin American independence movements, but not specific protagonists
❖ Boxer Rebellion, but not the Crimean War
❖ Suez Canal, but not the Erie Canal
❖ Muhammad Ali, but not Isma’il
❖ Marxism, but not Utopian socialism
❖ Social Darwinism, but not Herbert Spencer

~ 104 ~
Kaibara Ekken: Greater Learning for Women (1762)

This treatise on proper roles for women was widely influential in the later Edo Period (1600-1868), and denounced as retrograde during the progressive period that followed the Meiji Restoration of 1868. It is commonly attributed to the Confucian scholar Kaibara Ekken (1630-1714), based on its similarities to one of his works; but it has also been suggested that it may be an adaptation of his ideas by his wife, Kaibara Token (1652-1713), also a scholar.

What qualities are considered undesirable in women in this passage?

Seeing that it is a girl's destiny, on reaching womanhood, to go to a new home, and live in submission to her father-in-law and mother-in-law, it is even more incumbent upon her than it is on a boy to receive with all reverence her parents' instructions. Should her parents, through excess of tenderness, allow her to grow up self-willed, she will infallibly show herself capricious in her husband's house, and thus alienate his affection, while, if her father-in-law be a man of correct principles, the girl will find the yoke of these principles intolerable. . . .

More precious in a woman is a virtuous heart than a face of beauty. The vicious woman's heart is ever excited; she glares wildly around her, she vents her anger on others, her words are harsh and her accent vulgar. When she speaks it is to set herself above others, to upbraid others, to envy others, to be puffed up with individual pride, to jeer at others, to outdo others,--all things at variance with the "way" in which a woman should walk. The only qualities that befit a woman are gentle obedience, chastity, mercy, and quietness.

From her earliest youth, a girl should observe the line of demarcation separating women from men; and never, even for an instant, should she be allowed to see or hear the slightest impropriety. The customs of antiquity did not allow men and women to sit in the same apartment, to keep their wearing-apparel in the same place, to bathe in the same place or to transmit to each other anything directly from hand to hand. . . .

Let her never even dream of jealousy. If her husband be dissolve, she must expostulate with him, but never either nurse or vent her anger. If her jealousy be extreme, it will render her countenance frightful and her accents repulsive, and can only result in completely alienating her husband from her, and making her intolerable in his eyes. Should her husband act[ill][1] and unreasonably, she must compose her countenance and soften her voice to remonstrate with him; and if he be angry and listen not to the remonstration, she must wait over a season, and then expostulate with him again when his heart is softened. Never set thyself up against thy husband with harsh features and a boisterous voice! . . .

The five worst maladies that afflict the female mind are[indolence,][2] discontent, slander, jealousy, and silliness. Without any doubt, these five maladies infest seven or eight out of every ten women, and it is from these that arises the inferiority of women to men. A woman should cure them by self-inspection and self-reproach. The worst of them all, and the parent of the other four, is silliness.

Woman's nature is passive. This passiveness, being of the nature of the night, is dark. Hence, as viewed from the standard of man's nature, the foolishness of woman fails to understand the duties that lie before her very eyes, perceives not the actions that will bring down blame upon her own head, and comprehends not even the things that will bring down calamities on the heads of her husband and children. Neither when she blames and accuses
1750 C.E. to 1914 C.E.

and curses innocent persons, nor when, in her jealousy of others, she thinks to set up herself alone, does she see that she is her own enemy. . . Again, in the education of her children, her blind affection induces an erroneous system. Such is the stupidity of her character that it is incumbent on her, in every particular, to distrust herself and to obey her husband.

Translated by Basil Hall Chamberlain (1878)

(1) Badly.

(2) Lacking submissiveness.

Looking at China

The comments of Thomas Meadows, a 19th century British observer of Chinese culture, provide a window onto British attitudes towards China.

Discussion Questions

1. How does Meadows describe Chinese government? What checks and balances existed?

2. Was rebellion a legitimate and accepted part of Chinese society? If so, what role did it play? Does Meadows view this in a positive light?

3. Might Meadows also be using his evaluation of China as a means to comment on the state of affairs in Britain? If so, what does his article tell you about 19th century Britain?

The real causes of the unequalled duration and constant increase of the Chinese people, as one and the same nation . . . consists of three doctrines, together with an institution. . . . The doctrines are:

I. That the nation must be governed by moral agency in preference to physical force.

II. That the services of the wisest and ablest men in the nation are indispensable to its good government.

III. That the people have the right to depose a sovereign who, either from active wickedness or vicious indulgence, gives cause to oppressive and tyrannical rule.

The institution is . . .

The system of public service competitive examinations. . . .

The institution of Public Service Examinations (which have long been strictly competitive) is the cause of the continued duration of the Chinese nation: it is that which preserves the other causes and gives efficacy to their operation. By it all parents throughout the country, who can compass the means, are induced to impart to their sons an intimate knowledge of the literature which contains the three doctrines above cited, together with many others conducive to a high mental cultivation. By it all the ability of the country is enlisted on the side of that Government which takes care to preserve it in purity. By it, with its impartiality, the, poorest man in the country is
1750 C.E. to 1914 C.E.

constrained to that if his lot in life is a low one it
is so in virtue of the “will of Heaven,” and that
no unjust barriers created by his fellow men
prevent him from elevating himself. . . .

The normal Chinese government is essentially
based on moral force: it is not a despotism. A
military and police is maintained sufficient to
 crush merely factious risings, but totally
inadequate both in numbers and in nature, to
put down a disgusted and indignant people. But
though no despotism, this same government is
in form and machinery a pure autocracy. In his
district the magistrate is absolute; in his
province, the governor; in the empire, the
Emperor. The Chinese people have no right of
legislation, they have no right of self-taxation,
they have not the power of voting out their
rulers or of limiting or stopping supplies. They
have therefore the right of rebellion. Rebellion
is in China the old, often exercised, legitimate,
and constitutional means of stopping arbitrary
and vicious legislation and administration.

The “Self-Strengthening” Movement in China, 1898

A critical issue for the Chinese since their defeat in the Opium War in 1842, was how to regain their loss
of sovereignty. While most of those responsible for leading China preferred to continue the policies of the
past, there were some officials who, in the 1870’s, advocated reform in the form of a “self-
strengthening” movement. With the slogan, “Learn the superior technology of the barbarian, in order
to control him,” the Tongzhi (T’ung-chih) Restoration led to new plans for a modern army and navy,
industrialization and changes within the diplomatic corps, but the changes were slow for lack of
government support. The “Hundred Days of Reform” would sprout in 1898, after China’s shocking defeat
in the Sino-Japanese War (1894-1895), with decrees issued by the dozens. The following selection
presents a case for change in the form of a memorial written by Zhang Zhidong (Chang Chih-tung; 1837-
1909) to Emperor Guangxu (Kuang-hsu, reigned 1875-1908), who assumed the position of emperor at
the age of three and struggled throughout his reign to break away from the power of his aunt, the
Empress Dowager Cixi (1835-1908). Zhang’s essay was translated and published in English as China’s
Only Hope.

Discussion Questions

1. In one of his statements, the writer suggests, “Know what is important.” What did he mean by this?
What additional proposals would you have made?

2. When Zhang refers to the parable of Confucius, what do you think his purpose and his intended
audience were?

3. What aspects of Western values and institutions does the writer admire and how does he suggest
China make use of them? What is his opinion of China? Of its values?

In no period of China’s history has there arisen
an emergency like the present. It is a time of
change, and His Imperial Highness, the Emperor
of China, has accepted the situation by altering

somewhat the system of civil and military
examinations and by establishing schools. . . .
The Conservatives are evidently off their food
from inability to swallow, whilst Liberals are like

~ 107 ~
a flock of sheep who have arrived at a road of many forks and do not know which to follow. The former do not understand what international intercourse means, the latter are ignorant of what is radical in Chinese affairs. The Conservatives fail to see the utility of modern military methods and the benefits of successful change, while the Progressionists, zealous without knowledge, look with contempt upon our widespread doctrines of Confucius. Thus those who cling to the order of things heartily despise those who even propose any innovation, and they in turn cordially detest the Conservatives with all the ardor of their liberal convictions. It thus falls out that those who really wish to learn are in doubt as to which course to pursue, and in the meantime error creeps in, the enemy invades our coast, and, consequently, there is no defence and no peace.

The present condition of things is not due to outside nations, but to China herself. It has ever been true that the number of our able men has been proportioned to the good qualities of the government, and that morals are gauged by the conduct of the schools. In view of many facts, and with the hope of relieving our country from her present embarrassments, We, the Viceroy of the Liang Hu, have prepared this work especially for the Chinese under our jurisdiction, and generally for our countrymen in the other provinces. . . .

The corollaries of these Twenty Chapters may be briefly Comprehended in Five Objects of Knowledge.

1. Know the shame of not being like Japan, Turkey, Siam, and Cuba.

2. Know the fear that we will become India, Annam, Burmah, Korea, Egypt, and Poland.

3. Know that if we do not change our customs we cannot reform our methods, and if we do not reform our methods we cannot utilize the modern implements of war, etc.

4. Know what is important. The study of the old is not urgent; the call for men of attainments in useful knowledge is pressing. Foreign education is of different kinds. Western handicraft is not in demand, but a knowledge of the methods of foreign governments is a consummation devoutly to be wished.

5. Know what is radical. When abroad, do not forget your own native country; when you see strange customs, do not forget your parents; and let not much wisdom and ingenuity make you forgot the holy sages.

It will be seen then that the purport of what we have written accords well with the Doctrine of the Mean. Long ago, when the kingdom of Lu was in a weak condition, Duke Ai (B. C. 550) inquired of Confucius about government. He replied: “To he fond of learning is the next thing to knowledge. To be up and doing comes near to perfection. Know what shame is, and you will not be far from heroism.” Finally the sage said: “If these principles can be carried out, although one may be stupid, yet he will become clever; although weak, he will attain to strength.” These maxims were spoken in the time of Lu. How much more urgent are they now when China has become great, with her almost limitless territory and her teeming population of four hundred millions! . . .

Chapter 1. United Hearts

How circumscribed would be the responsibility of one graduate, the altruism of one official, or
the duty of a single individual! But if by one
determined purpose the heart’s of all the
graduates, the officials, and the men of China
were united, our country world rest upon a
great rock and we could defy the world to
overthrow us. To attain this object it is
necessary first that every man should fulfill his
duty to his parents and elders.

The country would then be at peace. And if
every Chinese would but exercise his wisdom
and courage the Empire would become strong.

We would here state that there are now three
things necessary to be done in order to save
China from revolution. The first is to maintain
the reigning dynasty; the second is to conserve
the Holy Religion; and the third is to protect the
Chinese race. These are inseparably connected;
in fact they constitute one... 

Under the present circumstances there is
nothing for it but to arouse ourselves to the
situation. Let us display our loyalty and love and
embrace every opportunity to become wealthy
and strong; let our first object be the veneration
of the Imperial Court which vouchsafes its
protection to the Commonwealth, and let those
who hold the reins of government consider the
general good. ...

Chapter III. The Three Moral Obligations

The Sovereign is the head of the Subject, the
Father is the head of the Son, and the Husband
is the head of the Wife. These tenets have been
handed down from the sages, and as Heaven
does not change, so they never change. They
constitute the first of the Five Relations and the
mainspring of every act. ... Know then, that the
obligation of subject to sovereign is
incompatible with republicanism ... 

Now, we have examined somewhat into the
methods of Western Governments. They have
their Lords and Commons, their Senates and
Representatives, which hold their prerogatives
in State matters. But we have noticed that the
Sovereign, or the President, retains the power
of dissolving these assemblies; and in case one
assembly does not suit him he exercises this
power, dismisses the obnoxious body and
convenes another. A Constitutional
Government with a Sovereign, and a Republic
are about the same. In the West the intercourse
of Sovereign, Ministers, and People is easy, the
rules of deportment meagre, and the needs of
the people are communicated to the sovereign
with rapid facility; but the bearing or dignity of
the Western Prince is not to be compared with
that of the Chinese Emperor. Western people,
however, love their sovereigns more than the
Chinese do theirs, and, although they may leave
home and live abroad thousands of miles from
their native land they do not disobey their
country’s laws or defraud their rulers. ... It is a
mistake, then, to suppose that Western
countries do not maintain the doctrine of the
Relation of Subject to Sovereign. ...

Chapter IV. The Recognition of Class

The highest degree of culture was reached in
the Chow (B. C. 1122–255) Dynasty. Then began
the decline about which Confucius grieved. The
Dynasties following had no powerful neighbors
to strive against, but heaped up large treasures
of literary lore at the expense of power. This
accumulation produced the hollowness of
forms, and this, in turn begat weakness. Not so
all the countries of Europe. These were opened
up at a late period in history, fresh and
vigorulous. Surrounded by strong neighbors, they
were always in circumstances of desperate
competition, stripped for a fight and ever
1750 C.E. to 1914 C.E.

striving to escape destruction. Continual apprehension produced determination, and determination begat strength. Of all countries China alone has for these fifty years proved herself almost irreclaimably stupid and not awake. Many of the officials and people are proud and indolent. They contentedly rest in the belief that the old order of things will suffice for those dangerous times, and in the end become the easy prey of outsiders. . . .

Chapter IX. Cast Out the Poison

The Custom’s Returns for the past few years give the value of our imports at 80,000,000 Taels, and the exports at 50,000,000 Taels. The balance of thirty million Taels represents what has been consumed in smoking the pernicious opium pipe! Assuredly it is not foreign intercourse that is ruining China, but his dreadful poison. Oh, the grief and desolation it has wrought to our people! . . . Opium has spread with frightful rapidity and heart-rending results through the provinces. Millions upon millions have been struck down by the plague. To-day it is running like wildfire. In its swift, deadly course it is spreading devastation everywhere, wrecking the minds and eating away the strength of its victims. The ruin of the mind is the most woeful of its many deleterious effects. . . .

Therefore we say, bring learning to the front in order to remedy the opium evil! . . . All the countries of the world recoil with disgust at the idea of smoking this vile, ill-smelling, poisonous stuff. Only our Chinese people love to sleep and eat with the deadly drug, and in the deadly drug we are self-steeped, seeking poverty, imbecility, death, destruction. . . .

---

Yao Chen-Yuan: My Adventures During the Boxer War, 1900

WHEN the letters of the various ministers had been committed to my care, I returned to Su Wang Fu, saying to myself, "How shall I ever be able to take these letters to Tientsin?" I breathed a simple prayer to God to give me some method by which I might reach my destination in safety. The words had scarcely left my lips when I noticed on the wall a large straw hat, such as is commonly used by coolies in the summer-time, and as it was composed of two layers of straw, I wet it, ripped it apart, and concealed my letters between the two sections, after which I carefully sewed it together as before, with the prayer upon my lips, "Lord, when do you wish me to start?"

When I left the Legation, I crossed the bridge and climbed over a wall of barricades into Su Wang Fu, where two Japanese soldiers said to me: "What are you doing here?" "I am going to Tientsin with letters," I replied. "What is your name?" inquired one of them. When I told him, he said in a kind but warning tone "You must be careful or you will be killed before you are well started on your way." He took me to a small lane at the outskirts of the barricades, where he left me to go on alone; but I had not gone far when I discovered that a Boxer watchman was stationed at the other end of the street and my heart almost stood still. I had gone too far, however, to turn back, so I put on a bold front, prayed the Lord for guidance, and walked boldly onward. "Give me ten cents, and I will let you pass," was all he said, which I was quite ready to do.

My way through the East Gate was without incident; but when halfway to Tung Chou I
1750 C.E. to 1914 C.E.

overtook some three hundred of Tung Fuhsiang's soldiers to whom I joined myself and continued on my way. The canal had overflowed its banks at the Eight Li Bridge, and at their suggestion we had our dinner, for which they paid, after which one of them offered to swim across with me on his back, which kindness I was glad to accept, as I saw no other way of getting to the opposite side. I continued with the soldiers, stopping with them that night at a Mohammedan inn, the proprietor of which was very kind to me. He refused to accept payment for my entertainment and asked me to take vows of friendship before I left.

During the night, a crowd passed by, led by a woman Boxer—a member of the Society of the Red Lantern—who asked me my name, my business, and where I was going. As I seemed to satisfy them with my answer, they went about their business, which was the destruction of a Catholic village, and the murder of the Christians. The next morning I continued on my way, being early joined by a Boxer who invited me to dine with him, after which we separated.

That night I heard the keeper of the inn at which I stopped say to a Boxer, "We have no Christians here," and I spent the night in peace. The following day a child warned me not to go through a certain village, saying that the Boxers were taking every one they suspected, and I saw the fire kindled at which they burnt twenty Christians, while I at the same time thanked the Lord for putting it into the mind of a child to warn me, and thus save me, and perhaps the people of the Legation, from a like horrible fate. The country was flooded. I was compelled to wade through water the depth of which I knew nothing about, and I was wet and discouraged. I had just emerged from the water when a man with a gun on his shoulder called out to me in a loud voice "Where are you going?" "I am going to Tientsin," I answered. "What for?" "To find the head of a flower establishment in which I was employed before this trouble broke out." The readiness of my answer seemed to satisfy him, and he allowed me to continue on my way.

At the next village a shoemaker informed me that the road was dangerous, being crowded with Chinese troops; a thing which I soon found to be true by being made prisoner and having my money taken from me. My money being all they wanted, the soldiers at once set me free, and I in turn complained to the officer that I had been robbed by his troops. "Wait," said he, "until I see who did it." "No, no," said I, "do not let me trouble you to that extent; the day is far spent, and I should like to spend the night in your camp." "With pleasure," said he. So I spent the night in the protection of my enemies.

"Please search me," said I in the morning, "to see that I have taken nothing, and I will proceed on my way." He returned my money, warning me not to go on the Great Road lest I fall into the hands of the foreign troops and suffer at their hands. "I understand," said I, with a meaning which he did not comprehend, and I left. When I came to the river, I noticed a boatman and accosted him as follows "Will you take me to the Red Bridge in Tientsin?" "We do not dare to go as far as the Red Bridge," he answered, "the Japanese soldiers are there, and they will shoot us." "You need not be afraid," said I, "I can protect you from Japanese soldiers."

On hearing this he readily consented, but he put me off some distance from the bridge. I saw the soldiers in the distance, but waved my handkerchief as a token that I was a messenger, and thus encountered no danger. They escorted me to the Foreign Settlement and then left me to go alone, but the Russians refused to allow me to pass and I was compelled to return to the Red Bridge. I took one of the letters out of the hat and showed it to three Japanese officers who happened to be passing. "Where do you come from?" they asked. "From Peking." "Were you not afraid of the Boxers?" "No."

"You are a good man; wait till I give you a pass." While he was writing, it began to rain, and they took me to their headquarters, where I saw a high official, dined with him, and related all my
adventures by the way as well as the condition of affairs in Peking; all of which he wrote down, and then sent four of his soldiers to accompany me to the British and American Consulates. When I saw the American Consul, I burst into tears and told him of all that the people in Peking were suffering; how the Boxers were firing on them from all sides and trying to burn them out; how each man was limited to a small cup of grain a day, while at the same time they were compelled to labor like coolies, under a burning sun, in employments to which they were not accustomed, and I urged him to send soldiers at once to relieve them.

He sent a man to take me to my room, and I found among the servants one of my old acquaintances, with whom I spent a pleasant evening, and then had a good night's rest. The following day I went to the Methodist Mission, where I met those who had passed through a siege similar to the one I had left. When Dr. Benn saw how sore my feet were, she washed and bandaged them with her own hands. After a rest of two days I secured the letters of the various consuls, together with others from friends of some of the besieged, and started on my journey, depending upon the Lord for his protection. I had not gone a mile from the city when I was arrested by two foreign soldiers, robbed of all my money, and taken to the tent of their officer, who, when he saw my pass, recognized it as that of a messenger from Peking and restored both my money and liberty. Two miles from the city I came to a stream I was unable to cross, and found myself compelled to return and leave by way of the North Gate of the city.

Seven miles from the city I fell into a nest of Boxers, the head of whom asked me "Where have you been?" "To Tientsin," I replied. "What for?" "To see the head of the flower establishment with which I was connected before this trouble broke out," I answered. "How old is he?" "Seventy-six years," I replied, without hesitation. He said no more, and I asked if I could dine with them. After dinner I said to the head Boxer "I wish to go to Peking; can you tell me the safest route for me to take?" He told me, and after wishing him good-bye I left, taking the direction he suggested. The following day, when passing a melon-patch watched by Boxers, I walked up to them and asked them to give me a melon, thinking that they would be less likely to disturb me if I first addressed them.

"Where are you going?" they asked. "To Peking," I answered; "can you tell me which road it would be safest for me to take?" They told me, and, as in the former case, I followed their directions, reaching the city without further adventure other than that of avoiding several crowds of Boxers and Chinese soldiers. Outside the East Gate I ate two bowls of vermicelli, while I watched the soldiers and Boxers on top of the city wall. I went west to the Ssu P'ai Lou, thence south to the Tan P'ai Lou, where I turned west toward the British Legation. All the way through the city I was compelled to saunter slowly, as though I was merely looking about and not going anywhere, so that it took me from noon till evening to go from the East Gate to the Legation. The soldiers in the lines between the Chinese and foreign quarters were gambling as I passed and paid no attention to me. In the Austrian Legation grounds I noticed a Chinese soldier digging as though for treasure. Walking up to him I addressed him thus: "Hello! Captain. What are you doing?" "What are you doing here?" said he, staring at me and speaking in a loud voice.

"Please do not speak so loud," said I in an undertone, as though to enter into a secret alliance with him; "I was originally a coolie in this place. My home is in the country, and I have just been to see if my family were killed, and finding them safe, I have returned to get some treasure I have in the Su Wang Fu." "How much have you?" he inquired. "About one thousand dollars." "What is your name?" he inquired further. "Yao Chen-yuan. What is your honorable name?" "Wu Lien-t'ai," he replied."Now you go and get your silver and we
two will open an opium shop." "Very well," I replied. "Have you any silver with you?" he asked. "Only about four or five ounces." "Well, you give that to me. Not that I want the silver, but it will cement our friendship, and I will return it to you when you come back." "Very well," said I, giving him what silver I had.

While we were talking, an officer with forty or fifty soldiers came up and wanted to have me killed.

"Do not kill him," said the soldier to whom I had been talking; "he is an old friend of mine from the country, here to make money out of the foreigners." "If he is a friend of yours, what is his name?"

"Yao Chen-yuan," he replied. "What is this soldier's name?" asked the officer, turning to me. "Wu Lien-t'ai," I answered without hesitation. "Quite right," he said, and passed on to the Great Street.

Just then a crowd of Boxers came up, and the leader asked "What is this fellow doing here?" "Do not meddle with my affairs," said the soldier, "he is my friend." And with this they passed on, leaving us alone. "Now you go into Su Wang Fu," said the soldier, "and get your money; and if you cannot come out tomorrow, stand behind the wall and hold your hand aloft that I may know you are safe."

"Very well," I replied, "but how am I to get in?" "I will take you to the end of that alley, where you will be safe," he said, at which place I bade him good afternoon. In a few moments the Japanese soldiers, who had observed and recognized me, pulled me up over the wall, and I was once more safe.

I was at once taken to the officer and met Mr. Squiers, to whom I delivered the letters. When he saw me ripping open the hat and taking them out, one after another until I had given him eleven, he could not refrain from laughing. He took me with him to the American Legation, where as we entered he held aloft the letters. The people clapped their hands and cheered, and many of them wanted to talk with me, but I was led out through the Russian into the British Legation. Here I met Mr. King, who after a short conversation asked me for my hat. "It is all ripped apart," I replied. "I can sew it together again," he answered. "What do you want to do with it?" I inquired. "Take it back to America as a relic of your trip," said he.

**Lin Zexu (LinTse-hsu) writing to Britain's Queen Victoria to Protest the Opium Trade, 1839**

*This selection is from Wallbank, et al, Civilizations Past And Present, 1992. Most scholars do not believe that the letter ever reached the Queen.*
1750 C.E. to 1914 C.E.

[Wallbank introduction] Lin Tse-hsu saw that the opium trade, which gave Europe such huge profits, undermined his country. He asked Queen Victoria to put a stop to the trade.

"After a long period of commercial intercourse, there appear among the crowd of barbarians both good persons and bad, unevenly. Consequently there are those who smuggle opium to seduce the Chinese people and so cause the spread of the poison to all provinces. Such persons who only care to profit themselves, and disregard their harm to others, are not tolerated by the laws of heaven and are unanimously hated by human beings. His Majesty the Emperor, upon hearing of this, is in a towering rage. He has especially sent me, his commissioner, to come to Kwangtung, and together with the governor-general and governor jointly to investigate and settle this matter.

"All those people in China who sell opium or smoke opium should receive the death penalty. If we trace the crime of those barbarians who through the years have been selling opium, then the deep harm they have wrought and the great profit they have usurped should fundamentally justify their execution according to law. We take into consideration, however, the fact that the various barbarians have still known how to repent their crimes and return to their allegiance to us by taking the 20,183 chests of opium from their storeships and petitioning us, through their consular officer [superintendent of trade], Elliot, to receive it. It has been entirely destroyed and this has been faithfully reported to the Throne in several memorials by this commissioner and his colleagues.

"Fortunately we have received a specially extended favor from is Majesty the Emperor, who considers that for those who voluntarily surrender there are still some circumstances to palliate their crime, and so for the time being he has magnanimously excused them from punishment. But as for those who again violate the opium prohibition, it is difficult for the law to pardon them repeatedly. Having established new regulations, we presume that the ruler of your honorable country, who takes delight in our culture and whose disposition is inclined towards us, must be able to instruct the various barbarians to observe the law with care. It is only necessary to explain to them the advantages and disadvantages and then they will know that the legal code of the Celestial Court must be absolutely obeyed with awe.

"We find that your country is sixty or seventy thousand li [three li equal one mile] from China. Yet there are barbarian ships that strive to come here for trade for the purpose of making a great profit. The wealth of China is used to profit the barbarians. That is to say, the great profit made by barbarians is all taken from the rightful share of China. By what right do they then in return use the poisonous drug to injure the Chinese people? Even though the barbarians may not necessarily intend to do us harm, yet in coveting profit to an extreme, they have no regard for injuring others. Let us ask, where is your conscience? I have heard that the smoking of opium is very strictly forbidden by your country; that is because the harm caused by opium is clearly understood. Since it is not permitted to do harm to your own country, then even less should you let it be passed on to the harm of other countries - how much less to China!"
The Morality of the Opium Trade

Two differing perspectives regarding the morality of trading opium are presented in these selections. The first reading is the personal experience of an American merchant with forty years of experience in China, and the second selection is from another merchant in Canton, writing to a British magazine in 1837.

**Discussion Questions**

1. What is your opinion of the first writer’s suggestion that smoking opium and drinking wine are the same? How does the second writer respond to this comparison?

2. What is the first merchant’s conclusion as to the ethics of opium smoking? What underlying motives might influence his attitude? What arguments does the second merchant use to refute the views of the first merchant, and others whom you’ve read?

3. “That which, sold in chests, is commerce, and to be applauded, becomes vulgar and mean when doled out in small lots. Admirable logic!” What is the second merchant’s point in this statement, and do you find merit in his argument?

4. Are the views regarding the morality of using and trading opium in the 19th century similar to present attitudes and arguments? Is it appropriate to use the standards of the present to evaluate past actions, such as the morality of the opium traders?

**An American Merchant in Canton**

While the opium trade was going on, discussions often occurred as to the morality of it, as well as to the effect of smoking on the Chinese. None of the Hong merchants ever had anything to do with it, and several of the foreign houses refrained from dealing in it on conscientious grounds. As to its influence on the inhabitants of the city and suburbs at large, they were a healthy, active, hard-working, and industrious people, withal cheerful and frugal. They were intelligent in business, skillful in manufactures and handicrafts. These traits are inconsistent with habitual smoking, while the costliness of the prepared drug was such as to render a dilution of it (to bring it within the means of the masses) utterly harmless. Amongst the wealthier classes, no doubt it was more or less common, this we knew; but I myself, and I think I may safely say the entire foreign community, rarely, if ever, saw any one physically or mentally injured by it. No evidences of a general abuse, rarely of the use of the pipe, were apparent. I remember one man having been brought to a missionary hospital to be treated for excessive smoking of opium, but he was looked upon as a Lion and much was made of him. In fact, smoking was a habit, as the use of wine was with us, in moderation. As compared with the use of spirituous liquors in the United States and in England, and the evil consequences of it, that of opium was infinitesimal. This is my personal experience during a residence at Canton, Macao, and Hong Kong of forty years.

**A British Merchant’s Answer**

Were the traffickers in this poison,— for such no one in possession of his senses can deny it to be, to state that they deal in it merely as a matter of gain; and that, with them, this determination supersedes every consideration of right or wrong, then their premises could be at once seen, and opposition or reasoning would be vain, since all conviction would be fruitless; but when, as now, the practice, evil in

~ 115 ~
1750 C.E. to 1914 C.E.

itself, and necessarily felt to be so, is upheld by anxious sophistication, it is but right that it be exposed.

... Were not great capital, skill, and enterprise embarked in this trade, it would never have arrived at its present magnitude. ... Constantly, avowedly, notoriously, in the practice of a trade, directly opposed to the laws of the empire; not less opposed to morality and propriety; the purveyors of a most powerful incentive to vice; a fierce moral destroying agent—on what has the opium merchant to plume himself, beyond his brother smuggler and law breaker, the contraband gin-importer into Great Britain? The one risks his life—the other, shielding himself behind the corruption of the local officers, or the weakness of the marine, carries on deeds of unlawfulness, without even the risk or excitement of personal danger; and coolly comments on the injustice of the Chinese government in refusing the practice of international law and reciprocity to countries, whose subjects it knows only as engaged in constant and gross infraction of laws, the breaking of which affects the basis of all good government, the morals of the country.

Reverse the picture. Suppose, by any chance, that Chinese junks were to import into England, as a foreign and fashionable luxury, so harmless a thing as arsenic, or corrosive sublimate—that, after a few years, it became a rage—that thousands—that hundreds of thousands used it—and that its use was, in consequence of its bad effects, prohibited. Suppose that, in opposition to the prohibition, junks were stationed in the St. George’s channel, with a constant supply, taking occasional trips to the isle of Wight, and the mouth of the Thames, when the governmental officers were sufficiently attentive to their duty, at the former station, to prevent its introduction there. Suppose the consumption to increase annually, and to arouse the attention of government, and of those sound thinking men who foresaw misery and destruction from the rapid spread of an insidious, unprofitable, and dangerous habit.

The comparison of opium to wine is, I beg to say, mere “fudge,” and the attempt at argument, thence deduced, no better than nonsense: but, even did the parallel hold, what would it prove? That because people in the western world poison themselves with wine, it is light and expedient that the Chinese should be poisoned with opium. ... Such is the opinion entertained of it, in all countries where it is used, that he, who has once become a prey to the infatuation, is regarded as lost to society, his family, and himself—he is looked on as a reprobate, a debauche, an incurable; and experience proves, by the innumerable wrecks which the fatal habit marks on its page, the truth of the observation. I will refer you for proof of this, to all the writers* on Turkey, Persia, and other countries, where the habit prevails. You will find all agree in the remark, above made. Does not our own experience confirm it? Who would have in his house a servant who smokes opium? Is not such a man a marked one, by his own countrymen and foreigners; and is he not looked down on with pity or scorn in consequence? The Chinese, who may be allowed to know somewhat of their own people, denounce the habit, as prejudicial and destructive. When once it is indulged in, renunciation is all but impossible; and the appetite, “growing by what it feeds on,” increases till premature decay and death close the scene of dissipation and vice. This picture is by no means so agreeable a one to contemplate, as the fancy one of using it—being merely “a rational and sociable article of luxury and hospitality; but, what it wants in pleasing imagery, it makes up in truth. Ask any Chinese (who does not use this rational and sociable thing), what it is, and hear what he will tell you.

... The saving clause in the opium-smuggling profession is that it is, not a vulgar one. It is a wholesale trade. Sales are made in thousands of
dollars’ worth. The amount is gentlemanly. Single balls would be low. Sales by retail would be indefensible. The seller of a pipe or two, the poor pander to a depraved appetite, should be pursued by justice— for none of these can be gentlemen. That which, sold in chests, is commerce, and to be applauded, becomes vulgar and mean when doled out in small lots. Admirable logic! with which one may hug one’s self, satisfied that it is nothing more than “supplying an important branch of the Indian revenue safely and peaceably.” . . . The trade may be a profitable one—it may be of importance to the Indian government, and to individuals— but to attempt a defense on the ground of its not having dangerous and pernicious influence on health and morals, is to say what cannot be borne out, by fact or argument; and what all, who reason on the subject, cannot but feel to be an impotent attempt to defend what is, in itself, manifestly indefensible.

* Hope, Chardin, Fraser, Madden, Raffles, and a host of others.

---

**The Treaty of Nanking, August 1842**

**Article I**

There shall henceforth be Peace and Friendship between ... (England and China) and between their respective Subjects, who shall enjoy full security and protection for their persons and property within the Dominions of the other.

**Article II**

His Majesty the Emperor of China agrees that British Subjects, with their families and establishments, shall be allowed to reside, for the purpose of carrying on their commercial pursuits, without molestation or restraint at the Cities and Towns of Canton, Amoy, Foochow-fu, Ningpo, and Shanghai, and Her Majesty the Queen of Great Britain, etc., will appoint Superintendents or Consular Officers, to reside at each of the above-named Cities or Towns, to be the medium of communication between the Chinese Authorities and the said Merchants, and to see that the just Duties and other Dues of the Chinese Government as hereafter provided for, are duly discharged by Her Britannic Majesty’s Subjects.

**Article III**

It being obviously necessary and desirable, that British Subjects should have some Port whereat they may careen and refit their Ships, when required, and keep Stores for that purpose, His Majesty the Emperor of China cedes to Her Majesty the Queen of Great Britain, etc., the Island of Hong-Kong, to be possessed in perpetuity by her Britannic Majesty, Her Heirs and Successors, and to be governed by such Laws and Regulations as Her Majesty the Queen of Great Britain, etc., shall see fit to direct.

**Article V**

The Government of China having compelled the British Merchants trading at Canton to deal exclusively with certain Chinese Merchants called Hong merchants (or Cohong) who had been licensed by the Chinese Government for that purpose, the Emperor of China agrees to abolish that practice in future at all Ports where British Merchants may reside, and to permit them to carry on their mercantile transactions with whatever persons they please, and His Imperial Majesty further agrees to pay to the British Government the sum of Three Millions of Dollars, on account of Debts due to British
1750 C.E. to 1914 C.E.

Subjects by some of the said Hong Merchants (or Cohong) who have become insolvent, and who owe very large sums of money to Subjects of Her Britannic Majesty.

**Article VII**

It is agreed that the Total amount of Twenty-one Millions of Dollars, described in the three preceding Articles, shall be paid as follows:
Six Millions immediately.
Six Millions in 1843...
Five Millions in 1844...
Four Millions in 1845...

**Article IX**

The Emperor of China agrees to publish and promulgate, under his Imperial Sign Manual and Seal, a full and entire amnesty and act of indemnity, to all Subjects of China on account of their having resided under, or having had dealings and intercourse with, or having entered the Service of Her Britannic Majesty, or of Her Majesty’s Officers, and His Imperial Majesty further engages to release all Chinese Subjects who may be at this moment in confinement for similar reasons.

**Article X**

His Majesty the Emperor of China agrees to establish all the Ports which are by the 2nd Article of this Treaty to be thrown open for the resort of British Merchants, a fair and regular Tariff of Export and Import Customs and other Dues, which Tariff shall be publicly notified and promulgated for general information, and the Emperor further engages, that when British Merchandise shall have once paid at any of the said Ports the regulated Customs and Dues agreeable to the Tariff, to be hereafter fixed, such Merchandise may be conveyed by Chinese Merchants, to any Province or City in the interior of the Empire of China on paying further amount as Transit Duties which shall not exceed ____ percent on the tariff value of such goods. (Note: Tariff schedules were not settled at this time. The tariff rates on various goods were fixed after further discussions; they averaged about five percent.)

**Important Additional Privileges Granted To Foreigners In Subsequent Treaties**

Most Favored Nation Status (Article VIII of the Supplementary Treaty of the Bogue, between China and Great Britain, signed October 8, 1843)

The Emperor of China, having been graciously pleased to grant to all foreign Countries whose Subjects, or Citizens, have hitherto traded at Canton the privilege of resorting for purposes of Trade to the other four Ports of Fuchow, Amoy, Ningpo, and Shanghai, on the same terms as the English, it is further agreed, that should the Emperor hereafter, from any cause whatever, be pleased to grant additional privileges or immunities to any of the Subjects or Citizens of such Foreign Countries, the same privileges and immunities will be extended to and enjoyed by British Subjects; but it is to be understood that demands or requests are not, on this plea, to be unnecessarily brought forward.

---

**Mohandas K. Gandhi: Indian Home Rule (1909)**

*The popular image of Gandhi in the West involves a saintly manner and “passive resistance.” In fact he was a skillful lawyer whose techniques of nonviolent protest were anything but passive and who could be fearlessly outspoken in defense of his beloved India. In this imaginary dialogue, Gandhi is replying to the question of an interviewer (here labeled “READER”) as to how he would address “extremists” seeking independence from Britain. Gandhi’s replies are labeled “EDITOR.”*
1750 C.E. to 1914 C.E.

What does Gandhi say the proper role of the British in India should be?

EDITOR:

I would say to the extremists: "I know that you want Home Rule (1) for India; it is not to be had for your asking. Everyone will have to take it for himself. What others get for me is not Home Rule but foreign rule; therefore, it would not be proper for you to say that you have obtained Home Rule if you have merely expelled the English. I have already described the true nature of Home Rule. This you would never obtain by force of arms. Brute-force is not natural to Indian soil. You will have, therefore, to rely wholly on soul-force. You must not consider that violence is necessary at any stage for reaching our goal." I would say to the moderates: "Mere petitioning is derogatory; we thereby confess inferiority. To say that British rule is indispensable, is almost a denial of the Godhead. We cannot say that anybody or anything is indispensable except God. Moreover, common sense should tell us that to state that, for the time being, the presence of the English in India is a necessity, is to make them conceived.

"If the English vacated India, bag and baggage, it must not be supposed that she would be widowed. It is possible that those who are forced to observe peace under their pressure would fight after their withdrawal. There can be no advantage in suppressing an eruption; it must have its vent. If, therefore, before we can remain at peace, we must fight amongst ourselves, it is better that we do so. (2) There is no occasion for a third party to protect the weak. It is this so-called protection which has unnerved us. Such protection can only make the weak weaker. Unless we realize this, we cannot have Home Rule. I would paraphrase the thought of an English divine (3) and say that anarchy under Home Rule were better than orderly foreign rule. Only, the meaning that the leaned divine attached to Home Rule is different from Indian Home Rule according to my conception. We have to learn, and to teach others, that we do not want the tyranny of either English rule or Indian rule."

If this idea were carried out, both the extremists and the moderates could join hands. There is no occasion to fear or distrust one another.

READER:

What then, would you say to the English?

EDITOR:

To them I would respectfully say: "I admit you are my rulers. It is not necessary to debate the question whether you hold India by the sword or by my consent. I have no objection to your remaining in my country, but although you are the rulers, you will have to remain as servants of the people. It is not we who have to do as you wish, but it is you who have to do as we wish. You may keep the riches that you have drained away from this land, but you may not drain riches henceforth. Your function will be, if you so wish, to police India; you must abandon the idea of deriving any commercial benefit from us. We hold the civilization that you support to be the reverse of civilization. We consider our civilization to be far superior to yours. If you realize this truth, it will be to your advantage and, if you do not, [according to your own proverb, (4)] you should only live in our country in the same manner as we do. You must not do anything that is contrary to our religions. It is your duty as rulers that for the sake of the Hindus you should eschew beef, and for the sake of Mahomedans (5) you should avoid bacon and ham. We have hitherto said nothing because we have been cowed down, but you need not consider that you have not hurt our feelings by your conduct. We are not expressing our sentiments either through base selfishness or fear, but because it is our duty now to speak out boldly. We consider your schools and courts to be useless. We want our own ancient schools..."
and courts to be restored. The common language of India is not English but Hindi. You should, therefore, learn it. We can hold communication with you only in our national language.

"We cannot tolerate the idea of your spending money on railways and the military. We see no occasion for either. You may fear Russia; we do not. When she comes we shall look after her. If you are with us, we may then receive her jointly. We do not need any European cloth. We shall manage with articles produced and manufactured at home. You may not keep one eye on Manchester (6) and the other on India. We can work together only if our interests are identical.

(1) Independence, self-government.

(2) Gandhi thus foresees the possibility of something like the divisive violence that occurred at Independence, even though it was to break his heart and take his life.

(3) Clergyman.

(4) "When in Rome, do as the Romans do."

(5) An old English term for "Muslim." Note that Gandhi is already trying to be sensitive to both religions. This was the issue that in the end defeated him.

(6) The center of the English cotton-weaving trade. One of Gandhi's most important campaigns was to persuade Indians to wear only traditional Indian homespun garments, boycotting English imports.

Rubén Darío (1867-1916): To Roosevelt

Theodore Roosevelt was the individual who most represented the US incursions into Latin America that outraged even nonpolitical poets such as Rubén Darío (Nicaragua, 1867-1916). Latin Americans had admired the energy, wealth, and democracy of the United States, but now they feared the bullying of their northern neighbor. President Roosevelt supported a 1903 revolution in Panama that resulted in the annexation by the U.S. of territory for the Panama Canal, and in 1904 proclaimed a corollary to the Monroe Doctrine which justified the use of the U.S. military to "police" Latin America.

It is with the voice of the Bible, or the verse of Walt Whitman, that I should come to you, Hunter, primitive and modern, simple and complicated, with something of Washington and more of Nimrod.

You are the United States, you are the future invader of the naive America that has Indian blood, that still prays to Jesus Christ and still speaks Spanish.

You are the proud and strong exemplar of your race; you are cultured, you are skillful; you oppose Tolstoy.

And breaking horses, or murdering tigers, you are an Alexander-Nebuchadnezzar. (You are a professor of Energy as today's madmen say.)

You think that life is fire, that progress is eruption, that wherever you shoot you hit the future.

No.

The United States is potent and great. When you shake there is a deep tremor that passes through the enormous vertebrae of the Andes. If you clamor, it is heard like the roaring of a

~ 120 ~
1750 C.E. to 1914 C.E.

Hugo already said it to Grant: The stars are yours. (The Argentine sun, ascending, barely shines, and the Chilean star rises...) You are rich. You join the cult of Hercules to the cult of Mammon, and illuminating the road of easy conquest, Liberty raises its torch in New York.

But our America, that has had poets since the ancient times of Netzahualcoyotl, that has walked in the footsteps of great Bacchus who learned Pan’s alphabet at once; that consulted the stars, that knew Atlantis whose resounding name comes to us from Plato, that since the remote times of its life has lived on light, on fire, on perfume, on love, America of the great Montezuma, of the Inca, the fragrant America of Christopher Columbus, Catholic America, Spanish America, the America in which noble Cuauhtemoc said: “I’m not in a bed of roses”; that America that trembles in hurricanes and lives on love, it lives, you men of Saxon eyes and barbarous soul. And it dreams. And it loves, and it vibrates, and it is the daughter of the Sun.

Be careful. Viva Spanish America! There are a thousand cubs loosed from the Spanish lion. Roosevelt, one would have to be, through God himself, the-fearful Rifleman and strong Hunter, to manage to grab us in your iron claws.

And, although you count on everything, you lack one thing: God!

_translated by Bonnie Frederick_

**Maria Eugenia Echenique: The Emancipation of Women (1876)**

When emancipation was given to men, it was also given to women in recognition of the equality of rights, consistent with the principles of nature on which they are founded, that proclaim the identity of soul between men and women. Thus, Argentine women have been emancipated by law for a long time. The code of law that governs us authorizes a widow to defend her rights in court, just as an educated woman can in North America, and like her, we can manage the interests of our children, these rights being the basis for emancipation. What we lack is sufficient education and instruction to make use of them, instruction that North American women have; it is not just recently that we have proclaimed our freedom. To try to question or to oppose women’s emancipation is to oppose something that is almost a fact, it is to attack our laws and destroy the Republic.

So let the debate be there, on the true point where it should be: whether or not it is proper for women to make use of those granted rights, asking as a consequence the authorization to go to the university so as to practice those rights or make them effective. And this constitutes another right and duty in woman: a duty to accept the role that our own laws bestow on her when extending the circle of her jurisdiction and which makes her responsible before the members of her family.

This, assuming that the woman is a mother. But, are all women going to marry? Are all going to be relegated to a life of inaction during their youth or while they remain single? Is it so easy for all women to look for a stranger to defend their offended dignity, their belittled honor, their stolen interests? Don’t we see every day how the laws are trodden underfoot, and the victim, being a woman, is forced to bow her head because she does not know how to defend herself, exposed to lies and tricks

~ 121 ~
because she does not know the way to clarify the truth?

Far from causing the breakdown of the social classes, the emancipation of women would establish morality and justice in them; men would have a brake that would halt the "imperious need" that they have made of the "lies and tricks" of litigations, and the science of jurisprudence, so sacred and magnificent in itself but degenerated today because of abuses, would return to its splendor and true objective once women take part in the forum. Generous and abnegated by nature, women would teach men humanitarian principles and would condemn the frenzy and insults that make a battlefield out of the courtroom.

"Women either resolve to drown the voice of their hearts, or they listen to that voice and renounce emancipation." If emancipation is opposed to the tender sentiments, to the voice of the heart, then men who are completely emancipated and study science are not capable of love. The beautiful and tender girl who gives her heart to a doctor or to a scientist, gives it, then, to a stony man, incapable of appreciating it or responding to her; women could not love emancipated men, because where women find love, men find it too; in both burns the same heart's flame. I have seen that those who do not practice science, who do not know their duties or the rights of women, who are ignorant, are the ones who abandon their wives, not the ones who, concentrated on their studies and duties, barely have time to give them a caress.

Men as much as women are victims of the indifference that ignorance, not science, produces. Men are more slaves of women who abuse the prestige of their weakness and become tyrants in their home, than of the schooled and scientific women who understand their duties and are capable of something. With the former the husband has to play the role of man and woman, because she ignores everything: she is not capable of consoling nor helping her husband, she is not capable of giving tenderness, because, preoccupied with herself, she becomes demanding, despotic, and vain, and she does not know how to make a happy home. For her there are no responsibilities to carry out, only whims to satisfy. This is typical, we see it happening every day.

The ignorant woman, the one who voluntarily closes her heart to the sublime principles that provoke sweet emotions in it and elevate the mind, revealing to men the deep secrets of the All-Powerful; the woman incapable of helping her husband in great enterprises for fear of losing the prestige of her weakness and ignorance; the woman who only aspires to get married

and reproduce, and understands maternity as the only mission of women on earth--she can be the wife of a savage, because in him she can satisfy all her aspirations and hopes, following that law of nature that operates even on beasts and inanimate beings.

I would renounce and disown my sex if the mission of women were reduced only to procreation, yes, I would renounce it; but the mission of women in the world is much more grandiose and sublime, it is more than the beasts', it is the one of teaching humankind, and in order to teach it is necessary to know. A mother should know science in order to inspire in her children great deeds and noble sentiments, making them feel superior to the other objects in the universe, teaching them from the cradle to become familiar with great scenes of nature where they should go to look for God and love Him. And nothing more sublime and ideal than the scientific mother who, while her husband goes to cafes or to the political club to talk about state interests, she goes to spend some of the evening at the astronomical observatory, with her children by the hand to show them Jupiter, Venus, preparing in that way their tender hearts for the most legitimate and sublime aspirations that
could occupy men’s minds. This sacred mission in the scientific mother who understands emancipation—the fulfillment of which, far from causing the abandonment of the home, causes it to unite more closely—instead of causing displeasure to her husband, she will cause his happiness.

The abilities of men are not so miserable that the carrying out of one responsibility would make it impossible to carry out others. There is enough time and competence for cooking and mending, and a great soul such as that of women, equal to that of their mates, born to embrace all the beauty that exists in Creation of divine origin and end, should not be wasted all on seeing if the plates are clean and rocking the cradle.

Translated by Francisco Manzo Robledo

Voltaire: A Treatise on Tolerance (1763)

Voltaire was the most eloquent and tireless advocate of the anti-dogmatic movement known as "The Enlightenment." He argued in favor of "deism," a vague substitute for traditional religion which acknowledged a creator and some sort of divine justice, but rejected most of the other fundamental beliefs of Christianity. Instead he preached that all are obliged to tolerate each other. When he defends even false religion as superior to none, it is obvious that his objections to atheism are superficial and that he looks on religious beliefs as useful, but not necessarily true. It should be remembered that atheism was strictly illegal in Voltaire’s time, and he had been imprisoned repeatedly and finally exiled for his challenges to traditional religion. Deism provided a convenient (and legal) screen for his attacks on Christianity; but many scholars believe that despite his statements to the contrary, he was in fact an atheist. His arguments for religious freedom have become commonplaces in the modern Western world, even among religious believers.

What reasons does Voltaire give that we should all tolerate each other?

Whether it is Useful to Maintain People in their Superstition

Such is the feebleness of humanity, such is its perversity, that doubtless it is better for it to be subject to all possible superstitions, as long as they are not murderous, than to live without religion. Man always needs a rein, and even if it might be ridiculous to sacrifice to fauns, or sylvans, or naiads, (1) it is much more reasonable and more useful to venerate these fantastic images of the Divine than to sink into atheism. An atheist who is rational, violent, and powerful, would be as great a pestilence as a blood-mad, superstitious man.

When men do not have healthy notions of the Divinity, false ideas supplant them, just as in bad times one uses counterfeit money when there is no good money. The pagan feared to commit any crime, out of fear of punishment by his false gods; the Malabarian fears to be punished by his pagoda. Wherever there is a settled society, religion is necessary; the laws cover manifest crimes, and religion covers secret crimes.

But whenever human faith comes to embrace a pure and holy religion, superstition not only becomes useless, but very dangerous. We should not seek to nourish ourselves on acorns when God gives us bread.

Superstition is to religion what astrology is to astronomy: the foolish daughter of a very wise mother. These two daughters, superstition and astrology, have subjugated the world for a long time.

~ 123 ~
When, in our ages of barbarity, scarcely two feudal lords owned between them a single New Testament, it might be pardonable to offer fables to the vulgar, that is, to these feudal lords, to their imbecile wives, and to their brutish vassals; they were led to believe that Saint Christopher carried the infant Jesus from one side of a river to the other; they were fed stories about sorcerers and their spiritual possessions; they easily imagined that Saint Genou (2) would cure the gout, and that Saint Claire (3) would cure eye problems. The children believed in the werewolf, and the fathers in the rope girdle of Saint Francis. The number of relics (4) was innumerable.

The sediment of these superstitions still survived among the people, even at that time that religion was purified. We know that when Monsieur de Noailles, the Bishop of Châlons, removed and threw into the fire the false relic of the holy navel of Jesus Christ, then the entire village of Châlons began proceedings against him; however, he had as much courage as he had piety, and he succeeded in making the Champenois believe that they could adore Jesus Christ in spirit and truth, without having his navel in the church.

Those we call Jansenists (5) contributed greatly to rooting out gradually from the spirit of the nation the greater part of the false ideas which dishonored the Christian religion. People ceased to believe that it was sufficient to recite a prayer to the Virgin Mary for thirty days so that they could do what they wish and sin with impunity the rest of the year.

Finally the bourgeoisie began to realize that it was not Saint Geneviève who gave or withheld rain, but that it was God Himself who disposed of the elements. The monks were astonished that their saints did not bring about miracles any longer; and if the writers of The Life of Saint Francis Xavier returned to the world, they would not dare to write that the saint revived nine corpses, that he was in two places, on the sea and on land, at the same time, and that his crucifix fell into the sea and was restored to him by a crab.

It is the same with excommunications. Our historians tells us that when King Robert was excommunicated by Pope Gregory V, for marrying his godmother, the princess Bertha, his domestic servants threw the meats to be served to the king right out the window, and Queen Bertha gave birth to a goose in punishment for the incestuous marriage. One could seriously doubt that in this day and age the servants of the king of France, if he were excommunicated, would throw his dinner out the window, or that the queen would give birth to a goose.

There are still a few convulsive fanatics (6) in remote corners of the suburbs; but this disease only attacks the most vile population. Each day reason penetrates further into France, into the shops of merchants as well as the mansions of lords. We must cultivate the fruits of this reason, especially since it is impossible to check its advance. One cannot govern France, after it has been enlightened by Pascal, Nicole, Arnauld, Bossuet, Descartes, Gassendi, Bayle, Fontenelle, and the others, as it as been governed in the times of Garasse and Menot.

If the masters of errors, and I'm speaking here of the grand masters, so long paid and honored for abusing the human species, ordered us today to believe that the seed must die in order to germinate; that the world is immovable on its foundations, that it does not orbit around the sun; that the tides are not a natural effect of gravitation; that the rainbow is not formed by the refraction and the reflection of rays of light, and so on, and they based their ordinances on passages poorly understood from the Holy Bible, how would educated men regard these men? Would the term "beasts" seem too strong? And if these wise masters used force and persecution to enforce their insolent stupidity, would the term "wild beasts" seem too extreme?
The more the superstitions of monks are despised, the more the bishops are respected and the priests listened to; while they do no good, these monkish superstitions from over the mountains (7) do a great deal of harm. But of all these superstitions, is not the most dangerous that of hating your neighbor for his opinions? And is it not evident that it would be much more reasonable to worship the Holy Navel, the Holy Foreskin, or the milk or the robe of the Virgin Mary, (8) than to detest and persecute your brother?

Chapter 21: Virtue is Better than Science

The fewer dogmas, the fewer disputes; the fewer disputes, the fewer miseries: if this is not true, then I'm wrong.

Religion was instituted to make us happy in this life and in the other. What must we do to be happy in the life to come? Be just.

What must we do in order to be happy in this life, as far as the misery of our nature permits? Be indulgent.

It would be the height of folly to pretend to improve all men to the point that they think in a uniform manner about metaphysics. It would be easier to subjugate the entire universe through force of arms than to subjugate the minds of a single village. . . .

Chapter 22: On Universal Tolerance

It does not require great art, or magnificently trained eloquence, to prove that Christians should tolerate each other. I, however, am going further: I say that we should regard all men as our brothers. What? The Turk my brother? The Chinaman my brother? The Jew? The Siam? Yes, without doubt; are we not all children of the same father and creatures of the same God?

But these people despise us; they treat us as idolaters! Very well! I will tell them that they are grievously wrong. It seems to me that I would at least astonish the proud, dogmatic Islam imam or Buddhist priest, if I spoke to them as follows:

"This little globe, which is but a point, rolls through space, as do many other globes; we are lost in the immensity of the universe. Man, only five feet high, is assuredly only a small thing in creation. One of these imperceptible beings says to another one of his neighbors, in Arabia or South Africa: 'Listen to me, because God of all these worlds has enlightened me: there are nine hundred million little ants like us on the earth, but my ant-hole is the only one dear to God; all the other are cast off by Him for eternity; mine alone will be happy, and all the others will be eternally damned."

They would then interrupt me, and ask which fool blabbed all this nonsense. I would be obliged to answer, "You, yourselves." I would then endeavor to calm them, which would be very difficult.

I would then speak with the Christians, and I would dare to say, for example, to a Dominican Inquisitor of the Faith: [9] "My brother, you know that each province of Italy has their own dialect, and that people do not speak at Venice or Bergamo the same way they speak at Florence. The Academy of Crusca near Florence has fixed the language; its dictionary is a rule which one dare not depart from, and the Grammar of Buonmattei is an infallible guide that one must follow. But do you believe that the consul of the Academy, or Buonmattei in his absence, could in conscience cut the tongues out of all the Venetians and all the Bergamas who persist in speaking their dialect?"

The inquisitor responds, "There is a difference between your example and our practice. For us, it is a matter of the health of your soul. It is for your good that the director of the Inquisition ordains that you be seized on the testimony of a
single person, however infamous or criminal that person might be; that you will have no advocate to defend you; that the name of your accuser will not even be known by you; that the inquisitor can promise you mercy, and immediately condemn you; that five different tortures will be applied to you, and then you will be flogged, or sent to the galleys, or ceremoniously burned. Father Ivonet, Doctor Cuchalon, Zanchinus, Campegius, Roias, Felynus, Gomarus, Diabarbus, Gemelinus, are explicit on this point, and this pious practice cannot suffer any contradiction."

I would take the liberty to respond, "My brother, perhaps you are reasonable; I am convinced that you wish to do me good; but could I not be saved without all that?"

It is true that these absurd horrors do not stain the face of the earth every day; but they are frequent, and they could easily fill a volume much greater than the gospels which condemn them. (10) Not only is it extremely cruel to persecute in this brief life those who do not think the way we do, but I do not know if it might be too presumptuous to declare their eternal damnation. It seems to me that it does not pertain to the atoms of the moment, such as we are, to anticipate the decrees of the Creator.

Translated by Richard Hooker

(1) Ancient Greek demigods.

(2) His name means "knee" in French.

(3) Her name suggests light.

(4) Physical remains of saints, either their body parts, clothing, or any other physical object associated with them; these relics were supposed to display remarkable curative and other magical properties.

(5) Reformers who agreed in many ways with Protestant ideas.

(6) Ecstatics who fell into religious fits.

(7) Rome.

(8) These are all relics actually venerated in his time.

(9) The Dominicans ran the notorious Inquisition which tortured and condemned to death people who departed from orthodox Catholicism.

(10) Note how he slips in this comment, arguing that the Inquisition itself is contrary to the teachings of Christ.

Rousseau, Jean-Jacques: The Social Contract (1762)

Jean-Jacques Rousseau, in The Social Contract, propounds a doctrine which already had a long history in the struggle against the older view of the divine right of kings, namely, that government gets its authority over us by a willing consent on our part, not by the authorization of God. While Rousseau's famous opening line condemns the society of his day for its limiting of our natural spontaneity (indeed, its corruption of our natural goodness), he thinks that a good government can be justified in terms of the compromise to which each of us submits so as to gain "civil liberty and the proprietorship of all he possesses." Rousseau even thinks that we mature as human beings in such a social setting, where we are not simply driven by our appetites and desires but become self-governing, self-disciplined beings.
1750 C.E. to 1914 C.E.

*How, as Rousseau himself asks, can one enter into an agreement which limits one's power without thereby "harming his own interests and neglecting the care he owes to himself?"

---

**Subject of the First Book**

Man is born free; and everywhere he is in chains. One thinks himself the master of others, and still remains a greater slave than they. How did this change come about? I do not know. What can it legitimate? That question I think I can answer.

If I took into account only force, and the effects derived from it, I should say: "As long as a people is compelled to obey, and obeys, it does well; as soon as it can shake off the yoke, and shakes it off, it does still better; for, regaining its liberty by the same right as took it away, either it is justified in resuming it, or there was no justification for those who took it away." But the social order is a sacred right which is the basis of all rights. Nevertheless, this right does not come from nature, and must therefore be founded on conventions... .

---

**Slavery**

Since no man has a natural authority over his fellow, and force creates no right, we must conclude that conventions form the basis of all legitimate authority among men.

---

**The Social Compact**

I suppose men to have reached the point at which the obstacles in the way of their preservation in the state of nature show their power of resistance to be greater than the resources at the disposal of each individual for his maintenance in that state. That primitive condition can then subsist no longer; and the human race would perish unless it changed its manner of existence.

---

But, as men cannot engender new forces, but only unite and direct existing ones, they have no other means of preserving themselves than the formation, by aggregation, of a sum of forces great enough to overcome the resistance. These they have to bring into play by means of a single motive power, and cause to act in concert. (2)

This sum of forces can arise only where several persons come together: but, as the force and liberty of each man are the chief instruments of his self-preservation, how can he pledge them without harming his own interests, and neglecting the care he owes to himself? This difficulty, in its bearing on my present subject, may be stated in the following terms:

"The problem is to find a form of association which will defend and protect with the whole common force the person and goods of each associate, and in which each, while uniting himself with all, may still obey himself alone, and remain as free as before." This is the fundamental problem of which the Social Contract provides the solution... .

---

**The Civil State**

The passage (3) from the state of nature to the civil state produces a very remarkable change in man, by substituting justice for instinct in his conduct, and giving his actions the morality they had formerly lacked. Then only, when the voice of duty takes the place of physical impulses and right of appetite, does man, who so far had considered only himself, find that he is forced to act on different principles, and to consult his reason before listening to his inclinations. Although, in this state, he deprives himself of some advantages which he got from nature, he gains in return others so great, his faculties are so stimulated and developed, his

~ 127 ~
ideas so extended, his feelings so ennobled, and his whole soul so uplifted that, did not the abuses of this new condition often degrade him below that which he left, he would be bound to bless continually the happy moment which took him from it for ever, and, instead of a stupid and unimaginative animal, made him an intelligent being and a man.

Let us draw up the whole account in terms easily commensurable. What man loses by the social contract is his natural liberty and an unlimited right to everything he tries to get and succeeds in getting; what he gains is civil liberty and the proprietorship of all he possesses. If we are to avoid mistake in weighing one against the other, we must clearly distinguish natural liberty, which is bounded only by the strength of the individual, from civil liberty, which is limited by the general will; and possession, which is merely the effect of force or the right of the first occupier, from property, which can be founded only on a positive title.

We might, over and above all this, add, to what man acquires in the civil state, moral liberty, which alone makes him truly master of himself; for the mere impulse of appetite is slavery, while obedience to a law which we prescribe to ourselves is liberty.

Translated by G. D. H. Cole (1913)

(1) That is, agreements which are not inevitable but are entered in to voluntarily.

(2) Jointly.

(3) Transition.

**Women Miners in the English Coal Pits**

In England, exclusive of Wales, it is only in some of the colliery districts of Yorkshire and Lancashire that female Children of tender age and young and adult women are allowed to descend into the coal mines and regularly to perform the same kinds of underground work, and to work for the same number of hours, as boys and men; but in the East of Scotland their employment in the pits is general; and in South Wales it is not uncommon.

*West Riding of Yorkshire: Southern Part* - In many of the collieries in this district, as far as relates to the underground employment, there is no distinction of sex, but the labour is distributed indifferently among both sexes, except that it is comparatively rare for the women to hew or get the coals, although there are numerous instances in which they regularly perform even this work. In great numbers of the coalpits in this district the men work in a state of perfect nakedness, and are in this state assisted in their labour by females of all ages, from girls of six years old to women of twenty-one, these females being themselves quite naked down to the waist.

"Girls," says the Sub-Commissioner [J. C. Symons], -regularly perform all the various offices of trapping, hurrying [Yorkshire terms for drawing the loaded coal carves], filling, riddling, tipping, and occasionally getting, just as they are performed by boys. One of the most disgusting sights 1 have ever seen was that of young females, dressed like boys in trousers, crawling on all fours, with belts round their waists and chains passing between their legs, at day pits at Hunshelf Bank, and in many small pits near Holmfirth and New Mills: it exists also in several other places. 1 visited the Hunshelf Colliery on the 18th of January: it is a day pit; that is, there is no shaft or descent; the gate or
entrance is at the side of a bank, and nearly horizontal. The gate was not more than a yard high, and in some places not above 2 feet.

"When I arrived at the board or workings of the pit I found at one of the sideboards down a narrow passage a girl of fourteen years of age in boy's clothes, picking down the coal with the regular pick used by the men. She was half sitting half lying at her work, and said she found it tired her very much, and 'of course she didn't like it.' The place where she was at work was not 2 feet high. Further on were men lying on their sides and getting. No less than six girls out of eighteen men and children are employed in this pit.

"Whilst I was in the pit the Rev Mr Bruce, of Wadsley, and the Rev Mr Nelson, of Rotherham, who accompanied me, and remained outside, saw another girl of ten years of age, also dressed in boy's clothes, who was employed in hurrying, and these gentlemen saw her at work. She was a nice-looking little child, but of course as black as a tinker, and with a little necklace round her throat.

"In two other pits in the Huddersfield Union I have seen the same sight. In one near New Mills, the chain, passing high up between the legs of two of these girls, had worn large holes in their trousers; and any sight more disgustingly indecent or revolting can scarcely be imagined than these girls at work-no brothel can beat it.

"On descending Messrs Hopwood's pit at Barnsley, I found assembled round a fire a group of men, boys, and girls, some of whom were of the age of puberty; the girls as well as the boys stark naked down to the waist, their hair bound up with a tight cap, and trousers supported by their hips. (At Silkstone and at Flockton they work in their shifts and trousers.) Their sex was recognizable only by their breasts, and some little difficulty occasionally arose in pointing out to me which were girls and which were boys, and which caused a good deal of laughing and joking. In the Flockton and Thornhill pits the system is even more indecent: for though the girls are clothed, at least three-fourths of the men for whom they "hurry" work stark naked, or with a flannel waistcoat only, and in this state they assist one another to fill the corves 18 or 20 times a day: I have seen this done myself frequently.

"When it is remembered that these girls hurry chiefly for men who are not their parents; that they go from 15 to 20 times a day into a dark chamber (the bank face), which is often 50 yards apart from any one, to a man working naked, or next to naked, it is not to be supposed but that where opportunity thus prevails sexual vices are of common occurrence. Add to this the free intercourse, and the rendezvous at the shaft or bullstake, where the corves are brought, and consider the language to which the young ear is habituated, the absence of religious instruction, and the early age at which contamination begins, and you will have before you, in the coal-pits where females are employed, the picture of a nursery for juvenile vice which you will go far and we above ground to equal."

Two Women Miners

Betty Harris, age 37: I was married at 23, and went into a colliery when I was married. I used to weave when about 12 years old; can neither read nor write. I work for Andrew Knowles, of Little Bolton (Lancs), and make sometimes 7s a week, sometimes not so much. I am a drawer, and work from 6 in the morning to 6 at night. Stop about an hour at noon to eat my dinner; have bread and butter for dinner; I get no drink. I have two children, but they are too young to work. I worked at drawing when I was in the family way. I know a woman who has gone home and washed herself, taken to her bed, delivered of a child, and gone to work again under the week.
I have a belt round my waist, and a chain passing between my legs, and I go on my hands and feet. The road is very steep, and we have to hold by a rope; and when there is no rope, by anything we can catch hold of. There are six women and about six boys and girls in the pit I work in; it is very hard work for a woman. The pit is very wet where I work, and the water comes over our clog-tops always, and I have seen it up to my thighs; it rains in at the roof terribly. My clothes are wet through almost all day long. I never was ill in my life, but when I was lying in.

My cousin looks after my children in the day time. I am very tired when I get home at night; I fall asleep sometimes before I get washed. I am not so strong as I was, and cannot stand my work so well as I used to. I have drawn till I have bathe skin off me; the belt and chain is worse when we are in the family way. My feller (husband) has beaten me many a times for not being ready. I were not used to it at first, and he had little patience.

I have known many a man beat his drawer. I have known men take liberties with the drawers, and some of the women have bastards.

Patience Kershaw, age 17, Halifax: I go to pit at 5 o’clock in the morning and come out at 5 in the evening; I get my breakfast, porridge and milk, first; I take my dinner with me, a cake, and eat it as I go; I do not stop or rest at any time for the purpose, I get nothing else until I get home, and then have potatoes and meat, not every day meat.

Karl Marx and Friedrich Engels: The Communist Manifesto (1848)

Although it at first had little or no impact on the widespread and varied revolutionary movements of the mid-19th century Europe, the Communist Manifesto was to become one of the most widely read and discussed documents of the 20th century. Marx sought to differentiate his brand of socialism from others by insisting that it was scientifically based in the objective study of history, which he saw as being a continuous process of change and transformation. Just as feudalism had naturally evolved into mercantilism and then capitalism, so capitalism would inevitably give way to its logical successor, socialism (a term which in Marx’s usage includes its most advanced form, communism) as the necessary result of class struggle. Marx’s insistence that tough-minded realism should replace the utopian idealism of earlier socialists had profound consequences: it enabled revolutionaries like Lenin to be put it into action, but it also tended to encourage its followers to accept ruthless means to justify what they believed were historically necessary ends. Radical politics were being much more widely discussed than the small number of radicals justified; but Marx uses this fact to his advantage by proclaiming that any ideology so feared must be important and worth explaining clearly. In the notes, "Marx" is used as shorthand for both Marx (the theoretician) and Engels (the more eloquent writer of the two). The Manifesto was originally issued in several languages, including this English version.

What kinds of changes does Marx say have been characteristic of the bourgeois era?

Prologue

A specter is haunting Europe—the specter of communism. All the powers of old Europe have entered into a holy alliance to exorcise this specter: Pope and Czar, Metternich and Guizot, (1) French Radicals and German police spies. Where is the party in opposition that has not been decried as communistic by its opponents in power? Where the Opposition that has not
1750 C.E. to 1914 C.E.

hurled back the branding reproach of communism, against the more advanced opposition part-ies, as well as against its reactionary adversaries?

Two things result from this fact:

I. Communism is already acknowledged by all European powers to be itself a power.

II. It is high time that Communists should openly, in the face of the whole world, publish their views, their aims, their tendencies, and meet this nursery tale of the specter of communism with a manifesto of the party itself. (2)

Part I: Bourgeois And Proletarians

The history of all hitherto existing society is the history of class struggles.

Freeman and slave, (3) patrician and plebeian, (4) lord and serf, (5) guildmaster and journeyman, (6) in a word, oppressor and oppressed, stood in constant opposition to one another, carried on an uninterrupted, now hidden, now open fight, a fight that each time ended, either in a revolutionary reconstitution of society at large, or in the common ruin of the contending classes.

In the earlier epochs of history, we find almost everywhere a complicated arrangement of society into various orders, a manifold gradation of social rank. In ancient Rome we have patricians, knights, plebeians, slaves; in the Middle Ages, feudal lords, vassals, guildmasters, journeymen, apprentices, serfs; in almost all of these classes, again, subordinate gradations.

The modern bourgeois society that has sprouted from the ruins of feudal society, has not done away with class antagonisms. It has but established new classes, new conditions of oppression, new forms of struggle in place of the old ones.

Our epoch, the epoch of the bourgeoisie, (7) possesses, however, this distinctive feature: It has simplified the class antagonisms. Society as a whole is more and more splitting up into two great hostile camps, into two great classes directly facing each other--bourgeoisie and proletariat. . . . (8)

Modern industry has established the world market, for which the discovery of America paved the way. (9) This market has given an immense development to commerce, to navigation, to communication by land. This development has, in its turn, reacted on the extension of industry; and in proportion as industry, commerce, navigation, railways extended, in the same proportion the bourgeoisie developed, increased its capital, and pushed into the background every class handed down from the Middle Ages.

We see, therefore, how the modern bourgeoisie is itself the product of a long course of development, of a series of revolutions in the modes of production and of exchange.

Each step in the development of the bourgeoisie was accompanied by a corresponding political advance of that class. (10) An oppressed class under the sway of the feudal nobility, it became an armed and self-governing association in the medieval commune; here independent urban republic (as in Italy and Germany), there taxable "third estate" of the monarchy (as in France); afterwards, in the period of manufacture proper, serving either the semi-feudal or the absolute monarchy as a counterpoise against the nobility, and, in fact, cornerstone of the great monarchies in general--the bourgeoisie has at last, since the establishment of modern industry and of the world market conquered for itself, in the modern representative state, exclusive political sway. The executive of the modern state is but a committee for managing...
the common affairs of the whole bourgeoisie.  
(11)

The bourgeoisie has played a most revolutionary role in history. (12)

The bourgeoisie, wherever it has got the upper hand, has put an end to all feudal, patriarchal, idyllic relations. It has pitilessly torn asunder the motley feudal ties that bound man to his "natural superiors," and has left no other bond between man and man than naked self-interest, than callous "cash payment." It has drowned the most heavenly ecstasies of religious fervor, of chivalrous enthusiasm, of philistine sentimentalism, in the icy water of egotistical calculation. It has resolved personal worth into exchange value, and in place of the numberless indefeasible chartered freedoms, has set up that single, unconscionable freedom—Free Trade. In one word, for exploitation, veiled by religious and political illusions, it has substituted naked, shameless, direct, brutal exploitation. (13)

Part II: Proletarians and Communists

What else does the history of ideas prove, than that intellectual production changes its character in proportion as material production is changed? The ruling ideas of each age have ever (14) been the ideas of its ruling class. (15)

When people speak of ideas that revolutionize society, they do but express the fact that within the old society the elements of a new one have been created, and that the dissolution of the old ideas keeps even pace with the dissolution of the old conditions of existence.

When the ancient world was in its last throes, the ancient religions were overcome by Christianity. When Christian ideas succumbed in the eighteenth century to rationalist ideas, feudal society fought its death-battle with the then revolutionary bourgeoisie. The ideas of religious liberty and freedom of conscience, merely gave expression to the sway of free competition within the domain of knowledge.

"Undoubtedly," it will be said, "religion, moral, philosophical and juridical ideas have been modified in the course of historical development. But religion morality, philosophy, political science, and law, constantly survived this change."

"There are, besides, eternal truths, such as Freedom, Justice, etc., that are common to all states of society. But communism abolishes eternal truths, it abolishes all religion, and all morality, instead of constituting them on a new basis; it therefore acts in contradiction to all past historical experience."

What does this accusation reduce itself to? The history of all past society has consisted in the development of class antagonisms, antagonisms that assumed different forms at different epochs.

But whatever form they may have taken, one fact is common to all past ages, viz., the exploitation of one part of society by the other. No wonder, then, that the social consciousness of past ages, despite all the multiplicity and variety it displays, moves within certain common forms, or general ideas, which cannot completely vanish except with the total disappearance of class antagonisms.

The Communist revolution is the most radical rupture with traditional property relations; no wonder that its development involves the most radical rupture with traditional ideas. (16)

Part IV: Position of the Communists in Relation to the Various Existing Opposition Parties

In short, the Communists everywhere support every revolutionary movement against the existing social and political order of things. (17)
In all these movements they bring to the front, as the leading question in each case, the property question, no matter what its degree of development at the time.

Finally, they labor everywhere for the union and agreement of the democratic parties of all countries.

The Communists disdain to conceal their views and aims. (18) They openly declare that their ends can be attained only by the forcible overthrow of all existing social conditions. Let the ruling classes tremble at a Communist revolution. The proletarians have nothing to lose but their chains. They have a world to win.

Workingmen of all countries, unite! (19)

(1) German and French conservatives.

(2) Marx opposed secret conspiratorial communist organizations because he felt that the only successful revolution would need the support of the overwhelming mass of society; and people could not be expected to support what they did not understand or even know about.

(3) Typical of ancient civilizations like that of the Greeks.

(4) Roman social classes.

(5) From the European Middle Ages.

(6) Representing the later Middle Ages and Renaissance.

(7) The term originally meant simply the class of people who lived in cities, but here it means those whose income comes from doing business rather than--like the aristocracy--from inherited estates or--like the proletariat--from wages.

(8) The working class, people who make their living by working for others rather than owning or investing in businesses.

(9) Marx's comments on the importance of the world market, developed further in passages here omitted, sounds very modern. He argued that the differences between countries would diminish as they adopted capitalism and increased their international trade, paving the way for a stateless world united in communism.

(10) Marx particularly has in mind the European revolutions of 1789-1848, in which the bourgeoisie, which had long before become the dominant economic force in society, asserted its claims to political power as well.

(11) In this famous comment, the modern democratic states are dismissed as mere tools of the bourgeoisie, since it is the wealthy who run them and set their agendas, despite their claims to popular representation.

(12) Although the following paragraph outlines this role in negative terms, Marx believed that the transformation of the world wrought by capitalism was absolutely necessary to provide the foundations for communism; so the bourgeoisie are revolutionary in fact, though unwittingly so.

(13) Although this is harshly put, Marx believes that the idealism which justified earlier class structures was indeed an illusion, a repressive deception that needed to be destroyed.

(14) Always.

(15) One of Marx's most influential concepts. In a capitalist society people think competition natural because capitalism requires competition; but in the Middle Ages submission to one's social "superiors" was seen as equally natural. Communism is not "against human nature" because there is no such thing--only the social values produced by certain kinds of economic organization. Contemporary Marxist analysis attempts to trace society's values back to the economic and political interests of the most powerful people in society.

(16) Marx spent relatively little time outlining the nature of communist society, but the goals were widely understood to be 1) complete equality of all citizens, 2) abolition of private ownership of the means of production (factories, mines, railways, etc.), 3) the replacement of a market economy with
1750 C.E. to 1914 C.E.

one in which everyone got whatever they needed in return for such labor as they were able to give. In addition, Marx envisions the abolition of all states and governments, and as a consequence, an end to war. The crucial problem of how one motivates workers in a state which is both free and propertyless was never solved by the Marxist states of the 20th century.

(17) Marx argues that communist should work with all "progressive" movements in what were later to be called "united fronts."

(18) Note the repeated emphasis on openness. When communists were viewed as conspirators they risked being seen as enemies of the people they were trying to help.

(19) This stirring conclusion is almost always misquoted as "Working men of all countries, unite! You have nothing to lose but your chains!"

---

Charles Darwin: The Origin of Species (1859)

Opposition to evolutionary theory has always been most vigorous among those who felt that their religious beliefs required them to reject it. Darwin was acutely aware of this fact and tried whenever he could to accommodate religious sensibilities. In the following overview of his theory of natural selection he emphasizes not only how much more rational the theory is than the claim that each species was separately created, but argues that it is marvelous and worthy of a majestic creator as well. In the final paragraph he lays down the basic elements of his theory: that individuals in every species tend naturally to vary from the norm, and that when there are so many members of a species sharing an ecological niche that they are competing for survival, only those who whose variations give them decisive advantages will survive. They will pass these characteristics on to their descendants. Despite many disagreements among scientists about the details of evolution, some of which are mentioned in the footnotes below, most of them agree that a century and a half of accumulated evidence supports the broad outlines of this elegant theory which explains nature's oddities, failures and even occasional ugliness as the products of chance operations rather than of an omnipotent god.

What examples does Darwin give of features of nature that seem like errors ("less than perfect")?

As natural selection acts solely by accumulating slight, successive, favorable variations, it can produce no great or sudden modifications; it can act only by short and slow steps. (1) Hence, the canon of "Natura non facit saltum," (2) which every fresh addition to our knowledge tends to confirm, is on this theory intelligible. We can see why throughout nature the same general end is gained by an almost infinite diversity of means, for every peculiarity when once acquired is long inherited, and structures already modified in many different ways have to be adapted for the same general purpose. We can, in short, see why nature is prodigal in variety, though niggard (3) in innovation. But why this should be a law of nature if each species has been independently created no man can explain.

Many other facts are, as it seems to me, explicable on this theory. How strange it is that a bird, under the form of a woodpecker, should prey on insects on the ground; that upland geese which rarely or never swim, should possess webbed feet; that a thrush-like bird should dive and feed on sub-aquatic insects; and that a petrel should have the habits and structure fitting it for the life of an auk! and so in endless other cases. But on the view of each species constantly trying to increase in member, with natural selection always ready to adapt the slowly varying descendants of each to any unoccupied or ill-occupied place in nature,
these facts cease to be strange, or might even have been anticipated.
We can to a certain extent understand how it is that there is so much beauty throughout nature; for this may be largely attributed to the agency of selection. That beauty, according to our sense of it, is not universal, must be admitted by every one who will look at some venomous snakes, at some fishes, and at certain hideous bats with a distorted resemblance to the human face. Sexual selection has given the most brilliant colors, elegant patterns, and other ornaments to the males, and sometimes to both sexes of many birds, butterflies, and other animals. With birds it has often rendered the voice of the male musical to the female, as well as to our ears. Flowers and fruit have been rendered conspicuous by brilliant colors in contrast with the green foliage, in order that the flowers may be easily seen, visited, and fertilized by insects, and the seeds disseminated by birds. How it comes that certain colors, sounds, and forms should give pleasure to man and the lower animals,—that is, how the sense of beauty in its simplest form was first acquired,—we do not know any more than how certain odors and favors were first rendered agreeable.
As natural selection acts by competition, it adapts and improves the inhabitants of each country only in relation to their co-inhabitants; so that we need feel no surprise at the species of any one country, although on the ordinary view supposed to have been created and specially adapted for that country, being beaten and supplanted by the naturalized productions from another land. Nor ought we to marvel if all the contrivances in nature be not, as far as we can judge, absolutely perfect, as in the case even of the human eye; or if some of them be abhorrent to our ideas of fitness. We need not marvel at the sting of the bee, when used against an enemy, causing the bee's own death; at drones being produced in such great numbers for one single act, and being then slaughtered by their sterile sisters; at the astonishing waste of pollen by our fir-trees; at the instinctive hatred of the queen-bee for her own fertile daughters; at ichneumonidae feeding within the living bodies of caterpillars; or at other such cases. The wonder indeed is, on the theory of natural selection, that more cases of absolute perfection have not been detected. . . .
Authors of the highest eminence seem to be fully satisfied with the view that each species has been independently created. To my mind it accords better with what we know of the laws impressed on matter by the Creator, that the production and extinction of the past and present inhabitants of the world should have been due to secondary causes, like those determining the birth and death of the individual. When I view all beings not as special creations, but as the lineal descendants of some few beings which lived long before the first bed of the Cambrian system was deposited, they seem to me to become ennobled. Judging from the past, we may safely infer that not one living species will transmit its unaltered likeness to a distant futurity. And of the species now living very few will transmit progeny of any kind to a far distant futurity; for the manner in which all organic beings are grouped, shows that the greater number of species in each genus, and all the species in many genera, have left no descendants, but have become utterly extinct. We can so far take a prophetic glance into futurity as to foretell that it will be the common and widely-spread species, belonging to the larger and dominant groups within each class, which will ultimately prevail and procreate new and dominant species. As all the living forms of life are the lineal descendants of those which lived long before the Cambrian epoch, we may feel certain that the ordinary succession by generation has never once been broken, and that no cataclysm has desolated the whole world. (7) Hence we may look with some confidence to a secure future of great length. And as natural selection works solely by and for the good of each being, all corporeal and mental endowments will tend to progress towards perfection. (8)
It is interesting to contemplate a tangled bank, clothed with many plants of many kinds, with birds singing on the bushes, with various insects flitting about, and with worms crawling through the damp earth, and to reflect that these elaborately constructed forms, so different from each other, and dependent upon each other in so complex a manner, have all been produced by laws acting around us. These laws, taken in the largest sense, being Growth with Reproduction; Inheritance which is almost implied by reproduction; Variability from the indirect and direct action of the conditions of life, and from use and disuse: a Ratio of Increase so high as to lead to a Struggle for Life, and as a consequence to Natural Selection, entailing Divergence of Character and the Extinction of less-improved forms. Thus, from the war of nature, from famine and death, the most exalted object which we are capable of conceiving, namely, the production of the higher animals, directly follows. There is grandeur in this view of life, with its several powers, having been originally breathed by the Creator into a few forms or into one; and that, whilst this planet has gone cycling on according to the fixed law of gravity, from so simple a beginning endless forms most beautiful and most wonderful have been, and are being evolved.

(1) One modern school of thought rejects Darwin’s gradualism, arguing that sudden and widespread change after long periods of stability has been more characteristic of evolutionary history.

(7) Darwin has in mind not only the Biblical flood, but theories of nature which attributed all traces of large-scale change to various catastrophes. Ironically, most modern Darwinians have integrated the belief in at least one great cataclysm—the cometary impact which evidently ended the age of the dinosaurs—into evolutionary theory.

(8) This view has been disputed by some scientists who argue that later forms are not necessarily "better" than later ones.

**Rudyard Kipling, The White Man's Burden (1899)**

*Born in British India in 1865, Rudyard Kipling was educated in England before returning to India in 1882, where his father was a museum director and authority on Indian arts and crafts. Thus Kipling was thoroughly immersed in Indian culture: by 1890 he had published in English about 80 stories and ballads previously unknown outside India. As a result of financial misfortune, from 1892-96 he and his wife, the daughter of an American publisher, lived in Vermont, where he wrote the two Jungle Books. After returning to England, he published "The White Man's Burden" in 1899, an appeal to the United States to assume the task of developing the Philippines, recently won in the Spanish-American War. As a writer, Kipling perhaps lived too long: by the time of his death in 1936, he had come to be reviled as the poet of British imperialism, though being regarded as a beloved children's book author. Today he might yet gain appreciation as a transmitter of Indian culture to the West.*

*What is it today's reader finds so repugnant about Kipling's poem? If you were a citizen of a colonized territory, how would you respond to Kipling?*

---

Take up the White Man's burden--
Send forth the best ye breed--
Go bind your sons to exile
To serve your captives' need;

To wait in heavy harness,
On fluttered folk and wild--
Your new-caught, sullen peoples,
Half-devil and half-child.

---

~ 136 ~
1750 C.E. to 1914 C.E.

Take up the White Man's burden--
In patience to abide,
To veil the threat of terror
And check the show of pride;
By open speech and simple,
An hundred times made plain
To seek another's profit,
And work another's gain.

Take up the White Man's burden--
The savage wars of peace--
Fill full the mouth of Famine
And bid the sickness cease;
And when your goal is nearest
The end for others sought,
Watch sloth and heathen folly
Bring all your hopes to nought.

Take up the White Man's burden--
No tawdry rule of kings,
But toil of serf and sweeper--
The tale of common things.
The ports ye shall not enter,
The roads ye shall not tread,
Go mark them with your living,
And mark them with your dead.

Take up the White Man's burden--
And reap his old reward:
The blame of those ye better,
The hate of those ye guard--
The cry of hosts ye humour
(Ah, slowly!) toward the light--
"Why brought he us from bondage,
Our loved Egyptian night?"

Take up the White Man's burden--
Ye dare not stoop to less--
Nor call too loud on Freedom
to cloke[1] your weariness;
By all ye cry or whisper,
By all ye leave or do,
The silent, sullen peoples
Shall weigh your gods and you.

Take up the White Man's burden--
Have done with childish days--
The lightly professed[2] laurel,
The easy, ungrudged praise.
Comes now, to search your manhood
Through all the thankless years
Cold, edged with dear-bought wisdom,
The judgment of your peers!

(1) Cloak, cover.
(2) Since the days of Classical Greece, a laurel wreath has been a symbolic victory prize.

Rudyard Kipling: Issues a Word of Warning (1890)

In the poem "Recessional," written for Queen Victoria’s Diamond Jubilee in 1897, Rudyard Kipling (1865-1936) sent a warning to his generation of ardent imperialists. Kipling, who had been born in India, has long been regarded as a staunch advocate of European imperialism. His "White Man’s Burden" (1899), written for the American audience during the Spanish-American War, is one of the most elegant summations of the "civilizing mission" justification of imperialism, replete with overtones of racial superiority. His stories and novels inspired many a young Englishman to seek his fame and fortune in the far reaches of the British Empire. Thus, the cautionary message of "Recessional" is somewhat of a paradox.

Questions to Consider
- What is Kipling warning his generation about?
- Offer an explanation for the paradox of the "Recessional."

God of our fathers, known of old--
Beneath whose awful hand we hold
Lord of our far-flung battle line--
Dominion over palm and pine--
1750 C.E. to 1914 C.E.

—Lord God of Hosts, be with us yet,
  Lest we forget—lest we forget!

The tumult and the shouting die—
The Captains and the Kings depart—
Still stands thine ancient sacrifice,
An humble and a contrite heart.
—Lord God of Hosts,

Far-called, our navies melt away—
On dune and headland sinks the fire—
Lo, all our pomp of yesterday
Is one with Nineveh and Tyre!
—Judge of the Nations, spare us yet,

—Lest we forget

If, drunk with sight of power, we loose
Wild tongues that have not Thee in awe—
Such boasting as the Gentiles use
Or lesser breeds without the Law—
—Lord God of Hosts,

For heathen heart that puts her trust
In reeking tube and iron shard—
All valiant dust that builds on dust,
And guarding calls not Thee to guard,
For frantic boast and foolish word,
Thy Mercy on thy People, Lord!

“The Black Man’s Burden”: A Response to Kipling

In February 1899, British novelist and poet Rudyard Kipling wrote a poem entitled “The White Man’s Burden: The United States and The Philippine Islands.” In this poem, Kipling urged the U.S. to take up the “burden” of empire, as had Britain and other European nations. Theodore Roosevelt, soon to become vice-president and then president, described it as “rather poor poetry, but good sense from the expansion point of view.” Not everyone was as favorably impressed as Roosevelt. African Americans, among many others, objected to the notion of the “white man’s burden.” Among the dozens of replies to Kipling’s poem was “The Black Man’s Burden,” written by African-American clergyman and editor H. T. Johnson and published in April 1899. A “Black Man’s Burden Association” was even organized with the goal of demonstrating that mistreatment of brown people in the Philippines was an extension of the mistreatment of black Americans at home.

Pile on the Black Man’s Burden.
'Tis nearest at your door;
Why heed long bleeding Cuba,
or dark Hawaiʻi’s shore?
Hail ye your fearless armies,
Which menace feeble folks
Who fight with clubs and arrows
and brook your rifle’s smoke.
Pile on the Black Man’s Burden
His wail with laughter drown
You’ve sealed the Red Man’s problem,
And will take up the Brown,
In vain ye seek to end it,
With bullets, blood or death
Better by far defend it
With honor’s holy breath.

Joseph Conrad: from Heart of Darkness (1902)

Heart of Darkness has been considered for most of this century not only as a literary classic, but as a powerful indictment of the evils of imperialism. It reflects the savage repressions carried out in the Congo by the Belgians in one of the largest acts of genocide committed up to that time. Conrad’s narrator
1750 C.E. to 1914 C.E.

encounters at the end of the story a man named Kurtz, dying, insane, and guilty of unspeakable atrocities. More recently, African critics like Chinua Achebe have pointed out that the story can be read as a racist or colonialist parable in which Africans are depicted as innately irrational and violent, and in which Africa itself is reduced to a metaphor for that which white Europeans fear within themselves. The people of Africa and the land they live in remain inscrutably alien, other. The title, they argue, implies that Africa is the "heart of darkness," where whites who "go native" risk releasing the "savage" within themselves. Defenders of Conrad sometimes argue that the narrator does not speak in Conrad's own voice, and that a layer of irony conceals his true views.

What is your impression of these opening pages from Heart of Darkness? Do the Africans seem stereotyped to you? What signs are there that the narrator is sympathetic to them?

"I left in a French steamer, and she called in every blamed port they have out there, or, as far as I could see, the sole purpose of landing soldiers and custom-house officers. I watched the coast. Watching a coast as it slips by the ship is like thinking about an enigma. There it is before you--smiling, frowning, inviting, grand, mean, insipid, or savage, and always mute with an air of whispering. Come and find out. This one was almost featureless, as if still in the making, with an aspect of monotonous grimness. The edge of a colossal jungle, so dark-green as to be almost black, fringed with white surf, ran straight, like a ruled line, far, far away along a blue sea whose glitter was blurred by a creeping mist. The sun was fierce, the land seemed to glisten and drip with steam. Here and there grayish-whitish specks showed up clustered inside the white surf, with a flag flying above them perhaps. Settlements some centuries old, and still no bigger than pinheads on the untouched expanse of their background. We pounded along, stopped, landed soldiers; went on, landed custom-house clerks to levy toll in what looked like a God-forsaken wilderness, with a tin shed and a flagpole lost in it; landed more soldiers--to take care of the custom-house clerks, presumably. Some, I heard, got drowned in the surf; but whether they did or not, nobody seemed particularly to care. They were just flung out there, and on we went. Every day the coast looked the same, as though we had not moved; but we passed various places--trading places--with names like Gran' Bassam, Little Popo; names that seemed to belong to some sordid farce acted in front of a sinister back-cloth. The idleness of a passenger, my isolation amongst all these men with whom I had no point of contact, the oily and languid sea, the uniform somberness of the coast, seemed to keep me away from the truth of things, within the toil of a mournful and senseless delusion. The voice of the surf heard now and then was a positive pleasure, like the speech of a brother. It was something natural, that had its reason, that had a meaning. Now and then a boat from the shore gave one a momentary contact with reality. It was paddled by black fellows. You could see from afar the white of their eyeballs glistening. They shouted, sang; their bodies streamed with perspiration; they had faces like grotesque masks--these chaps; but they had bone, muscle, a wild vitality, an intense energy of movement, that was as natural and true as the surf along their coast. They wanted no excuse for being there. They were a great comfort to look at. For a time I would feel I belonged still to a world of straightforward facts; but the feeling would not last long. Something would turn up to scare it away. Once, I remember, we came upon a man-of-war anchored off the coast. There wasn't even a shed there, and she was shelling the bush. It appears the French had one of their wars going on thereabouts. Her [ensign (1)] dropped limp like a rag; the muzzles of the long six-inch guns stuck out all over the low hull; the greasy, slimy swell swung her up lazily and let her down, swaying her thin masts. In the empty immensity of earth, sky, and water, there she was, incomprehensible, firing into a continent. Pop, would go one of the six-inch guns; a small
flame would dart and vanish, a little white
smoke would disappear, a tiny projectile would
give a feeble screech—and nothing happened.
Nothing could happen. There was a touch of
insanity in the proceeding, a sense of lugubrious
drollery in the sight; and it was not dissipated
by somebody on board assuring me earnestly
there was a camp of natives—he called them
enemies!—hidden out of sight somewhere.

"We gave her her letters (I heard the men in
that lonely ship were dying of fever at the rate
of three a day) and went on. We called at some
more places with farcical names, where the
merry dance of death and trade goes on in a
still and earthy atmosphere as of an overheated
catacomb; all along the formless coast bordered
by dangerous surf, as if Nature herself had tried
to ward off intruders; in and out of rivers,
streams of death in life, whose banks were
rotting into mud, whose waters, thickened into
slime, invaded the contorted mangroves that
seemed to writhe at us in the extremity of an
impotent despair. Nowhere did we stop long
enough to get a particularized impression, but
the general sense of vague and oppressive
wonder grew upon me. It was like a weary
pilgrimage amongst hints for nightmares.

"It was upward of thirty days before I saw the
mouth of the big river. We anchored off the
seat of the government. But my work would not
begin till some two hundred miles farther on. So
as soon as I could I made a start for a place
thirty miles higher up.

"I had my passage on a little sea-going steamer.
Her captain was a Swede, and knowing me for a
seaman, invited me on the bridge. He was a
young man, lean, fair, and morose, with lanky
hair and a shuffling gait. As we left the
miserable little wharf, he tossed his head
contemptuously at the shore. 'Been living
there?' he asked. I said, 'Yes.' 'Fine lot these
government chaps—are they not?' he went on,
speaking English with great precision and
considerable bitterness. 'It is funny what some
people will do for a few francs a month. I
wonder what becomes of that kind when it goes
up country?' I said to him I expected to see that
soon. 'So-o-o!' he exclaimed. He shuffled
athwart, keeping one eye ahead vigilantly.
'Don't be too sure,' he continued. 'The other
day I took up a man who hanged himself on the
road. He was a Swede, too.' 'Hanged himself!
Why, in God's name?' I cried. He kept on
looking out watchfully. 'Who knows? The sun
too much for him, or the country perhaps.'

"At last we [opened a reach. (2) A rocky cliff
appeared, mounds of turned-up earth by the
shore, houses on a hill, others with iron roofs,
amongst a waste of excavations, or hanging to
the declivity. A continuous noise of the rapids
above hovered over this scene of inhabited
devastation. A lot of people, mostly black and
naked, moved about like ants. A jetty projected
into the river. A blinding sunlight drowned all
this at times in a sudden recrudescence of glare.
'There's your Company's station,' said the
Swede, pointing to three wooden barrack-like
structures on the rocky slope. 'I will send your
things up. Four boxes did you say? So. Farewell.'
'I came upon a boiler wallowing in the grass,
then found a path leading up the hill. It turned
aside for the boulders, and also for an
undersized railway-truck lying there on its back
with its wheels in the air. One was off. The thing
looked as dead as the carcass of some animal. I
came upon more pieces of decaying machinery,
a stack of rusty rails. To the left a clump of trees
made a shady spot, where dark things seemed
to stir feebly. I blinked, the path was steep. A
horn tooted to the right, and I saw the black
people run. A heavy and dull detonation shook
the ground, a puff of smoke came out of the
clip, and that was all. No change appeared on
the face of the rock. They were building a
railway. The cliff was not in the way or
anything; but this objectless blasting was all the
work going on.

"A slight clinking behind me made me turn my
head. Six black men advanced in a file, toiling up
the path. They walked erect and slow, balancing
small baskets full of earth on their heads, and

~ 140 ~
the clink kept time with their footsteps. Black rags were wound round their loins, and the short ends behind waggled to and fro like tails. I could see every rib, the joints of their limbs were like knots in a rope; each had an iron collar on his neck, and all were connected together with a chain whose bights swung between them, rhythmically clinking. Another report from the cliff made me think suddenly of that ship of war I had seen firing into a continent. It was the same kind of ominous voice; but these men could by no stretch of imagination be called enemies. They were called criminals, and the outraged law, like the bursting shells had come to them, an insoluble mystery from the sea. All their meager breasts panted together, the violently dilated nostrils quivered, the eyes stared stonily up-hill. They passed me within six inches, without a glance, with that complete, deathlike indifference of unhappy savages. Behind this raw matter one of the reclaimed, the product of the new forces at work, strolled despondently, carrying a rifle by its middle. He had a uniform jacket with one button off, and seeing a white man on the path, hoisted his weapon to his shoulder with alacrity. This was simple prudence, white men being so much alike at a distance that he could not tell who I might be. He was speedily reassured, and with a large, white, rascally grin, and a glance at his charge, seemed to take me into partnership in his exalted trust. After all, I was also a part of the great cause of these high and just proceedings.

"Instead of going up, I turned and descended to the left. My idea was to let that chain-gang get out of sight before I climbed the hill. You know I am not particularly tender; I've had to strike and to fend off. I've had to resist and to attack sometimes--that's the only way of resisting--without counting the exact cost, according to the demands of such sort of life as I had blundered into. I've seen the devil of violence, and the devil of greed, and the devil of hot desire; but, by all the stars! these were strong, lusty, red-eyed devils, that swayed and drove men--men, I tell you. But as I stood on this hillside, I foresaw that in the blinding sunshine of that land I would become acquainted with a flabby, pretending, weak-eyed devil of a rapacious and pitiless folly. How insidious he could be, too, I was only to find out several months later and a thousand miles farther. For a moment I stood appalled, as though by a warning. Finally I descended the hill, obliquely, towards the trees I had seen.

(1) A small flag.

(2) Reached a straight stretch of river.

~ 141 ~
1750 C.E. to 1914 C.E.

Johann Gustav Droysen: *Speech to the Frankfurt Assembly, 1848*

We cannot conceal the fact that the whole German question is a simple alternative between Prussia and Austria. In these states German life has its positive and negative poles—in the former, all the interests which are national and reformative, in the latter, all that are dynastic and destructive. The German question is not a constitutional question, but a question of power; and the Prussian monarchy is now wholly German, while that of Austria cannot be. . . . We need a powerful ruling house. Austria's power meant lack of power for us, whereas Prussia desired German unity in order to supply the deficiencies of her own power. Already Prussia is Germany in embryo. She will "merge" with Germany. . .

Friedrich Wilhelm IV, King of Prussia: *Proclamation of 1849*

I am not able to return a favorable reply to the offer of a crown on the part of the German National Assembly [meeting in Frankfurt], because the Assembly has not the right, without the consent of the German governments, to bestow the crown which they tendered me, and moreover because they offered the crown upon condition that I would accept a constitution which could not be reconciled with the rights of the German states.

Otto von Bismarck: *Letter to Minister von Manteuffel, 1856*

Because of the policy of Vienna [the Congress of Vienna, 1815], Germany is clearly too small for us both [Prussia and Austria]; as long as an honorable arrangement concerning the influence of each in Germany cannot be concluded and carried out, we will both plough the same disputed acre, and Austria will remain the only state to whom we can permanently lose or from whom we can permanently gain. . . . I wish only to express my conviction that, in the not too distant future, we shall have to fight for our existence against Austria and that it is not within our power to avoid that, since the course of events in Germany has no other solution.

Field Marshal Helmuth von Moltke: 1866

The war of 1866 [between Prussia and Austria] was entered on not because the existence of Prussia was threatened, nor was it caused by public opinion and the voice of the people; it was a struggle, long foreseen and calmly prepared for, recognized as a necessity by the Cabinet, not for territorial aggrandizement, for an extension of our domain, or for material advantage, but for an ideal end—the establishment of power. Not a foot of land was exacted from Austria, but she had to renounce all part in the hegemony of Germany. . . Austria had exhausted her strength in conquests south of the Alps, and left the western German provinces unprotected, instead of following the road pointed out by the Danube. Its center of gravity lay out of Germany; Prussia's lay within it. Prussia felt itself called upon and strong enough to assume the leadership of the German races.

Otto von Bismarck: 1866

We had to avoid wounding Austria too severely; we had to avoid leaving behind in her any unnecessary bitterness of feeling or desire for revenge; we ought rather to reserve the possibility of becoming friends again with our adversary of the moment, and in any case to regard the Austrian state as a piece on the European chessboard. If Austria were severely injured, she would become the ally of France and of every other opponent of ours; she would even sacrifice her anti-Russian interests for the sake of revenge on Prussia. . . . The acquisition of provinces like Austria Silesia and portions of Bohemia could not strengthen the Prussian state; it would not lead to an amalgamation of German Austria with Prussia, and Vienna could not be governed from Berlin as a mere dependency. . . . Austria's conflict and rivalry with us was no more culpable than ours with
her; our task was the establishment or foundation of German national unity under the leadership of the King of Prussia.

The Imperial Proclamation, January 18, 1871

Whereas the German princes and the free cities have unanimously called upon us to renew and to assume, with the restoration of the German Empire, the German imperial office, which has been empty for more than sixty years; and Whereas adequate arrangements have been provided for this in the constitution of the German Confederation;

We, Wilhelm, by the grace of God King of Prussia, do herewith declare that we have considered it a duty to our common fatherland to answer the summons of the united German princes and cities and to accept the German imperial title. In consequence, we and our successors on the throne of Prussia will henceforth bear the imperial title in all our relations and in all the business of the German Empire, and we hope to God that the German nation will be granted the ability to fashion a propitious future for the fatherland under the symbol of its ancient glory. We assume the imperial title, conscious of the duty of protecting, with German loyalty, the rights of the Empire and of its members, of keeping the peace, and of protecting the independence of Germany, which depends in its turn upon the united strength of the people. We assume the title in the hope that the German people will be granted the ability to enjoy the reward of its ardent and self-sacrificing wars in lasting peace, within boundaries which afford the fatherland a security against renewed French aggression which has been lost for centuries. And may God grant that We and our successors on the imperial throne may at all times increase the wealth of the German Empire, not by military conquests, but by the blessings and the gifts of peace, in the realm of national prosperity, liberty, and morality. Wilhelm I, Kaiser und König.

Excerpts From Herzl: The Jewish State

Theodor Herzl, the father of political Zionism, outlined his vision for a Jewish state in Der Judenstaat (The Jewish State), published in February 1896. The following are excerpts.

The idea I have developed in this pamphlet is an ancient one: It is the restoration of the Jewish State. . . The decisive factor is our propelling force. And what is that force? The plight of the Jews. . . I am profoundly convinced that I am right, though I doubt whether I shall live to see myself proved so. Those who today inaugurate this movement are unlikely to live to see its glorious culmination. But the very inauguration is enough to inspire in them a high pride and the joy of an inner liberation of their existence. . .

The plan would seem mad enough if a single individual were to undertake it; but if many Jews simultaneously agree on it, it is entirely reasonable, and its achievement presents no difficulties worth mentioning. The idea depends only on the number of its adherents. Perhaps our ambitious young men, to whom every road of advancement is now closed, and for whom the Jewish state throws open a bright prospect of freedom, happiness, and honor perhaps they will see to it that this idea is spread. . .
It depends on the Jews themselves whether this political document remains for the present a political romance. If this generation is too dull to understand it rightly, a future, finer, more advanced generation will arise to comprehend it. The Jews who will try it shall achieve their State; and they will deserve it. I consider the Jewish question neither a social nor a religious one, even though it sometimes takes these and other forms. It is a national question, and to solve it we must first of all establish it as an international political problem to be discussed and settled by the civilized nations of the world in council.

We are a people — one people. We have sincerely tried everywhere to merge with the national communities in which we live, seeking only to preserve the faith of our fathers. It is not permitted us. In vain are we loyal patriots, sometimes superloyal; in vain do we make the same sacrifices of life and property as our fellow citizens; in vain do we strive to enhance the fame of our native lands in the arts and sciences, or her wealth by trade and commerce. In our native lands where we have lived for centuries we are still decried as aliens, often by men whose ancestors had not yet come at a time when Jewish sighs had long been heard in the country.

Oppression and persecution cannot exterminate us. No nation on earth has endured such struggles and sufferings as we have. Jew-baiting has merely winnowed out our weaklings; the strong among us defiantly return to their own whenever persecution breaks out. Wherever we remain politically secure for any length of time, we assimilate. I think this is not praiseworthy.

Palestine is our unforgettable historic homeland. Let me repeat once more my opening words: The Jews who will it shall achieve their State. We shall live at last as free men on our own soil, and in our own homes peacefully die. The world will be liberated by our freedom, enriched by our wealth, magnified by our greatness. And whatever we attempt there for our own benefit will redound mightily and beneficially to the good of all mankind.

---

**Islam and the Jews: The Status of Jews and Christians in Muslim Lands, 1772 CE**

_In 1772 a Muslim scholar in Cairo was asked how Jews and Christians should be treated. The answer is found in this selection, issued four years before the American Declaration of Independence. This answer is not law, but only the opinion of a conservative Muslim. The opinion is in Arabic._

**Question**

What do you say, O scholars of Islam, shining luminaries who dispel the darkness (may God lengthen your days)!!? What do you say of the innovations introduced by the cursed unbelievers [Jewish and Christian] into Cairo, into the city of al-Muizz [founder of Cairo, 969] which by its splendor in legal and philosophic studies sparkles in the first rank of Muslim cities?

What is your opinion concerning these deplorable innovations which are, moreover, contrary to the Pact of Umar which prescribed the expulsion of the unbelievers from Muslim territory? [This is exaggerated. Umar exiled the infidels only from Arabia.]
Among other changes they have put themselves on a footing of equality with the chiefs, scholars, and nobles, wearing, like them, costly garments of cloth of India, expensive silk and cashmere fabrics, and they imitate them even in the cut of these very garments.

In addition, whether through necessity or otherwise, they ride on saddles which are of the same type as those of chiefs, scholars, and officers, with servants at their right, at their left, and behind them, scattering and pushing back Muslims for whom they thus block the streets.

They carry small batons in their hands just like the chiefs. They buy Muslim slaves, the offspring of Negro, Abyssinian, and even white slaves; this has become so common and so frequent among them that they no longer consider this offensive. They even buy slaves publicly, just like the Muslims.

They have become the owners of houses and build new ones of a solidity, durability, and height possessed by neither the houses nor mosques of the Muslims themselves. This state of affairs is spreading and is extending beyond all proportions. They contribute for the extension of their churches and convents; they seek to raise them higher and to give them a strength and a durability which even the mosques and the monasteries themselves do not have.

Christian foreigners, foes who solicit our tolerance, settle in the country for more than a year without submitting themselves thereby to taxation and without renewing their treaties of protection. The women of the tolerated non-Muslim natives liken themselves to our women in that they deck themselves in a garment of black silk and cover their faces with a veil of white muslin with the result that in the streets they are treated with the consideration due only to respectable Muslim women.

Ought one to allow these things to the unbelievers, to the enemies of the faith? Ought one to allow them to dwell among believers under such conditions? Or, indeed, is it not the duty of every Muslim prince and of every magistrate to ask the scholars of the holy law to express their legal opinion, and to call for the advice of wise and enlightened men in order to put an end to these revolting innovations and to these reprehensible acts? Ought one not compel the unbelievers to stick to their pact [of Umar]; ought one not keep them in servitude and prevent them from going beyond the bounds and the limits of their tolerated status in order that there may result from this the greatest glory of God, of His Prophet, and of all Muslims, and likewise of that which is said in the Qu’ran?

Be good enough to give us a precise answer, one based on authentic traditions.

**The Answer Of The Shaikh Hasan Al Kafrawi, The Shafiite [Professor of canon law in Cairo, d. 1788 CE]**

Praise be to God, the guide of the right way!

The decision given by the Shaikh ar-Ramli [a great Cairo legal authority, d. 1596], by the Shaikh al-Islam [the Muslim religious authority in Constantinople], and by the learned scholars whose decrees can hardly be written down here, may be worded as follows: "It is forbidden to the tolerated peoples living on Muslim territory to clothe themselves in the same manner as the chiefs, the scholars, and the nobles. They should not be allowed to clothe themselves in costly fabrics which have been cut in the modes which are forbidden to them, in order that they may not offend the sensibilities of poor Muslims and in order that their faith in their religion should not be shaken by this. [Poor Muslims may regret their faith when they see how well-dressed the Christians and Jews are.]

"They should not be permitted to employ mounts like the Muslims. They must use neither saddles, nor iron-stirrups, in order to be
distinguished from the true believers. They must under no circumstance ride horses because of the noble character of this animal. The Most-High has said [Qu’ran 8:62]: 'And through powerful squadrons [of horses] through which you will strike terror into your own and God's enemies.' [A verse of the Qu’ran makes a good support for a law. Verses may even be torn out of their context.]

"They should not be permitted to take Muslims into their service because God has glorified the people of Islam. He has given them His aid and has given them a guarantee by these words [Qu’ran 3:140]: 'Surely God will never give preeminence to unbelievers over the true believers.' Now this is just what is happening today, for their servants are Muslims taken from among men of a mature age or from those who are still young. This is one of the greatest scandals to which the guardians of authority must put an end. It is wrong to give them even with a simple 'how-do-you-do'; to serve them, even for wages, at the baths or in what relates to their riding animals; and it is forbidden to accept anything from their hand, for that would be an act of debasement by the faithful. They are forbidden while going through the streets to ape the manners of the Muslims, and still less those of the cities of the religion. They shall only walk single-file, and in narrow lanes they must withdraw even more into the most cramped part of the road.

"One may read that which follows in Bukhari and Muslim [religious authorities of the ninth century]: 'Jews and Christians shall never begin a greeting; if you encounter one of them on the road, push him into the narrowest and tightest spot.' The absence of every mark of consideration toward them is obligatory for us; we ought never to give them the place of honor in an assembly when a Muslim is present. This is in order to humble them and to honor the true believers. They should under no circumstances acquire Muslim slaves, white or black. Therefore they should get rid of the slaves which they now have for the, have no right to own them. If one of their slaves who was formerly an infidel, becomes a Muslim, he shall be removed from them, and his master, willingly or unwillingly, shall be compelled to sell him and to accept the price for him.

"It is no longer permitted them to put themselves, with respect to their houses, on an equal footing with the dwellings of their Muslim neighbors, and still less to build their buildings higher. If they are of the same height, or higher, it is incumbent upon us to pull them down to a size a little less than the houses of the true believers. This conforms to the word of the Prophet: 'Islam rules, and nothing shall raise itself above it.' This is also in order to hinder them from knowing where our weak spots are and in order to make a distinction between their dwellings and ours.

"They are forbidden to build new churches, chapels, or monasteries in any Muslim land. We should destroy everything that is of new construction in every place, such as Cairo, for instance, founded under the Muslim religion, for it is said in a tradition of Umar: 'No church shall be built in Islam.' They shall no longer be permitted to repair the parts of these [post-Islamic] buildings which are in ruins. However, the old buildings [of pre-Islamic times] which are found in a land whose population had embraced Islam need not be destroyed. They shall not, however, be enlarged by means of repairs or otherwise. In case the tolerated peoples [Jews, Christians, etc.] act contrary to these provisions we will be obliged to destroy everything that has been added to the original size of the building. [Only pre-Islamic churches and synagogues may be repaired; new ones must be torn down.]

"Entrance into Muslim territory by infidels of foreign lands under the pact guaranteeing protection to the tolerated peoples is permitted only for the time necessary to settle their business affairs. If they exceed this period, their safe-conduct having expired, they will be put to death or be subject to the payment of the head-
tax. [Jews and Christians of foreign lands must pay a special head-tax if they wish to remain permanently in Muslim lands.] As to those with whom the ruler may have signed treaties, and with whom he, for whatever motive, may have granted a temporary truce, they form only the smallest fraction. But they, too, must not pass the fixed limit of more than four months [without paying the tax], particularly if this occurs at a time when Islam is prosperous and flourishing. The Most-High has said [Qu'ran 2: 2341: 'They should wait four months,' and he has again said [47:37]: 'Do not show any cowardice, and do not at all invite the unbelievers to a peace when you have the upper-hand and may God be with you.'

"Their men and women are ordered to wear garments different from those of the Muslims in order to be distinguished from them. They are forbidden to exhibit anything which might scandalize us, as, for instance, their fermented liquors, and if they do not conceal these from us, we are obliged to pour them into the street."

This which precedes is only a part of that which has been written on this subject, and if we should wish to mention it all here it would take too long. But this brief recital will be sufficient for those men whose intelligence God has enlightened, to whom he has given the breath of life, and whose inner thoughts he has sanctified. Now let us beg the Sovereign Master of the world to extend His justice over humanity universally, in order that they may direct all their efforts toward raising with firmness the banner of the religion.

In a tradition of the sincere and faithful [Calif Abu Bekr, 632-634] it is likewise said: "The abolition of a sacrilegious innovation is preferable to the permanent operation of the law." In another tradition it is also said: "One hour of justice is worth more than sixty years of ritual." The verses of the Qu'ran and the traditions are very numerous on this subject, and they are known by all the faithful. God has cursed the former nations because they have not condemned scandalous things; and He has said [Qu'ran 5:82]: "They [the children of Israel] seek not at all to turn one another from the bad actions which they have committed. O how detestable were their actions. But He has punished these men because of their obstinate conduct." The Most-High has also said [Qu'ran 9: 1131: "Those who bid what is right and forbid what is wrong, who observe the divine precepts, will be rewarded. Announce these glad tidings to the Muslims."

May the Most High God admit us to the number of this company and may He lead us in the paths of His favor. Certainly God is powerful in everything; He is full of mercy to His servants; He sees all.

Written by the humble Hasan al Kafrawi, the Shafiite. [1772 CE]

Later printings of this text (e.g. by Atheneum, 1969, 1972, 1978) do not indicate that the copyright was renewed)
1914 C.E. to the Present

Major Developments

1) Questions of periodization
   A) Continuities and breaks, causes of changes from the previous period and within this period
2) War and peace in global context (The World Wars, colonial soldiers in the First World War, the Holocaust, the Cold War, nuclear weaponry, international organizations and their impact on the global framework, globalization of diplomacy and conflict; global balance of power; reduction of European influence; the League of Nations, the United Nations, the Non-Aligned Nations)
3) New patterns of nationalism (the interwar years; decolonization; racism, genocide; new nationalisms, including the breakup of the Soviet Union)
4) Impact of major global economic developments (the Great Depression in Latin America; technology; Pacific Rim; multinational corporations)
5) New forces of revolution and other sources of political innovations
6) Social reform and social revolution (changing gender roles; family structures; rise of feminism; peasant protest; international Marxism; religious fundamentalism)
7) Globalization of science, technology, and culture
   A) Developments in global cultures and regional reactions, including science and consumer culture
   B) Interactions between elite and popular culture and art
   C) Patterns of resistance including religious responses
8) Demographic and environmental changes (migrations; changes in birthrates and death rates; new forms of urbanization; deforestation; green/environmental movements, rural to urban shifts)
9) Diverse interpretations
   A) Is cultural convergence or diversity the best model for understanding increased intercultural contact in the twentieth century?
   B) What are the advantages and disadvantages of using units of analysis in the twentieth century, such as the nation, the world, the West, and the Third World?

Major Comparisons and Snapshots

- Compare patterns and results of decolonization in Africa and India
- Pick two revolutions (Russian, Chinese, Cuban, Iranian) and compare their effects on the roles of women
- Compare the effects of the World Wars on areas outside of Europe
- Compare legacies of colonialism and patterns of economic development in two of three areas (Africa, Asia, and Latin America)
- Compare legacies of colonialism and patterns of economic development in two of three areas (Africa, Asia, Latin America)
- Analyze nationalist ideologies and movements in contrasting European and colonial environments
- Compare the different types of independence struggles
- Examine global interactions in cultural arenas (e.g. reggae, art, sports)
- Analyze the effects of global consumer society
- Compare major forms of twentieth-century warfare
- Assess different proposals (or models) for third world economic development and the social and political consequences

Examples of What You Need to Know

Below are examples of the types of information you are expected to know contrasted with examples of those things you are not expected to know for the multiple-choice section.

- Effects of the global wars, but not specific battles in the World Wars
- Cultural and political transformations resulting from the wars, but not French political and cultural history
- Authoritarian regimes, but not Mussolini’s or Vargas’s internal policies
- Feminism and gender relations, but not Simone de Beauvoir or Huda Shaarawi
- The growth of international organizations, but not the history of the ILO
- Colonial independence movements, but not the resolutions passed by the Indian National Congress
- The issue of genocide, but not Cambodia, Rwanda, or Kosovo
- The internationalization of popular culture, but not the Beatles

~ 148 ~
Quotations from Chairman Mao Tse-Tung

For a short period in the late sixties the "Little Red Book" containing the thoughts of Chinese Communist Party Chairman Mao Zedong (or as his name was spelled in English at the time "Mao Tse-Tung") was one of the most intensively-studied books in the world. Assembled by party editors from old speeches and writings of Mao, it was intended as a guide for those involved in the Cultural Revolution of 1966-1969. Mao argued that the Chinese Revolution had become rigid and betrayed its basic principles. To reinvigorate it, he invited young people to join the Red Guards and attack "bourgeois" elements in society. Everyone in China was forced to gather in study groups to spend hours discussing every line of the Quotations and applying them to their lives. The book was also studied by Maoists abroad, including in the U.S. The results were disastrous. Millions died, many others were imprisoned for "incorrect" thoughts such as liking Western music or advocating Confucianism, many of China's brightest and most creative people were forced to abandon their jobs to labor on collective farms, and a whole generation lost its chance at education as it charged around the countryside attacking the previous generation. The translation used here is that issued by the party itself through Foreign Languages Press in Beijing in the second edition of 1966.

"To Be Attacked by the Enemy Is Not a Bad Thing but a Good Thing," (May 26, 1939)

How does Mao turn criticism into an advantage?

I hold that it is bad as far as we are concerned if a person, a political party, an army or a school is not attacked by the enemy, for in that case it would definitely mean that we have sunk to the level of the enemy. It is good if we are attacked by the enemy, since it proves that we have drawn a clear line of demarcation between the enemy and ourselves. It is still better if the enemy attacks us wildly and paints us as utterly black and without a single virtue; it demonstrates that we have not only drawn a clear line of demarcation between the enemy and ourselves but achieved a great deal in our work.

Speech at the Chinese Communist Party's National Conference on Propaganda Work (March 12, 1957)

This passage was used to justify the intensive "reeducation" sessions which tried to bring all Chinese people into line. The final qualifying phrases were usually ignored.

In our country bourgeois and petty-bourgeois ideology, anti-Marxist ideology, will continue to exist for a long time. Basically, the socialist system has been established in our country. We have won the basic victory in transforming the ownership of the means of production, but we have not yet won complete victory on the political and ideological fronts. In the ideological field, the question of who will win in the struggle between the proletariat and the bourgeoisie has not been really settled yet. We still have to wage a protracted struggle against bourgeois and petty-bourgeois ideology. It is wrong not to understand this and to give up ideological struggle. All erroneous ideas, all poisonous weeds, all ghosts and monsters, must be subjected to criticism; in no circumstance should they be allowed to spread unchecked. However, the criticism should be fully reasoned, analytical and convincing, and not rough, bureaucratic, metaphysical or dogmatic.

"On the People's Democratic Dictatorship" (June 30, 1949)

The ultimate goal of Marxists was not unlike that of anarchists: the complete abolition of state power and the establishment of direct democracy among the people. However both
Marx and Lenin had argued that a period of transition called "socialism" was necessary, in which the state would organize the conditions necessary for its own abolition. But the only Communist states which abolished themselves, like that of the Soviet Union, did so in order to transform themselves into conventional states.

What reasons does Mao give for not abolishing state power right away? (This speech was given immediately after the triumph of the Communists.)

"Don't you want to abolish state power?" Yes, we do, but not right now; we cannot do it yet. Why? Because imperialism still exists, because domestic reaction still exists, because classes still exist in our country. Our present task is to strengthen the people's state apparatus--mainly the people's army, the people's police and the people's courts--in order to consolidate national defense and protect the people's interests.

"Problems of War and Strategy"  
(November 6, 1938)

In its original context this saying meant that the Communists would never be allowed to come to power in China without a successful violent revolution. In the context of the Cultural Revolution it meant that the Chinese People's Army had to play a leading role in sustaining, purifying, and spreading Communism. And abroad it was often used to justify revolutionary terrorism.

Every Communist must grasp the truth, "Political power grows out of the barrel of a gun."

"Some Questions Concerning Methods of Leadership" (June 1, 1943)

This is the core of the ideology that made the Cultural Revolution so appealing to many young idealists; but in the end learning from the people turned out to mean learning only from Chairman Mao and his allies.

In all the practical work of our Party, all correct leadership is necessarily "from the masses, to the masses." This means: take the ideas of the masses (scattered and unsystematic ideas) and concentrate them (through study turn them into concentrated and systematic ideas), then go to the masses and propagate and explain these ideas until the masses embrace them as their own, hold fast to them and translate them into action, and test the correctness of these ideas in such action. Then once again concentrate ideas from the masses and once

~ 150 ~
again go the masses so that the ideas are persevered in and carried through. And so on, over and over again in an endless spiral, with the ideas becoming more correct, more vital and richer each time. Such is the Marxist theory of knowledge.

On the Correct Handling of Contradictions Among the People (February 27, 1957)

Of all the quotations in the "Little Red Book" none is more inspiring or chilling than this. It comes from a brief period of reform in the fifties known as the "Hundred Flowers Campaign" during which Mao encouraged complete freedom of thought, including criticism of the Party. The result was much more vigorous debate than Mao had expected and the period ended with an abrupt crackdown against those who had raised their voices in opposition. It could stand as a critique of the failures of the Cultural Revolution itself, which tried to settle ideological questions by force under the guise of debate.

Letting a hundred flowers blossom and a hundred schools of thought contend is the policy for promoting the progress of the arts and the sciences and a flourishing socialist culture in our land. Different forms and styles in art should develop freely and contend freely. We think that it is harmful to the growth of art and science if administrative measures are used to impose one particular style of art or school of thought and to ban another. Questions of right and wrong in the arts and sciences should be settled through free discussion in artistic and scientific circles and through practical work in these fields. They should not be settled in summary fashion.

Roupen of Sassoun: Eyewitness to Armenia’s Genocide

All the belligerents in World War I had internal political problems, but the Turkish Empire had special problems with its large minority populations. Fearful that its huge Armenian population would be too sympathetic to its enemy, Russia, in the spring of 1915, the Turkish military authorities decided to remove Armenians from eastern Turkey and march them south to the city to Aleppo, where they would be sent into the Syrian desert or marched east into the Tigris-Euphrates valley. On April 24, 1915, the first roundup of Armenians began. Throughout the spring and summer of 1915, large elements of the Armenian population were removed from their homes, stripped of their property, and marched into the desert; in many cases, they were killed in their villages. Although the exact numbers are difficult to determine, it is likely that more than a million Armenians were slaughtered in 1915. Mr. Roupen, an Armenian resident of Sassoun District, provided this eyewitness account of the 1915 summer massacres in an interview with Mr. A.S. Safestian. In his account, he refers to the Kurds, another minority under Turkish rule, who were frequently used by the Turks to attack the Armenians.
1750 C.E. to 1914 C.E.

Questions:
1. How would you compare this eyewitness account of “ethnic cleansing” with other accounts in this section? Are there any common characteristics?
2. Why would the Turkish military use Kurdish troops against Armenians?
3. Are Armenian women targeted for any special treatment? Why would women be a special target in genocide?
4. Were the Turkish concerns about Armenians supporting Russians justified? Why? Why not?

Early in July, the authorities ordered the Armenians to surrender their arms, and pay a large money ransom. The leading Armenians of the town and the headmen of the villages were subjected to revolting tortures. Their finger nails and then their toe nails were forcibly extracted; their teeth were knocked out, and in some cases their noses were whittled down, the victims being thus done to death under shocking, lingering agonies. The female relatives of the victims who came to the rescue were outraged in public before the very eyes of their mutilated husbands and brothers. The shrieks and death-cries of the victims filled the air, yet they did not move the Turkish beast. The same process of disarmament was carried out in the large Armenian villages of Khaskegh, Franknorshen, etc., and on the slightest show of resistance men and women were done to death in the manner described above. On the 10th July, large contingents of troops, followed by bands of criminals released from the prisons, began to round up the able-bodied men from all the villages. In the 100 villages of the plain of Moush most of the villagers took up any arms they possessed and offered a desperate resistance in various favourable positions. In the natural order of things the ammunition soon gave out in most villages, and there followed what is perhaps one of the greatest crimes in all history. Those who had no arms and had done nothing against the authorities were herded into various camps and bayonet in cold blood.

In the town of Moush itself the Armenians, under the leadership of Gotoyan and others, entrenched themselves in the churches and stone-built houses and fought for four days in self-defense. The Turkish artillery, manned by German officers, made short work of all the Armenian positions. Every one of the Armenians, leaders as well as men, was killed fighting; and when the silence of death reigned over the ruins of churches and the rest, the Moslem rabble made a descent upon the women and children and drove them out of the town into large camps which had already been prepared for the peasant women and children. The ghastly scenes which followed may indeed sound incredible, yet these reports have been confirmed from Russian sources beyond all doubt. The shortest method for disposing of the women and children concentrated in the various camps was to burn them. Fire was set to large wooden sheds in Alidjan, Megrakom, Khaskegh, and other Armenian villages, and these absolutely helpless women and children were roasted to death. Many went mad and threw their children away; some knelt down and prayed amid the flames in which their bodies were burning; others shrieked and cried for help which came from nowhere. And the executioners, who seem to have been unmoved by this unparalleled savagery, grasped infants by one leg and hurled them into the fire, calling out to the burning mothers: “Here are your lions.” Turkish prisoners who had apparently witnessed some of these scenes were horrified and maddened at remembering the sight. They told the Russians that the stench of the burning human flesh permeated the air for many days after.
Under present circumstances it is impossible to say how many Armenians, out of a population of 60,000 in the plain of Moush, are left alive; the one fact which can be recorded at present is that now and then some survivors escape through the mountains and reach the Russian lines to give further details of the unparalleled crime perpetrated in Moush during July.

The Massacres in Sassoun.—While the “Butcher” battalions of Djevdet Bey and the regulars of Kiazim Bey were engaged in Bitlis and Moush, some cavalry were sent to Sassoun early in July to encourage the Kurds who had been defeated by the Armenians at the beginning of June. The Turkish cavalry invaded the lower valley of Sassoun and captured a few villages after stout fighting. In the meantime the reorganized Kurdish tribes attempted to close on Sassoun from the south, west, and north. During the last fortnight of July almost incessant fighting went on, sometimes even during the night. On the whole, the Armenians held their own on all fronts and expelled the Kurds from their advanced positions. However, the people of Sassoun had other anxieties to worry about. The population had doubled since their brothers who had escaped from the plains had sought refuge in their mountains; the millet crop of the last season had been a failure; all honey, fruit, and other local produce had been consumed, and the people had been feeding on unsalted roast mutton (they had not even any salt to make the mutton more sustaining); finally, the ammunition was in no way sufficient for the requirements of heavy fighting. But the worst had yet to come. Kiazim Bey, after reducing the town and the plain of Moush, rushed his army to Sassoun for a new effort to overwhelm these brave mountaineers. Fighting was renewed on all fronts throughout the Sassoun district. Big guns made carnage among the Armenian ranks. Roupen tells me that Gorioun, Dikran, and twenty other of their best fighters were killed by a single shell, which burst in their midst. Encouraged by the presence of guns, the cavalry and Kurds pushed on with relentless energy.

The Armenians were compelled to abandon the outlying lines of their defence and were retreating day by day into the heights of Antok, the central block of the mountains, some 10,000 feet high. The non-combatant women and children and their large flocks of cattle greatly hampered the free movements of the defenders, whose number had already been reduced from 3,000 to about half that figure. Terrible confusion prevailed during the Turkish attacks as well as the Armenian counter-attacks. Many of the Armenians smashed their rifles after firing the last cartridge and grasped their revolvers and daggers. The Turkish regulars and Kurds, amounting now to something like 30,000 altogether, pushed higher and higher up the heights and surrounded the main Armenian position at close quarters. Then followed one of those desperate and heroic struggles for life which have always been the pride of mountaineers. Men, women and children fought with knives, scythes, stones, and anything else they could handle. They rolled blocks of stone down the steep slopes, killing many of the enemy. In a frightful hand-to-hand combat, women were seen thrusting their knives into the throats of Turks and thus accounting for many of them. On the 5th August, the last day of the fighting, the blood-stained rocks of Antok were captured by the Turks. The Armenian warriors of Sassoun, except those who had worked round to the rear of the Turks to attack them on their flanks, had died in battle. Several young women, who were in danger of falling into the Turks’ hands, threw themselves from the rocks, some of them with their infants in their arms. The survivors have since been carrying on a guerilla warfare, living only on unsalted mutton and grass. The approaching winter may have disastrous consequences for the remnants of the Sassounli Armenians, because they have nothing to eat and no means of defending themselves.
Woodrow Wilson: "The Fourteen Points" (1918)

As American troops finally entered combat in Europe, Woodrow Wilson attempted to give shape to the nation's war aims, while suggesting the terms under which peace could be attained short of total victory. Delivered before Congress on January 8, 1918, this "program of the world's peace," which became known as "the Fourteen Points," transformed Wilson into an international leader of great moral authority. Clearly a great many common people in America and Europe shared Wilson's vision for the postwar world. When Germany finally sued for peace, its government did so with the expectation that the Fourteen Points would serve as the basis for all future negotiations.

Questions to Consider

- Why would America's enemies come to find hope in the Fourteen Points?
- How did Wilson think that his program would produce world peace?

Gentlemen of the Congress: Once more, as repeatedly before, the spokesmen of the Central Empires have indicated their desire to discuss the objects of the war and the possible basis of a general peace. Parleys have been in progress at Brest-Litovsk between Russian representatives and representatives of the Central Powers, to which the attention of all the belligerents has been invited for the purpose of ascertaining whether it may be possible to extend these parleys into a general conference with regard to terms of peace and settlement.... The representatives of the Central Powers...presented an outline of settlement which... proposed no concessions at all, either to the sovereignty of Russia or to the preferences of the population with whose fortunes it dealt, but meant, in a word, that the Central Empires were to keep every foot of territory their armed forces had occupied-every province, every city, every point of vantage-as a permanent addition to their territories and their power. It is a reasonable conjecture that the general principles of settlement which they at first suggested originated with the more liberal statesmen of Germany and Austria, the men who have begun to feel the force of their own peoples’ thought and purpose, while the concrete terms of actual settlement came from the military leaders who have no thought but to keep what they have got. The negotiations have been broken off. The Russian representatives were sincere and in earnest. They cannot entertain such proposals of conquest and domination.

The whole incident is full of significance. It is also full of perplexity. With whom are the Russian representatives dealing? For whom are the representatives of the Central Empires speaking? Are they speaking for the majorities of their respective Parliaments or for the minority parties, that military and imperialistic minority which has so far dominated their whole policy and controlled the affairs of Turkey and of the Balkan States which have felt obliged to become their associates in this war? The Russian representatives have insisted, very justly, very wisely, and in the true spirit of modern democracy, that the conferences they have been holding with the Teutonic and Turkish statesmen should be held with open, not closed, doors, and all the world has been audience, as was desired....

...Not once, but again and again, we have laid our whole thought and purpose before the world, not in general terms only, but each time with sufficient definition to make it clear what sort of definite terms of settlement must necessarily spring out of them.... There is no confusion of counsel among the adversaries of the Central Powers, no uncertainty of principle, no vagueness of detail. The only secrecy of
counsel, the only lack of fearless frankness, the only failure to make definite statement of the objects of the war, lie with Germany and her allies. The issues of life and death hang upon these definitions. No statesman who has the least conception of his responsibility ought for a moment to permit himself to continue this tragical and appalling outpouring of blood and treasure unless he is sure beyond a peradventure that the objects of the vital sacrifice are part and parcel of the very life of society and that the people for whom he speaks think them right and imperative as he does.

There is, moreover, a voice calling for these definitions of principle and of purpose which is, it seems to me, more thrilling and more compelling than any of the many moving voices with which the troubled air of the world is filled. It is the voice of the Russian people. They are prostrate and all but helpless, it would seem, before the grim power of Germany, which has hitherto known no relenting and no pity. Their power apparently is shattered. And yet their soul is not subservient.... They call to us to say what it is that we desire, in what, if in anything, our purpose and our spirit differ from theirs; and I believe that the people of the United States would wish me to respond with utter simplicity and frankness. Whether their present leaders believe it or not, it is our heartfelt desire and hope that some way may be opened whereby we may be privileged to assist the people of Russia to attain their utmost hope of liberty and ordered peace.

It will be our wish and purpose that the processes of peace, when they are begun, shall be absolutely open, and that they shall involve and permit henceforth no secret understandings of any kind. The day of conquest and aggrandizement is gone by; so is also the day of secret covenants entered into in the interest of particular governments and likely at some unlooked-for moment to upset the peace of the world....

We entered this war because violations of right had occurred which touched us to the quick and made the life of our own people impossible unless they were corrected and the world secured once for all against their recurrence. What we demand in this war, therefore, is nothing peculiar to ourselves. It is that the world be made fit and safe to live in; and particularly that it be made safe for every peace-loving nation which, like our own, wishes to live its own life, determine its own institutions, be assured of justice and fair dealings by the other peoples of the world, as against force and selfish aggression. All the peoples of the world are in effect partners in this interest, and for our own part we see very clearly that unless justice be done to others it will not be done to us.

The program of the world's peace, therefore, is our program, and that program, the only possible program, as we see it, is this:

I. Open covenants of peace, openly arrived at, after which there shall be no private international understandings of any kind, but diplomacy shall proceed always frankly and in the public view.

II. Absolute freedom of navigation upon the seas, outside territorial waters, alike in peace and in war, except as the seas may be closed in whole or in part by international action for the enforcement of international covenants.

III. The removal, so far as possible, of all economic barriers and the establishment of an equality of trade conditions among all the nations consenting to the peace and associating themselves for its maintenance.

IV. Adequate guarantees given and taken that national armaments will be reduced to the lowest point consistent with domestic safety.

V. Free, open-minded, and absolutely impartial adjustment of all colonial claims, based upon a strict observance of the principle that in determining all
such questions of sovereignty the interests of the population concerned must have equal weight with the equitable claims of the Government whose title is to be determined.

VI. The evacuation of all Russian territory and such a settlement of all questions affecting Russia as will secure the best and freest cooperation of the other nations of the world in obtaining for her an unhampered and unembarrassed opportunity for the independent determination of her own political development and national policy, and assure her of a sincere welcome into the society of free nations under institutions of her own choosing; and, more than a welcome, assistance also of every kind that she may need and may herself desire....

VII. Belgium, the whole world will agree, must be evacuated and restored, without any attempt to limit the sovereignty which she enjoys in common with all other free nations. No other single act will serve as this will serve to restore confidence among the nations in the laws which they have themselves set and determined for the government of their relations with one another. Without this healing act the whole structure and validity of international law is forever impaired.

VIII. All French territory should be freed and the invaded portions restored, and the wrong done to France by Prussia in 1871 in the matter of Alsace-Lorraine, which has unsettled the peace of the world for nearly fifty years, should be righted, in order that peace may once more be made secure in the interest of all.

IX. A readjustment of the frontiers of Italy should be effected along clearly recognizable lines of nationality.

X. The peoples of Austria-Hungary, whose place among the nations we wish to see safeguarded and assured, should be accorded the freest opportunity of autonomous development.

XI. Rumania, Serbia, and Montenegro should be evacuated; occupied territories restored; Serbia accorded free and secure access to the sea; and the relations of the several Balkan States to one another determined by friendly counsel along historically established lines of allegiance and nationality; and international guarantees of the political and economic independence and territorial integrity of the several Balkan States should be entered into.

XII. The Turkish portions of the present Ottoman Empire should be assured a secure sovereignty, but the other nationalities which are now under Turkish rule should be assured an undoubted security of life and an absolutely unmolested opportunity of autonomous development, and the Dardanelles should be permanently opened as a free passage to the ships and commerce of all nations under international guarantees.

XIII. An independent Polish State should be erected which should include the territories inhabited by indisputably Polish populations, which should be assured a free and secure access to the sea, and whose political and economic independence and territorial integrity should be guaranteed by international covenant.

XIV. A general association of nations must be formed under specific covenants for the purpose of affording mutual guarantees of political independence and territorial integrity to great and small states alike.

In regard to these essential rectifications of wrong and assertions of right, we feel ourselves to be intimate partners of all the governments and peoples associated together against the
imperialists. We cannot be separated in interest or divided in purpose. We stand together until the end.

For such arrangements and covenants we are willing to fight and to continue to fight until they are achieved; but only because we wish the right to prevail and desire a just and stable peace, such as can be secured only by removing the chief provocations to war, which this program does remove. We have no jealousy of German greatness, and there is nothing in this program that impairs it. We grudge her no achievement or distinction of learning or of pacific enterprise such as have made her record very bright and very enviable. We do not wish to injure her or to block in any way her legitimate influence or power. We do not wish to fight her either with arms or with hostile arrangements of trade, if she is willing to associate herself with us and the other peace-loving nations of the world in covenants of justice and law and fair dealing. We wish her only to accept a place of equality among the peoples of the world—the new world in which we now live—instead of a place of mastery.

Neither do we presume to suggest to her any alteration or modification of her institutions. But it is necessary, we must frankly say, and necessary as a preliminary to any intelligent dealings with her on our part, that we should know whom her spokesmen speak for when they speak to us, whether for the Reichstag majority or for the military party and the men whose creed is imperial domination.

We have spoken, now, surely, in terms too concrete to admit of any further doubt or question. An evident principle runs through the whole program I have outlined. It is the principle of justice to all peoples and nationalities, and their right to live on equal terms of liberty and safety with one another, whether they be strong or weak. Unless this principle be made its foundation, no part of the structure of international justice can stand. The people of the United States could act upon no other principle, and to the vindication of this principle they are ready to devote their lives, their honor, and everything that they possess. The moral climax of this, the culminating and final war for human liberty, has come, and they are ready to put their own strength, their own highest purpose, their own integrity and devotion to the test.

**The Balfour Declaration (1917)**

The British Foreign Secretary, Arthur James Balfour, wrote to Jewish leader Lord Rothchild, to assure him that his government supported the ideal of providing a homeland for the Jews. The British hoped thereby to win more Jewish support for the Allies in the First World War. The "Balfour Declaration" became the basis for international support for the founding of the modern state of Israel. The letter was published a week later in The Times of London as reproduced here.

Foreign Office
November 2nd, 1917

Dear Lord Rothschild:

I have much pleasure in conveying to you, on behalf of His Majesty's
Government, the following declaration of sympathy with Jewish Zionist aspirations which has been
submitted to, and approved by, the Cabinet:

His Majesty's Government view with favor the establishment in Palestine of a national home for the
Jewish people, and will use their best endeavors to facilitate the achievement of this object, it being
clearly understood that nothing shall be done which may prejudice the civil and religious rights of
existing non-Jewish communities in Palestine, or the rights and political status enjoyed by Jews in any
other country.

I should be grateful if you would bring this declaration to the knowledge
of the Zionist Federation.

Yours,
Arthur James Balfour

---

**British White Paper of 1939**

*In the statement on Palestine, issued on 9 November, 1938, His Majesty's Government announced their
intention to invite representatives of the Arabs of Palestine, of certain neighboring countries and of the
Jewish Agency to confer with them in London regarding future policy. It was their sincere hope that, as a
result of full, free and frank discussions, some understanding might be reached. Conferences recently
took place with Arab and Jewish delegations, lasting for a period of several weeks, and served the
purpose of a complete exchange of views between British Ministers and the Arab and Jewish
representatives. In the light of the discussions as well as of the situation in Palestine and of the Reports
of the Royal Commission and the Partition Commission, certain proposals were formulated by His
Majesty's Government and were laid before the Arab and Jewish Delegations as the basis of an agreed
settlement. Neither the Arab nor the Jewish delegation felt able to accept these proposals, and the
conferences therefore did not result in an agreement. Accordingly His Majesty's Government are free to
formulate their own policy, and after careful consideration they have decided to adhere generally to the
proposals which were finally submitted to and discussed with the Arab and Jewish delegations.*

---

The **Mandate for Palestine** the terms of which were confirmed by the Council of the
League of Nations in 1922, has governed the
policy of successive British Governments for
nearly 20 years. It embodies the **Balfour**
**Declaration** and imposes on the Mandatory four
main obligations. These obligations are set out
in **Article 2** and **13** of the Mandate. There is
no dispute regarding the interpretation of one
of these obligations, that touching the
1750 C.E. to 1914 C.E.

protection of and access to the Holy Places and religious building or sites. The other three main obligations are generally as follows:

To place the country under such political, administrative and economic conditions as will secure the establishment in Palestine of a national home for the Jewish People. To facilitate Jewish immigration under suitable conditions, and to encourage, in cooperation with the Jewish Agency, close settlement by Jews on the Land.

To safeguard the civil and religious rights of all inhabitants of Palestine irrespective of race and religion, and, whilst facilitating Jewish immigration and settlement, to ensure that the rights and position of other sections of the population are not prejudiced.

To place the country under such political, administrative and economic conditions as will secure the development of self governing institutions.

The Royal Commission and previous commissions of Enquiry have drawn attention to the ambiguity of certain expressions in the Mandate, such as the expression 'a national home for the Jewish people', and they have found in this ambiguity and the resulting uncertainty as to the objectives of policy a fundamental cause of unrest and hostility between Arabs and Jews. His Majesty's Government are convinced that in the interests of the peace and well being of the whole people of Palestine a clear definition of policy and objectives is essential. The proposal of partition recommended by the Royal Commission would have afforded such clarity, but the establishment of self supporting independent Arab and Jewish States within Palestine has been found to be impracticable. It has therefore been necessary for His Majesty's Government to devise an alternative policy which will, consistent with their obligations to Arabs and Jews, meet the needs of the situation in Palestine. Their views and proposals are set forth below under three heads, Section I, "The Constitution", Section II. Immigration and Section III. Land.

Section I. "The Constitution"

It has been urged that the expression "a national home for the Jewish people" offered a prospect that Palestine might in due course become a Jewish State or Commonwealth. His Majesty's Government do not wish to contest the view, which was expressed by the Royal Commission, that the Zionist leaders at the time of the issue of the Balfour Declaration recognised that an ultimate Jewish State was not precluded by the terms of the Declaration. But, with the Royal Commission, His Majesty's Government believe that the framers of the Mandate in which the Balfour Declaration was embodied could not have intended that Palestine should be converted into a Jewish State against the will of the Arab population of the country. That Palestine was not to be converted into a Jewish State might be held to be implied in the passage from the Command Paper of 1922 which reads as follows:

"Unauthorized statements have been made to the effect that the purpose in view is to create a wholly Jewish Palestine. Phrases have been used such as that 'Palestine is to become as Jewish as England is English.' His Majesty's Government regard any such expectation as impracticable and have no such aim in view. Nor have they at any time contemplated .... the disappearance or the subordination of the Arabic population, language or culture in Palestine. They would draw attention to the fact that the terms of the (Balfour) Declaration referred to do not contemplate that Palestine as a whole should be converted into a Jewish National Home, but that such a Home should be founded IN PALESTINE."

But this statement has not removed doubts, and His Majesty's Government therefore now declare unequivocally that it is not part of their policy that Palestine should
become a Jewish State. They would indeed regard it as contrary to their obligations to the Arabs under the Mandate, as well as to the assurances which have been given to the Arab people in the past, that the Arab population of Palestine should be made the subjects of a Jewish State against their will.

The nature of the Jewish National Home in Palestine was further described in the Command Paper of 1922 as follows:

"During the last two or three generations the Jews have recreated in Palestine a community now numbering 80,000, of whom about one fourth are farmers or workers upon the land. This community has its own political organs; an elected assembly for the direction of its domestic concerns; elected councils in the towns; and an organisation for the control of its schools. It has its elected Chief Rabbinate and Rabbinical Council for the direction of its religious affairs. Its business is conducted in Hebrew as a vernacular language, and a Hebrew press serves its needs. It has its distinctive intellectual life and displays considerable economic activity. This community, then, with its town and country population, its political, religious and social organisations, its own language, its own customs, its own life, has in fact 'national' characteristics. When it is asked what is meant by the development of the Jewish National Home in Palestine, it may be answered that it is not the imposition of a Jewish nationality upon the inhabitants of Palestine as a whole, but the further development of the existing Jewish community, with the assistance of Jews in other parts of the world, in order that it may become a centre in which the Jewish people as a whole may take, on grounds of religion and race, an interest and pride. But in order that this community should have the best prospect of free development and provide a full opportunity for the Jewish people to display its capacities, it is essential that it should know that it is in Palestine as of right and not on sufferance. That is the reason why it is necessary that the existence of a Jewish National Home in Palestine should be internationally guaranteed, and that it should be formally recognised to rest upon ancient historic connection."

His Majesty's Government adhere to this interpretation of the (Balfour) Declaration of 1917 and regard it as an authoritative and comprehensive description of the character of the Jewish National Home in Palestine. It envisaged the further development of the existing Jewish community with the assistance of Jews in other parts of the world. Evidence that His Majesty's Government have been carrying out their obligation in this respect is to be found in the facts that, since the statement of 1922 was published, more than 300,000 Jews have immigrated to Palestine, and that the population of the National Home has risen to some 450,000, or approaching a third of the entire population of the country. Nor has the Jewish community failed to take full advantage of the opportunities given to it. The growth of the Jewish National Home and its achievements in many fields are a remarkable constructive effort which must command the admiration of the world and must be, in particular, a source of pride to the Jewish people.

In the recent discussions the Arab delegations have repeated the contention that Palestine was included within the area in which Sir Henry McMahon, on behalf of the British Government, in October, 1915, undertook to recognise and support Arab independence. The validity of this claim, based on the terms of the correspondence which passed between Sir Henry McMahon and the Sharif of Mecca, was thoroughly and carefully investigated by the British and Arab representatives during the recent conferences in London. Their report, which has been published, states that both the Arab and the British representatives endeavoured to understand the point of view of the other party but that they were unable to reach agreement upon an interpretation of the correspondence. There is no need to summarize here the arguments presented by each side. His
Majesty's Government regret the misunderstandings which have arisen as regards some of the phrases used. For their part they can only adhere, for the reasons given by their representatives in the Report, to the view that the whole of Palestine west of Jordan was excluded from Sir Henry McMahon's pledge, and they therefore cannot agree that the McMahon correspondence forms a just basis for the claim that Palestine should be converted into an Arab State.

His Majesty's Government are charged as the Mandatory authority "to secure the development of self governing institutions" in Palestine. Apart from this specific obligation, they would regard it as contrary to the whole spirit of the Mandate system that the population of Palestine should remain forever under Mandatory tutelage. It is proper that the people of the country should as early as possible enjoy the rights of self-government which are exercised by the people of neighbouring countries. His Majesty's Government are unable at present to foresee the exact constitutional forms which government in Palestine will eventually take, but their objective is self government, and they desire to see established ultimately an independent Palestine State. It should be a State in which the two peoples in Palestine, Arabs and Jews, share authority in government in such a way that the essential interests of each are shared.

The establishment of an independent State and the complete relinquishment of Mandatory control in Palestine would require such relations between the Arabs and the Jews as would make good government possible. Moreover, the growth of self governing institutions in Palestine, as in other countries, must be an evolutionary process. A transitional period will be required before independence is achieved, throughout which ultimate responsibility for the Government of the country will be retained by His Majesty's Government as the Mandatory authority, while the people of the country are taking an increasing share in the Government, and understanding and cooperation amongst them are growing. It will be the constant endeavour of His Majesty's Government to promote good relations between the Arabs and the Jews.

In the light of these considerations His Majesty's Government make the following declaration of their intentions regarding the future government of Palestine:

The objective of His Majesty's Government is the establishment within 10 years of an independent Palestine State in such treaty relations with the United Kingdom as will provide satisfactorily for the commercial and strategic requirements of both countries in the future. The proposal for the establishment of the independent State would involve consultation with the Council of the League of Nations with a view to the termination of the Mandate.

The independent State should be one in which Arabs and Jews share government in such a way as to ensure that the essential interests of each community are safeguarded.

The establishment of the independent State will be preceded by a transitional period throughout which His Majesty's Government will retain responsibility for the country. During the transitional period the people of Palestine will be given an increasing part in the government of their country. Both sections of the population will have an opportunity to participate in the machinery of government, and the process will be carried on whether or not they both avail themselves of it.

As soon as peace and order have been sufficiently restored in Palestine steps will be taken to carry out this policy of giving the people of Palestine an increasing part in the government of their country, the objective being to place Palestinians in charge of all the Departments of Government, with the

~ 161 ~
1750 C.E. to 1914 C.E.

assistance of British advisers and subject to the control of the High Commissioner. Arab and Jewish representatives will be invited to serve as heads of Departments approximately in proportion to their respective populations. The number of Palestinians in charge of Departments will be increased as circumstances permit until all heads of Departments are Palestinians, exercising the administrative and advisory functions which are presently performed by British officials. When that stage is reached consideration will be given to the question of converting the Executive Council into a Council of Ministers with a consequential change in the status and functions of the Palestinian heads of Departments.

His Majesty's Government make no proposals at this stage regarding the establishment of an elective legislature. Nevertheless they would regard this as an appropriate constitutional development, and, should public opinion in Palestine hereafter show itself in favour of such a development, they will be prepared, provided that local conditions permit, to establish the necessary machinery.

At the end of five years from the restoration of peace and order, an appropriate body representative of the people of Palestine and of His Majesty's Government will be set up to review the working of the constitutional arrangements during the transitional period and to consider and make recommendations regarding the constitution of the independent Palestine State.

His Majesty's Government will require to be satisfied that in the treaty contemplated by subparagraph (6) adequate provision has been made for:

- the security of, and freedom of access to the Holy Places, and protection of the interests and property of the various religious bodies.

- the protection of the different communities in Palestine in accordance with the obligations of His Majesty's Government to both Arabs and Jews and for the special position in Palestine of the Jewish National Home.

- such requirements to meet the strategic situation as may be regarded as necessary by His Majesty's Government in the light of the circumstances then existing. His Majesty's Government will also require to be satisfied that the interests of certain foreign countries in Palestine, for the preservation of which they are at present responsible, are adequately safeguarded.

His Majesty's Government will do everything in their power to create conditions which will enable the independent Palestine State to come into being within 10 years. If, at the end of 10 years, it appears to His Majesty's Government that, contrary to their hope, circumstances require the postponement of the establishment of the independent State, they will consult with representatives of the people of Palestine, the Council of the League of Nations and the neighbouring Arab States before deciding on such a postponement. If His Majesty's Government come to the conclusion that postponement is unavoidable, they will invite the co-operation of these parties in framing plans for the future with a view to achieving the desired objective at the earliest possible date.

During the transitional period steps will be taken to increase the powers and responsibilities of municipal corporations and local councils.

**Section II. Immigration**

Under Article 6 of the Mandate the Administration of Palestine, "while ensuring that the rights and position of other sections of the population are not prejudiced," is required to "facilitate Jewish immigration under suitable conditions." Beyond this, the extent to which
1750 C.E. to 1914 C.E.

Jewish immigration into Palestine is to be permitted is nowhere defined in the Mandate. But in the [Command Paper of 1922] it was laid down that for the fulfilment of the policy of establishing a Jewish National Home:

"it is necessary that the Jewish community in Palestine should be able to increase its numbers by immigration. This immigration cannot be so great in volume as to exceed whatever may be the economic capacity of the country at the time to absorb new arrivals. It is essential to ensure that the immigrants should not be a burden upon the people of Palestine as a whole, and that they should not deprive any section of the present population of their employment."

In practice, from that date onwards until recent times, the economic absorptive capacity of the country has been treated as the sole limiting factor, and in the letter which Mr. Ramsay MacDonald, as Prime Minister, sent to Dr. Weizmann in February 1931 it was laid down as a matter of policy that economic absorptive capacity was the sole criterion. This interpretation has been supported by resolutions of the Permanent Mandates Commissioner. But His Majesty's Government do not read either the Statement of Policy of 1922 or the letter of 1931 as implying that the Mandate requires them, for all time and in all circumstances, to facilitate the immigration of Jews into Palestine subject only to consideration of the country's economic absorptive capacity. Nor do they find anything in the Mandate or in subsequent Statements of Policy to support the view that the establishment of a Jewish National Home in Palestine cannot be effected unless immigration is allowed to continue indefinitely. If immigration has an adverse effect on the economic position in the country, it should clearly be restricted; and equally, if it has a seriously damaging effect on the political position in the country, that is a factor that should not be ignored. Although it is not difficult to contend that the large number of Jewish immigrants who have been admitted so far have been absorbed economically, the fear of the Arabs that this influx will continue indefinitely until the Jewish population is in a position to dominate them has produced consequences which are extremely grave for Jews and Arabs alike and for the peace and prosperity of Palestine. The lamentable disturbances of the past three years are only the latest and most sustained manifestation of this intense Arab apprehension. The methods employed by Arab terrorists against fellow Arabs and Jews alike must receive unqualified condemnation. But it cannot be denied that fear of indefinite Jewish immigration is widespread amongst the Arab population and that this fear has made possible disturbances which have given a serious setback to economic progress, depleted the Palestine exchequer, rendered life and property insecure, and produced a bitterness between the Arab and Jewish populations which is deplorable between citizens of the same country. If in these circumstances immigration is continued up to the economic absorptive capacity of the country, regardless of all other considerations, a fatal enmity between the two peoples will be perpetuated, and the situation in Palestine may become a permanent source of friction amongst all peoples in the Near and Middle East. His Majesty's Government cannot take the view that either their obligations under the Mandate, or considerations of common sense and justice, require that they should ignore these circumstances in framing immigration policy.

In the view of the Royal Commission the association of the policy of the Balfour Declaration with the Mandate system implied the belief that Arab hostility to the former would sooner or later be overcome. It has been the hope of British Governments ever since the Balfour Declaration was issued that in time the Arab population, recognizing the advantages to be derived from Jewish settlement and development in Palestine, would become reconciled to the further growth of the Jewish National Home. This hope has not been fulfilled.
The alternatives before His Majesty's Government are either (i) to seek to expand the Jewish National Home indefinitely by immigration, against the strongly expressed will of the Arab people of the country; or (ii) to permit further expansion of the Jewish National Home by immigration only if the Arabs are prepared to acquiesce in it. The former policy means rule by force. Apart from other considerations, such a policy seems to His Majesty's Government to be contrary to the whole spirit of Article 22 of the Covenant of the League of Nations as well as to their specific obligations to the Arabs in the Palestine Mandate. Moreover, the relations between the Arabs and the Jews in Palestine must be based sooner or later on mutual tolerance and goodwill; the peace, security and progress of the Jewish National Home itself requires this. Therefore His Majesty's Government, after earnest consideration, and taking into account the extent to which the growth of the Jewish National Home has been facilitated over the last twenty years, have decided that the time has come to adopt in principle the second of the alternatives referred to above.

It has been urged that all further Jewish immigration into Palestine should be stopped forthwith. His Majesty's Government cannot accept such a proposal. It would damage the whole of the financial and economic system of Palestine and thus effect adversely the interests of Arabs and Jews alike. Moreover, in the view of His Majesty's Government, abruptly to stop further immigration would be unjust to the Jewish National Home. But, above all, His Majesty's Government are conscious of the present unhappy plight of large numbers of Jews who seek refuge from certain European countries, and they believe that Palestine can and should make a further contribution to the solution of this pressing world problem. In all these circumstances, they believe that they will be acting consistently with their Mandatory obligations to both Arabs and Jews, and in the manner best calculated to serve the interests of the whole people of Palestine, by adopting the following proposals regarding immigration:

Jewish immigration during the next five years will be at a rate which, if economic absorptive capacity permits, will bring the Jewish population up to approximately one third of the total population of the country. Taking into account the expected natural increase of the Arab and Jewish populations, and the number of illegal Jewish immigrants now in the country, this would allow of the admission, as from the beginning of April this year, of some 75,000 immigrants over the next five years. These immigrants would, subject to the criterion of economic absorptive capacity, be admitted as follows:

For each of the next five years a quota of 10,000 Jewish immigrants will be allowed on the understanding that a shortage one year may be added to the quotas for subsequent years, within the five year period, if economic absorptive capacity permits.

In addition, as a contribution towards the solution of the Jewish refugee problem, 25,000 refugees will be admitted as soon as the High Commissioner is satisfied that adequate provision for their maintenance is ensured, special consideration being given to refugee children and dependents.

The existing machinery for ascertaining economic absorptive capacity will be retained, and the High Commissioner will have the ultimate responsibility for deciding the limits of economic capacity. Before each periodic decision is taken, Jewish and Arab representatives will be consulted.

After the period of five years, no further Jewish immigration will be permitted unless the Arabs of Palestine are prepared to acquiesce in it.

His Majesty's Government are determined to check illegal immigration, and further
preventive measures are being adopted. The numbers of any Jewish illegal immigrants who, despite these measures, may succeed in coming into the country and cannot be deported will be deducted from the yearly quotas.

His Majesty's Government are satisfied that, when the immigration over five years which is now contemplated has taken place, they will not be justified in facilitating, nor will they be under any obligation to facilitate, the further development of the Jewish National Home by immigration regardless of the wishes of the Arab population.

**Section III. Land**

The Administration of Palestine is required, under Article 6 of the Mandate "while ensuring that the rights and position of other sections of the population are not prejudiced," to encourage "close settlement by Jews on the land," and no restriction has been imposed hitherto on the transfer of land from Arabs to Jews. The Reports of several expert Commissions have indicated that, owing to the natural growth of the Arab population and the steady sale in recent years of Arab land to Jews, there is now in certain areas no room for further transfers of Arab land, whilst in some other areas such transfers of land must be restricted if Arab cultivators are to maintain their existing standard of life and a considerable landless Arab population is not soon to be created. In these circumstances, the High Commissioner will be given general powers to prohibit and regulate transfers of land. These powers will date from the publication of this statement of policy and the High Commissioner will retain them throughout the transitional period.

The policy of the Government will be directed towards the development of the land and the improvement, where possible, of methods of cultivation. In the light of such development it will be open to the High Commissioner, should he be satisfied that the "rights and position" of the Arab population will be duly preserved, to review and modify any orders passed relating to the prohibition or restriction of the transfer of land.

In framing these proposals His Majesty's Government have sincerely endeavoured to act in strict accordance with their obligations under the Mandate to both the Arabs and the Jews. The vagueness of the phrases employed in some instances to describe these obligations has led to controversy and has made the task of interpretation difficult. His Majesty's Government cannot hope to satisfy the partisans of one party or the other in such controversy as the Mandate has aroused. Their purpose is to be just as between the two people in Palestine whose destinies in that country have been affected by the great events of recent years, and who, since they live side by side, must learn to practice mutual tolerance, goodwill and cooperation. In looking to the future, His Majesty's Government are not blind to the fact that some events of the past make the task of creating these relations difficult; but they are encouraged by the knowledge that as many times and in many places in Palestine during recent years the Arab and Jewish inhabitants have lived in friendship together. Each community has much to contribute to the welfare of their common land, and each must earnestly desire peace in which to assist in increasing the well being of the whole people of the country. The responsibility which falls on them, no less than upon His Majesty's Government, to co-operate together to ensure peace is all the more solemn because their country is revered by many millions of Moslems, Jews and Christians throughout the world who pray for peace in Palestine and for the happiness of her people.

The guiding ideology of the Nazi movement was provided, of course, by Adolf Hitler (1889-1945) and outlined in his Mein Kampf (a hybrid memoir and political manifesto that he dictated in prison following the failed attempt to overthrow the Bavarian state government in 1924). In addition to his virulent hatred of the Versailles settlement, Hitler emphasized two main tenets: lebensraum (living space) and racial purity. His fixation on racial purity derived from his early introduction to social Darwinism and anti-Semitism in Vienna before World War I. Hitler believed that the racially superior Germanic race was being polluted by intermarriage with non-Germans, by definition inferior, especially Jews. Moreover, the "inferior races" were reproducing at a higher rate than were the Germans. This is the genesis of his determination not only to annihilate the Jews (and others) but also to increase the size of the racially pure German population. The Jews were particularly targeted by Hitler and the Nazis with if not positive support at least passive acceptance by a substantial portion of the German population. Throughout the 1920s, gangs of Nazis ("Brown Shirts") frequently and viciously attacked Jews, both in their person and their property. Once the Nazis were in power, attacks on Jews became more legalistic: Jews were excluded from government jobs and licensed professions (law, medicine, etc.), and ultimately stripped of their German citizenship. The Nuremberg Laws, which defined who a Jew was, were a major step on the path to the Final Solution, as Hitler's plan to eradicate European Jewry was known. The Holocaust that ensued claimed the lives of six million Jews.

Questions to Consider

- In these laws, how do the Nazis define who a Jew is? Why?
- How do the Nazis intend to purify German blood?
- How does this legislation conform to Hitler's racial theories? How does it conform to social Darwinism?

### Article 5

1. A Jew is anyone who descended from at least three grandparents who were racially full Jews. Article 2, par. 2, second sentence will apply.

2. A Jew is also one who descended from two full Jewish parents, if: (a) he belonged to the Jewish religious community at the time this law was issued, or who joined the community later; (b) he was married to a Jewish person, at the time the law was issued, or married one subsequently; (c) he is the offspring from a marriage with a Jew, in the sense of Section 1, which was contracted after the Law for the Protection of German Blood and German Honor became effective; (d) he is the offspring of an extramarital relationship, with a Jew, according to Section 1, and will be born out of wedlock after July 31, 1936.

### Law for the Protection of German Blood and German Honor of 15 September 1935

Thoroughly convinced by the knowledge that the purity of German blood is essential for the further existence of the German people and animated by the inflexible will to safe-guard the German nation for the entire future, the Reichstag has resolved upon the following law unanimously, which is promulgated herewith:

#### Section 1

1. Marriages between Jews and nationals of German or kindred blood are forbidden. Marriages concluded in
1750 C.E. to 1914 C.E.

defiance of this law are void, even if, for the purpose of evading this law, they are concluded abroad...

Section 2

Relation[s] outside marriage between Jews and nationals of German or kindred blood are forbidden.

Section 3

Jews will not be permitted to employ female nationals of German or kindred blood in their household.

Section 4

1. Jews are forbidden to hoist the Reich and national flag and to present the colors of the Reich...

Section 5

1. A person who acts contrary to the prohibition of section 1 will be punished with hard labor.
2. A person who acts contrary to the prohibition of section 2 will be punished with imprisonment or with hard labor.
3. A person who acts contrary to the provisions of sections 3 or 4 will be punished with imprisonment up to a year and with a fine or with one of these penalties...

Li Shaoqi: “How to Be a Good Communist” (1939)

Just before his death in 1925, Sun Yat-sen had appointed the young military officer, Jiang Jieshi, to succeed him as leader of the Guomindang party and head of the National Revolutionary Army. It became Jiang’s responsibility to organize a Northern Expedition to “crush the warlords and unify the country.” The Guomindang party at that time was composed of a coalition of Nationalists and Communists, united in their opposition to the warlords and Western influence. But the Communist faction also viewed the campaign primarily as an anti-imperialist and anti-feudal struggle whereas the Nationalists were looking to end the interference of the West through negotiation. The Nationalists sought the support of Western powers while the Communists, true to their Marxist roots, wanted a domestic revolution and establishment of a workers’ and peasants’ state. By 1930, the Nationalist campaigns against warlord control had evolved into anti-Communist forays.

Mao’s success in organizing peasants, promoting strikes against landlords, and eventually redistributing land to the needy peasants demonstrated his dangerous organizational genius. Jiang launched four military campaigns against Mao’s new Chinese Soviet Republic from 1930 to 1932; all four proved unsuccessful. The Communist Red Army, though poorly trained and equipped, was incredibly motivated and able to resist these assaults. But by 1934, an effective economic blockade and a fifth Nationalist offensive proved too much for the Communists. Rather than risk total annihilation, Mao broke through Jiang’s encirclement and began a retreat to the hills called the “Long March” on October 16, 1934. Attacked and harried by Nationalist forces during a 6,000 mile trek, the Red Army was decimated and but a skeleton force when the march ended a year later. As Mao recalled in 1971: “The Red Army had had 300,000 men prior to the Long March, but it was reduced to 25,000 men when it arrived in Shensi province.” As Jiang’s forces moved in for the kill, the Communists were rescued, most ironically, by a Japanese invasion of Manchuria in northern China. Encouraged by the Chinese civil war, the Japanese had seized the opportunity to attack, forcing Jiang to deflect his attention.

~ 167 ~
1750 C.E. to 1914 C.E.

The Soviet Union’s leader, Joseph Stalin, encouraged both Mao and Jiang to end their civil war, and China entered World War II against Japan in 1937. This reprieve of the Communists was a crucial turning point in the Chinese Revolution. For while Jiang directed the Chinese resistance against Japan, Mao reorganized his political movement. At the end of World War II in 1945, Mao stood ready to meet Jiang once again in a fight to the death.

The following selection is an indoctrination tract by Li Shaoqi (1898–1969), one of Mao’s closest advisors and theoreticians. This was part of the Communist strengthening movement that focused Party discipline and revived Communist fortunes. Such instructive tracts gave inspiration to the peasants movement and Red Army in their duel with the Nationalists.

Questions:

1. Li Shaoqi’s 1939 political tract, “How to Be a Good Communist,” sought to inspire unity and focus commitment to the Communist cause. Why was such an effort so important at the time? Note especially the link between idealism and practical necessity argued by Li Shaoqi. How does one become a “good Communist”?

2. Li notes that “Marxism-Leninism offers a scientific explanation that leaves no room for doubt” and that “such a society will inevitably be brought about.” Over sixty years later, why has this “happy and beautiful Communist world” not materialized?

Comrades! What is the most fundamental and common duty of us Communist Party members? As everybody knows, it is to establish Communism, to transform the present world into a Communist world. Is a Communist world good or not? We all know that it is very good. In such a world there will be no exploiters, oppressors, landlords, capitalists, imperialists, or fascists. There will be no oppressed and exploited people, no darkness, ignorance, backwardness, etc. In such a society all human beings will become unselfish and intelligent Communists with a high level of culture and technique. The spirit of mutual assistance and mutual love will prevail among mankind. Who will say that such a society is not good? Here the question arises: Can Communist society be brought about? Our answer is “yes.” About this the whole theory of Marxism-Leninism offers a scientific explanation that leaves no room for doubt. It further explains that as the ultimate result of the class struggle of mankind, such a society will inevitably be brought about. The victory of Socialism in the U.S.S.R. has also given us factual proof. Our duty is, therefore, to bring about at an early date this Communist society, the realization of which is inevitable in the history of mankind....

Comrades! If you only possess great and lofty ideals but . . . do not carry on genuinely practical work, you are not a good Communist Party member. You can only be a dreamer, a prattler, or a pendant. If on the contrary, you only do practical work, but do not possess the great and lofty ideals of Communism, you are
not a good Communist, but a common careerist. A good Communist Party member is one who combines the great and lofty ideals of Communism with practical work and the spirit of searching for the truth from concrete facts.

The Communist ideal is beautiful while the existing capitalist world is ugly. It is precisely because of its ugliness that the overwhelming majority of the people want to change it and cannot but change it. . . . At all times and on all questions, a Communist Party member should take into account the interests of the Party as a whole, and place the Party’s interests above his personal problems and interests. It is the highest principle of our Party members that the Party’s interests are supreme. . . .

A Communist Party member should possess all the greatest and noblest virtues of man-kind. . . . Such ethics are not built upon the backward basis of safeguarding the interests of individuals or a small number of exploiters. They are built, on the contrary, upon the progressive basis of the interests of the proletariat, of the ultimate emancipation of mankind as a whole, of saving the world from destruction, and of building a happy and beautiful Communist world.

**The Rape of Nanjing**

*On December 13, 1937, Nanjing, the capital city of Nationalist China, fell to the onslaught of the invading Japanese army. For the Chinese forces of Jiang Jieshi, which had fought to defend the Yangtze Valley, this was a bitter defeat. The ancient walled city of Nanjing lay open to the fury of the Japanese who, for the next six weeks, pillaged and burned the town, executed tens of thousands of Chinese soldiers, slaughtered civilian men, and raped the women and children. This was no temporary lapse of military discipline in the Japanese ranks, but a methodical and horrific act of terror that resulted in the death of nearly 300,000 Chinese. The Rape of Nanjing, as it was immediately called, was not publicized after the war and has been termed by some historians, the “forgotten Holocaust.” But its lingering memory has poisoned Chinese-Japanese relations for over sixty years. The following transcript of the 1947 sentencing of a convicted Japanese war criminal testifies to the savagery and tragedy of the Rape of Nanjing.*

**Question:**

1. What motivated the Japanese to commit such acts?

**Source:** “The Rape of Nanjing” is from Military Tribunal for the Trial of War Criminals (March 10, 1947), contained in Dun J. Li, The Road to Communism (New York: Van Nostrand Reinhold Company, Compare and Contrast:

- Compare this account of the atrocities in Nanjing with those described in the Nazi death camps. What motivated the Japanese and German soldiers to commit such acts?

- Until recently, why did the Japanese brutality in Nanjing go relatively unnoticed? Why has Nanjing been called the “forgotten Holocaust”?

- The poet W. H. Auden reflected on the holocausts of World War II: “And maps can really point to places/Where life is evil now: Nanjing; Dachau.” What do you think? Can evil be defined by the atrocities conducted on these sites? Or is evil such a relative concept that it defies definition? Was Hitler evil?

---

~ 169 ~
1914 C.E. to the Present

File Number: Shen 1, 1947

**Defendant:** Tani Hsiao, male, age 66, native of Japan; a former lieutenant general and division commander of the Japanese army. The above defendant was accused by the public prosecutor of this Tribunal as a war criminal. The trial has been duly conducted. The decision is as follows:

**Decision:** During the period of war, Tani Hsiao, the defendant, condoned and encouraged the soldiers under his command to commit mass murder against prisoners of war as well as civilians, in addition to rape, looting, and deliberate destruction of properties. The defendant is hereby sentenced to death.

**Facts:** The defendant is regarded as one of the most ferocious and ablest generals among the Japanese militarists. He joined the Japanese army as early as the Russo-Japanese War [1905] and distinguished himself repeatedly on the battlefield. He was the commander of the Japanese Sixth Division when the Sino-Japanese War began in 1937; in August of that year, he came to China with his command and participated in the war of aggression. Since Nanjing was the capital of our country and the center of resistance against the Japanese aggression, the Japanese militarists mobilized their best and most ferocious military units, including the Sixth Division headed by the defendant . . . to launch an all-out attack under the overall supervision of General Matsu Iwane. Because of the fact that the defenders of the city had continued to resist and refused to surrender, the Japanese army, after capturing the city, conducted a systematic campaign of murder to show its revenge, hatred, and frustration.

On the afternoon of December 12, the invaders, led by the Sixth Division under the command of the defendant, captured the Zhonghua Gate. Massacre began the moment they roped over the city wall and descended upon the civilians. . . . The massacre was followed by looting, rape, and arson. The worst slaughter occurred between December 12 and 21, the time when the defendant’s troops were stationed inside the city. . . . The total number of captured soldiers and civilians who were collectively machine-gunned and then burned into ashes amounted to more than 190,000. The total number of victims who were murdered on an individual basis and whose bodies were later buried by philanthropic organizations were more than 150,000. Thus, the grand total of civilians and prisoners of war who fell victim to this campaign of mass murder was well beyond 300,000. Dead bodies were piled from one street corner to another, and no words, however eloquent, were adequate enough to describe this atrocity of unprecedented scale. . . .

On December 12, Mrs. Wang of Xu, a peasant woman, was beheaded on the harbor outside of the Zhonghua Gate. . . . On December 14, Yao Qialong, a native of Nanjing, was ordered to watch the performance when Japanese soldiers took turns raping his wife. When his eight-year-old son and three-year-old daughter pleaded for mercy on behalf of their mother, the rapists picked them up with their bayonets and roasted them to death over a camp fire. . . . In another case, two Japanese officers entered a murder contest; later, the one who had killed 106 persons was declared the winner over the other who had killed 105. On December 19, Xie Shanzhen, a peasant woman more than sixty years old, was cut into pieces after a Japanese soldier had pierced her vagina with a bamboo stick. In each and every case, the atrocities committed by the Japanese army were brutal to the greatest extreme. From December 12 to 21, the total number of atrocity cases that can be documented amounts to 886.
1750 C.E. to 1914 C.E.

Korea: The Thirty-eighth Parallel

On August 9, 1945, the Soviet Union declared war on Japan, and soon afterwards the Soviet Red Army crossed into Manchuria and Korea. The United States, whose armed forces were hundreds of miles away from Korea, had to draw up a military demarcation line across the Korean peninsula to prevent the Russians from overrunning the entire region. On August 11, the State-War-Navy Coordinating Committee ordered two former Rhodes scholars, Colonels Dean Rusk and Charles H. Bonesteel III, to determine a line within thirty minutes. They recommended the thirty-eighth parallel as a division between U.S. and Soviet occupation zones. By the time American troops entered Korea on September 8, the Russians were already entrenched along the thirty-eighth parallel. This line had been intended merely as a temporary military line to expedite the disarming of the Japanese troops in Korea. On August 14, Japan surrendered and Japanese rule in Korea ended; however, Korea found itself bisected and a focal point of intense rivalry between the United States and the Soviet Union. The following excerpt provides a detailed account of who actually drew the line and why.

Questions:

1. How do you assess the behind-the-scenes decision for the containing of the Soviet advance in the Korean peninsula? Was the decision to divide Korea at the thirty-eighth parallel a wise one? Would another approach have been feasible?
2. How did the decision to divide Korea shape the course of Korean history and influence the cold war?

At Potsdam, the chief of the Russian General Staff told General Marshall that Russia would attack Korea after declaring war on Japan. He asked whether the Americans could operate against Korean shores in co-ordination with this offensive. General Marshall told him that the United States planned no amphibious operation against Korea until Japan had been brought under control and Japanese strength in South Korea was destroyed. Although the Chiefs of Staff developed ideas concerning the partition of Korea, Manchuria, and the Sea of Japan into U.S. and USSR zones, these had no connection with the later decisions that partitioned Korea into northern and southern areas.

Russian entry into the war against Japan on 9 August, and signs of imminent Japanese collapse on 10 August 1945 changed U.S. Army planning from defeating Japan to accepting its surrender. Military planners in the War Department Operations Division began to outline surrender procedures in General Order No. 1, which General MacArthur would transmit to the Japanese Government after its surrender. The first paragraph of the order specified the nations and commands that were to accept the surrender of Japanese forces throughout the Far East.

The Policy Section of the Strategy and Policy Group in the Operations Division drafted the initial version of the order.

Under pressure to produce a paper as quickly as possible, members of the Policy Section began work late at night on 10 August. They discussed possible surrender zones, the allocation of American, British, Chinese, and Russian occupation troops to accept the surrender in the zones most convenient to them, the means of actually taking the surrender of the widely
scattered Japanese military forces, and the
position of Russia in the Far East. They quickly
decided to include both provisions for splitting
up the entire Far East for the surrender and
definitions of the geographical limits of those
zones.

The Chief of the Policy Section, Col. Charles H.
Bonesteel, had thirty minutes in which to
dictate Paragraph 1 to a secretary, for the Joint
Staff Planners and the State-War-Navy
Coordinating Committee were impatiently
awaiting the result of his work. Colonel
Bonesteel [along with Colonel Dean Rusk] thus
somewhat hastily decided who would accept
the Japanese surrender. His thoughts, with very
slight revision, we incorporated into the final
directive.

Bonesteel’s prime consideration was to
establish a surrender line as far north as he
thought the Soviets would accept. He knew that
Russian troops could reach the southern tip of
Korea before American troops could arrive. He
knew also that the Russians were on the verge
of moving into Korea, or were already there.
The nearest American troops to Korea were on
Okinawa, 600 miles away. His problem
therefore was to compose a surrender
arrangement which, while acceptable to the
Russians, would at the same time prevent them
from seizing all of Korea. If they refused to
confine their advance to North Korea, the
United States would be unable to stop them.

At first Bonesteel had thought of surrender
zones conforming to the provincial boundary
lines. But the only map he had in his office,
which was a small National Geographic map, a
1942 Gilbert Grosvenor Edition of “Asia and
Adjacent Areas,” was hardly adequate for this
sort of distinction. The 38th Parallel, he noted,
cut Korea approximately through the middle. If
this line was agreeable to President Truman and
to Generalissimo Stalin, it would place Seoul
and a nearby prisoner of war camp in American
hands. It would also leave enough land to be
apportioned to the Chinese and British if some
sort of quadripartite administration became
necessary. Thus he decided to use the 38th
Parallel as a hypothetical line dividing the zones
within which Japanese forces in Korea would
surrender to appointed American and Russian
authorities. . . .

When Bonesteel’s draft paper reached the Joint
Planners in the predawn hours of 11 August,
Admiral M.B. Gardner suggested moving the
surrender line north to the 39th Parallel, a
recommendation that the planners believed the
Navy Secretary, James C. Forrestal, favored.
Gardner pointed out that the 39th Parallel
would place Dairen in the military zone to be
occupied by the Americans. General Lincoln,
however, felt that the Russians would hardly
accept a surrender line that barred them from
Dairen and other parts of the Liaotung
Peninsula; besides, American units would have
great difficulty reaching the Manchurian port
ahead of the Russians. Calling Assistant
Secretary of State James Dunn, Lincoln
ascertained that his opinion was shared. Mr.
Dunn believed that Korea was more important
politically to the United States than Dairen, and
he felt this to be the view of Secretary of State
James F. Byrnes. As a result, the 38th Parallel
remained in the draft when the Joint Planners
handed the general order to the State-War-
Navy Coordinating Committee.

While General Lincoln was shepherding the
document through the State-War-Navy
Coordinating Committee on 11 and 12 August,
the Russians invaded Korea, landing on the
northeast coast near Rashin. Russian troops
then poured out of the maritime provinces of
Siberia, down the Korean peninsula, and into
the Kaesong-Ch’unch’on area above Seoul,
where they looted much equipment, including
locomotives and rolling stock. Reports of the
Russian troop movements reaching Washington
underscored the need for concurrence in the
proposed general order. Otherwise, the Russian
advance would render academic the American
acceptance of the Japanese surrender in
southern Korea. At the same time, swift Russian
troop movements into key areas of southern

~ 172 ~
1750 C.E. to 1914 C.E.

Manchuria eliminated the possibility of including Dairen in the American surrender zone.

Between 11 and 14 August, the State-War-Navy Coordinating Committee and the Joint Chiefs of Staff discussed the wording of the surrender instrument. Meanwhile, General MacArthur informed the Joint Chiefs of Staff that he would adhere to three priorities for the use of the forces under his command. After the Japanese surrender, the occupation of Japan would come first, Korea second, China third.

In Washington, the War Department Operations Division rephrased General Order No. 1 to the satisfaction of the Joint Chiefs of Staff and the heads of the State, War, and Navy Departments. On 15 August 1945, clean copies of the draft order were sent to Fleet Admiral William D. Leahy’s White House office. Within a few hours President Truman gave his approval, directing at the same time that General Order No. 1 be sent also to the capitals of Great Britain and the USSR with requests for concurrence by the heads of those states. . . .

Among the items it specified, General Order No. 1 stated that Japanese forces north of the 38th Parallel in Korea would surrender to the Russian commander, while those south of the parallel would surrender to the commanding general of the U.S. expeditionary forces. As Washington waited for the Moscow reaction to President Truman’s message, there was a short period of suspense. Russian troops had entered Korea three days before the President accepted the draft of General Order No. 1. If the Russians failed to accept the proposal, and if Russian troops occupied Seoul, General Lincoln suggested that American occupation forces move into Pusan.

Stalin replied to President Truman on 16 August 1945. He said nothing specifically about the 38th Parallel but offered no objection to the substance of the President’s message.

Sir Winston Churchill: “An Iron Curtain Has Descended Across the Continent” (March 1946):

The term “Cold War” describes the era of uneasy relations between the Western Allies and the Soviet Union after World War II. Each was competing for influence in Europe through propaganda and troop placement. In the first excerpt, the Soviet leader Joseph Stalin offered a glimpse of the ideological combat that was to be waged in the future. A month later, Winston Churchill, who had largely directed the British war effort, warned the West of the deceptive Soviet Union in his famous “Iron Curtain” speech.

Questions:

1. What policy was Churchill advocating in his “Iron Curtain” speech?
2. Was he pessimistic or optimistic about the possibility of war?

I now come to the . . . danger which threatens the cottage home and ordinary people, namely tyranny. We cannot be blind to the fact that the liberties enjoyed by individual citizens throughout the United States and British Empire are not valid in a considerable number of countries, some of which are very powerful. In these states control is forced upon the common people by various kinds of all-embracing police governments, to a degree which is overwhelming and contrary to every principle of democracy. The power of the state is exercised without restraint, either by dictators or by compact oligarchies operating through a
privileged party and a political police. It is not our duty at this time, when difficulties are so numerous, to interfere forcibly in the internal affairs of countries whom we have not conquered in war, but we must never cease to proclaim in fearless tones the great principles of freedom and the rights of man, which are the joint inheritance of the English-speaking world and which, through Magna Carta, the Bill of Rights, the habeas corpus, trial by jury, and the English common law find their famous expression in the Declaration of Independence. . .

A shadow has fallen upon the scenes so lately lighted by the Allied victory. Nobody knows what Soviet Russia and its Communist international organization intends to do in the immediate future, or what are the limits, if any, to their expansive and proselytizing tendencies. . . From Stettin in the Baltic to Trieste in the Adriatic, an iron curtain has descended across the continent. Behind that line lie all the capitals of the ancient states of central and eastern Europe. Warsaw, Berlin, Prague, Vienna, Budapest, Belgrade, Bucharest, and Sofia, all these famous cities and the populations around them lie in the Soviet sphere and all are subject, in one form or another, not only to Soviet influence but to a very high and increasing measure of control from Moscow. Athens alone, with its immortal glories, is free to decide its future at an election under British, American, and French observation.

In a great number of countries, far from the Russian frontiers and throughout the world, Communist fifth columns are established and work in complete unity and absolute obedience to the directions they receive from the Communist center. Except in the British Commonwealth, and in the United States, where communism is in its infancy, the Communist parties and fifth columns constitute a growing challenge and peril to Christian civilization. These are somber facts for anyone to have to recite on the morrow of a victory gained by so much splendid comradeship in arms and in the cause of freedom and democracy, and we should be most unwise not to face them squarely while time remains. . .

On the other hand, I repulse the idea that a new war is inevitable, still more that it is imminent. It is because I am so sure that our fortunes are in our own hands and that we hold the power to save the future, that I feel the duty to speak out now that I have occasion to do so. I do not believe that Soviet Russia desires war. What they desire is the fruits of war and the indefinite expansion of their power and doctrines. But what we have to consider here today while time remains, is the permanent prevention of war and the establishment of conditions of freedom and democracy as rapidly as possible in all countries.

Our difficulties and dangers will not be removed by closing our eyes to them; they will not be removed by mere waiting to see what happens; nor will they be relieved by a policy of appeasement. What is needed is a settlement, and the longer this is delayed, the more difficult it will be and the greater our dangers will become. From what I have seen of our Russian friends and allies during the war, I am convinced that there is nothing they admire so much as strength, and there is nothing for which they have less respect than for military weakness. For that reason the old doctrine of a balance of power is unsound. We cannot afford, if we can help it, to work on narrow margins, offering temptations to a trial of strength. If the western democracies stand together in strict adherence to the principles of the United Nations Charter, their influence for furthering these principles will be immense and no one is likely to molest them. If, however, they become divided or falter in their duty, and if these all-important years are allowed to slip away, then indeed catastrophe may overwhelm us all.
Joseph Stalin: The Soviet Victory: Capitalism versus Communism  
(February 1946)

The term “Cold War” describes the era of uneasy relations between the Western Allies and the Soviet Union after World War II. Each was competing for influence in Europe through propaganda and troop placement. In the first excerpt, the Soviet leader Joseph Stalin offered a glimpse of the ideological combat that was to be waged in the future. A month later, Winston Churchill, who had largely directed the British war effort, warned the West of the deceptive Soviet Union in his famous “Iron Curtain” speech.

**Question:**

1. What did Stalin mean in his speech of February 1946 by the phrase “Soviet victory”?

It would be wrong to believe that the Second World War broke out accidentally or as a result of the mistakes of some or other statesmen, though mistakes certainly were made. In reality, the war broke out as an inevitable result of the development of world economic and political forces on the basis of modern monopoly capitalism.

Marxists have stated more than once that the capitalist system of world economy conceals in itself the elements of general crisis and military clashes, that in view of this in our time the development of world capitalism takes place not as a smooth and even advance but through crises and war catastrophes.

The reason is that the unevenness of the development of capitalist countries usually results, as time passes, in an abrupt disruption of the equilibrium within the world system of capitalism, and that a group of capitalist countries which believes itself to be less supplied with raw materials and markets usually attempts to alter the situation and re-divide the “spheres of influence” in its own favour by means of armed force. . . .

This results in the splitting of the capitalist world into two hostile camps and in war between them. Perhaps the catastrophes of war could be avoided if there existed the possibility of re-distributing periodically raw materials and markets among the countries in accordance with their economic weight—by means of adopting coordinated and peaceful decisions. This, however, cannot be accomplished under present capitalist conditions of the development of world economy. . . .

As to our country, for her the war was the severest and hardest of all the wars our Motherland has ever experienced in her history. But the war was not only a curse. It was at the same time a great school in which all the forces of the people were tried and tested. The war laid bare all the facts and events in the rear and at the front, it mercilessly tore off all the veils and covers which had concealed the true faces of States, governments, and parties, and placed them on the stage without masks, without embellishments, with all their shortcomings and virtues.

. . .

And so, what are the results of the war? . . .

Our victory means, in the first place, that our Soviet social system has won, that the Soviet
social system successfully withstood the trial in the flames of war and proved its perfect viability. It is well known that the foreign press more than once asserted that the Soviet social system is a “risky experiment” doomed to failure, that the Soviet system is a “house of cards,” without any roots in life, imposed upon the people by the organs of the “Cheka” [secret police], that a slight push from outside would be enough to blow this “house of cards” to smithereens.

Now we can say that the war swept away all these assertions of the foreign press as groundless. The war has shown that the Soviet social system is a truly popular system, which has grown from the people and enjoys its powerful support, that the Soviet social system is a perfectly viable and stable form of organization of society.

More than that, the point is now not whether the Soviet social system is viable or not, since after the objective lessons of the war no single skeptic now ventures to come out with doubts concerning the viability of the Soviet social system. The point now is that the Soviet social system has proved more viable and stable than a non-Soviet social system, that the Soviet social system is a better form of organization of society than any non-Soviet social system.

Declaration of Human Rights

One of the early acts of the United Nations was to proclaim a Universal Declaration of Human Rights. Work on the document began soon after the international organization was established and continued for approximately three years before the Declaration was formally promulgated by the General Assembly in December, 1948. In the Assembly ballot forty-eight member states voted approval of the Declaration and eight abstained. There were no negative votes.

The sessions of the drafting committees, which all together held hundreds of meetings to prepare the document, were far from harmonious. The topic of human rights is one not just of fundamental concern but also one about which different nations of the world held (and still hold) quite divergent opinions. The aim throughout the drafting sessions was to formulate a document that, although it would not satisfy the wishes of every nation entirely, would still embrace enough of these to meet with general acceptance. That it was almost completely successful in doing so is revealed by the final vote. As the president of the General Assembly pointed out at the time: “It was the first occasion on which the organized community of nations had made a declaration of human rights and fundamental freedoms.”

The Declaration is a compilation of political, social, and cultural ideals to which all nations can aspire. It should be clear from a close reading of its text that no country in the world today fully realizes these ideals and, indeed, that many fall far short of doing so. Yet, although the Articles of the Declaration are not legally binding on its signatories, it has, as many delegates to the United Nations emphasized at the time, a moral force that can lead the nations of the world away from oppression toward more humane and liberal forms of society.

Questions:

1. What rights are considered universal in the Declaration?
2. Do you think all of rights enumerated in the Declaration should be included? Do you think they left any important rights out?
UNIVERSAL DECLARATION OF HUMAN RIGHTS
PREAMBLE

Whereas recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family is the foundation of freedom, justice and peace in the world,

Whereas disregard and contempt for human rights have resulted in barbarous acts which have outraged the conscience of mankind, and the advent of a world in which human beings shall enjoy freedom of speech and belief and freedom from fear and want has been proclaimed as the highest aspiration of the common people,

Whereas it is essential, if man is not to be compelled to have recourse, as a last resort, to rebellion against tyranny and oppression, that human rights should be protected by the rule of law,

Whereas it is essential to promote the development of friendly relations between nations,

Whereas the peoples of the United Nations have in the Charter reaffirmed their faith in fundamental human rights, in the dignity and worth of the human person and in the equal rights of men and women and have determined to promote social progress and better standards of life in larger freedom,

Whereas Member States have pledged themselves to achieve, in cooperation with the United Nations, the promotion of universal respect for and observance of human rights and fundamental freedoms,

Whereas a common understanding of these rights and freedoms is of the greatest importance for the full realization of this pledge,

Now, therefore, The General Assembly

Proclaims this Universal Declaration of Human Rights as a common standard of achievement for all peoples and all nations, to the end that every individual and every organ of society, keeping this Declaration constantly in mind, shall strive by teaching and education to promote respect for these rights and freedoms and by progressive measures, national and international, to secure their universal and effective recognition and observance, both among the peoples of Member States themselves and among the peoples of territories under their jurisdiction.

ARTICLE 1

All human beings are born free and equal in dignity and rights. They are endowed with reason and conscience and should act towards one another in a spirit of brotherhood.

ARTICLE 2

Everyone is entitled to all the rights and freedoms set forth in this Declaration, without distinction of any kind, such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth, or other status.

Furthermore, no distinction shall be made on the basis of the political, jurisdictional or international status of the country or territory to which a person belongs, whether it be independent, trust, non-self-governing, or under any other limitation of sovereignty.

ARTICLE 3

Everyone has the right to life, liberty, and the security of person.

ARTICLE 4

No one shall be held in slavery or servitude; slavery and the slave trade shall be prohibited in all their forms.
1750 C.E. to 1914 C.E.

ARTICLE 5
No one shall be subjected to torture or to cruel, inhuman, or degrading treatment or punishment.

ARTICLE 6
Everyone has the right to recognition everywhere as a person before the law.

ARTICLE 7
All are equal before the law and are entitled without any discrimination to equal protection of the law. All are entitled to equal protection against any discrimination in violation of this Declaration and against any incitement to such discrimination.

ARTICLE 8
Everyone has the right to an effective remedy by the competent national tribunals for acts violating the fundamental rights granted him by the constitution or by law.

ARTICLE 9
No one shall be subjected to arbitrary arrest, detention, or exile.

ARTICLE 10
Everyone is entitled in full equality to a fair, and public hearing by an independent and impartial tribunal, in the determination of his rights and obligations and of any criminal charge against him.

ARTICLE 11
1. Everyone charged with a penal offence has the right to be presumed innocent until proved guilty according to law in a public trial at which he has had all the guarantees necessary for his defence.

2. No one shall be held guilty of any penal offence on account of any act or omission which did not constitute a penal offence, under national or international law, at the time when it was committed. Nor shall a heavier penalty be imposed than the one that was applicable at the time the penal offence was committed.

ARTICLE 12
No one shall be subjected to arbitrary interference with his privacy, family, home, or correspondence, nor to attacks upon his honour and reputation. Everyone has the right to the protection of the law against such interference or attacks.

ARTICLE 13
1. Everyone has the right to freedom of movement and residence within the borders of each State.

2. Everyone has the right to leave any country, including his own, and to return to his country.

ARTICLE 14
1. Everyone has the right to seek and to enjoy in other countries asylum from persecution.

2. This right may not be invoked in the case of prosecutions genuinely arising from non-political crimes or from acts contrary to the purposes and principles of the United Nations.

ARTICLE 15
1. Everyone has the right to a nationality.

2. No one shall be arbitrarily deprived of his nationality nor denied the right to change his nationality.
1750 C.E. to 1914 C.E.

ARTICLE 16

1. Men and women of full age, without any limitation due to race, nationality, or religion, have the right to marry and to found a family. They are entitled to equal rights as to marriage, during marriage, and at its dissolution.

2. Marriage shall be entered into only with the free and full consent of the intending spouses.

3. The family is the natural and fundamental group unit of society and is entitled to protection by society and the State.

ARTICLE 17

1. Everyone has the right to own property alone as well as in association with others.

2. No one shall be arbitrarily deprived of his property.

ARTICLE 18

Everyone has the right to freedom of thought, conscience and religion; this right includes freedom to change his religion or belief, and freedom, either alone or in community with others and in public or private, to manifest his religion or belief in teaching, practice, worship, and observance.

ARTICLE 19

Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media and regardless of frontiers.

ARTICLE 20

1. Everyone has the right to freedom of peaceful assembly and association.

2. No one may be compelled to belong to an association.

ARTICLE 21

1. Everyone has the right to take part in the government of his country, directly or through freely chosen representatives.

2. Everyone has the right of equal access to public service in his country.

3. The will of the people shall be the basis of the authority of government; this will shall be expressed in periodic and genuine elections which shall be by universal and equal suffrage and shall be held by secret vote or by equivalent free voting procedures.

ARTICLE 22

Everyone, as a member of society, has the right to social security and is entitled to realization, through national effort and international co-operation and in accordance with the organization and resources of each State, of the economic, social and cultural rights indispensable for his dignity and the free development of his personality.

ARTICLE 23

1. Everyone has the right to work, to free choice of employment, to just and favourable conditions of work and to protection against unemployment.

2. Everyone, without any discrimination, has the right to equal pay for equal work.

3. Everyone who works has the right to just and favourable remuneration ensuring for himself and his family an existence worthy of human dignity, and supplemented, if necessary, by other means of social protection.
Edward Stettinius to Harry S. Truman, April 18, 1945

DEPARTMENT OF STATE
WASHINGTON

April 18, 1945

PERSONAL AND CONFIDENTIAL

My dear Mr. President:

It is very likely that efforts will be made by some of the Zionist leaders to obtain from you at an early date some commitments in favor of the Zionist program which is pressing for unlimited Jewish immigration into Palestine and the establishment there of a Jewish state.

As you are aware, the Government and people of the United States have every sympathy for the persecuted Jews of Europe and are doing all in their power to relieve their suffering. The question of Palestine is, however, a highly complex one and involves questions which go far beyond the plight of the Jews of Europe. If this question shall come up, therefore, before you in the form of a request to make a public statement on the matter, I believe you would probably want to call for full and detailed information on the subject before taking any particular position in the premises. I should be very glad, therefore, to hold myself in readiness to furnish you with background information on this subject any time you may desire.

There is continual tenseness in the situation in the Near East largely as a result of the Palestine question and as we have interests in that area which are vital to the United States, we feel that this whole subject is one that should be handled with the greatest care and with a view to the long-range interests of this country.

 Faithfully yours,

The President
The White House.
Joseph Grew to Harry S. Truman, May 28, 1945

MEMORANDUM FOR THE PRESIDENT

Subject: Palestine

It has come to our attention that the American Christian Palestine Committee has written all the members of Congress, asking them to write you urging that now the war in Europe is over, steps be taken to implement a pro-Zionist policy regarding Palestine with the aim of opening the country to unrestricted Jewish immigration and creating a Jewish state.

The American Christian Palestine Committee of which Senator Wagner is the chairman, includes among its members a number of distinguished non-Jews, both in Congress and elsewhere, who are interested in reaching a solution of the Palestine problem along Zionist lines. We have every reason to believe that a large number of the members of both Houses of Congress will comply with the Committee’s request and will write you in the sense indicated above.

In considering this matter, you may wish to bear in mind the fact that Palestine may be included among the dependent areas for which a system of trusteeship is being evolved at San Francisco, and that definite arrangements regarding specific territories are to be considered later. You will also recall that there has been a marked growth of tension in the last few days in the Near East as a result of the crises in Syria and Lebanon and renewed outbreaks of terrorism in Palestine itself. In the circumstances it is believed that any action on the part of the American Government along the lines desired by the American Christian Palestine Committee would increase the prevailing tension in the Near East.

Acting Secretary
MEMORANDUM FOR THE PRESIDENT

Subject: Palestine

On April 18 Secretary Stettinius sent you a personal and confidential letter in which he pointed out that efforts would undoubtedly be made by the Zionists to obtain commitments from you in favor of their program for Palestine, and that while we were making every effort to relieve the suffering of the Jews in Europe we felt that the question of Palestine was a highly complex one which should be handled with the greatest care.

In this connection I thought that you would like to know that although President Roosevelt at times gave expression to views sympathetic to certain Zionist aims, he also gave certain assurances to the Arabs which they regard as definite commitments on our part. On a number of occasions within the past few years, he authorized the Department to assure the heads of the different Near Eastern Governments in his behalf that in the view of this Government there should be no decision altering the basic situation in Palestine without full consultation with both Arabs and Jews. In his meeting with King Ibn Saud early this year, moreover, Mr. Roosevelt promised the King that as regards Palestine he would make no move hostile to the Arab people and would not assist the Jews as against the Arabs.

I am attaching a copy of a memorandum summarizing the conversation between Ibn Saud and Mr. Roosevelt, of which the original is presumably with Mr. Roosevelt's papers. After the meeting, this memorandum was approved by both the President and the King, so that it may be regarded as completely authentic. On April 8, only a week before his death, the President signed a letter to Ibn Saud in which he repeated the assurances which he had made to the King during the meeting. A copy of this letter is also attached.
The Arabs, not only in Palestine but throughout the whole Near East, have made no secret of their hostility to Zionism and their Governments say that it would be impossible to restrain them from rallying with arms, in defense of what they consider to be an Arab country. We know that President Roosevelt understood this clearly, for as recently as March 5, after his trip to the Near East, he told an officer of the Department that, in his opinion, a Jewish state in Palestine (the ultimate Zionist aim) could be established and maintained only by military force.

I should be glad at any time to furnish you with any additional background material which you may desire bearing upon the entire Palestine problem.

JOSEPH C. CREW

Acting Secretary

Enclosures:

(1) Copy of memorandum of conversation between King Ibn Saud and President Roosevelt. (2) Copy of letter from President Roosevelt to King Ibn Saud.
THE WHITE HOUSE
WASHINGTON

October 17, 1945

MEMORANDUM FOR THE PRESIDENT.

I have talked with Secretary Byrnes today about Palestine and his proposed statement for you to make. I presented my views, but they have not been at all persuasive. The Secretary adheres to the views expressed to you by him heretofore.

For obvious reasons, it is very embarrassing for me to be in disagreement with the State Department on this particular question. I really think that you should have someone else here in the White House handle it - and hope you will.

However as long as you have asked me to thus far, I wish to express to you the views which I expressed to Secretary Byrnes today:

(1) In view of the fact that you have not taken any position orally or in writing which would support President Roosevelt's letter of April 5th, I think that you should definitely not make the statement proposed.

I think it is proper for you to take the position that the admission of 100,000 Jews into Palestine is not a "change in the basic situation". There are now approximately 600,000 Jews and 1,800,000 Arabs in Palestine. For that reason, 100,000 additional Jews would not be a change in the basic situation.

(2) You should make it clear that the most that President Roosevelt stated was that he would "consult" with the Arab and Jewish leaders, but that there was no intention on his part that he would have to obtain their consent before he took action.

(3) Some further action should be taken by you immediately with respect to Atlee so as to show that you are really pressing the British for the additional certificates.

(4) That you or the Secretary of State call the Jewish and Arab leaders into conference at an early date, and "consult" with them so that the promise of consultation will be fulfilled.
1750 C.E. to 1914 C.E.

- and then you can take whatever action you wish.

(5) Immediate effort should be made by the State Department to postpone publication of the April 5th letter until the middle of November. At any rate, I do not see why we should publish it ourselves at any time.

[S. I. R.]

Israel’s Proclamation of Independence

One day before the termination of the British mandate for Palestine, the Provisional State Council (a forerunner of the Israeli Parliament) declared the independence of Israel on May 14, 1948. The following selection is an excerpt from this official announcement.

Questions:
1. Can the historic and religious ties of the Jewish people to Israel accommodate the fact that for nearly two thousand years Israel was also the dwelling place of Arabs and other non-Jewish populations?
2. How does Israel’s Proclamation of Independence suggest the influence of European and American history in this area?

The Land of Israel was the birthplace of the Jewish people. Here their spiritual, religious and national identity was formed. Here they achieved independence and created a culture of national and universal significance. Here they wrote and gave the Bible to the world.

Exiled from the Land of Israel the Jewish people remained faithful to it in all the countries of their dispersion, never ceasing to pray and hope for their return and the restoration of their national freedom.

Impelled by this historic association, Jews strove throughout the centuries to go back to the land of their fathers and regain their statehood. In recent decades they returned in their masses. They reclaimed the wilderness, revived their language, built cities and villages, and established a vigorous and ever-growing community, with its own economic and cultural life. They sought peace, yet were prepared to defend themselves. They brought the blessings of progress to all inhabitants of the country and looked forward to sovereign independence.

In the year 1897 the First Zionist Congress, inspired by Theodor Herzl’s vision of the Jewish State, proclaimed the right of the Jewish people to national revival in their own country.

This right was acknowledged by the Balfour Declaration of November 2, 1917, and reaffirmed by the Mandate of the League of Nations, which gave explicit international recognition to the historic connection of the Jewish people with Palestine and their right to reconstitute their National Home.
WE HEREBY PROCLAIM the establishment of the Jewish State in Palestine, to be called Medinath Yisrael (The State of Israel).

WE HEREBY DECLARE that, as from the termination of the Mandate at midnight, the 14th–15th May, 1948, and pending the setting up of the duly elected bodies of the State in accordance with a Constitution, to be drawn up by the Constituent Assembly not later than the 1st October, 1948, the National Council shall act as the Provisional State Council, and that the National Administration shall constitute the Provisional Government of the Jewish State, which shall be known as Israel.

THE STATE OF ISRAEL will be open to the immigration of Jews from all countries of their dispersion; will promote the development of the country for the benefit of all its inhabitants; will be based on the principles of liberty, justice and peace as conceived by the Prophets of Israel; will uphold the full social and political equality of all its citizens, without distinction of religion, race, or sex; will guarantee freedom of religion, conscience, education and culture; will safeguard the Holy Places of all religions; and will loyally uphold the principles of the United Nations Charter.

THE STATE OF ISRAEL will be ready to co-operate with the organs and representatives of the United Nations in the implementation of the Resolution of the Assembly of November 29, 1947, and will take steps to bring about the Economic Union over the whole of Palestine.

We appeal to the United Nations to assist the Jewish people in the building of its State and to admit Israel into the family of nations.

In the midst of wanton aggression, we yet call upon the Arab inhabitants of the State of Israel to preserve the ways of peace and play their part in the development of the State, on the basis of full and equal citizenship and due representation in all its bodies and institutions—provisional and permanent.

1750 C.E. to 1914 C.E.

The recent holocaust, which engulfed millions of Jews in Europe, proved anew the need to solve the problem of the homelessness and lack of independence of the Jewish people by means of the re-establishment of the Jewish State, which would open the gates to all Jews and endow the Jewish people with equality of status among the family of nations.

The survivors of the disastrous slaughter in Europe, and also Jews from other lands, have not desisted from their efforts to reach Eretz-Yisrael, in face of difficulties, obstacles and perils; and have not ceased to urge their right to a life of dignity, freedom and honest toil in their ancestral land.

In the second World War the Jewish people in Palestine made their full contribution to the struggle of the freedom-loving nations against the Nazi evil. The sacrifices of their soldiers and their war effort gained them the right to rank with the nations which founded the United Nations.

On November 29, 1947, the General Assembly of the United Nations adopted a Resolution requiring the establishment of a Jewish State in Palestine. The General Assembly called upon the inhabitants of the country to take all the necessary steps on their part to put the plan into effect. This recognition by the United Nations of the right of the Jewish people to establish their independent State is unassailable.

It is the natural right of the Jewish people to lead, as do all other nations, an independent existence in its sovereign State.

ACCORDINGLY WE, the members of the National Council, representing the Jewish people in Palestine and the World Zionist Movement, are met together in solemn assembly today, the day of termination of the British Mandate for Palestine; and by virtue of the natural and historic right of the Jewish people and of the Resolution of the General Assembly of the United Nations.
Palestinian Declaration of Independence

Forty years after the state of Israel declared its independence, the Palestine National Council, meeting in Algiers, further revised its 1964 charter and on November 15, 1988, proclaimed this Declaration of Independence for the Palestinian people.

Questions:
1. After a half century of bitter warfare between Palestinians and Israelis, can the Palestinian Declaration of Independence be reconciled with the state of Israel’s concerns about national security? Can the two peoples ever find a way to live in peace?
2. In its Declaration of Independence, the Palestinian National Council “calls upon the United Nations to bear special responsibility for the Palestinian Arab people and its homeland.” Do you believe that the UN should “bear a special responsibility” for ensuring the security of a Palestinian state? How should the UN exercise this responsibility?

In the name of God, the Compassionate, the Merciful. Palestine, the land of the three monotheistic faiths, is where the Palestinian Arab people was born, on which it grew, developed, and excelled. The Palestinian people was never separated from or diminished in its integral bonds with Palestine. Thus the Palestinian Arab people ensured for itself an everlasting union between itself, its land, and its history. . .

Despite the historical injustice inflicted on the Palestinian Arab people resulting in their dispersion and depriving them of their right to self-determination, following upon UN General Assembly Resolution 181 (1947), which partitioned Palestine into two states, one Arab, one Jewish, yet it is this resolution that still provides those conditions of international legitimacy that ensure the right of the Palestinian Arab people to sovereignty and national independence. . . .

In Palestine and on its perimeters, in exile distant and near, the Palestinian Arab people never faltered and never abandoned its conviction in its rights of return and independence. Occupation, massacres, and dispersion achieved no gain in the unabated Palestinian consciousness of self and political identity, as Palestinians went forward with their destiny, undeterred and unbowed. And from out of the long years of trial in evermounting struggle, the Palestinian political identity emerged further consolidated and confirmed. And the collective Palestinian national will forge itself in a political embodiment, the Palestine Liberation Organization, its sole, legitimate representative, recognized by the world community as a whole, as well as by related regional and international institutions. . . .

The massive national uprising, the intifadah, now intensifying in cumulative scope and power on occupied Palestinian territories, as well as the unflinching resistance of the refugee camps outside the homeland, have elevated consciousness of the Palestinian truth and right into still higher realms of comprehension and actuality. Now at last the curtain has been dropped around a whole epoch of prevarication and negation. The Intifadah has set siege to the mind of official Israel, which has for too long relied exclusively upon myth and terror to deny Palestinian existence altogether. Because of the Intifadah and its revolutionary irreversible
impulse, the history of Palestine has therefore arrived at a decisive juncture.

Whereas the Palestinian people reaffirms most definitely its inalienable rights in the land of its patrimony: Now by virtue of natural, historical, and legal rights and the sacrifices of successive generations who gave of themselves in defense of the freedom and independence of their homeland;

In pursuance of resolutions adopted by Arab summit conferences and relying on the authority bestowed by international legitimacy as embodied in the resolutions of the United Nations Organization since 1947; And in exercise by the Palestinian Arab people of its rights to self-determination, political independence, and sovereignty over its territory;

The Palestine National Council, in the name of God, and in the name of the Palestinian Arab people, hereby proclaims the establishment of the State of Palestine on our Palestinian territory with its capital Jerusalem (Al-Quds Ash- Sharif).

The State of Palestine is the state of Palestinians wherever they may be. The state is for them to enjoy in it their collective national and cultural identity, theirs to pursue in it a complete equality of rights. In it will be safeguarded their political and religious convictions and their human dignity by means of a parliamentary democratic system of governance, itself based on freedom of expression and the freedom to form parties. The rights of minorities will duly be respected by the majority, as minorities must abide by decisions of the majority. Governance will be based on principles of social justice, equality and nondiscrimination in public rights on grounds of race, religion, color, or sex under the aegis of a constitution which ensures the role of law and an independent judiciary. Thus shall these principles allow no departure from Palestine’s age-old spiritual and civilizational heritage of tolerance and religious co-existence.

The State of Palestine is an Arab state, an integral and indivisible part of the Arab nation, at one with that nation in heritage and civilization, with it also in its aspiration for liberation, progress, democracy, and unity. The State of Palestine affirms its obligation to abide by the Charter of the League of Arab States, whereby the coordination of the Arab states with each other shall be strengthened. It calls upon Arab compatriots to consolidate and enhance the emergence in reality of our State, to mobilize potential, and to intensify efforts whose goal is to end Israeli occupation.

The State of Palestine proclaims its commitment to the principles and purposes of the United Nations, and to the Universal Declaration of Human Rights. It proclaims its commitment as well to the principles and policies of the Non-Aligned Movement.

It further announces itself to be a peace-loving state, in adherence to the principles of peaceful co-existence. It will join with all states and peoples in order to assure a permanent peace based upon justice and the respect of rights so that humanity’s potential for well-being may be assured, an earnest competition for excellence be maintained, and in which confidence in the future will eliminate fear for those who are just and for whom justice is the only recourse.

In the context of its struggle for peace in the land of love and peace, the State of Palestine calls upon the United Nations to bear special responsibility for the Palestinian Arab people and its homeland. It calls upon all peace- and freedom-loving peoples and states to assist it in the attainment of its objectives, to provide it with security, to alleviate the tragedy of its people, and to help to terminate Israel’s occupation of the Palestinian territories.

The State of Palestine herewith declares that it believes in the settlement of regional and international disputes by peaceful means, in accordance with the UN Charter and resolutions. Without prejudice to its natural right to defend its territorial integrity and
1750 C.E. to 1914 C.E.

inddependence, it therefore rejects the threat or use of force, violence, and terrorism against its territorial integrity, or political independence, as it also rejects their use against the territorial integrity of other states.

Therefore, on this day unlike all others, 15 November, 1988, as we stand at the threshold of a new dawn, in all honor and modesty we humbly bow to the sacred spirits of our fallen ones, Palestinian and Arab, by the purity of whose sacrifice for the homeland our sky has been illuminated and our land given life. . . .

Therefore, we call upon our great people to rally to the banner of Palestine, to cherish and defend it, so that it may forever be the symbol of our freedom and dignity in that homeland, which is a homeland for the free, now and always.

In the name of God, the Compassionate, the Merciful.

---

**Saddam’s Invasion of Kuwait: Two Rationales**

Saddam Hussein’s military expedition to Kuwait speedily resulted in the subjugation of that oil-rich Emirate, and precipitated a lengthy crisis which was only (and then perhaps only temporarily) ended with Iraq’s defeat by Allied forces in the 1991 Desert Storm War. As in other crises that have historically escalated into warfare, the question of “why?” is complex and multi-faceted. Saddam, in a “Victory Day” speech to his people (A), and the scholar Bishara Bahbah (B) offer their explanations.

**Questions:**
1. Of what shortcomings does Saddam accuse the Kuwaiti leadership? To what historically anti-Arab elements does he attempt to link them? What part do jihad and pan-Arabism play in his arguments?
2. According to Bahbah, what part did the oilfields and oil production controversies play in Iraqi-Kuwaiti relations?
3. How does Bahbah assess Saddam’s personality and the role it played in the unfolding of Gulf Crisis events? What miscalculations does he set forward as being crucial?
4. Compare and contrast the two documents; what is your assessment as to points of agreement, or divergence?

---

**A**

Message from President Saddam Husayn “on the occasion of the great victory day on 8 August 1988”—read by announcer. Baghdad Domestic Service in Arabic 1700 GMT, 7 August 1990.

In the name of God, the merciful, the compassionate.

O great Iraqi people, O sons of the glorious Arab nation, on 8 August 1988 matters were settled after eight years of dueling. That day was the day of days, and the communiqué that was
issued on that day was the communiqué of communiqués. That day was truly the day of
days because every day, beginning with the first
day in the book of the second al-Qadisiyya that
began on 4 September 1980 and ending with
the last day of that eternal and great book of
our people’s life that preceded the day of days
on 7 August 1988 has a share in the day of 8
August 1988. The communiqué broadcast on 8
August was the communiqué of communiqués
because every communiqué issued from 4
September 1980 to 7 August 1988 is a vital part
of the fruits of the record from which the
banner of victory was raised on 8 August
1988. From this we can see the peoples’ record,
and history cannot exist without the
accumulation of repeated sacrifices, wisdom,
bravery, patient work, and true struggle to
God’s satisfaction. By this we can see that the
day of days began from the first day of the
record and that the communiqué of
communiqués was written in the first
communiqué of the second al Qadisiyya.

The day of days gives lessons to those who heed
them, lessons whose meanings and dimensions
go beyond the national borders to affect the
entire nation and humanity at large. There are
people who do not benefit from other people’s
lessons and there are those who do benefit. All
this is determined by the fact that some leaders
draw lessons in accordance with the patriotic
and national aspects of human wisdom and
some others learn the lessons they wish—but
not the truth as it is.

We do not like lessons outside the course of
life, except those affiliated with God. We do not
give reason the full right to interpret things
independently from the eye or give the eye the
full right apart from reason. The two should
cooperate in concrete and abstract matters.
The blood of our martyrs has turned into a
permanent torch along our people’s path
toward progress and a better life. The edifice of
progress is rising with the passing of every day
since 8 August 1988, and its foundation is
becoming stronger on the basis of

righteousness and justice. Mistakes in its course
are being dealt with on the basis of the
insistence of the people, who have defended
rights and justice and offered sacrifices for
them. Thus, the people deserve a life that is not
disturbed by evil intentions, and the torch lit by
the martyrs’ blood that represents virtue and
national and pan-Arab dignity should not be
extinguished by the attempts of non-patriots,
non-nationalists, and non-humanitarians.

Therefore, the day of days and the communiqué
of communiqués became not the end of a stage
in the life of the Iraqis and the nation, but the
serious beginning of a life of honor and triumph
in all walks of life—in theory and practice—as
well as in the arena of the battlefield whenever
the heat rises.

Therefore, we have the right and it is our duty
to say that the day of the call, the second of this
month, August, in this year, is the legitimate
newborn child of 8 August 1988. in fact, this is
the only way to deal with these despicable
Croesus.* who relished stealing the part to
harm the whole, who relished possession to
destroy devotion, and who were guided by the
foreigner instead of being guided by virtuous
standards, principles of pan-Arabism, and the
creed of humanitarianism in relations between
the sons of the same people and nation. The
second of August was a day bursting with these
meanings. In the same way it is the legitimate
newborn child of the struggle, patience, and
perseverance of the Kuwaiti people, which was
crowned by revolutionary action on that
immortal day.

The newborn child was born of a legitimate
father and an immaculate mother. It will be a
loyal son to the Kuwaitis, Iraqis, and all the
Arabs. Greetings to the makers of the second of
August, whose efforts God has blessed. They
have achieved one of the brightest, most
promising, and most principled national and
pan-Arab acts.
1750 C.E. to 1914 C.E.

At a time when the second of August arrived to be the legitimate newborn son of the second Qadisiyya and its people—and with God’s help, it will also be a loyal son—it and its consequences shall be the beginning of a new, lofty, and rising stage in which virtue will spread throughout the Arab homeland in the coming days and profanity, treachery, betrayal, meanness, and subservience to the foreigner will retreat from it. Many of the goals of the Arabs will move closer after some believed they were moving away from their places in the horizon. New suns and moons will shine, stars will glitter, light will expel darkness, and lunar and solar eclipses will withdraw from the skies of Iraq and the Arab world.

How can that be?

When the sun of the Arabs set in its faraway horizon, after Baghdad’s eye was put out and its mind was ruined by the actions and rule of the foreigner, a pitch-black darkness prevailed throughout the Arab world, with the exception of local cases that used to emerge here and there and every now and then under certain symptoms and whose indications were not wholly pan-Arab. The Arabs had no sun, moon or stars to guide them to any road with a glimmer of hope.

When they saw before them the opportunity to be liberated from the darkness of the Ottoman era, and the virtuous and patriotic Arabs determined to change the image of the state of the Arabs, they fell into the claws of the forces of the age as soon as they took their first step. At a time when some foreign rulers were overthrown by Arab rulers to start with, and liberation revolutions and movements took place after the first Arab revolution to replace what was left with local, national, or pan-Arab alternatives, the partition and dispersion of the factors of power and capability throughout various regions retained a weak Arab homeland—weak individuals, actions, and aspirations. In this condition, every time the Arab took a step forward, he took two steps back, or a bit more or a bit less than that step, and was moved further away from the position he was supposed to be in.

The malicious Westerners, while partitioning the Arab homeland, intentionally multiplied the number of countries with the result that the Arab nation could not achieve the integration needed to realize its full capability. In this way, they also fragmented capabilities. While fragmenting the Arab homeland, they intentionally distanced the majority of the population density and areas of cultural depth from riches and their sources, something new to the life of Arabs. This became one of the most dangerous results of partition and a fatal wedge in Arab relations.

The wealth centered in one place, in the hands of a minority lacking in cultural depth or, more accurately, having no record of cultural depth. On the other hand, cultural depth and population density centered in a place remote from the sources of the new wealth, as I said. This malicious act resulted in the minority becoming so corrupt that it was cut off from its nation. It stopped mentioning this nation, except in lip service and on some ceremonial occasions. The wealth in the hands of this minority did not come as a result of legitimate hard work. The overwhelming majority of the nation, which was living away from the sources of wealth and enduring a major part of its negative impact on its life in the social, psychological, cultural, military, and political spheres, suffered a weakness that, if not overcome, could not allow this majority to play a vital and effective role in the life of the nation.

The authority of the honorable national and pan-Arab majority and its leading influence on the Arab life was absent and was replaced by the authority of the corrupt minority, which is connected with the foreigner. As a result, the nation was hit right between the eyes, and the damage it suffered was no less in its consequences than direct foreign rule. Indeed, at some stages of the nation’s life direct foreign
rule awakened—through reaction—the national and pan-Arab awareness and crystallized the factors of spiritual upsurge in which the nation invoked its genuine values from the depths of its culture. But the nation’s situation before 2 August this year was fatal to its soul and body. One could not but feel its descent into the abyss. This situation would rob rulers and people of their courage, whether among the corrupt wealthy minority or among the overwhelming majority of the poor Arabs. It would also block the capable collective efforts in the two places, make the people in both places dependent on foreigners in one way or another, and seriously upset the social life in both places. Moreover, efforts toward true interaction with the laws of the age would become absent or weak, and, consequently, the process of formulating these laws in a national and pan-Arab manner would be hindered in both places. Furthermore, the nation—in its cultural sense, collective capability, and joint action—would become lacking in both areas. The nation will return to its rightful position only through real struggle and jihad to place the wealth of the nation in the service of its noble objectives so that the opinion of the majority would become prevalent, capable, and honest, and the opinion of the minority will be respected when it is honest. Its conduct, then, will be remote from decay and corruption.

Two August has come as a very violent response to the harm that the foreigner has wanted to perpetrate against Iraq and the nation. The Croesus of Kuwait and his aides became the obedient, humiliated, and treacherous dependents of that foreigner. Instead of honoring its commitments toward the stem, the dead branch began stabbing the stem with a poisonous dagger in the back so that it might fall dead beside the dead branch and so that the living stem would not try to awaken the dead branch (sentence as heard). What took place on 2 August was inevitable so that death might not prevail over life, so that those who were capable of ascending to the peak would not be brought down to the abysmal precipice, so that corruption and remoteness from God would not spread to the majority as a result of need and poverty after the corrupt minority had distanced itself from God, values, books, and disciples. Honor will be kept in Mesopotamia so that Iraq will continue to be the pride of the Arabs, their protector, and their model of noble values, and so that Kuwait will join the march of its nation.

The lowly waltled and planned to harm the free women of Iraq, as they had done to free Arab women in other places. But their calculations went wrong because they did not know that we prefer death to this and that we cannot sleep without putting out the eyes of those who encroach upon Iraqi and Arab and Islamic values. Death is better than humiliation and subordination to the foreigner.

This was the 8th of August 1988, the day of days, in which the communiqué of communiqués was issued, declaring the great victory. It will be the fountainhead of all the sweet days in the life of the Arabs, and their compassionate mother, as was the day of 2 August this year. Glory to the martyrs; glory to the free, living people; God is great; and accursed be the lowly.

(Signed) Saddam Husayn, 16 Muharram, 1411 Hegira, corresponding to 7 August 1990.

B

Saddam Hussein’s decision to invade Kuwait on August 2, 1990 took friend and foe by surprise. One can explain Iraq’s decision to invade Kuwait by outlining and reviewing the list of grievances Iraq had against Kuwait. These included: historical and territorial claims that Iraq had over Kuwait; Kuwait’s refusal to lease two strategic islands to Iraq; Iraq’s anger over Kuwait’s pumping of huge quantities of oil from the Rumaila field which lies underneath both countries; Kuwait’s refusal to forgive Iraq’s debt incurred during the Iran-Iraq war; and Iraq’s
1750 C.E. to 1914 C.E.

accusations that Kuwait had waged economic warfare against it.

Nevertheless, it can be argued that Saddam Hussein’s personality played a key role in his decision to embark on such a disastrous venture. Moreover, Saddam Hussein seriously and persistently miscalculated and failed to predict other countries’ reaction to his invasion of Kuwait. And, when the invasion did occur, he failed to realize that file coalition of forces amassed against him would soundly defeat his forces in a very short period of time.

**Historical and Territorial Claims**

The borders of present day Iraq and Kuwait are the product of the colonial powers. Under the terms of the San Remo conference in 1920, most of the territories of the Arab Middle East, formerly part of file Ottoman Empire, were divided between Britain and France, which received mandates from the League of Nations to establish and supervise national governments in these territories. In 1921, Britain established the kingdom of Iraq made up of the three former provinces of Mosul, Baghdad, and Basra (which had included the Ottoman district of Kuwait).

In 1922, the British High Commissioner for Iraq, Sir Percy Cox, delineated the modern borders of Iraq, Kuwait and Saudi Arabia. He gave Kuwait a coastline of 310 miles, leaving Iraq a mere 36 miles. Although this angered the Iraqis, they did little to alter that reality because Iraq was under varying degrees of British influence.

However, two developments led to a drastic change in Iraq’s relative silence. In 1958, the pro-Western monarch in Iraq was overthrown in a military coup led by Major General Abdul-Karim Qasim. And, in 1961, Britain and Kuwait terminated the 1899 agreement which had allowed the Sabah family to run internal affairs in Kuwait but made Britain responsible for Kuwait’s defense and external relations.

When, in June 1961, Kuwait declared its independence, General Qasim laid claim to Kuwait and threatened to annex it by force. British forces rushed to Kuwait deterred an Iraqi invasion. On February 8, 1963, Qasim was overthrown and the Ba’ath party, Iraq’s current ruling party, subsequently recognized Kuwait’s independence on October 4, 1963 in exchange for a large payment from Kuwait.

Notwithstanding this agreement, Iraqi regimes continued to raise questions over border issues. In 1973, a contingent of Iraqi troops briefly occupied a Kuwaiti border post. In a somewhat unusual but interesting twist, and on the eve of Iraq’s invasion of Kuwait, Iraq accused Kuwait of violating its territorial integrity.

In a letter sent to the Secretary General of the League of Arab States dated July 16, 1990, Iraqi Foreign Minister Tariq Aziz complained that the Kuwaiti government had “...implemented a plot to escalate the pace of the gradual, systematic advance toward Iraqi territory. The Kuwaiti government set up military establishments, police posts, oil installations, and farms on Iraqi territory.”

**Access to the Gulf: Kuwait’s Refusal to Lease Two Islands to Iraq**

In its quest for a deep sea port in the Gulf, Iraq requested from Kuwait, in the early 1970s, control over the two islands of Warbah and Bubiyan. These islands overlook the approaches to Umm Qasr, one of Iraq’s two ports on the Gulf. In 1975, Kuwait rejected an Iraqi proposal to cede Warbah island and lease half of Bubiyan island to Iraq for 99 years. Shortly after the outbreak of the Iran-Iraq war in 1980, Kuwait refused a similar Iraqi request. And, in 1989, after the end of the Iran-Iraq war, Kuwait refused another request to lease the two islands.

Given that one of the main reasons for the Iran-Iraq war was the issue of who controls the Shatt al-Arab waterway which separates Iran and Iraq.
and which provides Iraq with its only access to the Gulf, Iraq viewed Kuwait’s refusal to accommodate its needs with regard to a deep sea port as unfriendly. Thus, the issue of the two islands has been a major irritant in Iraqi-Kuwaiti ties.

**The Dispute over the Rumaila Oilfield**

Despite Iraq’s recognition of Kuwait’s independence in October 1963, the two governments did not settle their dispute over ownership of the huge 50-mile-long Rumaila oilfield, which lies beneath the Iraq-Kuwait border. About 90% of the banana shaped field, which is estimated to contain 30 billion barrels of oil, is in Iraq. Nevertheless, Iraq claimed that during the 1980s Kuwait pumped over $10 billion worth of oil from the field that should have gone to Iraq, without any agreement between the two countries.

The significance of this Iraqi gripe against Kuwait becomes even more serious when considering the huge debt that Iraq found itself saddled with as a result of the Iran-Iraq war. More importantly, a significant portion of Iraq’s debt was owed to Kuwait.

**Kuwait’s Refusal to Forgive Iraq’s Debt**

Saddam Hussein viewed Iraq’s war with Iran as having been fought on behalf of all Arabs, helping to protect them from Khomeini’s Islamic revolution. He, therefore, expected Arab countries, particularly those in the Gulf region, to be grateful for his role in checking the spread of Khomeini’s Islamic revolution.

Iraq’s war with Iran, by most estimates, cost Iraq about $500 billion. Iraq emerged from the conflict with debts exceeding $80 billion—about one and a half times its gross national product—including at least $30 billion in short-term debt that had to be repaid to Europe, Japan, and the United States in dollars or other hard currencies. About half of Iraq’s debt was owed to Saudi Arabia, Kuwait, and the United Arab Emirates. In February and July 1990, Iraq demanded money from the Arab states in the Gulf, and both times, it was turned down.

**Economic Warfare**

Kuwait not only refused to forgive the debt, it deliberately, according to Iraq, flooded the oil market in violation of OPEC production quotas agreed to by the major oil producers. This Kuwaiti overproduction depressed the price of oil and, in turn, hurt Iraq, which was already short on funds.

During the Baghdad Arab summit which was held at the end of May 1990, Iraqi President Saddam Hussein claimed that every one dollar drop in the price of a barrel of oil meant a loss of $1 billion a year for Iraq. He then added, in no uncertain terms, that in Iraq’s present economic state of affairs, this overproduction amounted to “an act of war.”

Iraq badly needed funds to rebuild its shattered economy, devastated by years of war with Iran. One of the ways that Saddam Hussein had maintained internal support for his policies was by spending generously on goods and services even through the bleakest moments of the war. Now that the war with Iran had ended, the Iraqi population’s expectations for a better standard of living were on the rise. The rulers of Iraq were aware of that and strived to cope with these rising expectations. This created tremendous pressures to try and get Iraq’s debt forgiven and to increase the income generated from the sale of oil.

In a memorandum dated July 15, 1990, addressed to the Secretary General of the United Nations, Iraqi Foreign Minister Tariq Aziz explicitly named Kuwait and the United Arab Emirates as the two “culprits” in overproduction.
Hussein’s Personality and Miscalculations

Saddam Hussein’s personality, compounded by the fact that he exercised absolute control in Iraq, played a key role in the unfolding of events in the Gulf. He views himself as one of the great leaders of history, ranking himself with Nasser, Castro, Tito, Ho Chi Minh, and Mao Zedong. He has been consumed by dreams of glory, and he identifies himself with Nebuchadnezzar, the King of Babylonia who conquered Jerusalem in 586 B.C., and Salah ad-Din who regained Jerusalem in 1187 by defeating the Crusaders. He believed (it is not clear if he persists in those beliefs) that there could be only one supreme Arab nationalist leader, and he was the one. He was driven by what he perceived as his mission to lead the Arab world.

Nevertheless, based on his actions and statements, Saddam Hussein is a pragmatic man. When he deemed certain “unthinkable” actions to have been in his favor or better than the existing alternatives, he carried out the “unthinkable.”

In March 1975, he signed an agreement with the Shah of Iran, stipulating joint sovereignty with Iran over the disputed Shatt al-Arab waterway in return for Iran ceasing to supply aid to the Kurdish rebellion. Then, in June 1982, Hussein reversed his earlier militant attitude toward Iran and Khomeini and attempted to terminate hostilities by offering a unilateral ceasefire. And, on August 15, 1990, Hussein agreed to meet Iranian conditions for a permanent ceasefire by promising to withdraw from Iranian territory, agreeing to an exchange of prisoners, and, most importantly, agreeing to share the disputed Shatt al-Arab waterway—one of the main reasons for initiating the Iran-Iraq war in 1980—all because he desperately needed the 500,000 Iraqi troops who were tied up along the Iran-Iraq border.

Given his pragmatism, why then did Saddam Hussein occupy Kuwait and refuse to withdraw when it was obvious that a majority of the world community led by the United States supported UN Security Council resolutions that condemned Iraq’s invasion of Kuwait, and subsequently authorized the use of force to evict Iraqi troops and liberate Kuwait? Saddam Hussein’s actions were based on serious miscalculations and misperceptions.

First, given Saudi Arabia’s long-standing sensitivity to the presence of foreign troops on its soil, Saddam Hussein assumed that the Saudis would not ask, or be convinced, to accept U.S. and other foreign, particularly non-Muslim, troops to help defend their country and liberate Kuwait. He was wrong.

Second, Saddam Hussein overestimated the level of support he would have in the Arab world. He assumed that the have-nots in the Arab world would be happy with the demise of oil-rich Kuwait. He was surprised by the opposition to his occupation of Kuwait by even those who were closest to him, such as Jordan and the Palestine Liberation Organization.

Third, Saddam Hussein believed that the United States would not interfere militarily if he were to occupy Kuwait. When the United States decided to send troops to defend Saudi Arabia and liberate Kuwait, he thought that the U.S. was bluffing and would not wage a war against Iraq because of the former’s Vietnam complex—the fear of being entangled in a long drawn-out war in a distant land. He felt that, even if the United States did attack Iraqi troops, the low tolerance of the American public to U.S. casualties would force the United States to end the war and negotiate an acceptable agreement with Iraq.

Fourth, Saddam Hussein was determined to attack Israel if a war erupted. He believed that Israel would then retaliate, leading to the collapse of the Arab, and hence, the international alliance against Iraq. When attacked, Israel opted not to retaliate and reaped enormous benefits for its restraint.
Fifth, Iraq’s victory over Iran, albeit at an outrageous cost, and the end of the Iran-Iraq war, unleashed an unrealistic level of confidence in the Iraqi military’s capabilities. Iraq emerged as the fourth largest army in the world—an army that was well-equipped, and battle-hardened. Where Saddam Hussein miscalculated was by assuming that this army would or could put up a fight against the U.S. and other Western armies. More importantly, the Iraqi leader miscalculated when he assumed that his troops were committed to fighting for the sake of retaining Kuwait.

Conclusion

Iraq’s invasion of Kuwait will go down in history as one of those tragic events that precipitated as a result of one man’s miscalculations. Whether Iraq had justifiable grievances against Kuwait no longer is the issue. These grievances were quickly overshadowed by the tremendous destruction caused by Kuwait’s invasion, and during the battle for its subsequent liberation.

Many have argued that Saddam Hussein could have settled his grievances with Kuwait without having to physically occupy the country. Nonetheless what Saddam Hussein could or could not have done is in the realm of speculation. What is unshakably clear is that Iraq’s invasion of Kuwait led to a chain of events which threaten not only Saddam Hussein’s career, but also Iraq’s ambition to be the dominant power in the Gulf and the Arab world.

---

Alain Destexhe: Rwanda and Genocide in the Twentieth Century

In the spring of 1994, the Western media reported “tribal warfare” of unusual ferocity in Rwanda, a small central African country with Zaire on its west, Uganda on its north, and Kenya on its east. Together with its southern neighbor, Burundi, Rwanda had been a German colony from 1885 to World War I and a Belgian mandate from 1925 to 1962. In 1994, the majority Hutus seemed intent on killing as many of the minority Tutsis, who had formerly enjoyed something of an elite status, as they could. In the summer months of the same year, the Rwandan Patriotic Front (RPF), a group composed largely of Tutsis in exile in Uganda, with some Hutus hostile to the regime, led an invasion that succeeded in toppling almost the entire Hutu government. The leadership of the fallen regime encouraged Hutus to flee the country, and hundreds of thousands did so, huge numbers ending up in a sprawling refugee camp in Goma, just across the Zairian border.

Alain Destexhe is an experienced observer of African affairs and the former secretary general of Médecins sans Frontières (Doctors Without Borders), a worldwide relief and health organization very active in Africa. In his work, excerpted here, he traces how the Tutsis, who raised cattle and acquired wealth and status separating them from the Hutus, who were mostly crop farmers and laborers, became the objects of murderous resentment.

Questions:
1. How would you define “genocide”? Do you think that Destexhe is correct in indicting the Hutu leadership for this crime?
2. In the refugee camp at Goma at least tens of thousands and possibly several hundred thousand Hutus died, largely from cholera, which swept the area in epidemic fashion. Several media sources applied the term “genocide” to the tragedy at Goma, but Destexhe finds it inappropriate. What do you think?
1750 C.E. to 1914 C.E.

3. Destexhe finds only three bona fide cases of genocide in the twentieth century. Apart from the Nazis killing Jews and Hutus killing Tutsis, discussed here, what do you suppose his third example is? Would you add a third one? Do you think there is a valid conceptual border between genocide and generic mass murder? Why or why not?

HUTU RACIST IDEOLOGY

It took exactly fifty years . . . it or something very like it has indeed happened again. Just as Hitler’s grand plan was founded on an ingrained European anti-Semitism which he played on by singling out the Jews as the source of all Germany’s ills, the Hutu radicals are inheritors of the colonial lunacy of classifying and grading different ethnic groups in a racial hierarchy. While the Jews were described by Nazis as “vermin,” the Tutsis were called invenzi (“the cockroaches that have to be crushed”). Anti-Tutsi propaganda presented them as a “minority, well-off and foreign”—so similar to the image developed to stigmatize the Jews—and thus an ideal scapegoat for all Rwanda’s problems.

In a country which receives virtually no information from the outside world, local media, particularly the radio, play an essential role. For a large part of the population, a transistor radio is the only source for information and therefore has the potential for exerting a powerful influence. Rwandan radio broadcasts are in two languages, French and the national language, Kinyarwanda, which is spoken by all Rwandans. Less than a year before the genocide began, two close associates of President Habyarimana set up the “private” radio station, known as Radio Mille Collines (Thousand Hills). Assured of a large audience thanks to regular programs of popular music, the programs in Kinyarwanda broadcast unceasing messages of hate, such as “The grave is only half full. Who will help us fill it?” Christened “the radio that kills” by its opponents, it was the basic instrument of propaganda for the Hutu extremists, and the militias rallied in support of its slogans.

On 6 April 1994 the plane carrying President Habyarimana and President Cyprien Ntariyamira of Burundi was shot down by rocket fire. Although it is not yet known who was behind this assassination, it is clear that it acted as the fuse for the eruption of violence which led to the greatest tragedy in the history of the country.

As the stereotypes of physical characteristics do not always provide sufficient identification—and can even be totally misleading—it was the identity cards demanded at the roadblocks set up by the militias that acted as the signature of a death warrant for the Tutsis. As control of the road could not alone ensure that no Tutsi escaped, the militia leaders divided up the territory under their control so that one man was allocated for every ten households in order to systematically search for Tutsis in their immediate localities. In this way every Tutsi family could be denounced by somebody who knew the members personally: pupils were killed by their teachers, shop owners by their customers, neighbor killed neighbor and husbands killed wives in order to save them from a more terrible death. Churches where Tutsis sought sanctuary were particular targets and the scene of some of the worst massacres: 2,800 people in Kibungo, 6,000 in Cyahinda, 4,000 in Kibeho, to give just a few examples. In Rwanda, the children of mixed marriages take the ethnic group of the father and, although many of the Hutu killers—including some militia
leaders—had Tutsi mothers, so effective was the indoctrination program, that even this apparently counted for nothing. Radio Mille Collines encouraged the violence with statements such as that made at the end of April 1994, “By 5 May, the country must be completely cleansed of Tutsis.” Even the children were targeted: “We will not repeat the mistake of 1959. The children must be killed too.” The media directly influenced Hutu peasants, convincing them that they were under threat and encouraging them to “make the Tutsis smaller” by decapitating them. In the northern areas occupied by the RPF, the peasants were astonished that the Tutsi soldiers did not have horns, tails and eyes that shone in the dark as they had been described in radio programs.

The genocide spread rapidly to cover the whole country under the control of the government army. By the end of April, it was estimated that 100,000 people had been killed. There are aspects of this genocide which are new and contemporary; others we have seen before. The use of propaganda, the way control was exercised over the administration: these are all reflections of the modern era. So too are the extreme racist ideology and the radical determination to exterminate all Tutsis in one all-encompassing blow. It would be a mistake to think that the killings were carried out in an archaic manner: the reality is that they were meticulously well organized. However, the means used to accomplish them were primitive in the extreme: for example, the use of machetes and unfunis (wooden clubs studded with metal spikes). Unfortunately, the media eclipsed the first aspect of its preoccupation with the second.

Nobody really knows the exact origin of the Hutu, Tutsi and Twa peoples (the Twa represent only one percent of the population and have never played a significant role in the region). The three groups speak the same language, share the same territory and follow the same traditions. By all definitions, this should qualify Rwanda as a nation in the true sense.

The first Europeans to reach Rwandan territory described the people and their way of life in terms very much influenced by the scientific ideas of their time. Until the beginning of the nineteenth century, the origin of Africa’s many peoples was regarded by Europeans as rooted in the biblical story of Ham, Noah’s son. The book of Genesis tells how Ham and his descendants were cursed throughout all generations after he had seen his father naked. The “Blacks” were believed to be descendants of Ham, their color a result of that curse. At the beginning of the nineteenth century, linguistic studies, archaeological research and rational thinking led to a questioning of this theory, which was subsequently replaced with a system of classifying people according to their physical characteristics: skin color, type of hair, shape of the skull, etc. Those who were then classified as “blacks” were regarded as “another” kind of human being, not descended from Noah. Yet this classification did not cover the whole population of the African continent. Explorers in the region we now know as Niger and the areas of the Zambezi and the Upper Nile, came across people that did not correspond to the caricature of the negro.

So it was that German, and later Belgian, colonizers developed a system of categories for different “tribes” that was largely a function of aesthetic impressions. Individuals were categorized as Hutu or Tutsi according to their degree of beauty, their pride, intelligence and political organization. The colonizers established a distinction between those who did not correspond to the stereotype of a negro (the Tutsi) and those who did (the Hutu). The first group, “superior Africans,” were designated Hamites or “white coloreds” who represented a “missing link” between the “whites” and the “blacks.” Also included in this group were the Galla peoples of Ethiopia and Somalia. “Any quality attributed to an African group must be read as a sign of interbreeding
with ‘non-negro’ cultures’.1 This “hamitic” ideology translates into the hypothesis, for which there is no serious proof, that a migration of the Galla took place in the seventeenth century, thus explaining the similarities between the Galla and the Tutsi.

The Belgians also favored the Tutsi students and the main priority of Rwanda’s schools was their education. As this was, inevitably, also the policy at the tertiary level, the educated elite at the country’s university, Astrida, the future administrative and technical backbone of the country, were very largely Tutsi. The colonizers blamed the imbalance in the schools and resulting low social standing of the Hutu on Hutu passivity, making no acknowledgement of their own role in the situation. The legacy of this theory continues even today. The missionaries also supported the Tutsi power structure, using it to evangelize from the top down. The Tutsi chiefs, once they had become Christian, then felt a moral obligation to convert the Hutu masses. The seminaries were more open to the Hutu than the schools. Although, after 1959, the educated Tutsi sometimes backed the theory of the mono-ethnic origins of the population following the removal from power of the Tutsi aristocracy . . . the myth of Egyptian origins and Hamitic superiority was supported by many among the Tutsi people. Some Hutu discovered the extent to which they, the “native” people of the region, had been “despoiled” and developed their own theory of the “Ethiopian invaders,” categorizing the Tutsi as colonizers, the same as the Belgians. Rwandan Tutsis were from now on treated as immigrants and the 1959 “revolutionaries” called for “the return to Ethiopia of the Tutsi colonizers.” The Hutu had begun to believe that they alone were the native people of Rwanda.

Belgium, criticized at the UN for a colonial policy that ensured that only a handful of the local population in their colonies received sufficient training for them to eventually be promoted to the higher levels of their national administrations—a policy aimed at ensuring that they would not think they were capable of running their own country—gradually ceded power to the small Hutu elite. The democratic principle of majority rule was cited as justification for the removal of the Tutsi from their previous positions of influence; a complete reversal of previous political policy. The Hutu became the “good guys” who “have been dominated for so long by the Tutsi” and the Belgians now expressed “sympathy for the cause of the suppressed masses.”

In 1959, a series of riots directed against the authority of the Tutsi chiefs were allowed by the Belgians to escalate into a revolution accompanied by massacres which killed more than 20,000 Tutsi. What happened in Rwanda illustrates a situation where the coexistence of different social groups or castes metamorphosed into an ethnic problem with an overwhelmingly racist dimension. The caricature of physical stereotypes, although they did not always hold true and were probably due to the principle of endogamy practiced by each group despite the number of mixed marriages, was manipulated to provide proof of the racial superiority of one group over the other. Archaic political divisions were progressively transformed into racial ideologies and repeated outbreaks of violence resulting from the colonial heritage which was absorbed by local elites who then brought it into the political arena. The present generation has internalized this ethnological colonial model, with some groups deliberately choosing to play the tribal card. The regimes that have ruled Rwanda and Burundi since independence have shown that they actually need ethnic divisions in order both to reinforce and justify their positions. Finally, however, it was the ethnic classification registered on identity cards introduced by the Belgians that served as the basic instrument for the genocide of the Tutsi people who were “guilty” on three counts: they were a minority, they were a remainder of a feudal system and they were regarded as colonizers in their own country.
Day by day, as the death toll increased in the spring of 1994, the reality that a genocide was underway became clearer. By the end of April, it was estimated that 100,000 people had been killed, by mid-May 200,000, and by the end of May half a million. Although nobody really knew the actual death toll, the signs of massacres were everywhere and the River Nyaborongo carried thousands of corpses towards Lake Victoria along what Hutu propaganda described as “the shortest way back to Ethiopia.”

Taking humanitarian, rather than political, action is one of the best ways for a developed country to avoid facing up to its responsibilities in the wake of a disaster such as Rwanda. Another way is language. Employing a particular vocabulary can cast doubt on the actual causes of the massacre and foster confused images of the guilty and the victims. “Warring parties,” “belligerents” and “civil war” on one hand, and “aggression,” “massacre” and “genocide” on the other, are all strong words—but they are not synonyms in meaning. Under the cover of a supposed objectivity, to suggest that “both parties” have committed atrocities can often be seen as an underhand way of giving them the same status. To speak of tribal disputes when an armed majority perpetrates a genocide against an unarmed minority is patronizing and meaningless. The aggression against the Bosnians and the genocide of the Tutsis both exceed civil war. In the case of Rwanda, to compare the RPF with the Rwandan Armed Forces (FAR) is at best a display of ignorance, at worst propaganda. The FAR have committed a genocide and the RPF have carried out exactions: the two things cannot be compared. If a distinction is not made, then genocide is reduced to the status of common murder—but murder is not the same as genocide. They differ both in nature and in degree, a fact that needs to be constantly emphasized if the crimes committed in Rwanda are not to be pushed to the back of international consciousness.

The racist philosophy of the previous Hutu government and the dangers of trivializing, and even forgetting, the events of last summer are summed up perfectly in a remarkable interview with François Karera, the former mayor of Kigali, now living comfortably with his family in Zaire, just a few miles from the misery of the refugee camps (one of which he is responsible for). According to Karera, “The Tutsis are originally bad. They are murderers. The Tutsis have given the white people their daughters. Physically they are weak—look at their arms and legs. No Tutsi can build: they are too weak . . . they just command . . . The others work. If the reasons are just, the massacres are justified. In war you don’t consider the consequences, you consider the causes.”

The perpetrators of genocide should permanently lose any legitimacy as rulers of their people. They should be outlawed by the international community and brought to trial for their crimes. In the case of Rwanda, no attempt should be made to negotiate with those responsible for the genocide of the Tutsis: they are not only directly responsible for this worst possible crime against humanity, but also for the exodus from Rwanda and the catastrophic events in Goma which followed. When the new Allied forces won victory in 1945, there was never any question of providing a role for the Nazi party in the new Germany, nor of considering just how small a fraction of the population it really represented. The Nazis were banned outright and the authors of genocide then, as should happen in Rwanda today, lost any right to participate in public life.

1. This hypothesis originated with the British explorer J.H. Speke; references to it continued as late as 1945. Jean-Pierre Chretien, Burundi: l’histoire retrouvée (Paris: Karthala, 1993).
